FIELD NOTES.

M. H. Manley & Co., of Lyons, Neb., will sell at private sale all their boars and sows that they cataloged for their fall sale. Several of these sows will be bred to Junior Jim, the second-prize aged boar at Des Moines.

A highly-improved farm of 480 acres of land, considered the best in southwestern Oklahoma, is offered for sale by Messrs. L. A. Briggs & Co., of Kansas City, Mo., in their advertisement which appears on page 22 of this issue. For prices and terms write them.

Thirty very choice Poland China boars are offered for sale by Mr. Jno. Schneider, of Remsen, Iowa. These are sired by Winning Perfection and Keep On 3d, and are as good as those he was so successful in winning with at the interstate fair. Drop him a line and get his price on one of these.

On page 42 will be found the Berkshire advertisement of that old, reliable breeder, Mr. C. S. Buckley, of Holstein, Iowa, who offers twenty-five or thirty good spring boars for sale. He will also sell some choice gilts or will book orders for bred gilts. If you want Berkshires write Mr. Buckley. He can fill your order.

We make announcement in our date claim columns this week of the public sale of Aberdeen Angus cattle, the property of Messrs. Rosenfeld & Siverly, of Kelly, Iowa, to take place on February 15th. At that time these gentlemen will dispose of some forty head of high-class cattle. Watch The Homestead for future announcements.

Mr. A. W. H. Orr, of Lorimer, Iowa, whose public sale of Duroc Jersey hogs took place recently, writes: "I had a very good sale. The average was \$21.25, the top sow in the sale going at \$37.50 and the highest price spring boar at \$20.50. Rain in the afternoon made it disagreeable for selling the cattle, but the prices obtained were very satisfactory."

Mr. Hector Cowan, of Paulina, Iowa, sells a draft of forty head of Scotch and Scotch-topped Short-horns at his farm on October 23d. He will include his two imported cows, Patience and Miss Law, and they are good enough to attract the best breeders in this country. There will be a grand good lot of Scotch heifers in the sale and about ten Scotch bulls. Watch next week's issue for further particulars.

On October 17th, at Red Oak, Iowa, Mr. T. H. Isaac, one of the well-known breeders in that section of the state, will make a public sale of Duroc Jerseys. There will be fifty boars in his offering, four brood sows and one choice gilt. They will be sired by Educator 41979, a son of Indicator; Robert H. 31461, a son of Pilot J., and Belle's Red Chief 39543, a son of Red Chief I Am and one of the great sweepstakes sows, Nebraska Belle. One of his best litters of boars that go into the sale will be out of his old show sow, Curly, and the pigs will be sired by Educator. There will be some cracking good boars by the others hogs as well. They are growthy, stretchy and well developed, having plenty of length and bone and are one of the best bunches of boars we have seen this season. He also puts a splendid sow in this sale, a granddaughter of the sweepstakes sow, Red Lady, and she has been a

WANTED:

An agent, lady or gentleman, in every town and township, to find buyers for farm lands. 500,000 acres in western Texas, \$5 to \$10 per acre. For particulars address, enclosing stamp, Floyd Land & Immigration Co., 729 N. W. Life Building, Kansas City, Missouri. References: National Bank of Commerce, Kansas City, Missouri; Commercial National Bank, Kansas City, Kansas.

PATENTS
ORWIG & LANE,
DES MOINES, IA.

Send sketch or model of invention for free opinion as to patentability. Reference, The Iowa Homestead

winner of second prize a couple of times for Mr. Isaacs. No one will go wrong in attending his sale, especially if he wants a good boar or two. It is a good offering from one end to the other. His catalog is ready. Write for it and mention The Homestead.

Mrs. Will Michael, of Selma, Iowa, is offering Rose and Single Comb Brown Leghorn and Silver Laced and White Wyandotte cockerels, hens and pullets for sale in her advertisement on page 12 of this issue. The prices at which she will sell them per dozen is named. She also has Indian Runner ducks and Buff Cochins Bantams for sale.

Mr. A. L. Mossman, breeder of Duroc Jersey swine, of Radcliffe, Iowa, in ordering the re-insertion of his advertisement to be found on page 23 of this issue, says: "My males are a fine lot, weighing from 150 to 200 pounds. They are sons of Tientsin 17261 and A. L.'s Chief 43327 and are simply immense. Nothing but clear, clean stock as represented, shipped. I solicit correspondence and inspection."

One of the best buyers of good stuff in the Road & Fessenmeyer sale last week was Mr. P. F. Smith, of Charlton, Iowa. He purchased the spring boar, No. 22 of catalog, sired by Rood's Tecumseh and out of that famous old brood sow, Giantess, and he was one of the very best boars in that sale. He cost him \$105 and he was a bargain at that price. He also purchased a good daughter of P. W. Perfection out of a daughter of Molly M. by Chief Price. Mr. Smith got some of the best things in that sale and they should do him lots of good in his herd.

Breeders of Chester Whites will always find a choice individual by writing to Mr. E. W. Richardson, of Ogden, Iowa. A field representative visited with this breeder of Chesters some time ago, and found the prospects exceedingly good. Mr. Richardson can place numerous well-bred Chesters at this time. He is pricing them within reason, so that it affords an opportunity for a new breeder, as well as one engaged in the Chester business for some time. Look up his card on page 32 and when writing to him kindly mention The Homestead.

Choicely bred Durocs are offered to buyers by Mr. E. W. Richardson, of Ogden, Iowa. He has quite a number of growthy pigs ready to go, sired by Bill B 45313. Mr. Richardson is placing them every day and it behooves the admirer of this breed to get in line and write for his prices at once. The smooth, heavy-bodied kind are the only ones raised at this breeding establishment. They all stand up on their toes and are growthy individuals. No mistake made in ordering from Mr. Richardson. See his card on page 32 and mention The Homestead when writing.

Every lover of Berkshire swine will be interested in the Homestead herd of Echerzinger Bros., at Nelson, Neb. Twenty years of careful study and scientific breeding has put this herd in the front rank for high-class breeding animals. The boars used in this herd are Homestead Model 86765, Homestead Premier 94223, Homestead Duke 85261, all premium winners at the Nebraska State Fair. The sows are daughters of the great Lord Premier 50001, Premier Longfellow 68800, Berryton Duke 72946 and other noted sires. A visit to the farm gave an opportunity to see as fine a lot of pigs of this year's crop as will be found anywhere. A guarantee to please goes with every transaction made with the Homestead herd proprietors. Young boars and sows good enough for any herd are now ready to ship.

Mr. F. T. Wells, of Bristow, Iowa, breeder of Poland China swine and Aberdeen Angus cattle, in starting his new advertisement found on page 32 of this issue, writes that he has carefully selected the twenty-five Poland Chinas boars which he is offering for sale out of fifty head. He says: "They are sired by Midwood Perfection and Perfect Keep On 2d and out of matured dams. They are lengthy, deep bodied, good boned, nicely-finished pigs and are all right. I also have a few bulls that will be priced right. These bulls are yearlings past and from matured dams and sires. I can also spare some cows and leifers bred or not bred. Will make a cut price on a bunch of five head or more. Can ship over Chicago Great Western, Chicago & Northwestern and Rock Island railways." Read the advertisement and write Mr. Wells for further particulars.

Mr. Thomas H. Canfield, of Lake Park, Minn., writes: "Our show herd of Large Yorkshire hogs has returned from its summer and fall circuit of fairs. At the North Dakota State Fair, at Fargo, it won nine firsts, five seconds, three thirds and two championships. At the Iowa State Fair, at Des Moines, thirteen firsts, six seconds, four thirds, four fourths, three fifths, four championships and one special. At the Minnesota State Fair, at Hamline, eleven firsts, seven seconds, five thirds, one fourth and two championships. At the South Dakota State Fair, at Huron, ten firsts, seven seconds and three thirds. This is an even 100 premiums, including all championships and herd prizes at each of these fairs and all first premiums competed for except three. It also won at the Minnesota State Fair the most sought for premium of first on best exhibit of swine owned and bred in the state, this being the second successive year that this award has been granted to the Canfield Yorkshires. We made over twice as many sales as usual at the fairs, and the demand is better than ever before. We have already shipped out 125 pigs of this spring's farrow and have around 400 now ready for shipment. While at the fairs we met many of our former customers, all of whom reported good success with their Yorkshires and they were all on the look out for new stock. To all those who contemplate purchasing this fall we would recommend that they write as early as possible, as the chance for a better selection is

enhanced thereby and much is saved in express charges to the purchaser by not waiting until the pigs get heavier."

Mr. Chas. L. Marston, of Mason City, Iowa, changes his sale date from December 12th to December 14th. The sale will take place at Mason City and will consist of about sixty head, including about ten or twelve head of Scotch cattle.

In the advertisement of Mr. J. C. Danner, of Yalo, Iowa, offering thirty head of Duroc Jersey hogs at public sale on October 8th, which appeared in our last week's issue, we stated that the sale would be held at Jefferson, Iowa. This was an error, as the sale will be held at Yalo. Mr. Danner's advertisement in its correct form appears on page 34 of this issue of The Homestead.

Farm and platform scales, wire nails, windmills, lift pumps, heating plants, kitchen, parlor, bedroom and other furniture, fire-proof safes, roofing, fencing, paints, gasoline engines, rope, steel tanks, both tubs, steel tank towers, horse-shoes, portable forges, air-tight heaters, jack screws and numerous other valuable articles are advertised by the Chicago House Wrecking Company at sheriffs' sale and bankrupt prices on our last page today. The Chicago House Wrecking Company are an old, reliable house, who purchase merchandise at sheriffs' sales, buy exposition buildings and furniture and other goods at low prices and give the farmer the benefit. Write for their large free catalog No. 500, mentioning The Homestead. It will save you much money.

Mr. W. B. Seelye, of Mt. Pleasant, Iowa, a breeder of Aberdeen Angus cattle, whose new advertisement will be found on page 41 of this issue, writes as follows in regard to the interest in pure-bred live stock that is being fostered in his city and county: "Mt. Pleasant is destined to be one of the leading sale centers in eastern Iowa, since the southeastern Iowa short course is permanently located here. Several of our young men have within the past year embarked in the breeding of thoroughbred cattle, horses, hogs and sheep. And with the renewed interest that will be taken through the instrumentality of the short course week here, we expect many others to become interested; and with the new pavilion that now adorns the fair grounds, which was built especially for the live stock part of the short course week, this will make an excellent place for holding public sales. A successful horse sale was recently conducted in this pavilion. Our Aberdeen Angus sale on October 24th will be the opening cattle sale. This will likely be followed by a Poland China hog sale on the 25th. Later on will be a Hereford sale and plans are now under way to follow this with a Short-horn cattle sale."

Mr. Reuben E. Sanders, breeder of Poland China hogs, of Montezuma, Iowa, under recent date furnishes the following letters written by two of his customers, which he says are samples of the letters he is constantly receiving: "I received the eight gilts O. K. They are a premium lot of beauties. They have the requisites for large herd sows. I sincerely thank you for sending me just what I have been in search of. I saw Mr. Eugene Churchill's boar pig that you shipped him. He is a hog of great individuality and promises to make a large hog. J. C. Armadale, Canton, Ill." "The last time I wrote you was when I was proprietor of the Walnut Hill herd of Poland Chinas at Blytheedale, Mo. I am now in Washington and want to buy some more hogs of you. I have owned hogs from all the different families, but the best hog I ever owned in my life was the pig I bought of you. I called him Sanders' Wilkes. He was the largest hog I ever saw in my life. He also had the best of finish. Write me what you have and I will give you my order.—Samuel Taylor, Farmington, Wash." Mr. Sanders reports that he has the best lot of pigs to offer this season to his customers that he has ever had. His advertisement appears on page 45.

Mr. F. H. Herring, of Iowa City, Iowa, whose sale advertisement appears on page 45 of this issue, furnishes the following notes in regard to his sale: "In regard to the stock that go into my October 10th offering, there is a litter by Perfection Chief 23367, second at St. Louis and first at Des Moines in 1905, and out of Keepsake II., also a winner at Des Moines in 1905. All of this litter have much scale and finish and are worthy a place in the best herds; three boars and a gilt by Invincible 15143 and out of Nellie's Lady, a full sister to Top Notcher Chief, the St. Louis champion. These four can go in fast company and feel at home. A boar in the litter by Grand Chief 1983, by Ohio Chief, the noted hog, dam Minnie S. and grandam Xenia Queen, has every indication of developing into a great hog. A very nice bunch go in the ring by old Sensation and out of Miss Keep Ahead, an I. J. Chief sow. Boar No. 29 of this litter should command attention. He is a full yearling by Reliance and out of Kant's Lulu, and won seventh place at Des Moines in 1906, and will go in the sale. Others of much promise will go through the sale ring at Iowa City, October 10th." Write Mr. Herring as above for catalog giving full particulars.

Mr. Geo. C. Mosher, proprietor of the Hillcrest Farm Herd of Holstein-Friesian cattle, whose farm is at Greenwood, Mo., reports recent sales as follows: Florence Jewel 2d, to Mr. W. J. Downing, of Spencer, S. D., and to Mr. S. E. Ross, of Creston, Iowa, Myrtle Gerben Duke, sired by World's Fair Duke and tracing to the great Gerben family; Messrs. Peak & Son, of Parsons, Kan., purchased Daisy Lamb Pieterje De Kol 2d, a half sister to the champion heifer World's Fair Hadria. They also took 'De Kol's Brightest Son, a junior yearling bull. Mr. Mosher is now prepared to ship bull calves sired by his premier bull, Prince Inka Pieterje De Kol 2d, ranging in age from one to eleven months. Among recent inspectors of his herd have been a representative of the Japanese Agricultural Department, accompanied by Prof. Oscar Erf, of the Kansas Experiment Station; Prof. Mueller, of the German Royal Agricultural Commission, and Professor White, of the dairy division of the W. S. Department of Agriculture. Mr. Mosher writes: "Hillcrest Farm is now starting a sanitary milk delivery in Kansas City through Messrs. Guernsey & Murray. Later on modification by the Walker-Gordon process will be added through a properly-equipped laboratory, endorsed by the local medical society. Visitors to the farm are always welcome. It is only necessary to see the class of young stock we have to show to

sell them, but we invite visitors to come and see us whether they want to buy or not. We simply wish them to see the model dairy and sanitary barns with their sixty-five head of black and white, selected from the best herds of the world." See advertisement on page 19.

Mr. Geo. A. Ilans, breeder of Short-horn cattle, New London, Iowa, writes: "Say to the readers of The Homestead for me that Nonpareil 5th, No. 1 in my catalog, and Maud W. 4th, No. 2 in the catalog, to be sold at my sale on Monday, October 8th, will both have fine red bull calves at side. They have both had calves since your representative called on me. My cattle are doing fine." See advertisement on page 35.

Mr. B. A. Shafer, of Sanborn, Iowa, in furnishing copy for his Duroc Jersey swine advertisement that appears on page 23 of this issue, writes: "My stock is good and growthy; the fall boars weigh about 375 pounds and the spring pigs about 175 pounds. They are sired by Waneta Beat 'Em by Beat 'Em All, Waneta King by Duroc King Jr. III. and Waneta Hub Jr. by Waneta Hub 8215, and out of sows of equal breeding. I can satisfy both breeders and farmers."

The attention of hog raisers is called to the illustrated advertisement on page 12 of Messrs. F. K. Bowes & Co., 698 West Lake street, Chicago, which furnishes particulars regarding the hog trough they have on the market. It is made of one-eighth-inch thick boiler steel, is five feet long, thirteen inches wide and seven inches deep, and is declared to be the strongest and most durable trough ever made for the money. Catalog will be cheerfully sent to parties mentioning The Homestead.

Attention is called to the Berkshire advertisement of our old-time patron, C. T. Ayres, of Osceola, Iowa, found on page 28. He has bred Berkshire swine continuously since 1873 and, of course, has found it profitable. His herd is up to date in breeding and quality. The stock is mostly descended from Imp. Sabella, a large prize sow bought in 1836 and through good boars to the present time. The present chief herd boar is a yearling son of Lord Lee 61133 with dam a \$400 daughter of the great \$2,500 Masterpiece. Write Mr. Ayres for what you want.

Messrs. McLaughlin Bros., of Columbus, Ohio, write as follows under date of September 27th: "We are in receipt of a telegram, from St. Joseph, Mo., saying that our Percheron and French Coach stallions won every first prize and every championship at the annual interstate live stock show inaugurated there this year. One of the reasons why we import and sell more stallions than any other firm is because Mr. McLaughlin does not buy anything but the very best. A horse that does not please him he leaves for someone else to buy."

Mr. J. T. Dollison, Sac City, Iowa, a well-known breeder of Duroc Jersey hogs and Short-horn cattle, writes: "My pigs are doing fine, and I have the best lot of young Duroc Jersey boars that I have had for a long time. They are long-bodied, and have good, heavy bone. I have one good yearling Short-horn bull yet for sale. He is a nice calf, and the price is right. I am making a low price on boar pigs at present." Mr. Dollison says he can furnish a good boar pig or a choice gilt for a reasonable price. Anyone wanting a Short-horn bull can also get one very cheap if he sends at once.

On Tuesday, October 16th, Mr. W. S. Penn, of Springville, Iowa, will offer at public sale forty head of Duroc Jersey swine. The sale will take place at the East Linn Farm, four miles northwest of Springville, in Linn county, Iowa. The offering will consist of twenty boars and twenty gilts, sired by Iowa Chief 37453, Rosewood 31345, Crackerjack 33835 and King Perfection, all prize-winning boars and sires of prize winners. Mr. Penn announces in his advertisement on page 23 that these pigs are the tops of his spring crop, nothing being reserved, and that they are an exceptionally good lot of smooth, growthy and strong-boned pigs. Catalogs are now ready.

The advertisement of Mr. A. A. Hummer, breeder of Chester White swine, at Keswick, Iowa, appears on page 32 of this issue of The Homestead. Mr. Hummer has 100 choice March and April pigs of heavy bone, strong backs, good heads and ears, sired by three extra good boars, which he is offering for sale to Homestead readers. A representative of The Homestead recently heard Mr. Hummer price a boar and he advised Mr. Hummer that he was offering the most quality and value for the price of any that he had seen priced this season. Mr. Hummer writes: "As usual my pigs are not fat, but in the best of shape for breeders. I sold over sixty boars last season and every one proved a breeder. My hogs have plenty of pasture, water and shade and are in the best of shape to do a purchaser good."

HUFFMAN'S DUROCS.

On October 15th, at Scranton, Iowa, is where Mr. Claud Huffman sells forty head of his best Duroc Jerseys. Among these will be twenty-two spring hogs, ten spring gilts and a number of brood sows with litters. He will also dispose of his herd boar, Larchwood Echo 40415, in this sale. Mr. Huffman is a young breeder, but has made remarkable success and has won a number of premiums on his herd this season. He is a splendid feeder and a good care taker and he has reserved all his best things for this sale. Write for a catalog and then arrange to attend the sale.

A NEW IMPORTATION OF PERCHERON STALLIONS.

Mr. Chas. R. Kirk, of Chariton, Iowa, has been importing and handling Percheron stallions for a great many years. His name is at all unfamiliar to Homestead readers, as he has been with us for fifteen years or more. Mr. Kirk lays no claims to being the largest importer in Iowa, but does lay claim to being a small importer of strictly first-class Percheron stallions and brings them fresh from the pastures of France to the very doors of the Iowa and Missouri farmer. Mr. Kirk landed seventeen head the last days of August—all young, clean, valuable stallions, possessing unusually heavy bone, well coupled and of proper conformation from the Percheron standpoint. These horses can be seen at Mr. Kirk's barns a block and a half from the court house at Chariton, Iowa, at any time. The Homestead cordially recommends Mr. Kirk as a progressive, energetic and reliable man with whom to deal.

He makes his own selections in the old country and avoids the expense of the middle-man in this direction, which advantage accrues to the buyer. His announcement appears on page 32.

FASHIONABLE DUROC JERSEYS.

On page 45 will be found the announcement of Mr. C. W. Wolf, of Hampton, Iowa, setting forth the beauties of his famous Duroc Jersey pigs. He has a choice lot of male pigs now ready to ship, also a goodly number of gilts of same age. They represent the blood of Proud Advance, Iowa Banker and other desirable strains. Mr. Wolf courts inspection of his herd at all times. Mention The Homestead when writing.

DUROC JERSEY PIGS FOR SALE.

Mr. M. K. Avery, of Mason City, Iowa, whose advertisement of Short-horn cattle appears in these columns, has also 100 spring pigs that he is now offering for sale. They are by such noted boars as Top Notcher Jr., Model Improver, Perfection Chief Again, Jumbo Jack and the great Advance Boy, a full brother to the champion Advancer. Advance Boy, at the present time, heads the Averydale herd of Duroc Jerseys.

WEST'S DUROC SALE.

Mr. W. S. West, of Hanna City, Ill., will hold his annual Duroc Jersey sale on Thursday, October 11th. Fifty head of choicely-bred Durocs have been selected for this sale, representing some of the best families of the breed. The pigs have been grown in a manner which will insure their future usefulness, and breeders will find what they want in this sale, both as regards breeding and individuality. Write for catalog, as per advertisement on page 43, kindly mentioning The Homestead, and plan to be present sale day.

SANMANN'S POLAND CHINA SALE.

Breeders of Poland China swine who are looking for strong, growthy stock will do well to attend the forthcoming sale of Mr. R. A. Sanmann, of Glasford, Ill., on Wednesday, October 10th. Mr. Sanmann has been a liberal buyer from the best herds and is a very good judge and breeder. His offering this year consists of ten fall boars, nine fall sows, sixteen spring gilts, twenty spring boars and seven yearling sows, several of which will have pigs at side on sale day. Write for catalog, as per the advertisement on page 43, and mention The Homestead when writing.

SHROPSHIRE SHEEP FOR SALE.

The well-known Short-horn breeders, Messrs. A. M. Avery & Son, of Mason City, Iowa, are also breeding Shropshire sheep and have at this time a very choice lot of yearling rams. A representative of this paper has seen them and considers them a very vigorous, strong constitutioned lot. They sheared sixteen pounds of wool per head. One of the most prominent prize-winning rams in America has just been placed at the head of the Averydale herd, which will insure the continuance of the present high standard of Shropshires produced on this farm. Anyone desiring a good Shropshire ram should address Messrs. M. K. Avery & Son, Mason City, Iowa.

LYNCH'S DUROC SALE.

On October 15th, at Mt. Airy, Iowa, Messrs. A. L. and U. S. G. Lynch will sell forty head of Duroc Jerseys. They will be composed of both fall yearlings and spring pigs. They will be sired by Ohio Chief, Proud Advance, Alix Pride and Iowa Lad and Top Notcher R. They are selling a good lot of fall boars and sows in the sale, as well as a very choice lot of spring pigs. The Ohio Chief pigs are out of Will's Pride, a sow purchased at the Harding sale. Their sale stuff has been well grown out and they have as good blood as can be found in the hogs. Write them at once for catalog and mention The Homestead.

AN IMPORTANT DUROC SALE.

Readers of The Homestead should write at once for catalog of Messrs. M. W. Greer & Son's Duroc sale, which will be held at Bushnell, Ill., on Monday, October 22d. Messrs. Greer reside at Rushville, Ill., but on account of the superior railroad facilities at Bushnell they have decided to hold their sale at that place. On page 47 of this issue appears an illustration of Schuyler Prince 27479. This boar shows in the under eighteen months class at the Illinois State Fair this week and he should be well up in the money. He is a grandson of Tip Top Notcher and goes in Messrs. Greer's sale. Some breeder looking for a herd boar, bred right and of exceptional merit should plan to attend this sale, the opening of the Grand Champion Circuit. Further details regarding the offering will appear in these columns in our next issue. Write for catalog of this sale at once to Messrs. M. W. Greer & Son, of Rushville, Ill., and arrange to be present sale day.

CHINA SALE.

October 10th, at Villisca, Iowa, is when Mr. W. D. Fulton will again sell a draft from his well-known herd of "big Poland Chinas." The name and fame of Mr. Fulton have crept across the borders of his own community until now he is known as one of the very best breeders of the big fellows. Fifty head will be the number that he is running through his sale and we doubt if that will be enough to supply those who will be there. However, fifty head is what will be sold and they are the kind that the farmer and the western breeder are looking for. The most of the spring stuff will be sired by Miller Boy, a hog that he purchased of Mr. John Miller, and he will now weigh around 600 pounds as a yearling and will measure a nine-inch bone. There are at least four or five of his February and March litters represented in sale catalog. One of these is out of the big, deep-bodied, mellow sow, Zella (75571). Three boars and one gilt will sell. One boar is a "corker." Another sire of some exceptionally good stuff here is Big Klever 35195 by Joe C., a clear outcross from Tecumseh blood lines. One of his extra fine litters is out of Fancy U. S. 89016 by Royal Hiderstretcher—nine pigs (six raised) of this litter. Selling two top boars and one gilt farrowed March 10th. Model Chief 35196 is another sire of some choice young stuff to be sold. A model litter from this bunch is out of Lady Peerless—raising seven out of ten, of February 23d farrow, two boars and two sows in sale. This big sow, Lady Peerless, may also sell with Miller Boy litter at side. A pair of January gilts

"Stunted lamp-light"—smoky chimney, poor draught, imperfect fit, cracking chimney, clouded glass—why do people put up with this when good lamp-light is the best light to read by?

I make and put my name—MACBETH—on lamp-chimneys that are clear as crystal, never break from heat, and fit perfectly.

MACBETH lamp-chimneys give lamps new life.

Let me send you my Index to tell you how to get the right chimney for your lamp; it's free.

Address, MACBETH, Pittsburgh.

that are big and fine, and one boar, got by the Peter Mouw hog, Long Wonder, go in among the tops. Litter out of Fulton's Surprise (94644) by Surprise Chief by Chief Price, her dam, Mollie Jones by Mollie King Jr. You can go a long way and find no better stuff than this. Note the fifty head in sale, including some fine sows with Miller Boy litters at foot. Get the catalog now, and mention The Homestead.

FARM TELEPHONES A NECESSITY.

The utility of the telephone to the farmer is becoming more pronounced every year. The endless satisfaction of being in close touch with neighbors, the railroad station, creamery and city, appeals not only to the farmer, but his family as well. The Jul. Andrae & Sons Co., 219 W. Water St., Milwaukee, Wis., specialize in supplying farmers and independent lines with everything pertaining to telephone systems. The Andrae people, who have been very successful in establishing telephone systems throughout the entire country, make a special telephone for farmers' use. Their instruments are constructed in such a manner as to enable them to be subjected to extra hard usage. We would advise our subscribers to write for the large book that is being given away free by the Andrae Company. See advertisement on page 12.

LAST CALL FOR J. O. JAMES' POLAND CHINA SALE.

The get of the 900-pound boar, Pawnee Lad, and Big Prospect, will go through the sale of Mr. J. O. James, at Braddyville, Iowa, on October 11th. He is selling fifty head, evenly divided as to boars and sows. Fifteen fall sows are by Big Prospect and the spring gilts are mostly by Pawnee Lad. One of the best litters in the sale will be out of Rose Perfection and are sired by Pawnee Lad. Lady Giant, a daughter of P. W. Perfection and out of old Giantess, and she will have five good pigs in the sale. Another good litter is out of Miss Nemo L., a daughter of Nemo L.'s Dude and sired by Pawnee Lad. There will be a good bunch of fall boars in the sale sired by Big Prospect and one by Pawnee Lad. The latter boar has won for himself a reputation in southern Iowa that places him second to no other boar as a sire of great big stuff. Those of our readers who want the large, big-boned kind of Poland Chinas will find them in the J. O. James sale on October 11th. Write him for catalog and mention The Homestead.

WHERE THE HIDES GO.

Shoe men use them up in a way that is appalling. The Mayer factory, of Milwaukee, uses 415,612 annually. Steers, cows, calves, goats, horses, sheep and kangaroos contribute to one of the greatest industries on earth. In the mad whirl of business, people rarely pause long enough to consider the little things of life and how closely they are identified with the greater ones—how inseparable, in fact they are, from and how essential to them. Take for instance the shoe business—did ever anyone ponder long enough to realize the wealth of actual energy and animal life expended in the production of footwear for the human race? As an example, take the Mayer Boot & Shoe Co., a Milwaukee concern that in their 300 working days have consumed no less than 415,612 hides of all kinds during the past twelve months. Here then we have the hides of 60,298 steers, 31,163 cows, 55,704 calves, 196,846 goats, 67,599 sheep, 2,523 horses and 1,479 kangaroos, all consumed and distributed by the great Mayer factory within the period of a year. Stand these animals in a straight line and they would cover a distance of 351 miles, nearly one-sixtieth of the earth's circumference. To bring this livestock to its final point of destination, required no less than 3,000 twenty-six-foot cars, which strung together would cover over fifteen miles of railroad track. It takes the hides of nearly 1,500 animals daily to supply the demands of this monster shoe enterprise and were all of them spread out at one time, it would require an area of over 5,000,000 square feet to accommodate them. Nearly 1,000 skilled artisans are employed by the Mayer Company the year round, making the Honorable shoe for men, Western Lady for women, and the celebrated Martha Washington comfort shoes; also school shoes that wear like iron and work shoes for all classes and purposes. The total capacity of the Mayer factory is 6,000 pairs of shoes a day. The equipment of this factory is as thoroughly modern and up to date as money and experience can make it. Another decidedly favorable feature is that of location, which is in the greatest leather market in the world, thus enabling the company to secure first choice on products con-

sumed. The uniformly excellent quality of all shoes turned out by the Mayer factory is largely attributed to this fact. See advertisement on page 4.

GROUT'S DUROCS.

On October 17th, at Tingley, Iowa, Mr. Z. L. Grout will sell about forty head of very select Duroc Jerseys. He has reserved all of his spring boars and gilts for this sale, and he therefore has some of the best to offer the boys on this occasion. Mr. Grout has been out at the fairs this fall and has demonstrated to the boys that he has some of the good things and many of these will be in his forthcoming sale. There will be some surprisingly good boars in his offering that should go to the head of herds. He has the most up-to-date blood lines and therefore has what the best breeders are looking for. Write for his catalog, which is now ready, and mention The Homestead.

OXLEY'S CLOSING OUT ANGUS SALE.

On October 12, 1906, at Bedford, Iowa, Mr. G. N. Oxley will close out his entire herd of fifty head of Aberdeen Angus cattle. As Mr. Oxley will dispose of everything it will undoubtedly be a good place to pick up some snaps. The families represented are largely of the Drumlin Lucy, Westertown Rose and Rathmay Queen, Nosegay and Jeanette. There will be a good bunch of helpers in the offering and a lot of well-bred cows, many of which will have calf at foot. There will be seven bulls in the sale. Many of the cows in this sale have been sold for as high as \$300, but they all go now. Farmers and breeders can well afford to go to this sale, because there will certainly be some bargains in the offering. Further particulars can be had by addressing Mr. G. N. Oxley, Gravity, Iowa, or Mr. Roy Chambers, Gravity, Iowa, who will be glad to furnish all the necessary information. Write for catalog at once, as it is now ready, and kindly mention The Homestead.

HURLBUTT & RASMUSSEN'S DUROC SALE.

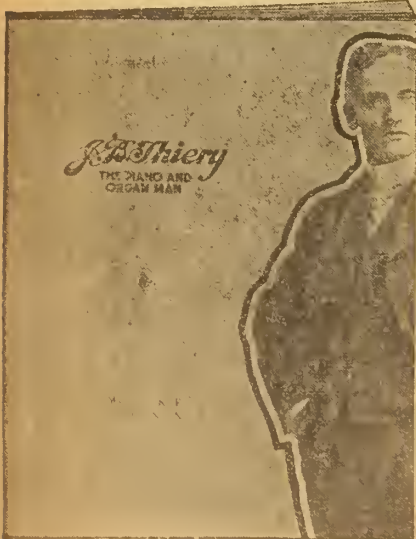

One of the important Duroc sales of the year is that of Messrs. Hurlbutt & Rasmussen, of Taylorville, Ill. These breeders have selected the tops of two herds for this occasion and are sure that their fellow breeders will appreciate the stock. The bulk of the spring pigs are sired by Kraschel's Wonder 37771 by Allison Jr. Perfection 9783 (A.), dam Buddy Beauty II. 70858 by Buddy T. There are also some pigs included in the offering sired by Forest Chief, he by Chief of Indiana by Ohio Chief. Such breeding coupled with individual merit as this lot possesses should induce breeders to arrange to be present sale day. Catalogs are now ready and will be mailed to those who write, mentioning The Homestead, as per the announcement on page 34 of this issue. Bids sent to Mr. D. M. Pierce, in care of these parties, will be properly handled. Full particulars regarding this offering will appear in these columns in our next issue.

CASTLE'S DUROC SALE.

Messrs. E. M. Castle & Son, of Joy, Ill., will hold their annual fall sale of Duroc Jerseys on Tuesday, October 16th. Fifty head have been selected from their herd, including thirty spring boar pigs, five summer and fall boars that will please discriminating buyers, ten fall gilts that will make valuable additions to good herds, and a few choice sows with litters at side. The spring pigs in this sale are sired by De Soto's Model, a prize-winning boar at the Kausas State Fair; Iowa Plummer, Prairie Acrobat, Champion Paul, Major R., Proud Advance and Tip Top Notcher. The offering is one (which as the boars named above indicate) that will please breeders and farmers. They have been grown with the idea of making useful hogs that will please buyers and insure to them a nice profit on their investment. The writer representing this paper is pleased to recommend this sale consignment to Homestead readers. In our next issue we will have more to say regarding this offering, but would advise our readers to write at once for catalog, kindly mentioning The Homestead. Bids sent to Mr. D. M. Pierce, in care of Messrs. Castle, will be properly handled.

THIERY, PIANO AND ORGAN MAN.

We call attention of all our subscribers to the full page advertisement of Mr. J. B. Thiery, the piano and organ man, on page 15 of this issue. This man conducts a remarkable business—shipping his beautiful pianos and organs to hundreds of homes in every nook and corner of the country. Scores of our subscribers have purchased their instruments direct from him, and we have yet to hear of any dissatisfaction from any home dealing with him. We have been informed

by Mr. Thiery that 5,000 Thiery pianos and organs will be sold by him during this fall and winter to homes in the West and middle West alone. And all these instruments will be shipped by him out on thirty days' free trial, which is one of the features of his buying plan. Mr. Thiery has just completed

his new piano and organ catalogs. This book is a work of art, handsomely printed and contains full page illustrations of all the well-known Thiery pianos and organs. We present herewith a reproduction of the cover, greatly reduced. The catalog is 10x19 inches in size, and all the illustrations were made from photographs and expensive drawings, showing all details. We ask all our readers to send to Mr. Thiery for a copy of this beautiful catalog. It will be gladly mailed to you with full particulars of his buying plan and special offers. Simply cut out the coupon appearing in his large advertisement and send to him.

A GOOD CRIMSON WONDER-TOP NOTCHER SALE.

Mr. August Voge will sell a decidedly good lot of Crimson Wonder 1 Am 2d and Top Notcher and Tip Top Notcher boars at Portsmouth, Iowa, on October 9th. He is selling in this sale a very choice lot of Crimson Wonder 1 Am boars. This boar was the third-prize boar at Des Moines this year in one of the strongest yearling boar classes that has ever been seen at that fair. He is a son of the sweepstakes boar last year, Crimson Wonder 1 Am, and he is also a half brother to the sweepstakes boar at the same fair this year. He also offers a few good boars sired by Ohio Chief 2d and they are very good and possess a wonderful lot of quality. Mr. Voge has done wonders in growing this stuff out and they have an abundance of growth, as well as a lot of finish. It is not often that such a bunch of Tip Top Notcher boars can be bought here in the West, but as Mr. Voge went back East and secured some of the very best sows bred to him, he therefore now has his get to offer for sale. If any of our readers want Crimson Wonder 1 Am blood, or the blood of Tip Top Notcher or Ohio Chief 2d they can get it in the Voge sale at Portsmouth, Iowa, on October 9th. Write him at once for catalog and then arrange to be at the sale. Kindly mention The Homestead when writing.

WATSON'S DUROC SALE.

Mr. N. E. Watson, of Edinburg, Ind., breeder of Duroc Jersey hogs, invites the breeders of the central West to be present at his sale on Saturday, October 20th. Mr. Watson is one of Indiana's best breeders. At the head of his herd he is using a son of Ohio Chief called High Chief. The writer has seen much of his breeding and is pleased to recommend it to readers of this paper. The consignment is made up of twenty fall yearlings, all sired by High Chief; five yearling sows by High Chief 13423; one yearling sow by the noted breeding boar, Surc Winner; four fall yearling boars by High Chief; four spring boars by Top Notcher Chief 17583; fourteen spring sows and two spring boars, sired by High Chief, Top Notcher Chief, American Chief, he by High Chief, and Harrison's Chief. Very few herds put forth as good a sale offering as does Mr. Watson. Last year with the exception of one sale, his was the highest sale in the state of Indiana. We wish to advise our readers who are looking for Ohio Chief blood that this sale affords one of the best opportunities of the year. Breeders who want to add a few good fall yearling sows to their herds in order to change blood or strengthen their brood sow sales should send for catalog at once, as per the announcement on page 30 of this issue, kindly mentioning The Homestead. Those who cannot be present sale day may send bids to Mr. D. M. Pierce, representing The Homestead, in care of Mr. Watson.

MANIFOLD'S DUROCS.

One of the Duroc Jersey sales that never fails to have its share of the good things is that of the veteran breeder, Mr. George R. Manifold, of Shannon City, Iowa. His sale takes place this year on October 19th, and he will sell fifty head from his herd. All his state fair winners go into the sale. He will sell some of the best Proud Advance pigs of the year. He writes as follows about his coming sale: "I am going to sell the litter of eight March gilts that showed at Des Moines this year winning fourth place. They have grown exceedingly well since I brought them home—not over fat; have been running out on a fifteen-acre pasture all the time. Also one male out of same litter. This litter is sired by Proud Advance and out of Nan Orion, and the same breeding that won third last year; also sell another litter sired by Proud Advance out of Princess Wonder, in which are four sows and three males, which I think are as good as the ones shown at Des Moines. Also ten sows and five males sired by old Corrector. Five of these sows and one male are out of Iowa Star; then five sows and four males out of Decatur Bell M. A Choice Goods pig is sired by W. L. A's Choice Goods; dam of this pig is Annetta, a litter sister to Addy's Top Notcher, now in service in Mr. R. J. Harding's herd. This is a very promising pig and is worth looking after. We are going to sell thirty-five March and April gilts, four fall yearlings sows, and eighteen March and April boars. This stuff is all in fine condition, and people will not be disappointed when they see it. We make but one sale and the tops go in that. Catalogs will be mailed on application." Write at once and mention The Homestead.

EVERYDALE SHORT-HORNS.

Some good Short-horn bulls are offered for sale by Mr. M. K. Avery, at Mason City, Iowa. One of the good herds of Short-horn cattle in northern Iowa is the Everydale herd, which is not only a great beef producing herd, but a great dairy herd as well. Mr. Avery maintains a private creamery on his farm which is supplied with milk from registered Short-horn cows. Mr. Avery has been in the Short-horn business twenty-five years. He has both Scotch and Scotch Topped cattle of the most approved breeding. The Emmas and Ccellas are perhaps among the best of the Scotch sorts, while the grand, broad-backed, thick-fleshed, Scotch Topped young Mary's are held much in favor at Everydale. Mr. Avery has used the best Scotch bulls obtainable. One of his Scotch herd bulls was Kannuck 96576; he was by Double Gloster, a richly-bred Duchess of Gloster Cruickshank bull. McLauren was another good bull out of Imp. Emma 3d, by Free Lance. Knight of Orleans by Royal Duke of Orleans, Zollikof 2d, a line bred Victoria huli, Prince of Lancaster

PILES NO MONEY TILL CURED.

Another Choice Offering

FROM

... VAN PATTEN HERD OF DUROCS ...

TO BE SOLD AT SUTTON, NEBRASKA, OCTOBER 18, 1906.

...THE CHANCE TO BUY REAL HERD HEADERS...

40 HEAD OF TOPS 40

Some choice animals sired by the great Billy K. Others sired by Golden King, Beauty Wilkes, etc. Billy K. sired the prize winners at Iowa and Nebraska this fall. He is now dead. Get some of his get. The strong two-year-old Golden King is included; five choice sows.

My offering will be up to past ones from this herd. I believe my lot of 35 boars are as strong as will be found in any ring this season. The grand sire, Billy K., has passed away, but has left several choice pigs that prove him what we claim. His get, as well as Beauty Wilkes, were winners at two great shows. I am offering some pigs that should be taken by breeders seeking herd headers. Catalog now ready. G. W. Segrist will attend the sale.

G. VAN PATTEN, PROP., - SUTTON NEB.
Col. T. C. Callahan, Auct.

Public Sale of East Linn Durocs.

To be held at

East Linn Farm, 4 miles Northwest of Springville, Linn Co., Iowa, Tuesday, October 16, 1906.

20 Boars---20 Gilts.

Sired by Iowa Chief 37453, Rosewood 31345, Cracker Jack 33885 and King Perfection. All prize-winning boars and sires of prize winners. The pigs are the tops of my spring crop, nothing being reserved, and they are an exceptionally good lot, smooth, growthy and strong boned. My catalogs are ready; let me send you one. Address,

W. S. PENN, Col. J. H. Lathrop, Auct. SPRINGVILLE, IA.

Prairie Glen Herd of Duroc Jerseys.

I AM now offering the best lot of Duroc Jersey boars I have ever bred; large, growthy, mellow, smooth fellows, with lots of bone and plenty of quality. Good enough to head the good herds and do the breeder good. Sired by such boars as Al's Chief 43327 N, 15723 A, he by J. J.'s Chief 12445 A; first at Indiana state fair last year, a thousand-pound hog, he by Winchester Chief 10077, he by Morton's King 8725, Tintin 17261. Imp. Wonder 43861, A. L. Advance 43331, Odebolt Chief 38271, a son of Perfection Chief 425 hog, Pleasant Hill Advance No. 44251, and other good sires; last, but not least, Ohio Chief, two sons of this great sire and show boar. Tintin No. 17261 for sale, sire of some of my best. Satisfaction guaranteed. Come and inspect, or write me. Prices reasonable; quality best. Address,

P. S.—Eight November males of rare quality; three Top Notcher bred. **A. L. MOSSMAN, TELEPHONE 83-3, RADCLIFFE, IA.**

WANETA DUROCS.

35 Choice Boars now for sale, both fall yearlings and spring boars. The "tops" at moderate prices. **B. A. SHAFFER, SANBORN, IOWA.**

and last, the splendid Marr Missie bull, Me-teor 174278. This is the present herd bull and is a very thick-fleshed typical Scotch bull, as richly bred as any Scotch bull living. However, he has been used as long as is convenient and is now offered for sale to some appreciative buyer. Mr. Avery also has a number of young bulls for sale that will be priced right.

SONNELAND'S TOP NOTCHER SALE.

At Harlan, Iowa, October 13th, Mr. August Sonneland will sell fifty head of Top Notcher and Tip Top Notcher Durocs, and those who are after this particular line of breeding will find it in his sale. He sells ten choice boars by old Top Notcher and ten boars by the famous World's Fair boar, Tip Top Notcher. He also sells Top Notcher Chief 2d boars and a few sired by old Orion out of a Dandelion sow. The latter boar won fourth at Des Moines and is not only a good individual, but is also a good breeder. Every man who breeds Durocs should write Mr. Sonneland for a catalog and see what a good line of stuff he is offering. Kindly mention The Homestead when writing.

HOW TO HAUL HEAVY LOADS.

It is said that when common grease is used on the axles of a wagon, nearly half the power necessary to move it is used to overcome friction. If this is the case, the use of the best axle grease is nearly as important as a good horse. On the other hand, an axle grease that "gums" is nearly as bad as none at all. A very clever idea to reduce friction and make it easier to haul heavy loads is a mixture of ground mica and mineral grease which is manufactured by the Standard Oil Company and sold everywhere under the name of Mica Axle Grease. This is the most perfect lubricant for all kinds of wagons. The reason is, that the finely ground mica in the mixture forms a thin surface or coating on the axle that is almost frictionless. It smooths over and fills up any roughness or irregular surface on the axle, making an almost glass-like bearing. The practical result as a load lighter is wonderful. Furthermore, after this coating of mica has formed on an axle, only a very small quantity of axle grease need be used,

2d Annual Sale of Duroc Jerseys

AT MASON CITY, ILL.

WEDNESDAY, OCT. 17th

THE property of Messrs. L. W. Cross & Son. Forty head consisting of tried brood sows, fall and spring gilts, spring boars, the get of Buddy T's Best, (3d prize boar Illinois State Fair 1905), Indiana, a prize winning boar and from sows that have produced show yard stock. Write for catalog.

MASON CITY, ILLINOIS.

Col. Judd McGowan, Auctioneer.

BERKSHIRES

LARGE growthy boars, big bone and best of breed. Ing. Prices low. Address **C. T. AYRES, Osceola, Clark Co., Iowa.**

thus making its use a decided economy. Mica Axle Grease is put up in convenient tin boxes, and is sold nearly everywhere in hardware and general stores. It saves horse-flesh, money and time.

KERR'S O. I. C.'S

A representative of this paper recently visited Mr. O. I. C. Kerr, of Independence, Mo., the O. I. C. man of the corn belt. We have seen many good hogs at Kerr's on former trips, but never so many outstanding good ones. It seems that the more the blood of the great Kerr Dick and Big Mary is mingled the better are the results. Mr. Kerr has reserved all of this year's crops for his sale on November 2d. A few fall boars and sows are also included. Three boars of fall farrow that should appeal to buyers of O. I. C. boars were seen and we

must say that three greater hoars would be hard to find in several days' travel. There are other great hoars listed for the Kerr sale and it is certainly remarkable to see the number of outstanding good ones Mr. Kerr has to offer. The sow end of the sale has not been neglected in any manner and those who want an extra sow or two will find them at Independence, Mo., on November 2d. Watch for future announcements and if wanting O. I. C.'s that are right in every way, do not miss this sale.

GLAZED WINDOWS AT A BARGAIN.

On page 22 of this issue will be found the advertisement of Messrs. Gordon Van Tine & Co., of Davenport, Iowa. A careful reading of that advertisement will show some rare bargains in glazed windows, as well as on a great variety of mill works. The company referred to operate the largest mill in the world, covering a floor space of 163,000 feet. The plan of the company is to sell for cash directly to the user, thereby doing away with the expenses of traveling men. Special pains is taken to thorough air-dry all lumber that is sent out and it is afterwards put through a scientific drying process. All work is guaranteed to be first class in every respect. We request our readers to write for the mill work catalog of this company, which gives the latest and best styles of doors, windows, storm sashes, moldings, etc. Address Messrs. Gordon Van Tine & Co., Station 25, Davenport, Iowa.

THE BEST WEARING RUBBER BOOT ON THE MARKET.

Every farmer reader of our paper needs a good, strong rubber boot to get out in the slush and rain, which will soon be upon us; he also wants a boot that will stand the hard wear he has to give it. The Security Lycoming Duck Boot, advertised by the Hamilton-Brown Shoe Company, of St. Louis, Mo., on page 20 of this issue, is just such a boot. This Security rubber boot is made of pure rubber and the best duck, and is positively snag proof. A representative of this paper was shown a number of pairs of this boot that had been worn for some time, and there was not a hole or snagged place on any of them; they were the best-looking lot of rubber boots that had seen lots of wear that we ever saw. The new boot looks exactly like the rubber boot in the illustration in the advertisement, and if your dealer does not carry them in stock, do not take some other, but write the Hamilton-Brown Shoe Company, St. Louis, Mo., and they will tell you just how to get this Security rubber boot. If you once get a pair of these boots you will never have any other kind, as they are the only ones that will stand the hard wear you have to give them. Insist on getting the Security Lycoming Duck Boot and take no other.

COWAN'S SHORT-HORN SALE.

On October 23d, at his farm near Paulina, Iowa, Mr. Hector Cowan will sell a draft of forty head of imported, straight Scotch and Scotch-topped Short-horns. No breeder in Iowa has had better cattle or has sold better cattle than has Mr. Hector Cowan, and his forthcoming offering is the equal of anything heretofore sold from his herd. He is putting in twenty head of Scotch cattle in this sale, representing some of the most richly-bred Miss Ramsden, Brawith Bud, Mysie, Secret, Undine, Patience and Golden Drop families. It is with considerable reluctance that he has consented to put into this sale the two imported cows, Miss Law and Patience. The former is a large roan, with a great, broad back and is a foundation cow for any herd. Patience is a dark red, a most excellent individual and can go into any show herd next year. She is low to the ground, wide out, even in her lines, both top and bottom, has an excellent head and very shapely horns, and a short neck that sets well on her shoulders. She is one of the most typically Scotch cows that we have seen in our travels this season. There will also be a splendid lot of Scotch heifers in the sale. Most of the Scotch cows will be bred or will have calf at foot by Imp. Nonpareil and some will be in calf to Anoka Archer, the young bull he purchased from Mr. Frank Harding. There will be ten daughters of Imp. Nonpareil and ten young Scotch bulls in the offering. If

you want a catalog send your name in early and kindly mention The Homestead.

W. E. MARRS' SALE OF DUROC JERSEYS.

Among the younger breeders of the Duroc Jerseys to go into the public sale business is Mr. W. E. Marrs, of Albany, Mo., who will on October 23d, sell fifty head of Duroc Jerseys. Mr. Marrs was particularly fortunate in having had opportunities for learning the requirements necessary to produce a good hog and he has a herd from which to select that was founded on stock of known reliability as producers of stock of merit, both in the show ring and as breeders. Mr. Marrs had been in close touch with the great herd owned by Messrs. Bowman & Fitch, of Lawrence, Neb., and at their dispersion in 1905 he secured several sows, among these being daughters of the great show boar, Improver II., bred to Cole's Duroc. Some rattling good stuff has been raised from these sows. The herd boar, Pilot J. 26311, a Stribling-bred hog, was purchased of Mr. R. J. Harding, of Macedonia, Iowa, and his get out of these Improver II. and Cole's Duroc sows are good. Mr. Marrs has selected only the choice things of his herd for this his first sale, and the man hunting Duroc Jerseys will find that Mr. Marrs has the goods and will be prepared to deliver them sale day. In future issues more will be said of the offering and the breeding. In the meantime we urge all our readers who are interested in good Durocs to write Mr. Marrs for a catalog and to kindly mention this paper when doing so.

A GOOD PHONOGRAPH AT SMALL COST.

No home should be without a good phonograph. When one is tired out with either physical or mental exertion there is no tonic like music. Poor music from a poor instrument is a nerve wrecker, while good music from a good instrument is a nerve builder. The phonograph is finding its way into the best homes in the land, both in the rural districts and in the city. There are few musical instruments in which there is so much difference in the character of the music produced as the phonograph. The Duplex Phonograph Company, of Kalamazoo, Mich., have succeeded in almost revolutionizing the science of phonograph construction. They are now producing an instrument which is equal if not superior in every way to the average \$100 phonograph, and yet they are selling their Duplex directly to the trade at \$29.85. This may seem incredible to our readers, but as a matter of fact music dealers always make an immense profit on the goods they handle. They would sell this very phonograph for three or four times the price that is now being offered. As a guarantee that the Duplex is of the very best in every way it is sold on a plan by which it can be returned without any expense to the buyer if it is not satisfactory. The price of \$29.85 includes six seven-inch or three ten-inch records. A catalog will be furnished upon application which tells all about the free trial offer. Address Duplex Phonograph Company, Kalamazoo, Mich.

THE JONES ABERDEEN ANGUS SALE.

On October 18th, at his farm, three miles northwest of Quimby, Iowa, will occur the Aberdeen Angus sale of Mr. W. H. Jones, one of the well-known breeders in northwest Iowa. He will sell forty-five head, thirty-five females and ten bulls. He includes some of the best things he has in the herd, among which will be three Blackbird cows and two of these will have calf at foot by Cherokee Blackhawk 59521 and Imp. Edward R. 61744. He has cataloged four Pride cows, and three of them have calves at foot. There will be two Trojan Ericas in the offering and two Heatherblooms with calves at foot. He has picked nine Janettes, and four of this family will have calves at foot. Cows of breeding age will be bred to Imp. Edward R. 61744, Cherokee Blackhawk 59521 and Edewall 85748, a richly-bred son of Imp. Edward R. He is putting ten young bulls in the sale, bred along the same lines and these compare very favorably with the rest of the offering. The sale deserves the attendance of the best Angus breeders, and while the cattle are not in high flesh, yet they are in good breeding condition and will certainly do good for the purchaser. Many of the cattle in this sale represent the most popular and most sought after families, and

here will be a good opportunity to get them and buy them right. The catalog is now ready for distribution. Write for it and be kind enough to mention The Homestead.

POINTERS OF VALUE IN STOCK FEEDING.

The above caption is the title of a neat little book of thirty-one pages gotten out by the Iowa Stock Food Company, of Jefferson, Iowa. This little book has much to do with profit or loss in feeding cattle. The title of the first article, "In the Manufacture," deals largely with the utilizing of the raw material grown upon the farm, designed to be fed to stock for the purpose of meat production. It deals with all the little wastes that are to be found on almost every farm, caused by lack of forethought and proper judgment. The second title, "The Farmers' Fuel," compares the waste in growing and feeding domestic animals to the waste of improperly firing a furnace. This topic is carefully and exhaustively handled in a very thoughtful and intelligent manner, and the proper remedies given for obviating this great loss. This little book should be in the hands of every farmer and stock feeder in the middle West. It can only be secured free of charge, by addressing B. L. Howard, Jefferson, Iowa. This free offer is made only for a limited time to Homestead readers. The book is nicely illustrated with live-stock scenes, and should find a place in every farm home.

THE DES MOINES DAILY NEWS

AGAIN MAKES AN EXCEPTIONAL OFFER OF 25c FOR THREE MONTHS TO TRIAL SUBSCRIBERS.

The News is the only paper published at the Capital City that is not controlled by party politics. All the news is published in a condensed and readable form in an independent and fearless manner. If you would know the facts about all state and national questions, just as they are, you will enjoy reading The News.

Daily market reports, farm news, household hints, sporting gossip, and everything that goes to make a complete metropolitan paper are regular features.

Every reading person in Iowa now has an opportunity to see just how good The News is by sending 25c to the Des Moines Daily News, Des Moines, Iowa, for a three months' trial subscription. The paper will be stopped promptly at the end of the three months unless you decide to renew.

HOME OF THE MOLINE WAGON.

THIS IS THE LARGEST EXCLUSIVE WAGON FACTORY IN THE WORLD.

Moline is the hub of the wagon industry. The Moline wagon, the famous Ironclad, gave to Moline its fame as the home of good wagons. The prestige of Moline as the hub of the wagon industry dates from 1854, when the Moline Wagon Company began business there in a little shop not much larger than a country school house. But "tail trees from little acorns grow," and from that small beginning the company has steadily increased its facilities and its output until today it has the largest exclusive wagon factory in the world. The word "factory" fails to convey an adequate idea of the magnitude of the plant. A "city of factories" better expresses its great extent. Here are a few of the things you would find if you were to visit the Moline wagon factory: An army of skilled wagon makers. 500 strong, well-paid men, not boys. Every man an expert in his particular kind of work. Every man held strictly responsible for the quality of the work he turns out. Every piece of lumber inspected and only the straight-grained, perfect pieces used. Each separate piece of woodwork, each metal part, rigidly inspected and no flaws permitted. Every joint, every mortise, all bracing, all ironing—every part of the construction inspected and reinspected at all stages of manufacture, so that the company are safe in putting their ironclad guarantee upon every Moline wagon. The factory turns out one complete Moline wagon every six minutes. Over a million Moline wagons are now in use and there is a waiting market for all the wagons the company can build. Several thousand copies of a valuable wagon book, in which the master mechanic tells "How the New Moline Wagon is Made Ironclad," are being distributed. If you want a free copy, better get a postal to the Moline Wagon Company, Moline, Ill., at once.

Low Rates to South Dakota.

On every Tuesday during 1906 Homeseekers' rates to South Dakota points are offered by the Chicago, Milwaukee & St. Paul Railway. These low rates enable homeseekers to investigate the opportunities offered at slight expense. Any ticket agent can sell you tickets to South Dakota, via the Chicago, Milwaukee & St. Paul Railway. It is worth your while to ask him to do so. Write today for new booklet on South Dakota.

E. C. NETTELS, D. F. & P. A.

Des Moines, Iowa.

A Splendid Opportunity to Buy Hereford Cattle.

At the Sunny Slope Stock Farm, Lake View, Iowa, on October 11th, will be sold forty head of Hereford cattle from the herds of Messrs. Ben Broughton, of Lake View, and F. J. Green, of Early, Iowa. So far as Mr. Green is concerned it is practically a closing out sale, as he is moving off the farm. He will sell his herd bull and all his breeding cows, together with a very nice bunch of heifers and a few young bulls. Drafts from both of these herds were shown at Sioux City and won their share of the premiums in every class. We mention this to show that their offering is the equal in every way of anything that will be sold this year. We have seen Mr. Green for these many years at the leading sales and when buying he always bought the good ones. His cattle are in good condition and here will be an opportunity for some man who wants to get a foundation for a herd. There is a line of breeding in this offering that cannot be bought at private sale and it is only at a sale of this kind that such breeding is offered. Mr. Broughton is selling twenty head in the sale. Most of his cows are carrying their second or third calf at the present time, and he guarantees them all to be regular breeders. They are with calf by, have calves by their sides by, or were themselves sired by his present herd bull, Dudley 176275. Dudley was by Andrew by Don Carlos, dam by Beau Brummel. From this it will be seen that he is an intensely bred Anxiety bull. He was a prize winner at the Sioux City Fair this fall without any fitting. He has half brothers and sisters owned by Messrs. Cargill & McMillan, of LaCrosse, Wis., that have been first prize winners this season, as well as last in the circuit of state and national fairs. The young bull, Leopold, sired by Dudley, deserves special mention; his dam was a granddaughter of the Earl of Shadeland 30th. This is a bull that any breeder might feel pleased to own. At Sioux City, without being fitted, he won second in his class, second at head of breeder's young herd and second as one of four get of one sire. Professor Currius said of the class, the get of one sire, that all they needed was a little more fitting and they were good enough to show anywhere. Several of his cows, one bull and the two bulls consigned by Mr. Leslie, of Auburn, were sired by grandsons of the mighty Dale. Altogether this will be a sale to attract the attention of the best breeders. There will be the most popular blood, good individuals and the sale is made by men of the best reputation. Parties wanting catalogs should address Mr. Ben Broughton, Lake View, Iowa, or Mr. F. J. Green, Early, Iowa.

E. G. Stark's Short-horn Sale.

On October 15th, at Humboldt, Iowa, Mr. E. G. Stark, of Livermore, Iowa, one of the oldest breeders in the state, will make a public sale of Short-horn cattle at the fair grounds, and he will sell fifty head of as good and practical, money-making cattle as will go through a sale ring this year. The name of E. G. Stark has been synonymous with good Short-horns and for the past thirty-three years he has preached the gospel of good cattle and he has been one of the men who has practiced what he preached. While not following any particular fad, he has nevertheless been a believer in the saying that the best was none too good and he has in his day owned his share of the good ones. Scotch blood predominates in his herd on the very best Bates foundations and his present offering will be bred along these same lines. There will be about ten yearling bulls in the sale, two of which will be grandsons of Imp. Leyburn, a bull that he used in the herd a number of years ago and a bull that was considered one of the very best in his day. He undoubtedly had more to do in bringing the Stark herd to the front than any other bull that he ever used. The cows and heifers that Mr. Stark is selling in this sale are as good as can be seen anywhere. They are right off grass, but they are in nice condition. There will be a good bunch of heifers in the offering sired by Standard Fibre and some of these will have calf at foot and some will be bred and safe in calf to Commodore 2d, a Scotch bull purchased of Messrs. Cookson Bros. and used in the Stark herd. There will be at least a dozen or fifteen cows with calf at foot and several others will be right at calving. One of the best cows that he is selling is Thistle Duchess 2d, a seven-year-old cow, and a good one. She will have a calf at foot or will be right at her calving to Standard Fibre, a Cookson-bred bull. A number of the females will be bred to Mysie Lad, his new Scotch bull that he recently purchased of Mr. Claus Johnson. Mr. Stark is not putting an animal in this sale that he does not know to be all right in every way and his offering will pass the most critical inspection. As a money-making, debt-paying proposition, we know of nothing better than the offering of cattle that Mr. Stark is selling on this occasion. It is a clean lot of cattle from beginning to end and the very kind that men can afford to buy and do well with. Col. F. M. Woods will cry the sale and he will care for your bid if you cannot be there in person. Write Mr. Stark, at Livermore, Iowa, for catalog, and kindly mention The Homestead.

Very Strong Lot of Durocs.

Mr. H. G. Warren enters the sale ring with an offering from his well established herd of Durocs. He is one of the younger breeders of this stock that has made a good impression with a class of breeders that have a reputation worth seeking. They have added him to this circuit simply because his hogs warrant it and he has made this reputation in a very short time. Not so many months ago the writer watched this gentleman place some of his hids and we must admit that he went after the good ones only. He had to pay good prices in several instances, but never came home without his sow or boar that he started after. The sale stuff will be good and you can rest assured that you will get values that you will not be able to find in any other sales. His offering will not be as large in number, but where it lacks in numbers will be made up in quality and individuality. You will find hogs and gilts sired by Warren's Improver, by Improver 2d. This yearling

boar is one of strong individuality and is good enough to be at the head of any good herd. He has some choice litters sired by Hambletonian. The last named litter is out of Rosie Perfection, she by Jumbo Perfection. She was sold in the Loudon sale last spring for \$200 and was safe in pig to Hambletonian. Mr. Warren will sell her litter in the sale. Other litters are sired by Billy K. Ray's Choice and Big John. Some very good sows in the herd are sired by the great show and breeding boar, Higgins' Model. Look up this breeder's sale advertisement on page 31 and write him for catalog. His sale follows along with the Central Nebraska Circuit. You can send a bid to auctioneer, or Mr. G. W. Segrist, in care of Mr. Warren, at inland, Neb. This city is on the Northwestern & B. M. Try and attend this sale.

Herefords and Duroc Jerseys at Auction.

We wish to call attention to the Hereford and Duroc Jersey sale of Messrs. N. J. Hiltahrand and Lewis Bros., which will be held on Monday and Tuesday, October 8th and 9th, at Princeton, Ill. The writer representing this paper has inspected the major portion of the offering and is pleased to recommend them to readers of this paper. The Herefords represent the best blood the breed affords and in many instances are the get of famous huls. The catalog shows a list of sires that have contributed largely to the improvement of the Hereford breed and the man who wants the best blood the breed affords either to add to his herd already established, or to select the foundation for a herd, should not overlook this important event. The entire lot is in good, thrifty condition and just right for service in good herds. There are in both offerings such specimens as command good prices in any sale where those present know their value and they should meet with appreciation in this sale. The cattle are just in the beginning of their usefulness. Among the number are several of show-yard type and quality, and the calves at side make this a very desirable offering. Every female of breeding age is either safe in calf, has calf at side or is due to calve immediately after sale. The bull offering is an equally strong one. Several huls of the herd-header sort are included, and anyone looking for herd bulls will find what he wants in this lot. The Duroc Jerseys are in good condition to go into herds and yield much profit. Messrs. Hiltahrand and Lewis kindly invite all those in need of good stock of either breed to be present sale day, and they are sure the offering will please those present. Catalogs may be had by writing as per the advertisement on page 40 of this issue. Bids sent to Mr. D. M. Pierce, representing this paper, in care of either consignor, will be properly handled.

ONLY \$4.50 TO MINNEAPOLIS AND ST. PAUL AND RETURN.

Via the Minneapolis & St. Louis Ry. Popular excursion Saturday, October 13th. The last chance to visit the Twin Cities at a low rate. Tourist berth rate \$1.00. City Ticket Office, 512 Walnut St.

My boars are very stretchy, with lots of bone, and have been well grown out. If you want a good boar I have them in my sale. Write for catalog, mentioning Iowa Homestead. Address

T. H. ISAAC, Col. ATKINS, Auctioneer, RED OAK, IA.

The Broughton-Green Hereford Sale.

An important Hereford sale will take place at Lake View, Iowa, on Thursday, October 11th, commencing at 1 o'clock sharp. At that time Mr. Ben Broughton and Mr. F. J. Green, of Lake View, will sell an exceedingly creditable draft of Hereford cattle. Mr. Green is disposing of his entire herd and it includes some exceedingly good individuals. He has been using Rosebud, a Briton-bred show bull, and the result has been that he has established a marked degree of uniformity in his herd. Allen Overton 2d, a bull of great scale and depth, so successfully used in the herd of Mr. C. G. Comstock, of Missouri, succeeded Rosebud in the herd, and all the females of breeding age in Mr. Green's herd will be bred to or have calves at side by this bull. Mr. Broughton is offering his first consignment at public auction. He has selected a string of useful young cows, most of them carrying their second or third calf. In addition, he is offering several heifers too young to breed. All the females consigned by Mr. Broughton are bred to, or have calves at side by or were themselves sired by Dudley, an intensively-bred Anxiety bull of Messrs. Guggell & Simpson's breeding. Some of his half brothers and sisters were shown last year, as well as this season, by Messrs. Cargill & McMillan, of LaCrosse, Wis., with a remarkable degree of success. The young heifers sired by Dudley will make an excellent foundation for any man's herd, while his bulls are exceptionally good individuals. Among the cows in this sale is Florence 2d 116125, a six-year-old matron bred by Mr. C. G. Comstock. She is by Garfield 75738 and is a granddaughter of Anxiety Grove 2d. She has a heifer calf at foot by Allen Overton 2d. Rosalia 134640 is a five-year-old cow due to

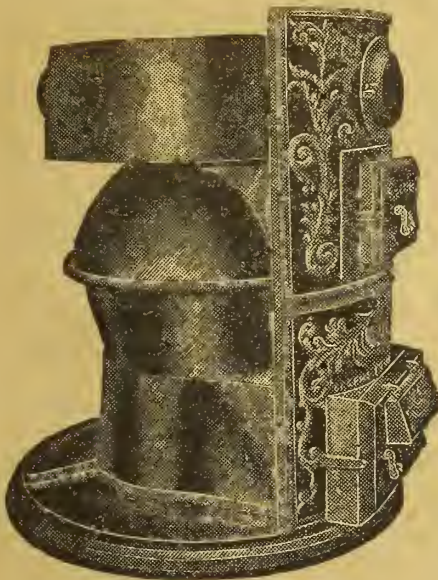

There will also be one boar out of this litter, the balance being spring gilts out of the same dams as the spring boars, and will be the pick of the herd. Here will be the chance to buy some open sows and gilts to breed to top sales with next winter, for Proud Advance sires are the kind that do that. The spring pigs are not fat, as they have never been crowded hard, but are just in nice breeding condition and ready to do the man good that buys them. Mr. C. M. Dewey will sell two fall boars by Proud Advance and two fall sows by the same boar. He also sells four spring boars and one spring gilt by him. He also consigns two boars and one sow by Miss Bob's Wonder, he by Crimston Wouder, and one boar and two sows by Tip Top Noteber and one boar and three sows by Red Lock, a son of Ringleader. There will be other good ones, but the catalog gives them all. Write Messrs. White & Dewey, Shannon City, Iowa, for catalog and then go to the sale.

Blackbird Daddies at Auction

There probably has never been a sale of Aberdeen Angus cattle where so many richly-bred Blackbirds were to be sold as at the dispersion of the Cloverland herd, owned by Baker & Smith, at Mt. Vernon, Iowa, on Wednesday, November 14th. This sale is being made in order to dissolve the partnership existing between Mr. Matt Baker and Mrs. C. A. B. Smith. Mr. Matt Baker has been prominent in Angus circles for a number of years. It was he who had charge of Mr. A. P. Grout's herd at Winchester, Ill., and conducted the affairs in such a manner as to bring the Winchester herd into more than ordinary prominence. From there Mr. Baker took charge of the Messrs. Chas.

THIS IS THE GREEN FURNACE.

This is the time of year when everyone is getting ready for cold weather and many of our readers are putting furnaces in their homes, as they are much cheaper than stoves, and besides your whole house is heated evenly upstairs and down. The stove at best only heats one or two rooms and is always a dirty piece of furniture, while the furnace is way off down in the cellar out of the way and no dirt. The Green furnace, an illustration of which is given in this article, is one of the best furnaces on the market, and as we have one in our home we know how good they are and how nicely they keep the house warm. They are made as good as first-class material and workmanship can make them and will last as long as you want a furnace in the house if they are attended to properly. The Green Foundry & Furnace Works, of Des Moines, Iowa, are sending out a neat little booklet about furnaces and would like to send every reader of this paper one who may be interested in furnaces. Write today for this furnace booklet. It will greatly interest you. Read the advertisement on page 16 and mention this paper when writing.

calve about sale time by Sunny Slope Tom 2d 94219, out of Cowslip 76748. There are some granddaughters of Dale 3d and Beau Brummel and several by Dale Lad 20th. The breeding throughout is of the very richest and both herds in the offering are in useful breeding condition. They have been profitable in the past and they will make money for the men who buy them. Catalogs are now ready and will be sent upon application to Mr. Ben Broughton, of Lake View, Iowa. The auctioneers are Cols. Carey M. Jones, E. P. Layman and W. T. Thompson, to whom bids may be sent in care of Mr. Broughton, at Lake View.

White & Dewey's Duroc Jersey Sale.

The sale of Mr. Grant White and Mr. C. M. Dewey, at Shannon City, Iowa, on October 18th, promises to be one of the good ones of the season. Mr. White will consign twenty-five head to the sale. There will be fifteen boars and ten sows and gilts in his offering. The boars are all sired by Proud Advance, and the dams are such as Dalby, sired by Orion. There are three boars in this litter and one of them is good enough to head any good herd. Another dam is Russell Belle. She will have three boars in sale that are good, and Miss Queen will also have three boars in sale. There are two extra good pigs in litter. Lady Chief will have one boar pig that is a good one. She is by Ohio Banner by Ohio Chief. Will have two boar pigs sired by Ohio Chief and dam the sow that topped Mr. O. E. Osborn's sale last spring. The sows going in the sale will all be sired by Proud Advance and will be an extra good lot. There will also be one junior yearling that we think is as good as they grow them. It is the sow which was fitted for show this year. Will offer three fall yearlings that are half sisters to Shade's sweepstakes sow this year at three fairs. Two of these are very choice sows.

HOWE SCALE CO., OF ILL.
50-52 Lake Street, Chicago, Ill.

Usher & Sons' herd, at Botna, Iowa, and fitted them in the pink of condition for show and sale at the time of this herd's greatest prominence. It was also Matt Baker that fitted the great Short-horn cow Red Bird, and exhibited her without defeat for so many years at the leading shows of America, showing against all the best imported cattle from England and Scotland. In this offering, to be made by Baker & Smith, are forty-eight head of first-class, high-bred daddies; thirty-five of the forty-eight are of the famous Blackbird family. Without doubt, this is the greatest aggregation of Blackbirds that has ever been offered by any one breeder or firm on American soil. We simply throw this out as a fore-runner of much more that is to be said concerning this very valuable aggregation of Angus cattle that will pass under the hammer on the date above mentioned. The catalogs are now ready for distribution, and will be sent free to every Homestead reader who says he saw this notice in The Homestead. Address Baker & Smith, Mt. Vernon, Iowa, for same.

The World's Largest Herd of Red Polled Cattle.

Our readers may not be aware of the fact that right in Iowa is located the largest herd of Red Polled cattle in the world, over 300 head of pure-bred, registered cattle of the most approved strains. They are owned by Messrs. P. G. Henderson & Sons, of Central City, Linn county. Twenty years ago Mr. P. G. Henderson commenced the breeding of Red Polls, securing the nucleus of the present herd from Gen. L. F. Ross, who was an extensive breeder and importer located at Iowa City, Iowa. The writer well remembers the many pleasant days spent with General Ross listening to him exploit the good qualities of his favorite breed. Mr. Henderson, with Red Polls like everything he undertakes, wants the very best. General Ross caused Mr. Henderson to part with a lot of money for a few of the very best things in the herd, but it was not many years until the Henderson herd was the larger and superior. During later years Mr. Henderson went to England and made his own importations. One of our scribes recently visited the herd and found a very uniform, smooth lot of cows with splendid, large udders, that milked out clean and flexible; in fact it is truly a business herd from start to finish. The milking cows average \$5 per month from the sale of cream, exclusive of calves and the value of separated milk. The cows take on flesh rapidly when dry and make excellent beef. At this time there are twelve fine young bulls old enough for service that are offered for sale.

VERY LOW RATES TO BUFFALO, N. Y., Via the North-Western Line. Excursion tickets will be sold at one fare for round trip October 10th to 12th, inclusive, with favorable return limits, on account of International Christian Convention. Apply to agents Chicago & North-Western R'y.

THE COMBINATION DUROC SALE.

Lincoln, Neb., October 17, 1906.

50
HEAD

Tops From 3 Strong Herds

50
HEAD

The get of Crimston Wonder, Fancy Crimston, Ohio Chief, Aethelred, Luther II. by Hambletonian, Malcolm Model and Morrison's Bell Top.
W. A. Kirkpatrick, of Lincoln, Neb., consigns 17 head.
A. Wilson, of Bethany, Neb., consigns 14 head.
E. K. Young & Son, of Havelock, Neb., consign 20 head.
Three strong herds topped to make the offering choice. In making our combination sale we have decided to offer the best lot of boars raised by each and we have something to offer that will please all interested in good Durocs. You will notice that our offering embraces the rich blood of the breed. Our catalog is now ready.

C. A. WRIGHT'S SALE OF DUROC JERSEYS

AT THE FARM NEAR Savannah, Mo., Thurs., Oct. 18th

34 BOARS.

46 SOWS.

I have reserved my entire crop from which to select for this sale, and if you are here sale day you will see as many good ones as you will likely see in any one herd in the West. All my winners at Iowa State Fair and Interstate show at St. Joe go in the sale. Larchwood King, Echo, Challenger, Orion, Cbip, Wright's Choice, Parnell Banner are the sires represented. Larchwood King and Challenger go in the sale. Here's a chance to get herd boars. Write today for catalog, mentioning this paper. It tells the whole story.

DUNCAN BROTHERS, AUCTIONEERS.

C. A. Wright, Rosendale, Mo.

WARREN'S WELL BRED DUROCS OFFERING OF

At Inland, Neb., October 20th, 1906.

Choice pigs of both sexes. Large, roomy gilts with good color. Strong lot of spring boars. Bone, feet, strong backs and vitality. Offering strong in blood of Improver 2d, Hambletonian, Billy K., Rays' Choice, Big John and Higgins' Model. Several good herd headers noticeable.

My first sale will be one of quality, finish and of good color. My hogs have been selected from the best herds of this breed. I have paid long prices for my foundation stock. This sale will not be a disappointment to those who may attend same. My sale follows the C. Briggs sale at Clay Center, Neb. Catalog now ready. G. W. Segrist will attend sale.

H. E. WARREN,

Col. T. C. CALLAHAN, Auctioneer.

J. E. WEHR, - - PORTSMOUTH, IOWA.
COLONEL LUTHER, AUCTIONEER.

Last Call for the Brown-Mickey Sale.

In our last week's issue we gave you an idea as to the class of Durocs going in the sale to be held at Osceola, Neb., on October 10th. We are just as strong as ever in our assertion that this sale will afford opportunities to invest in something choice. Each gentleman has gone through his herd and made a selection that will be pleasing to those who attend the sale. You no doubt realize that the pig crop is somewhat short and that the first in will get the pick of the different offerings. As to breeding, they will stand among the best. These gentlemen have purchased a class of sires that have won recognition the world over. Mr. Brown owns the celebrated Red Knight. We will say that this hog won his spurs in one of the strongest classes last year and it was an undisputed decision. He was picked as a winner before the show, and true to the assertion he won first and sweepstakes. Both gentlemen have pigs sired by him in the sale, while some will be out of his get. Mr. O. E. Mickey owns the good breeding boar Homestead Gold Dust, sired by the great Gold Dust Jim. Mr. Mickey has sired him on a class of sows that produced good results, and his get will show that the assertion was true. The good sire Belle Echo, sired by Echo King, is owned by both gentlemen, and both farms have secured real choice animals for their troubles. This hog is one of the best sires of the breed. He has demonstrated his worth several times, and to get one of his pigs would certainly prove a wise deal for all concerned. Then we find some choice pigs sired by King of Crimsons, sired by Crimson Wonder. Mr. Brown will sell a number of yearlings at this breeding that should be worth your time. They are very good and will please the purchaser. You will also find some pigs sired by Star Jumbo by Jumbo Red. Mr. Brown's sale last spring was a success in all respects, and his offering was well received by the breeders. Mr. Mickey has some of the same breeding, and we can say that he has some very choice stock going in the sale. Homestead Gold Dust has crossed well wherever mated, and the Belle's Echo pigs are choice. It is now up to the breeding public to take notice and make arrangements to attend. Both gentlemen are working for the betterment of the hog business and both have made good purchases. It now looms up that the sale will be one of choice animals with a line of breeding worthy of your consideration. Good boar timber and good brood sow timber, with a few good yearlings, is what makes the offering choice. If unable to attend the sale, send a bid to G. W. Segrist, representing The Homestead. Look up display advertisement on page 42.

Blain's Poland China Sale, One of Choice Animals.

The writer need not go into details on this well-known breeder's history, but we will say that the class of hogs raised by Mr. John Blain, of Pawnee City, Neb., are the type that sell readily, as well as give satisfaction to the purchaser. For a number of years this breeder has topped the spring offerings in the state of Nebraska. He has made good, large consignments to each offering and it would be hard to find an even bunch of spring pigs than those that will represent the Blain herd on October 17th. Mr. Blain's introduction in his catalog will give you an idea as to his business and we must say that it will interest you. The fifty head of growthy Poland China pigs to be offered on the above date should attract as much attention as any previous offering from this herd. The pigs are strong in every respect. As many herd hogs are noticeable as ever and as many of those promising sows are to be found. In looking back over this herd's history we can count a very large string of sires that have been causing considerable comment. These same grand hogs are ones bred by the veteran breeder, Mr. Jno. Blain, of Pawnee City, Neb. In giving a few of them we will say that many more have had license to be heard from, but owing to some party getting them that did not care to give the hog a chance, they were held back. A few of the ones that have made good as breeders, as well as show hogs, are Marcus Hadley, Pawnee Chief, Logan B., Major M., Major Blain, Pawnee Wonder, Electric Light, Searchlight, Oakland Prospect and in fact many more that have slipped our mind. The animals to be offered on sale day are as strong in feet, back, bone and quality as any previous one. If you have watched the papers you no doubt know that this man has the type of Poland that please the farmer as well as the hog man in general. The offering is strong in the blood of Johnson's Chief by Chief Tec. 3d. This grand sire was a winner at Nebraska State Fair, winning both first and sweepstakes in a warm class as a yearling. He was sold recently. His get show very much quality and size combined. The cross on the large, roomy sows was very good and the produce are such as will please you. Then we find some choice pigs sired by Major Blain, he by Blain's Tecumseh, and a few good ones sired by Major M., now owned by Mr. J. R. Triggs, of Dawson, Neb., and others sired by Pawnee Wonder by Glenwood Chief by Wonder's Perfection. A choice litter is by Hastings Boy. Mr. Blain breeds for the type that grow into hogs from 700 to 900 pounds at maturity. Watch for our next issues and get a full list of the offering. If unable to attend this sale, send a bid to Mr. G. W. Segrist, representing this paper. Look up display advertisement on page 34.

Overholser's Duroc-Jersey Sale.

Mr. L. L. Overholser, of Diagonal, Iowa, will sell forty-two head of Durocs at his farm on October 10th. There will be fifteen spring boars, twenty spring gilts, five sows with litters, one Orion Dandelion sow and one herd boar in the sale. The boars are sired by the very best hogs and are out of splendid brood sows. Mr. Overholser has pigs in this sale sired by his well-known boar, Ringleader, and King Walnut, and will sell the latter boar in this sale. There will be three Ringleader sows in the sale; also pigs by Proud Advance Jr., King Perfection Chicago Boy and Tom Watson Jr. The attraction in the sale will be Dixie Belle by Orion Dandelion. She is an extra good sow, and one of the best he ever owned. She is a splendid individual from head to

tail and will be sold open. He is putting in a splendid litter by King Perfection out of Iowa's Iowa Girl and another good litter out of Russell Belle. Keepsake Lady has a good litter by Ringleader and Hank's Beauty has a nice litter by King Walnut. There are many other good litters in the sale and Mr. Overholser says he never put up such a good offering as he has this year. Catalog is now ready. Write for it and mention The Homestead.

Last Call for the Sale of Short-horns and High-grade Short-horns by Geo. Hans.

As this is the last opportunity to invite attention to the sale of registered Short-horn cattle and high-grade Short-horns offered by Mr. Geo. Hans, at his farm near Newton, Iowa, on October 8th, we wish to impress our readers with the fact that it will certainly afford a golden opportunity to buy some good cattle at what, in all probability, will be bargain prices, for the reason that Mr. Hans is not selling all registered cattle. Twenty-two head of the number are registered and about twenty head are purebred unregistered cattle, which must pass as grades. Among the registered cattle are eleven young huffs, all but two solid reds. There are also included eleven cows, six of which have fine, big, husky calves at foot and the other five well forward in calf to the service of Victor Alexander 2d. This splendid Scotch bull is a son of Victor Raphael and out of a dam by the great show and breeding bull, Victor Mysie 2d. He was bred by the Messrs. Thompson, at Iowa City, and has demonstrated his ability as a good sire, which is made clearly evident by the many young things now on the farm by him. Preceding the use of this bull Mr. Hans used a splendid bull called Beauty's Prince. This bull was founded on the imported Nerissa cow, Nerissa 11th, by the Booth bull, Hamlet. It will thus be remembered that this is the same identical cow from which Mr. Parsons' \$4,000 Nonpareil King, and also other noted show bulls produced and exhibited by Mr. Geo. Bothwell, of Nettleton, Mo. All of the bulls listed in the sale are by Beauty's Prince. Beauty's Prince was sired by Prince Nonpareil and he by Gwendoline King. Thus it will be seen that Mr. Hans has maintained good bulls at the head of this herd during its entire existence. No straight Scotch cattle are listed for sale, but the standard American sorts prevail. From the standpoint of practical utility, good milking qualities and general usefulness this breed commands a ranking position, and those who wish to better the condition of their stock without paying prices that straight Scotch cattle demand will find here a splendid opportunity for such purchases. Mr. Hans will be pleased to send all Homestead readers his sale catalog.

H. C. DAWSON & SONS,

ENDICOTT, NEBRASKA.

Big Three Days' Sale of Short-horn Cattle in Wright County, Iowa.

Attention is called to the important three days' sale of Short-horn cattle that will be held in Wright county, Iowa, by the following well-known breeders: Mr. T. A. Davenport, of Belmont, Iowa, opens the circuit with a consignment of forty-five head from his Pike Timber herd, including thirty-five head of females and ten bulls. The unusual part of this offering is the fact that twenty-five cows will sell with calves at foot. Mr. Davenport is listing four good Scotch bulls in this sale, and the remainder of the offering Scotch topped. His sale will be held at his Pike Timber Farm, five miles from Belmont, on October 23d. However, free conveyance will be furnished to all of his guests from either Belmont or Clarion, to the farm and return. On October 24th, Mr. G. J. Mack, of Clarion, Iowa, will disperse his Lillac herd of fifty head of cattle. This course on Mr. Mack's part becomes an absolute necessity because of his sad misfortune in losing his life companion, which forces the breaking up of his home and leaving the farm. These cattle have been propagated with the idea of always continuing in the business, but as Burns would say, "The best, laid plans of mice and men, gang aft agley." Hence, the misfortune of Mr. Mack will place the public in position to secure this select herd, including ten head of Scotch cattle that he is very loath to part with. They are Nonpareils, Orange Blossoms, Mysies and Duchesses of Glosters. Seven of these are females and three bulls. All other families represented are Scotch topped. The day following Mr. Mack's dispersion, on October 25th, Messrs. Rice & Lindsey, of Clarion, will sell at their farm their entire herd of Short-horn cattle, including some fifty-two lots. This sale is made necessary by the dissolution of partnership, which has existed for some four or five years between Messrs. Rice and Lindsey. Mr. Rice has purchased a farm of his own and will remove to the same in the spring and expects to again engage in the breeding of Short-horn cattle after he gets settled in his new home. Their offering embraces some exceedingly heavy-milking cows. In conversation with Mr. Rice he informed the writer that there were very few of their cows but what had to be milked until the calves were two months old, before the calf could take all the milk. This herd does not represent any straight Scotch cattle, aside from the herd bull, but they have from three to five Scotch tops of the best Scotch bulls in northern Iowa. There are about forty-two females in the sale and eight or ten bulls and they are largely Scotch-topped Young Marys, Young Phyllis and Lady Elizabeths. For catalogs of this sale address Messrs. Rice & Lindsey, Clarion, Iowa. Further notices in The Homestead will be made with reference to some of the individual lots included in these sales. In the meantime application for catalogs should be made according to the addresses given in the foregoing article. Kindly mention The Homestead when applying for the catalog.

Down Where the Good Ones Grow.

The writer has handled Mr. G. Van Patten's business for some time and has never found a squarer breeder than the veteran who raises the choice Durocs at Sutton, Neb. It is a pleasure to do business where a man has a reputation as well as a herd of hogs to back you. For years we have watched the output of this grand herd of hogs and we are of the opinion that he has as many good ones among this breed as any other one breeder. He not only breeds a Duroc that gives the results to the purchaser, but gets them good enough to win honors in the warmest competition. He fears no herd and his hogs have given him that confidence. As a buyer we do not remember of ever seeing this veteran breeder take back a poor one to do service in his well established herd. He has always been a lover of the best. He is as high among his fellow breeders and his dealings have been a pleasure to all interested. This fall finds him at the shows with his good type of Durocs and we note that his hogs were among the winners in every show where exhibited. He has selected a lot of Durocs that will demand interest. He deserves the patronage of young and old breeders, as his offering is strong and the farmer need not worry about getting a bargain at any price paid. The grand sire, Billy K, has been dead some time, but has left a class of pigs behind that will take his place in way of remembrance of his good deeds. This hog was shown at the Nebraska State Fair last fall and was given a place of third money. The size of the premium does not signify his worth as a breeder. The animals going in the sale on October 18th are choice and you will be given an opportunity to buy some of the show stock. Part of Mr. Van Patten's show herd was sired by this animal. The forty head are sired by Billy K, Medoc and Beauty Wilkes. The latter named sire had winners at the fall show. Mr. Van Patten will offer some choice pigs by him. Golden King, a yearling past, will be offered and he is a good, strong herd header. You will like him. In our next issue we will give a full report of the offering and it will be to your interest to watch for it. If unable to attend this sale send your bids to Mr. G. W. Segrist, representing The Homestead. Look up display advertisement on page 23.

Last Call for Podendorf's Iowa Sunshine Sale.

Mr. A. J. Podendorf, of Logan, Iowa, and his great array of Iowa Sunshines will be at Council Bluffs, Iowa, on October 12, 1906. He has selected twenty of his very best hogs for this sale and twenty sows and gilts. He will include his entire show herd at Des Moines, together with his second-prize hog pig called Sunshine Finish and No. 1 of catalog. This pig was one of the sensational ones at Des Moines and he is going to make a great herd boar. He is sired by Iowa Sunshine and his dam is Proud Ollie, a 600-pound sow that won fourth at Des Moines in 1905. In this pig we have the best thing that Mr. Podendorf has ever bred and he goes

with the rest on this occasion. One of the great sows in the offering is Iowa's Beauty. She is a grand sow from head to tail and is a show sow for next year. She was a winner at Des Moines in 1905 and 1906, and can go back again next year stronger than ever. Another good two-year-old sow is Valentine by Iowa Sunshine and out of Chief's Sister by Chief Tecumseh 2d. She has been a winner at the Iowa and Nebraska State Fairs and is a good one. She took second at Nebraska and fifth at the Iowa State Fair in 1905. Another good fall yearling sow is Iowa Belle out of a granddaughter of Chief Tecumseh 3d. Two of her sisters go in the sale with her. There are eight fall boars in the sale and six fall gilts, nearly all sired by old Iowa Sunshine. If our Poland China brothers want some of this great Sunshine blood they will have to be at Council Bluffs, Iowa, on October 12th, or send their bids, as there is going to be a good demand for this prize-winning blood. Write for catalog at once and mention The Homestead.

A New Short-horn Herd Bull for Rookwood Farm.

Rookwood Farm is the name of Prof. C. F. Curtiss' fine stock farm located some two miles from the Iowa Agricultural College, at Ames, Iowa. On this farm, which is Professor Curtiss' own private property, and has no connection with the state institution, is maintained the highest class and type of pure-bred stock to be found anywhere. Registered Short-horn cattle, Percheron horses and Berkshire hogs are the leading breeds at present represented. The splendid Short-horn bull British Glory has recently been selected by Professor Curtiss from Messrs. I. M. Forbes & Co., who imported this bull from Scotland. His sire was Pride of the Realm, a bull conceded to be one of the best ever imported. British Glory was shown nine times in the Illinois fair circuit, winning nine first prizes and three championships. This is unquestionably a great Short-horn bull. In fact, nothing short of such a bull would suffice to fill the artistic eye and satisfy the demands of as critical and competent a judge as Professor Curtiss. At the head of the Berkshire herd of swine is the great prize-winning boar University Lee, second prize-winner at the Ohio State Fair in a very strong ring, and sire of the grand championship pen of harrrows at last year's International. This fellow is an unusually good Berkshire boar. He is low down, blocky, stands on exceptionally strong, heavy bone, well up on his feet, has an unusual spring of rib, smooth, round shoulders and deep, full hams. As will be noted by the following lines of breeding, he is bred in the purple: His sire was Governor Lee 2d, bred by Messrs. I. M. Barker & Son; his dam was the celebrated sow Minnie's Girl; she was by Duke Lee, while Governor Lee 2d, s dam, Daisy Bell 2d, was by the great prize-winning boar Headlight. Rookwood Farm is now in position to offer a choice lot of young hogs and gilts, sired by University Lee. Farmers who wish to secure a Berkshire boar of the modern pork-barrel type will do well to write Rookwood Farm for prices and description. No better breeding can be found, and few as good individuals as are offered from this famous breeding establishment. The announcement will be found on page 42.

Lyndale Poland Chinas at Auction.

On Saturday, October 20th, at the Lyndale farm five miles north of King City, Mo., Mr. A. F. Graves, of that place, proprietor of the Lyndale herd of Poland Chinas, will make his first annual sale of boars and gilts. Mr. Graves has one of the finest live stock farms in America and has it stocked with as fine a lot of live stock as is often found. The Poland China herd has been established some three years. The best foundation stock to be had was purchased when founding the herd and careful management has done much to improve the quality of the offspring. Size was thought to be one of the requisites—and Mr. Graves made no mistake here—yet quality was not sacrificed for size and the writer knows of no place where more big, stretchy pigs are to be found than at Lyndale. With all the size and bone there is quality and a uniformity that is most pleasing to the lover of good hogs. The herd boars, Sunshine King 37352, got by I Am Sunshine 22400, the boar that sired so much of Messrs. W. T. Garrett & Son's high-selling stuff, and Tecumseh 4th, one of the good sons of old Tecumseh 2d, have certainly produced a line of stuff that should command the attention of all who are interested in the Poland China that has stood the test of time. Herd boar material can be had at Lyndale and those who need boars should not fail to be in attendance. The sow end of Mr. Graves' offering is without doubt one of the strongest offers to be found this fall. Fall gilts and spring gilts to the number of twenty-five head will be sold, and a better lot of the stuff would be hard to find. Next week when we have a catalog more will be said of the offering. We urge all our readers who are interested in Poland Chinas to write Mr. Graves for a catalog. Col. George P. Bellows will do the selling, and any bids to him will receive the most careful attention. See page 32 for advertisement and when writing Mr. Graves for catalog kindly mention this paper.

Cross Duroc Sale.

Messrs. L. W. Cross & Son, of Mason City, Ill., have an announcement on page 23 of this issue which should interest Duroc breeders. This firm have selected the tops of their herd for this sale. The offering is made up of fine tried brood sows, fifteen fall sows, seven spring boars and ten spring gilts. The spring pigs are mostly sired by Buddy T's Best, the third-prize boar pig at Illinois State Fair, 1905, and are a uniform lot. The tried sows are mostly sired by Indiana, a prize-winning boar. All through the offering is a good one and should be appreciated by breeders. Catalogs may be had by writing to Messrs. Cross & Son as per the announcement on page 23 of this issue. Kindly mention The Homestead when writing. Bids sent to Mr. D. M. Pierce, representing this paper, in care of Mr. Cross, will be properly handled.

GREAT - AUCTION - SALE!

OF

165 REGISTERED 165 HEREFORDS

Wednesday, Thursday and Friday, Oct. 17, 18, and 19.

WINTERMUTE'S BIG POLAND CHINA SALE BLOCKTON, IA., OCT. 16, '06

60 Head. 30 Boars and 30 Sows.

THE large, growthy, prolific kind, consisting of 6 fall yearling boars, 7 fall yearling gilts, 24 spring boars, 20 spring gilts, and 3 bred brood sows, one with litter at foot.

THE spring pigs are all sired by my 1,000 lb. boar Junho. They have size, length and bone. Eleven sows farrowed me 111 pigs last February and March. Sired by large boars and out of 500 and 600 lb. sows, with the greatest bone seen on a bunch this year, is the kind I am offering. Write for catalog, mentioning The Homestead. Address,

DUNCAN BROS., Aucts.

J. H. WINTERMUTE, Blockton, Ia.

J. O. James' Big Poland Chinas.

BRADYVILLE, IA., OCT. 11, 1906.

50 HEAD. THE GET OF THE GREAT BOAR PAWNEE LAD, MY 800 lb. BOAR, and BIG PROSPECT. Bone, 50
Size and Quality Here.

I am offering a fine string of Pawnee Lad yearling sows and these make great big, roomy brood sows. I have retained everything that was good for this sale—the very cream of my herd. Ten fall boars in sale sired by Pawnee Lad and Big Prospect. My spring boars have never been equaled for size, bone and quality in southern Iowa. Write for catalog.

I have reserved my best pigs for this sale. Will also sell my herd boar, Larchwood Echo. Catalog now ready. Address

Claud Huffman,

Scranton, Ia.

Southwestern Iowa Duroc-Jersey Sale Circuit

The cream of five of the best herds in southern Iowa will be sold in this Circuit Sale. The get of such great boars as Ohio Chief, Proud Advance, and other noted sires will be included in these sales. There will be some leading State Fair winners among the number offered and there are some great prospects for herd headers and show sows next year.

October 15th, A. L. & S. G. LYNCH,
MOUNT AYR, IA.

We are putting some very Choice Ohio Chief boars in our sale. There will be forty head in our offering, among which will be some choice yearlings. We think we are putting in as good a bunch of boars and sows as will be seen this fall. Write for catalog. Address,
A. L. & U. S. G. LYNCH, MT. AYR, IOWA.

October 16th, L. L. OVERHOLSER,
DIAGONAL, IA.

I am offering forty-two head of my tops in this sale. Everything has been reserved for this great event, and I can show you a bunch of boars and sows that are fit to go anywhere. Fifteen spring boars, twenty spring gilts, five sows with litter at side, one Orion Dandelion sow. Write for catalog. Address,
L. L. OVERHOLSER, DIAGONAL, IOWA.

October 17th, Z. J. GROUT,
TINGLEY, IA.

Forty head, including my very best spring boars and gilts, and some grand good sows will be offered for sale. I have reserved all of my tops for this sale, and they are good ones. Write for catalog at once. Address
Z. J. GROUT, TINGLEY, IOWA.

October 18th, WHITE & DEWEY,
SHANNON CITY, IA.

If you want Proud Advance males and females we have them in our sale. The most of our offering is sired by Proud Advance, and many of our show herd are included. We are selling forty head of our tops. Write for catalog. Address,
WHITE & DEWEY, SHANNON CITY, IA.

October 19th, GEO. R. MANIFOLD,
SHANNON CITY, IA.

My great Proud Advance litter, winners at the Iowa State Fair, goes into my sale. Thirty-five March and April gilts; eighteen March and April boars, and four fall yearling sows. If you want the very best, then make your arrangements to attend my sale. Write for catalog to
GEO. R. MANIFOLD, SHANNON CITY, IA.

SEND BIDS TO COL. F. F. LUTHER, FOR THE ENTIRE CIRCUIT OF SALES.

C. A. Wright's Sale of Duroc Jerseys.

About as interesting a catalog as has reached the writer's desk for some time is the Duroc Jersey sale catalog issued by C. A. Wright, of Rosendale, Mo., for his sale of Durocs to be held at his farm near Savannab, Mo., on Thursday, October 18, 1906. Mr. Wright has had experience in advertising, has always had stuff of merit to advertise, and when issuing this catalog he had hogs that deserved good advertising, and he has given them the benefit without over-estimating their value or merit. The writer has seen Mr. Wright's hogs and while the statements made in the catalog may seem rather strong, we are inclined to think all will say sale day that Mr. Wright has the goods just as advertised. No fancies or fads have been followed by him; he has simply gone ahead using the best of breeding stock, and cared for his hogs in such a manner as to obtain best results. This year was his first trip to the big show at Des Moines, Iowa, where he won seventh place on boar under six months, with sixty-one pigs showing. On young herd, boar and three sows bred by exhibitor, Wright's herd landed in seventh place—not at all a bad showing for the first trip out, and among 1,000 head of hogs, mostly fitted by old show men. As Mr. Wright will not make a bred sow sale he has listed his absolute tops and it will pay anyone wanting sows to be on hand. In boars he has listed a strong lot, including the two herd boars, Larchwood King and Challenger. They are a pair of good breeding boars and sired by Mr. Wright's winners and the majority of the sale stuff. Those wanting spring boars should look up Nos. 44 and 45. No. 44 is a February pig that was second prize over six and under twelve months pig at the Interstate show at St. Joe, Mo. No. 44 won second in under six months class at same show. While these are good, it is our opinion that Mr. Wright has other boars equally as good if not the superior of these. While at the Iowa State Fair Mr. Wright bought the yearling, Butler Orion 48579 (N.), to head his herd and all sows that sell for \$50 and over can be left at Mr. Wright's to be bred to this hog free of charge. Here is an offer seldom equaled, as it will give buyers a chance to secure the blood of Orion Chief through a boar that looks like a good breeding hog, as well as a good individual. In next week's issue more will be said of this hog and the sows that go in Mr. Wright's sale. Send today for a catalog, which tells all about the hogs and how to reach the farm. Kindly remember to mention The Homestead when writing.

Last Call for Williams' Short-horn Sale.

On October 8th, at Oakland, Iowa, Mr. R. E. Williams, Jr., will sell a draft of forty head of Short-horn cattle, composed of a choice lot of young bulls and cows and heifers. He is selling seventeen yearling and two-year-old heifers, and these would make a nucleus for some man to start a nice little herd of Short-horns. All the cows that he sells will have calf at foot except four, and these are well along in calf to his herd bull, Grand Champion 151483. The eight yearling bulls that go into this sale are lusty, well-developed fellows and are in prime condition to do good service. They are all sired by Prince Aldrie, a bull bred by the well-known breeder, Mr. B. G. Stark, of Livermore, Iowa, and used successfully in the Williams herd. His offering is very largely composed of Rose of Sharons, Arabella, Lady Elizabeth, Young Mary and White Rose families. These cattle are the practical and money-making Short-horns and they are now sold because Mr. Williams' herd has outgrown his pastures. In his catalog Mr. Williams says: "I am selling breeding cattle in breeding condition and guaranteeing everything sold to be a breeder. Cows having calves at side will be considered breeders." All the cows will have calf at side or will be bred to Grand Champion, his present herd bull. He is a well-bred Duchess of Gloster bull and was bred by Messrs. T. J. Ryan & Son. His dam was the 62d Duchess of Gloster, a daughter of old King James and his granddam was Imp. 33d Duchess of Gloster by the Chulckshank

bull, Gondolier. Remember the date, October 8th, at Oakland, Iowa, and don't fail to attend if you want a few good cows or heifers or a young bull.

Prominent Sale of Angus Cattle.

On October 19th, at Hartwick, Iowa, Messrs. M. D. & C. G. Korn and Wm. Dickson, of Hartwick, Iowa, associated with Messrs. U. S. Grant, of Brooklyn, A. H. Kimble, of Ladora, and H. H. Reed, of Marengo, Iowa, will hold a combination sale of registered Angus cattle at the beautiful farm home of Mr. M. D. Korn, one mile from Hartwick. There are some forty-five head of cattle in the sale, mostly from the Korn herd, with small contributions made by the other named gentlemen. Among the families represented are Blackbirds, Queen Mothers, Prides, Drumin Lucys, Alicias, Kinchoy Favorites, Miss Copelands, Lady Franklins, etc. The leading herds bulls that have been recently used on the Korn herd have been Royal Blackcap 3d, Blackwood Jim and Gay Blackbird Jr. Two of these are of the famous and ever-popular Blackbird family. There are several good heifers and four choice young bulls sired by Royal Blackcap 3d, which, by the way, was an International winner in 1903, this being the only time that he was ever exhibited. He was sired by the great son of Jim Jam, Black Jam. Black Jam was bred by Messrs. J. Evans, Jr., & Son, of Emerson, Iowa, and sold by them to Messrs. M. A. Martin & Son, of Wall Lake, Iowa, and at the time of their dispersion sale, he was sold to Messrs. Lantz of Carlock, Ill., where he has made an enviable reputation for himself and the breed. Thus it will be seen that the bulls heading the Korn herd have been of more than ordinary note. Mr. L. Kimball consigns a few choice females bred to a son of Black Roselawn. He is also offering a choice Pride cow, not that he cares to spare her, but simply as an attraction. Mr. Grant is making a small consignment, largely of his own breeding, and taken all in all the offering is one that should command the attention of Angus breeders and the farmers of the middle West. It is doubtful if any Angus sale held in this part of the state affords buyers a better opportunity to secure practical, useful Angus cattle that will be presented in their everyday clothes. It has been the aim of all these breeders associated in this sale to present a business lot of useful cattle that would do the buyer much good and stimulate a future demand for the surplus cattle bred on these farms. Mr. M. D. Korn showed the writer over his herd recently and gave him a bit of history concerning how rapidly certain families have propagated themselves, also pointing out many very heavy-milking cows, this being a point that should not be lost sight of by the beginners who are seeking to establish a herd, not only on the market-topping doddie, but if any other of the beef breeds, for it has been often said by our wisest and most experienced breeders of pure-bred cattle that without exception their heaviest milkers have been their best producers. By the time this reaches our readers we hope to have the complete catalog from which we can give more detailed mention in our issue of October 11th. In the meantime it will be in order to make application for this catalog to Mr. C. G. Korn, of Hartwick, Iowa.

Wintermute's Big Polands.

If our readers who are wanting the big-boned Poland Chinas will only attend the sale of Mr. J. H. Wintermute, at Blockton, Iowa, they will be able to buy what they want. He is selling sixty head, ten head of fall yearling and aged sows, twenty head of spring gilts and the rest spring and fall boars. The greater part of the young stuff will be sired by his 1,000-pound hog, Jumbo 37811, and out of sows weighing from 600 to 700 pounds. He sells a fall boar in this sale, a son of Mr. Fred Rood's great brood sow, Glantess. Those breeders who want none, plenty of size and great length of body can find in the Wintermute sale just what they are after. Write for his catalog and see what he has to offer. Mention The Homestead when doing so.

THE OPPORTUNITY PRESENTED

Blain's Big Poland China Hogs

The Breeder's Friend **50** HEAD of TOPS SELECTED **50** The Farmer's Friend
SIZE---BONE---FEET---QUALITY.

To Be Offered

OCTOBER 17th, 1906, at PAWNEE, NEB.

My offerings have topped all sales on spring pigs in Nebraska. Have shipped hogs to all parts of the United States. Have furnished many noted herd headers. My offering will be up to past sales held by myself. I feel confident the buyer will be well repaid for his trouble. The farmer demands a hog with size and vitality, as well as hogs that sire and produce large litters. The boars are in good breeding condition. The sows are as choice as the boars. The opportunity is presented. Look up field note elsewhere. Catalog now ready. G. W. Segrist will represent this paper.

Schaefer & Son's Short-horn Sale.

At Raleigh, Iowa, on October 17th, Messrs. F. A. Schaefer & Son will sell a draft of fifty head of richly-bred Short-horn cattle at their farm near town. There will be forty females and ten bulls in the sale and among these will be some well-bred Scotch cattle of both sexes. Altogether there will be about sixteen head of Scotch cattle, including the great imported cow, Celia 9th, and Duchess of Gloster 47th, a daughter of Imp. King James. The latter cow is bred to his Cruickshank bull, Choice of Archers. This cow has four of the very best imported sires at the top of her pedigree and she is one of the most richly-bred Duchesses of Gloster cows to be found in the state. Imp. Celia 9th is a beautiful light roan cow, and was bred by Mr. Geo. Campbell, Kinnellar, Aberdeenshire, Scotland, and she is a daughter of the Duthie-bred bull, Proud Star. She is a Miss Ramsden and a good one and is one of the great attractions in the Schaefer sale. She is safe in calf to Choice of Archers. Another good Scotch cow is Orange Lilly, a daughter of Godoy Butterfly and out of Orange Lassie by Imp. Master of the Rolls. She is in calf since May to Choice of Archers. Geranium 6th and Geranium 7th are two nicely-bred Gwendoline heifers, both sired by Golden Robin 204220. They are both out of Geranium 3d, a daughter of the Crawford-bred bull, Aberdeen. The first of these is bred to Choice of Archers. There will also be two nicely-bred Orange Blossoms among the good heifers that go into the sale. There is a good young heifer in this sale that is sired by Imp. Nonpareil and another by Golden Robin and both of these are out of Imp. Lady Laura 12th by the Marr-bred bull, Statesman. There are other good Scotch cattle in the sale, representing the Duchess of Gloster, Campbell Mina, Gwendoline, Orange Blossom, Miss Ramsden and Butterfly families, and our very best breeders can find foundation material for their herds in this sale. Quite a per cent of the sale offering will have calf at foot or will be well along in calf to their present Scotch bull, Choice of Archers, one of the best bred bulls and one of the best individuals among the younger Scotch bulls in northern Iowa. He is a son of Imp. Master Archer and out of Carmencita, a daughter of the Harris-bred bull, Gaveston. His second dam is by the Cruickshank bull, Gondolier, then comes Dunblane, Roan Gauntlet, Scotland's Pride and Lancaster Royal. The sire of this bull, Imp. Master Archer, was by the great Best of Archers, and he was also a full brother to Ceremonious Archer, now at the head of the Lowden herd at Mississippi Stock Farm. One of the best young bulls in the sale will be sired by him and will be out of Sittytton Lass by Sittytton Hero. He is a very low-down, thickly-made fellow and he resembles his sire in many ways. He is a red in color and belongs to the Louisa family that has been noted for the many good things that have come from that particular strain of Short-horns. They are also cataloging their Scotch bull, Bridal Archer, a thickly-made bull that they have been using at the head of their herd. They have issued a nicely-printed catalog and well illustrated for the occasion and will be

pleased to mail it to all those who ask for it. Kindly mention The Homestead when sending for it.

Erschen's Duroc Sale.

Mr. F. M. Erschen, of Odell, Ill., is offering an excellent lot of spring pigs for sale in his forthcoming auction, to be held on Thursday, October 11th. We wish this week to call attention to a few of the attractions of the offering. Long Duke is a spring yearling boar that has proven himself a good sire. He was sired by Longtellow 6815 (A) and his dam was Bright Star II. by Echo King. This sow was also the dam of Hanley, and Long Duke is a good deal the same type as that noted show and breeding boar. A fall yearling gilt is safe in pig to service of Long Duke and breeders in search of something good should not overlook this opportunity to get a good herd boar. The spring pigs are mostly sired by Just One 41977, he by Odell Boy; Comet, he by Gold Finch and out of an Oom Paul sow; Frank's Choice by Stoner's Improver. This boar is a litter brother to Fashion Boy, the sire of the highest priced gilt in Messrs. Deal & Schweizer's spring sale. A litter which is deserving of special mention is sired by Just One and is out of May Roberts 89022 by He's a Hero 11743. This sow came from the Wm. Roberts' herd and has produced some extra good things for Mr. Erschen. A litter by Tip Top Notcher and out of Rose O'Grady S. is one that will please buyers. Mr. Erschen is sending into the sale ring a fine lot of stuff and is deserving of the support of the best breeders, as he has been a liberal buyer in the best sales of the past season. Bids sent to Mr. D. M. Pierce in care of Mr. Erschen will be properly handled. Write for catalog at once, kindly mentioning The Homestead, as per advertisement on page 37, and arrange to be present sale day.

At the Oxley sale to be held at Bedford, Iowa, October 12th, will be some of the best cattle of the breed offered. These cattle will all be sold, as Mr. Oxley has recently gone into the hardware business and won't be able to give the stock the personal attention they deserve. In selling this herd it is with much reluctance on the part of Mr. Oxley. In looking over the catalog you will see the best blood of such noted animals as Hugh Elliott, McHenry's Blackbird, McHenry's Allen and plenty of other good sires and dams. In the consignment are thirty-eight cows, some with calves at foot, and fifteen good young bulls, including the herd bull, Hugh Lee, a good bull with all the beef points of a typical Angus. This sale is to be held under cover, and is the only pure-bred Aberdeen Angus cattle to be sold in southern Iowa this season. Some of these cows recently cost \$300. Breeders, farmers and anyone with the least intentions of purchasing cattle, should go to this sale, as everything is going to be sold without reserve or by-bid and all cattle will be put on the cars free of charge. The catalogs are ready. Address Mr. Geo. N. Oxley, or Roy Chambers, sale manager, Gravity, Iowa. Col. Silas Igo, and assistants, auctioneers.

... PUBLIC SALE ... OF REGISTERED SHORT-HORN CATTLE — AND HIGH GRADES —

I WILL offer at my farm two and one-half miles northeast of Newton, Iowa, on October 8, 1906, twenty-two head of registered Short-horn cattle, eleven yearling bulls and eleven cows, six of which have calves at foot, the remaining bred to the Cruickshank bull, Victor Alexander 2d. I will also sell twenty high-grade Short-horns, fifteen cows and heifers, all bred, and five steers. This will be the farmers' opportunity of a lifetime. Address for catalog

GEO. A. HANS, - NEWTON, IOWA.
COL. AL P. MASON, AUCTIONEER.

50 HEAD OF TOP DUROC-JERSEYS SELL AT AUCTION JOY, ILLINOIS, OCTOBER 16th, 1906.

Thirty spring boar pigs, good enough to head any herd, five summer and fall yearling boars that are sensational, ten fall gilts that will make sale toppers next winter. A few choice sows with litters by their sides. The spring pigs in this sale are sired by Desota's Model (the Kansas State Fair winner), Iowa Plummer, Prairie Acrobat, Champion Paul, Major R., Proud Advance and Tip Top Notcher. A FEW OF OUR SPECIALS—A summer gilt by Iowa Plummer out of Roycroft Interstate is an extra good one. Another good one by Iowa Plummer is out of Prairie Fancy. This is a very handsome sow, broad, long and square. She has a litter brother that is a great prospect. Plummer's Winner by Iowa Plummer out of Prairie Winner by Indiana is a fall boar that is phenomenal both in breeding and individuality. Three boars by Desota's model, out of Stoner Girl (the top of the Stoner fall sale) by Tip Top Notcher. A fine litter by Champion Paul out of Prairie Top Notcher by Tip Top Notcher that are something extra. One spring boar by Tip Top Notcher out of Daisy Kruger by Kruger. Here is a herd header. Another litter by Major R. out of McCabe's Dream by A Top Notcher, and a fine litter by Proud Advance. Write for one of the catalogs at once, mentioning The Homestead. Send bids to D. M. Pierce, representing The Homestead, in my care.

CHOICE-OF-THE-RING 187237.

One of the best sons of First-in-the-Ring, out of Imp. Proud Fancy, one of the great producing daughters of Pride of Morning, gave Mr. Wood many of his best cattle. She sold for \$1,000 at the last Woodland sale to Colonel Lowden, for permanent service at Sinissippi.

CONSISTING of imported and home bred Scotch, Scotch Topped and pure Bates sorts, including the get of Imported First-in-the-Ring 162100 (sire of Master-of-the-Ring sold for \$1,705; Choice-of-The-Ring sold for \$1,550, and Lord-of-The-Ring for \$1,000, the three highest priced bulls, the get of one sire, bred and sold in United States in 1902). Choice-of-The-Ring 187237, Nominee (champion over all breeds at Omaha 1898), Imported Scotsman 195-164, Bapton Admiral 157-704, Scottish King 177889, Imported Scotch Mist 157-620, Woodland Sultan 214-546, and other noted bulls.

W. I. WOOD,

**Col. Woods, Barclay & Urton,
Auctioneers.**

WILLIAMSPORT, O.

Bulls in Woodland Dispersion

The Short-horn breeder who is in search of a herd bull will find in the Woodland dispersion sale, to be held on Thursday, October 18th, at Washington C. H., Ohio, the kind that will suit the most discriminating buyer. A dispersal sale, as is well known, gives to the breeder an opportunity to secure at his own figure animals that under any other circumstances could not be priced. Every noted herd has at the head a bull of rich breeding and rare individuality, as well as the ability to produce the class of cattle which have gained for the herd the reputation it sustains. In the case of Woodland herd, the property of Mr. W. I. Wood and his sister, no bull has ever done more to bring credit upon the herd than has Imp. First-in-the-Ring. His sire, Ringleader, was considered by many the best bull ever bred by Mr. Duthie. He was the sire of more prize-winning fat cattle in the British shows than any other bull. The dam of Imp. First-in-the-Ring was First Strawberry. Of this grand matron Mr. Duthie has the following to say in his 1905 catalog: "First Strawberry is dam of First Favorite, sold at 1897 sale for 200 guineas, and Mr. Wood's (Ohio) great stock bull, First-in-the-Ring, the sire of Master-of-the-Ring and Choice-of-the-Ring, which topped the American sales in Ohio, 1902; also of Mr. Bruce's (Heatherwick) bull, First Fiddle, winner of first and champion at Inverurie this year. Her last year's calf won for Mr. Rowland Wood first at the Northamptonshire show and first at the Short-horn Society's £10 prize at the Huntingdonshire show." She was also dam of Royal Choice sold in this October, 1905, sale for £420, or \$2,100. Mr. Wood rates Imp. First-in-the-Ring as one of the best breeding bulls in America. His get have always sold readily at remunerative prices and breeders should aim to secure a cow bred to this famous bull. We quote from a former catalog the following in regard to First-in-the-Ring: "First-in-the-Ring was never considered or thought of as an ideal show bull, or never fitted for show. His strong points are his well-spread ribs, deep length and thick body on fine bone, with a model head, a bright and 'quick-as-a-wink' eye, a great and sure indication of a good feeder. These strong points, along with his ability to stamp his progeny with his strong points, make them easily distinguishable among many cattle. Proof of this is to see his get, namely: Master-of-the-Ring 171376, sold for 1,705 at twenty months; Choice-of-the-Ring 187237, sold for 1,550 at twelve months; Lord-of-the-Ring 187238, sold for \$1,000 at sixteen months; Lord Russell, sold for \$600; First Emperor, sold for \$400; Thanksgiving, sold for \$400; Pride-of-the-Ring, sold for \$375; Chief-of-the-Ring, sold for \$295; Queen-of-the-Ring, heifer, sold for \$405; Rose-of-the-Ring, heifer, sold for \$305; and many others at from \$100 to \$295; also one cow and calf at foot for \$2,030, with others at \$1,100, \$625, etc., on down, making a strong record for a sire that only had a limited number of Scotch cows. Many of these were out of dams of plain-bred American sorts of the useful kind. Another gratifying fact is that the young First-in-the-Ring bulls are without exception giving their owners satisfaction." Next to First-in-the-Ring comes Choice-of-the-Ring. He was sired by First-in-the-Ring and was out of Imp. Proud Fancy, one of the best

producing daughters of Pride of Morning, that gave Mr. Wood many of his best cattle. She was sold for \$1,000 to Colonel Lowden for permanent service in his noted Sinissippi herd, at the last Woodland sale. Choice-of-the-Ring has sired some of the best heifers that are included in the sale. His pedigree cannot be improved and individually he is fit to head any herd. A roan in color, with strong, masculine head, very deep with good, level lines, great length and smoothness, Choice-of-the-Ring should please the breeder who is looking for a herd bull to use on good cows. Woodland Coronet, the third bull in service at Woodland, is a son of Bapton Coronet, a bull used with much success by the late C. L. Gerlaugh. Bapton Coronet was one of the best sons of the noted Silver Plate, a prize winner in many of the leading shows. The dam of Woodland Coronet is Imp. Scottish Nell, she by the Marr-bred bull, Scottish Champion. These herd bulls have done much for Mr. Wood and should be equally well for breeders who are in search of something good, both as regards pedigree and individuality. The younger bulls are in prime condition. They comprise a select lot and afford those who are seeking herd headers an unexcelled opportunity to secure the get of noted sires at their own figures. Mr. Wood's catalog contains numerous photographs of the cattle to be sold and should be in the hands of every breeder. Look up the advertisement on this page and write for catalog at once, kindly mentioning this paper. Further particulars will appear in these columns next week. Arrange to attend this noted sale.

Galloway Auction at American Royal.

Corn-belt and western breeders of Galloways have consigned a choice lot of females to the Galloway sale to be held under the auspices of the American Galloway Breeders' Association, October 11th, during the American Royal. The offering is not as large as has been in evidence in past years; however, the quality is very much superior. Thirteen of the cows will have calves at foot the day of the sale and several of them are bred again and are safe in calf. The remainder of the females are all bred and well along in calf. The entire offering consists of females in the prime of their usefulness and a large number of the cows have calves at foot; thus it should appeal to those desiring to purchase something that will grow into money rapidly. Mr. A. M. Thompson has contributed seven superb young cows. Two of them have fine hull calves at foot by Caleb Miller, which are recorded as Royal Boy and Choice of Nashua. Mr. Thompson has also put in his noted show cow, Highland Mary. She is one of the best breeding cows ever retained in the Nashua herd. She was purchased at the Lowe dispersion sale as a yearling when cattle were selling at very low prices, for \$825. The Clay Woods offering consists of three cows with calves at foot. Two of these are richly-bred young cows and both have fine hull calves at foot, six months old, and are bred again to Standard Royal, a son of Scottish Standard 15221. Scottish Rosalind, a Brookside-bred cow—the only Scottish Standard cow in the sale—has a fine hull calf at foot nearly a year old by the famous Brookside show hull, Chief 3d of Castlemilk,

and she is bred again. Messrs. Brown & Son have put in a very useful cow with a bull calf at foot by a bull that won second prize at the American Royal in 1905, and she was bred again to the bull that won second prize at the International in 1905. The other two females included by Messrs. Brown & Son are very choice and are well along in calf to the great show bull, Chief 2d of Stepford. The Michigan Premium Stock Company have consigned two cows that will have calves in November. Mr. Claude Attebery has contributed five choice female lots. They are all cows with calves at foot and several of them are bred again. Messrs. Matson, Bales and Wild have each consigned their show cows and Mr. Croft has sent forward his superb show cow, Miss Midget, and calf. Seldom has the association been fortunate enough to catalog such a choice collection of superior cows and heifers. The large number of cows with calves at foot is an attraction that should appeal to the breeder, farmer and stockman. This will be the only opportunity of the season for breeders to secure females to strengthen their herds. Those desiring to procure females that possess the best blood of the breed should arrange to attend the auction and obtain their wants at public prices. For catalogs and further information address Mr. Charles Gray, 17 Exchange Avenue, Chicago, Ill.

A Very Liberal Offer Made By This Well-known Firm.

The sale of Durocs to be held at College View, Neb., on October 16th, by Messrs. J. M. Morrison & Son, promises to be one of choice stock with good breeding and backed by a herd of ribbon eaters. This firm have made this wonderful offer to the breeders in general: Any sow selling for the sum of \$100 will entitle the purchaser to the free service of the great show and breeding boar, Kant Be Beat. This offer is an extremely liberal one, taking into consideration that the hogs sold by this firm are all worthy ones and from one of the greatest herds of ribbon eaters known to the breed. The offering alone carries as much quality and finish as you would ask to see in any herd. Messrs. Morrison & Son will have the best lot of pigs ever placed in a sale by them and it is up to the breeders to attend if they want choice stock. We could go back over the herd's great list of show sows, but will not take the space, as every breeder, as well as reader of farm journals has heard of this firm. Where can you find more show blood than will be offered here? Mr. Morrison started the show going by working up Interget in the great Ohio Chief. He has used this great hog in the herd and has as good a chance to have great returns as any man breeding hogs today. Ohio Chief should have made good in this herd if he ever did, and we are of the opinion that you will find them here. Fifteen husky hoars sired by Ohio Chief and out of the following sows should count for something: Village Pride by Improver 2d, Lady Top Notcher, Miss Bob (dam of Dan Patch and several good sows) and more of the good ones in the herd. Morrison's Bell Top comes in for his credit as a breeder. His pigs are very good and come from choice sows. They are big, strapping fellows and will make good herd headers and

valuable brood sows. There will be a litter by Pericles and out of a litter sister to Glendale Critic and a full sister to Crimson Wonder. We will not give a complete description of the entire offering in this issue, but will do so next week. We might add that the great Kant Be Beat has some of his get represented at the Ohio State Fair and won eleven firsts, eight seconds and four thirds. You will see how they get along when shown. The sale will be far the best offering ever shown by these gentlemen, and you are to be the lucky ones. Write for the catalog and post yourself. If unable to attend this sale send bids to Mr. G. W. Segrist, representing this paper. Remember you get an opportunity to buy from one of the greatest herds of great sows of this breed. If any breeder has license to get good ones from his crosses it should rest with our friends, Messrs. Morrison & Son, of College View, Neb. Don't forget the date.

Richly-bred Angus in the American Royal Sale.

The attention of breeders is called to the double Blackbird bull, Black Knight of Highland 5th, to be sold in the Aberdeen Angus Association sale at Kansas City, October 9th. This youngster was calved Jan. 1, 1905, was got by Imp. Blackbird Baron of Advie, a son of the noted Erica bull, Ephesian, and the Blackbird cow, Black Ida of Advie, by Kidnapper, the sire of the celebrated champion, Minx of Glamis. The imported sire represents the best of Ballindalloch blood and the dam of Black Knight of Highland 5th, Blackbird of Highland, is a daughter of Blackbird of Turlington 8th, the maternal granddam of Black Monarch of Emerson, the celebrated champion sire. It would indeed be difficult to find a better-bred Blackbird bull and we understand his individuality also entitles him to claims as a herd header. This bull is cataloged by Mr. T. J. McCreary, of Highland, Kan., and he also includes another yearling son of Imp. Blackbird Baron of Advie, King McCreary 4th, a Queen Mother descending from a line of prize-winning dams, and whose dam was got by the double Blackbird bull, Highland Hero, a full brother to the dam of Black Monarch of Emerson. Mr. W. J. Miller, of Newton, Iowa, consigns the show cow, Metz Ogarta, a daughter of the Blackbird-topped Rosebud bull, Wabash of Treaty. He also includes the yearling Drumlin Lucy bull, Elaine's Prince, by the Queen Mother bull, Black Prince of Estill, a son of Imp. Prince of Kerrera, and Lucia Estill 2d, a sister to Gay Lad. Elaine's Prince was from a dam by the noted Blackbird bull, Black Jam. Mr. W. F. Eckles, of Green City, Mo., consigns the get of the double Pride bull, Pride's Albion 5th, by the noted Pride of Albion. Messrs. McAdam Bros., of Holton, Kan., include a good two-year-old bull of the Kinnaid Fanny family and topped with the blood of the Prides, Ericas and Heather Blooms. The offering is not large, but is believed to be the best that has been made at Kansas City in several years and it furnishes an opportunity to obtain there some of the best specimens of the breed. The catalog can be obtained by addressing Mr. W. C. McGarock, Mgr., Springfield, Ill.

Closing Out Aberdeen-Angus Sale

AT BEDFORD, IA., FRIDAY, Oct. 12, '06

I AM closing out my entire herd of cattle, among which will be some of the best families known to the Aberdeen-Angus breed. Some good Rathbun, Drumlin, Lucy and Westertown lines will be found in the sale. It will be one of the best opportunities of the year to buy Angus cattle. Sale under cover. Catalog sent on application to G. N. Oxley, Gravity, Ia.

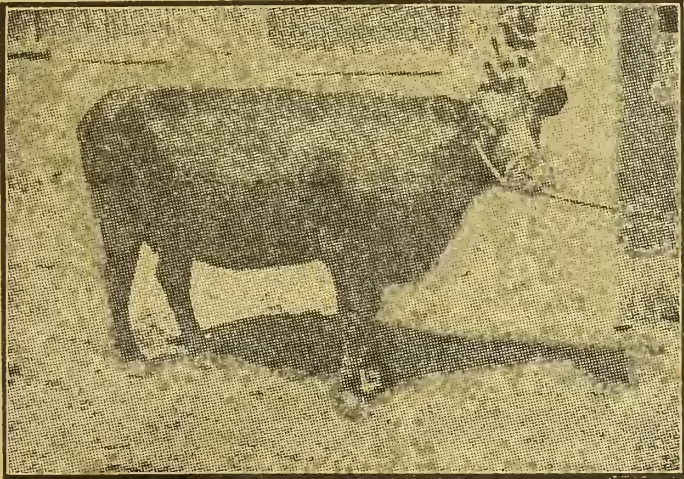

50

Head of cows and heifers, some with calves at foot and 7 bulls.
SILAS IGO and PIPER BROS., Auctioneers.

Last Call for Lanaghan Bros.' Sale of Short-horn Cattle.

The sale catalog has just come to our desk for Messrs. Lanaghan Bros.' sale of Short-horn cattle and Poland China hogs, to be held at their Lakeview farm, one and one-half miles west of Goose Lake, and three miles east of Charlotte, Clinton county, Iowa, on October 11th. This offering furnishes a splendid opportunity for those who contemplate the purchase of Short-horn cattle this fall, to find Short-horn cattle to their liking. Previous issues of The Homestead have contained articles that dwell at length on the quality of the herd bulls in use in this famous herd, namely: Sentinel, Imp. Royal Archer and Imp. Merry Hampton. Since the sale date has been claimed, some splendid

prize in his class and silver medal, as well as the two gold medals, for the best Short-horn bull, and H. R. H., the Prince of Wales gold medal, as champion bull of the breed at the Highland Agricultural Society's show at Edinburgh. The second sire was the Dublin bull Golden Ray, a son of the great Scottish Archer. This young bull, Hampton's Favorite, is sufficiently well bred to find a place in any herd in America. On page 35 will be found this bull's pedigree down to and including the imported cow. Below that, the breeders are Bruce, Cruickshank, Torr, Sterling and Smith. Inasmuch as this is our last opportunity to divert attention to this important sale, we would remind our readers that it is high time they were making application for a catalog, in case they are at all interested in this sale. In addition to the many good females

IMP. GLAD TIDINGS 3d.

This is one of the good Short-horn cows in the sale of Mr. Ira Cottingham, of Eden, Ill., which will be held in the new pavilion on his farm, two miles from Eden, October 9th. Imp. Glad Tidings 3d is a five-year-old cow by Prince of Beauty of the noted Diamond family. She has produced a heifer calf every eleven months since she was two years old and was bred February 20th last to Darnley's Best. Her blood lines are of the richest and she is a good individual. She will be sold along with thirty-four other good ones on the date above mentioned. The advertisement of Mr. Cottingham will be found on page 43 of this issue. Catalogs are now ready and will be mailed on application to Mr. Ira Cottingham, Eden, Ill.

cows of Scotch extraction have been listed for the sale that were not at first intended to go in this offering. One of these is Lot 10, Lady Alice. She was got by Baron Secret and her dam by Captain of Maine Valley. She traces direct to Imp. Lady Eden. This is a very large, growthy three-year-old cow, due to calve by sale time. She is one of the best things in the offering and is an attraction to any sale. Lot 11 is Park Queen. She belongs to the same family, and has some of the best Scotch bulls in the top of her pedigree to be found anywhere, namely: Baron Secret, Duke of Gloster, Imp. Confessor, Imp. Royal Hampton and Imp. Stanley. This is a very good and regular breeder, is six years old and sells with bull calf at foot. These Lady Edens or Fisher's Roans have produced some of the very best cattle in America. While the foundation was of English blood, many of them are nearer Scotch than the more recently imported Scotch cattle. Lot 12 is Lily O. K., sired by Baron O. K. She is topped off by practically the same Scotch bulls as Park Queen. She is a beautiful two-year-old red heifer, well forward in calf, and belongs to the old-established Lavinia family. Lily Scott by Young Scotchman is a handsome red four-year-old cow that sells with a beautiful calf at foot. Aside from the top sire, she is bred identically as Lily O. K., and belongs to the same prominent Lavinia family. Any of the above cows mentioned will be queens wherever they may go. As has been before stated, it was only recently that these cows were listed for the sale, and this was done in order to make the sale more attractive, and not because Messrs. Lanaghan Bros. cared to part with this class of stock from their herd. A splendid Scotch bull is offered in Lot 49, Hampton's Lad. This bull was sired by Imp. Merry Hampton and out of Duchess of Niagara 17th by Spartan Royal, he is a son of Imp. Spartan Hero. Spartan Royal's dam was that great cow of national renown, Imp. Princess Royal 6th by Border Chief. Much of the highest-priced Short-horn blood known to the breed on either continent will be found in this bull's pedigree. He is a roan, calved October 30, 1904. He has been used the past season, and has proved himself a sure breeder. Here is an opportunity to secure a splendid son of that illustrious sire Imp. Merry Hampton. Lot 46 of the sale catalog is Hampton's Favorite. This is a red bull, calved December 9, 1904, consigned by Mr. Frank Hunter. He is a straight Scotch bull. He also was sired by Imp. Merry Hampton and out of Imp. Golden Rose 4th; she by Cornelius. Cornelius was a Cruickshank Clipper bull, and a full brother to the undefeated Scotch bull Corner Stone, winner of first

and bulls to be sold, there is also another attraction because of the fact that four sons of the great Imp. Merry Hampton will be sold in this offering. We know of no other such opportunity to secure bulls sired by this famous old Short-horn bull, considered in his day of bloom to be the best Short-horn bull in America, from an individual standpoint. Mr. C. B. Duston scoured all Scotland in search of the best bull there, and selected Merry Hampton as that bull. Messrs. Lanaghan Bros. will be pleased to meet all Short-horn breeders and others interested in the breed, at their farm, on Thursday, October 11th, at which time Col. Griff Johnson will give them an opportunity to secure these cattle at whatever price they may see fit to place. We should have stated that the offering also includes Lanaghan Bros.' entire show herd of the year, with two exceptions.

Pleasant Grove Durocs.

Messrs. Hanks & Bishop, of New London, Iowa, proprietors of the Pleasant Grove herd of Duroc Jersey swine, write as follows: "We are now offering a fine bunch of males sired by such boars as Top Notcher Again, Proud Advance, Indiana Boy, Mayor Jr. and others of equal merit. If Homestead readers are looking for large, growthy hogs, backed by breeding and individuality, we have them. We have four by Top Notcher Again, dam by Indicator; two, dam by Buddy K. IV. (first and sweepstakes at the Illinois State Fair), sired by Mayor Jr., first in class at the same show. We also have others of equal breeding that are just as good. Satisfaction guaranteed." See advertisement on page 46.

Dorr's Tecumsehs.

Mr. Henry Dor, of Remsen, Iowa, in sending in change of copy for his Poland China advertisement, writes: "Hogs are doing well and are filling out to my entire satisfaction, and are the long, heavy-boned fellows. I have a splendid fall boar for sale, farrowed September 14th. He is sired by Tecumseh Keep On and is out of Miss Chief, one of my very best brood sows. Dor's Tecumseh weighs 690 pounds at not quite eighteen months of age, and is as smooth as a pig. I know I can suit most any man who wants a good, lengthy, heavy-boned pig." As Mr. Dor is one of the reliable Poland China breeders in the state we do not hesitate to urge our readers to buy of him, and we know that they will get a square deal and a good bargain for their money.

JOINT SALE HEREFORD CATTLE to be held on THE SUNNY SLOPE STOCK FARM. LAKE VIEW, IA., OCT. 11, 1906.

40---Recorded Herefords. 10 bulls, 30 females---40

All but about ten of the females are of breeding age and will have calves at foot or bred to have calves soon; the rest of the females are too young to breed yet. There will be no old cows offered. In the bull class there will be two aged bulls that have proved their worth as breeders. Their calves will be offered in the ring, showing what they can produce. The rest of the bulls are of serviceable age and good ones. Some of these cattle to be sold were shown at Sioux City this season without any fitting and won premiums in every class shown in. Sale will be held in seated tent, no postponement on account of weather. Place of sale only four blocks from C. & N. W. depot. Parties coming over the Illinois Central will be met at South Wall Lake.

Mr. Green is dispersing his entire herd without reserve. All of the cattle offered are in fine breeding condition, none spoiled by fitting. Send for catalog to Ben Broughton, Lake View, Iowa, or F. J. Green, Early, Iowa.

F. J. GREEN and BEN BROUGHTON, Proprietors.
COLS. GARY M. JONES, E. P. LAYMAN, W. T. THOMPSON, AUCTIONEERS.

ERSCHEN'S FALL DUROC JERSEY SALE. ODELL, ILL., OCTOBER 11, 1906.

THE offering will consist of spring boars and gilts, forty head, mostly sired by Comet 25965, he by the International winner Gold Finch, his dam by the noted breeding and showyard boar Oom Paul; Frank's Choice, he by Stoner's Improver, his dam Daisy Muller, a winner at 1903 International. Attractions: Litter by Tip Top Notcher, grand champion boar World's Fair; Litter by Buddy K IV 1st and sweepstakes boar Illinois State Fair 1905; Long Duke 4239, yearling boar by Longfellow and out of Bright Star II, the dam of Hanley. Quality with breeding predominates the offering. Write for catalog.

F. M. ERSCHEN, Col. Reppert and Kell, Auctioneers. **ODELL, ILL.**
Send bids to Mr. D. M. Pierce in my care.

THE PRIZE WINNING Duroc Jersey Sale of the Season. PORTSMOUTH, IA., OCT. 9, 1906.

I am offering 40 head in my sale, 35 BOARS and 5 GILTS, sired by the following noted boars:

Crimson Wonder I Am 2d, 3rd prize boar at Des Moines this year in the strongest yearling show ever seen at the state fair.
Tip Top Notcher, the sweepstakes boar at the great World's Fair and the boar that sold for \$5,000.
Ohio Chief 2d, One of the greatest sons of Ohio Chief. Pigs by other well known boars in this sale. Write for catalog. Address,

AUGUST VOGE, Col. Luther, Auctioneer. **PORTSMOUTH, IA.**

THE TOP NOTCHER-TIP TOP NOTCHER DUROC JERSEY SALE

HARLAN, IOWA, OCTOBER 13, 1906.

50 10 choice boars by old Top Notcher; 10 boars by Tip Top Notcher. Boars sired by Top Notcher, Chief 2d and 3 boars by old Orion out of Dandelion sows. A few choice sows and gilts included in sale. **50**

Top Notcher Chief 2d, the sire of many of the pigs in the sale won fourth place at Des Moines. I am putting in the best lot of Top Notcher and Tip Top Notcher boars that have ever been sold in the West. Some of the sows will have litters at foot. If you are wanting the best blood in the land it will be necessary for you to attend my sale. Catalog ready, write for it. Address.

AUGUST SONNELAND, HARLAN, IOWA.
C. C. KEIL, AUCTIONEER.

PUBLIC SALE of Burr Oak Poland Chinas Oct. 8 at Burr Oak Farm, Monday, Oct. 8

40 Head. Seven fall boars, five spring boars, seven mature sows with fall litters, three fall gilts, eighteen spring gilts. **40**

These are the get of Fillmore 29736, got by Chief Tecumseh 3d, and Oak Post 3462, a grandson of Harry Wilkes. The blood of the Tecumseh, Wilkes, Perfection, Black Chief and U. S. predominates. Burr Oak Farm is four miles northwest of Fillmore and about eight miles from Maitland or Nodaway on Burlington Ry., or Rosendale and Savannah on Great Western Ry. If you want the big kind with quality, come and see me. Catalogs sent on request. Address,

JOHN TUTTLE, FILLMORE, MO. J. West Jones, Auctioneer.

Northwest Iowa Duroc Jersey Circuit.

MOATS & SONS' DUROCS.

On October 16th, at Randolph, Neb., is the time when the tops of Messrs. M. S. Moats & Sons' Duroc Jersey herd will be disposed of. Their herd was out at the fairs this fall, both at Lincoln and Sioux City, and were among the most successful winners. At Lincoln they got second on Crimson Critic, one of the best sons of Glendale Critic, and he has coursing through his veins the best blood known to the breed. Quite a percent of the offering is sired by Duroc Challenger's Wonder, also a winner this year at the fairs. They are selling three male pigs out of Elmer M. by Malcolm's Model, and Lady Surprise sired by Critic's Echo by Glendale Critic, and another grand offering and most attractive pig out of old Orion and Edith Mc. He is extra in quality and has great size. They have two boars from Moats' Choice, a Gold Dust Jim sow, and sired by Duroc Challenger's Wonder. These two pigs are half brothers to Crimson Critic, the second prize winner at the state fair. Here is a pair that would be fit for any company. They are quality from start to finish, with the best of breeding. Here is another four out of Hawthorne, a Duroc King sow, sired by Duroc Challenger's Wonder. This is a February farrow, with great size, good color, standing on good feet and legs, free from wrinkles. This sow also has a junior yearling in the sale that can stand as good a write up as can be given. He is rich in color, good in size and is a cracking good one all over. He is sired by Duroc Challenger's Wonder. So don't be afraid to hit this sow's spring pigs and the yearling a good joint because they are something to be proud of. They also have five out of Chief Edith. She is from Edith Mc and Iowa Chief. This litter is sired by Crimson Critic. These are jam up good pigs and another good, choice offering is from Profit's Pride, a Daisy Profit sow, and Cherry Boy. A nice pig is sired by Chimes Advance, a son of Proud Advance. He is another arched-back, broad-shouldered fellow. One of the best offerings is a junior yearling from Roxy Girl 2d, a Duroc King sow. He is a Duroc Challenger's Wonder pig, deep sided, sound hams, well-sprung ribs, and in fact is all quality from head to tail. They have ten sows in this October sale. Two sows have litters by their sides sired by Chimes Advance. These are sired by Duroc Challenger and are good yearling sows. The pigs will be sold with the sows. Write for their catalog and mention The Homestead.

MILLER & BLACK'S DUROC JERSEY SALE.

On October 17th, Messrs. R. B. Miller and John C. Black will make a public sale at Randolph, Neb., and these two well-known breeders have pooled issues and have selected their very best pigs for this sale. They will sell about forty head, mostly boars. However, they will put in a few choice sows and a few good spring gilts. Their herds are strong in the blood of Orion, Dandelion, Crimson and Gold Dust Jim. Mr. Black has used a son of Glendale Critic and one of the most toppy fellows, at the head of his herd, and some of the things that go into the sale will be sired by him. Mr. Miller has selected his best boars for this event, and he will also put in a few good sows. The offering is made up of a lot of exceedingly well-bred stuff and the boys will be pleased to have everyone write for a catalog. Kindly mention The Homestead when doing so.

HOLMES' DUROC JERSEY SALE.

On October 18th, at Osmond, Neb., Mr. W. C. Holmes will sell forty head of Duroc Jerseys, consisting of ten head of aged sows, nine head of yearling sows, four head of fall and twelve head of spring gilts. Ten head are sired by Money Maker, a son of Red Chief and Duke of Marble Rock, and are bred to Stutts' Wonder and Young Orion, two very excellent boars that can be seen on sale day. One of these sows is a half-sister to the noted boar, Gold Dust Jim, that was sweepstakes boar at the Iowa State Fair two years ago. Among the sows that go into the sale is a daughter of Liberty Jim, the sire of Gold Dust Jim; two by Long John, several by L's Choice, a couple by Glendale Prince, one by Orion and several by Acme, a son of Red Chief W. C. All the young stuff is sired by Stutts' Wonder, Money Maker and Young Orion. Mr. Holmes is putting in a lot of well-bred Durocs and there will be some choice boars and sows in his offering. There will be one yearling boar sired by Liberty Boy, six fall boars by Stutts' Wonder, four spring boars by Critic's Wonder and two spring boars by Liberty Boy's Challenger, and there are some good, useful boars among the number. Write him at once for a copy of his catalog.

MIHILLS' CLOSING OUT SALE.

On October 19th, at Norfolk, Neb., will occur the closing out sale of Mr. M. Mihills. He will sell his entire herd, including Jack Orion, a son of old Orion, together with several daughters of Orion and Dandelion. He will sell a granddaughter of Proud Advance in the sale and several granddaughters of old Orion. He also sells Cherub Boy, a grandson of Hambletonian, and he is a yearling. A good fall boar is called Cherub Boy 2d by Cherub Boy. He sells Maud Orion and Kate Orion in this sale, and they are something that any of the boys can afford to buy. There are ten gilts out of Maud Orion, Kate Orion and Bell Echo Belle. The Orion sows' gilts were got by Bell Echo Prince and the Bell Echo Belle gilts are by Jack Orion. Bell Echo Belle is a granddaughter of Nebraska Bell, and Bell Echo Prince is a grandson of old Queen. There are six March boar pigs of the same breeding, also a number of April boar and sow pigs from Lady Surprise and Lady Black, sired by Tighes' Challenger and Liberty Boy's Challenger. There will be included in the sale about forty or forty-five head. Everything goes that is in sale shape, as he is going to retire for a while at least, on account of his health. We have seen Mr. Mihills' herd and can truthfully say that he is putting in a splendid lot of Durocs, whose breeding is strictly in the front rank. As this is a closing out sale it will be an excellent place to be on sale day. Write for catalog at once and mention The Homestead.

Combination Sale of Durocs.

On October 17th, will be the combination

sale of Durocs sold by three reliable breeders of this type. The three gentlemen have each decided to offer the very best stock they have on their premises and you are the ones that will receive the benefit of such a sale. The entire lot will number about fifty head, consisting of fall and spring boars and sows. As to breeding we will leave it to you. As to individually we will say that you will not be disappointed. Mr. A. Wilson, of Bethany, Neb., consigns fourteen head of royally-bred animals from his herd. These same animals will be sired by such boars as the great Ohio Chief and the one litter in mind is out of the top sow, Morrison's Peach, she by Crimson Wonder. Mr. Wilson topped the sale last winter at \$410. He will also have some choice ones sired by his great breeding boar, Aethelred, by Tip Top Notcher. This sire is pronounced one of the best sons of the \$5,000 Tip Top Notcher. His pigs are good and will please you. Then he has a very nice litter sired by Morrison's Bell Top. These are good and you will like them. Mr. Wilson is one of the promising breeders of the West and his crop of pigs show that he is posted on his business. Mr. W. A. Kirkpatrick is well known to the breeders and we need not go into his history, as his reputation will stand without any doubt. This breeder consigns seventeen head from his herd, of which Crimson Wonder is the sire of two and his brother the sire of two, while Combination comes in for one and Fancy Crimson has twelve in the lot. Taking the boars as they come we will say that the great Crimson Wonder sired some choice get and this same blood has made good in the best show rings of this country. Mr. Kirkpatrick was very unfortunate when he lost the hog. The Crimson Wonder get are scarce and it is now up to you to look to Mr. Kirkpatrick to get the choice ones he will offer on sale day. Crimson Wonder's Brother was a good sire and has made good on several occasions. The two in this offering by him will please you. The one pig sired by Combination should be a good one. This is the same blood that topped his sale last year and the spring pig sold for \$280. Fancy Crimson has sired some choice pigs and carries with him the honor of being a winner at our state fair last fall. He passed away recently and leaves only a few pigs to represent him in this herd. The ten spring boars are good, even fellows and show the Crimson Wonder feature. Mr. Kirkpatrick will have some good ones to offer you. Mr. E. K. Young, of Havelock, Neb., is one of the younger breeders who has made good among the best class of breeders. His offering is as strong as any consignor and his pigs represent some choice sires. He will have twenty head from his herd. These will be sired by Luther H., he by Hambletonian, the boar that won first at Nebraska and third at St. Louis. Luther H. was a winner at the Nebraska State Fair this fall. He is a hog of good length and growth, with good, strong back and good head and ear. His get will please you. Others in the herd are sired by Belle's Echo, (one of the greatest sires of the breed), Malcolm Model, Morrison's Bell Top and Wont Be Beat. The entire offering is strong in blood and individuality. Morrison's Bell Top is a son of the great Nebraska Belle. The Wont Be Beat litter is good; the grand sire, Kant Be Beat, recently sold for \$2,500 to one of Nebraska's best breeders. Mr. Young & Son will not have any excuses to offer on sale day. The offering will speak for itself. This combination will afford you an opportunity to select some royally-bred animals. You can find them in goodly numbers. For catalog, address any one of the three breeders mentioned. Look up display advertisement.

A Letter to Hereford Breeders.

To the breeders and users of Hereford cattle:—I write you concerning the sale of registered Hereford cattle to be made by Mr. Frank Rockefeller, at the Fine Stock Pavilion, at Kansas City, Mo., Wednesday, Thursday and Friday, October the 17th, 18th and 19th. Having been to Mr. Rockefeller's ranch, at Belvidere, Kan., several times during the past summer and having helped in selecting the cattle for this sale, I write to ask you to attend and to assure you that you will find an offering of Hereford cattle that in breeding can not be surpassed by any breeder in the United States. Never before in my experience of the handling of Hereford cattle have I seen a catalog published with the get of so many grand sires offered therein. In fact there are animals in this offering sired by nearly all the great Hereford sires of recent years. The cattle will come to the sale ring direct from the pasture and will be in only moderate condition, but I believe this condition is better for the buyer than as if they had been fed grain for the past four or six months and put in show condition. The fact that the cattle will be sold in this condition and that there is such a very large number of them will mean great bargains for the buyers. In my judgment there has not been a time in twenty years that promised so much for the buyer of pure-bred Hereford cattle as the present. In the first place Hereford cattle are selling at a lower price today than I have seen for twenty years and nearly every range man in the country is trying to dispose of his cows and get out of the cow business. If he keeps any cattle at all he is going to keep steers and I want to suggest to the range men right here that someone has got to raise those steers and I do not believe there is a better investment today in the cattle business than the purchase of a good cow herd, whether it be pure breeds or simply for range purposes to raise steers from. Mr. Rockefeller for years has been one of the best buyers of Hereford cattle we have had at our sales, and in buying to whose herd it came from, so that it possessed individual merit and a good pedigree. While he does not ask any consideration at your hands on this account, I suggest to you that the Hereford breeders owe Mr. Rockefeller some consideration for his liberal patronage and assistance to the breed and I shall consider it as a personal favor to me if the breeders and users of Hereford cattle will attend this sale. Very truly yours, C. A. Stannard.

The Homestead and The Homemaker \$1.25 per year.

..... 40 HEAD OF SCOTCH AND SCOTCH TOPPED

I SHORT-HORNS I

AND 35 HEAD OF POLAND CHINAS

WILL BE SOLD AT AUCTION IN THE STOCK PAVILION AT
LAUREL, IOWA, TUESDAY, OCTOBER 16, 1906.

Twenty-five grand breeding cows safe in calf to the good Scotch herd bull or the prize winning show bull, King Victor, also a few open heifers. Nine bulls old enough for service including the first prize senior calf at Des Moines. Also my Scotch herd bull, Royal Raven. Thirty-five head of Poland Chinas of both sexes. Fall yearlings and spring pigs with a few tried brood sows, some of the best blood known to the breed. Parties coming over the C. M. & St. P. will find free conveyance from Ferguson on the morning of sale. The trains for Laurel will make connections with both the north and south bound passenger trains on the Iowa Central at Newburg on morning of sale. The hogs will be sold before dinner. The sale commences at 10:30. Lunch at noon. Terms cash or bankable notes at 8 per cent. For catalog, address

F. W. AKERS, - LAUREL, IOWA.
Cols. Geo. P. Bellows and Al P. Mason, Aucts., assisted by Houghton, Gowdy and Albers.

45 HEAD 45 OF HIGH CLASS

Aberdeen Angus Cattle

Will be sold at my farm, three miles northwest of
Quimby, Cherokee County, Iowa,
THURSDAY, OCTOBER 18, 1906.

.... 35
Females

.... 10
Bulls

**Representing
the very best
strains known
to Angus
breeders.**

THERE will be three Blackbird cows in the sale and two of them will have calf at foot. There will be four Pride cows and three of these will have calf at foot. There will also be two Ericas in the sale and two Heather-blooms with calf at foot. There will be nine Janetts and four of these will have calf at foot. The balance are of the most noted families. The calves are all sired by Cherokee Blackhawk 5921 and Imp. Edward R. 61744. All cows of breeding age will be bred to Cherokee Blackhawk 59521 and Edewall 85748, a son of Imp. Edward R. Cattle will be sold off grass without any pampering, but will be in good breeding condition. Catalog now ready. Write for it. Address,

**Blackbirds
Prides
Trojan
Ericas
Heather-blooms
Janetts
and other
popular families**

W. H. Jones, Quimby, Ia.

Colonel 160, Auctioneer—Kindly mention Iowa Homestead when writing for catalog.

Great Three Days' Sale in Clay County, Ia.

This will be the last time that we can call attention to the big three days' sales of pure-bred cattle to be sold in Clay county, Iowa, early in October. Commencing on Wednesday, October 10th, Mr. Wm. Hansen, of Dickens, Iowa, will sell fifty head of registered Angus cattle, consisting of forty-five cows and heifers and five bulls. That well-known breeder of doddies, Mr. Wm. Mincer, of Spencer, Iowa, will manage this sale. This is the first offering of Aberdeen Angus cattle that Mr. Hansen has ever made to the public. It is a good lot of honest cattle in plain, farmer condition. The females represent such families as Queen Mothers, Prides, Heatherblooms, Westertown Roses, etc. The present herd bull used by Mr. Hansen is the Trojan Erica bull, Imp. Enstamp. This is a splendid prospect for a good herd bull. He was sired by the Highland Society winner, Buttress, he by Diplomat and he by Prince Iliad, while his dam was out of the great cow, Eclipse, a daughter of Prince Inca and she by Iliad. More aristocratic blood could scarcely be wrapped up in one bull. This offering embraces some beautiful cows and heifers in calf to this great bull which should be an attraction that should command the attention of breeders throughout the middle West. No. 2 of the catalog is one of the choicest-bred Blackbird bulls to be found, Baron Blackcap. He is a son of Edward R. and out of Blackcap's Maid. We speak of this bull and his superior breeding for the reason that the females are all bred to him or the Trojan Erica bull previously mentioned. This is pre-eminently a breeding offering. Only a few bulls are offered but they are all good, strong, husky fellows ready for service at this time. Included in this offering are some nicely-bred Heatherblooms descending from the old T. W. Harvey stock. One of these is Heatherbloom of Woodlawn, a daughter of Wellington and out of Heatherbloom of Turlington. This cow was a daughter of the great Black Knight, probably the greatest Angus bull that this country has yet seen. Heatherbloom of Turlington was third prize-winner at the Columbian Exposition and was suckling a large calf at the time. She was shown against her more bloomy sisters, Abbeess and Progress of Turlington, whose bloom had not been impaired by calf-bearing. These Heatherblooms, in the hands of Messrs J. Evans, Jr., and Son during their career as Aberdeen Angus breeders, were considered the most prolific and profitable family of doddies in their entire herd, although it contained large numbers of the fashionable Blackbird, Pride and Erica families. As Mr. Marion Evans once said to the writer, the Heatherblooms are the working cattle of the herd. An offering of Aberdeen Angus cattle in this section of Iowa is comparatively new, and for this reason we anticipate that at this Clay county sale a splendid opportunity will be offered buyers of northwestern Iowa, southern Minnesota and eastern Dakota to secure the ever popular Aberdeen Angus with little expense and only traveling a short distance to this sale. A representative of The Homestead has viewed the cattle to be sold and considers them a practical, useful lot. On October 11th Mr. J. W. Graham will sell at his farm six miles north of Spencer fifty head of choicely-bred Short-horn cattle, including a lot of good Scotch blood. Mr. Graham will sell thirty-three females, among which are a half dozen or more good Scotch cows of the famous Cruickshank Dorothy family. Unfortunately, we have not yet received Mr. Graham's catalog, and for that reason cannot enter into detail concerning the breeding of the cattle. However, this is of little import at this time because of the fact that lovers of Short-horns, in order to properly study the blood lines of this offering, should send to Mr. J. H. Graham, Spencer, Iowa, for the catalog. The best of Scotch herd bulls have been maintained at the head of his herd, such as Champion, the great Cruickshank bull that made the herd of Mr. S. G. Crawford, of Lohrville, Iowa, and the great Scotch bull, Orange Oakland, a splendid Orange Blossom bred by Mr. H. D. Parsons, of Newton, Iowa. Mr. Graham is simply selling these fifty head of cattle because his herd has grown to proportions where he cannot well take care of them. This speaks volumes for the breeding qualities of this herd, as all the animals are rapid, prolific breeders of good, useful Short-horns. Heavy milkers are in evidence, which is a point not to be overlooked in selecting good breeding cattle. It has been very wisely said by that prominent breeder of Scotch cattle, Wm. Duthie, of Collynie, Scotland, that his best breeding cows were his heaviest milkers. Mr. Graham has conducted his breeding operations on common-sense lines and has cared for his cattle in the plain, matter-of-fact farmer's style that is conducive to the preservation of the breeding qualities and the longevity of the herd. On Friday, October 12th, will occur a dispersion sale of Short-horn cattle at the Clay County Poor Farm, three miles west of Spencer. The board of county supervisors have decided, through their manager, Mr. A. F. McConnell, to throw their entire herd of choicely-bred Short-horns on the market, concluding the three days' series of sales to be held in that locality. Mr. McConnell informs us that the cattle to be sold have never been over-fat, but have been kept in working condition from the time the herd was founded until now. These cattle would no doubt show better and sell better were they heavier in flesh, yet we do not wish in any way to convey that they are poor or poverty-stricken, because such is not the case. They are in first-class breeding condition and have been carefully inspected by a Homestead representative, who regards them a very practical, useful lot. A large number of the cows will be sold with calves at foot, and others showing that they are well advanced in calf to good bulls. A liberal guarantee is made by the board of supervisors which will fully protect any and all who buy these cattle. No Scotch cattle are offered, and no pretensions are made to an exceptionally fashionable breeding offering. However, they are clean, business cattle that have been profitable to the county farm, but they find themselves over-stocked and to some extent at a disadvantage in handling registered cattle on a county farm; hence this dispersion sale. The three days' circuit of sales certainly affords a good opportunity for buyers to secure some good, useful cattle at the expenditure of one trip. It should

be borne in mind that the Angus sale of Mr. William Hansen will be held at his farm adjoining Dickens, Iowa, October 10th, and the following day Mr. J. H. Graham, six miles north of Spencer, sells fifty head of Short-horns, and the Clay County Poor Farm, three miles west of Spencer, sells an equal number on the following day. The catalog of the Clay County Poor Farm will be mailed free on application to Mr. A. F. McConnell, Spencer, Iowa; application for Mr. J. H. Graham's catalog should be made to him at Spencer, Iowa; while application for Mr. William Hansen's catalog should be made to Mr. William Mincer, Spencer, Iowa.

Cottingham's Sales.

The breeder of Short-horn cattle or Poland China swine should arrange to be present at the forthcoming sales to be held at Eden, Ill., on October 9th, by Mr. Ira Cottingham. This breeder needs no introduction to readers of The Homestead, for during the past few years he has been breeding Short-horns and Poland Chinas of exceptional merit. Stock purchased from Mr. Cottingham does well for others, hence breeders may feel sure that in this lot, the best Mr. Cottingham has offered for sale at public auction, they can secure something which will be profitable to them. In these columns last week we called attention to a few of the females consigned to this auction. There are few families in Mr. Cottingham's herd and in fact in any herd that have produced more good cattle than have the Sareptas. They come from a Cruickshank Secret foundation and are individually of the type that is profitable. For several years this family has been maintained in the herd and a very even, thrifty lot they have been. Sarepta Minnie 5th is a two-year-old daughter of Champion Archer and is safe in calf to Proud Prince, a son of Golden Charity Prince, the well-known bull at the head of Mr. W. B. Riggs' herd at Mt. Sterling, Ill. Sarepta Pride 16th is a very nice two-year-old heifer that should go into some good herd. She is safe in calf to service of Proud Star 2d. Sarepta Lady 8th is another good one of this profitable family. Another lot of heifers which will please those in attendance sale day belong to the Duchess of Gloster tribe. They are a thrifty lot and are bred to Proud Star 2d. Mr. A. W. Christopher, of Canton, Ill., consigns several good cattle that will please discriminating buyers. The Poland Chinas consigned by Mr. Cottingham for this sale are the best lot he has ever sold publicly. They are uniform in size and color, large and growthy, with plenty of bone and stand on the best of feet. The fall gilts are sired by Harcourt 94568, he by Faultless Perfection Jr. and out of some of Mr. Cottingham's best sows. Large, strong litters have been the rule in this herd. A few of the fall sows are bred, while others are sold open. Last year Mr. T. W. Walker, of Mazon, Ill., bought a bred sow of Mr. Cottingham and the following letter is self explanatory: "The sow I bought at your sale did fine. She raised nine extra good pigs in first litter and I sold them for \$225. She has a nice fall litter now." What Mr. Walker has done anyone can do. The Poland Chinas are in prime breeding condition and have not been pampered, but will result in much profit to those who secure them. Those who cannot be present on sale day can send bids to Mr. D. M. Pierce, representing The Homestead, in care of Mr. Cottingham. Write for catalog at once, kindly mentioning The Homestead, as per advertisement on page 43.

Wehr's Duroc Jersey Sale.

On October 20th at Portsmouth, Iowa, Mr. J. E. Wehr, a breeder well and favorably known throughout the West, will make a public sale of forty head of Duroc Jerseys. There will be twenty-five choice spring boars and about fifteen spring gilts, and a few brood sows. The offering will be mostly sired by Munson's Perfection, Orion's Model and Proud Advance Again. He will sell Proud Advance Again, the boar that won third prize at the Interstate Fair, and one of the best boars ever sired by Munson's Perfection. This boar has a good head and ear, and is a good, all-round hog. He was first prize hog in his class at the Minnesota State Fair, so some good breeder will have a chance to secure a herd header. He is putting in a lot of boars sired by this same hog and out of his best brood sows. He also sells six good fall boars sired by him, and one by Orion's Model, the boar he won on at the Iowa State Fair last year. He sells some good fall and spring gilts sired by the above boars, and these are very good and will make nice brood sows. Six of the Orion Model spring boars are out of a daughter of Roosevelt and there are a few very lusty fellows out of Lulu Advance, the dam of Proud Advance Again. Mr. Wehr has selected the very best of this year's raising for this sale, and he has made every arrangement to take care of the boys. His sale will be held in a comfortably-heated sale tent, and those who want a good boar or a few nice gilts will be able to get them in his sale. Write for catalog and mention The Homestead.

Roy Rockwell's Poland China Boars.

On page 32 of this week's issue will be found the advertisement of Mr. Roy Rockwell, of Paulina, Iowa, one of the best-known Poland China breeders in northwest Iowa. He is now offering a good bunch of fifteen spring boars and one fall boar for sale. The spring boars are sired by his old boar, Empire Chief 2d 90645, and Empire Thicket 102647. He has a good litter by the first-named boar and out of a sow called Ohio Quality, one of his best brood sows. The fall boar is quite a good one, and he is pricing them right. He is sired by Acrobat 71003, a son of Proud Perfection, and he has for a dam a daughter of Empire Chief. The average man will not go wrong in buying this fellow, and he is worth what is asked for him. Mr. Rockwell is a good judge of a hog, having served in that capacity at the Interstate Fair last year. He is therefore competent to describe a pig and knows just what he has. We know of no breeder who is more reliable than Mr. Rockwell, and he will treat you right if you send him an order.

SALE OF SHORT-HORN CATTLE

BY J. Z. WILLSON AT

...MORNING SUN, IOWA, OCTOBER 10, 1906...

On the above date I will sell in the new pavilion 57 head of Short-horn cattle, 47 of which are females and 10 bulls. These females are all reds and all well Scotch Topped. They are largely of the Ruby family, topped out with such grand good bulls as Scotchman 128117, Lord Nonpareil 225698, Village Prince 161575, Darnley's Best 232104, Lord Darnley and Plumed Knight, the last named being the best Cruickshank bull that ever did service in or around Morning Sun. He was got by Knight of Orleans, a son of Craven Knight and out of Imp. Gwendoline by Baron Violet. It will be thus seen that the bulls in the top of these pedigrees are some of the best Scotch bulls that the country has seen in many years. These cattle will be sold fresh from the pasture without any special fitting and no surplus flesh. The writer has had the pleasure of looking over this entire offering quite recently and regards them as a very rapid breeding herd as well as being heavy milkers throughout. Mr. Willson guarantees all females breeders when properly cared for. A certified copy of each and every lot sold will be furnished on day of sale signed by the Secretary of the American Short-horn Breeders Association. Mr. Willson is a plain, practical farmer and breeder and has made no effort to place these cattle in strictly thick, fancy sale condition. However, they are in condition to breed rapidly and to give best results to their new owners. One seldom sees a bunch of cows of like number with as many calves at foot or just ready to drop calves as can be seen in this offering. The herd is in thrifty breeding condition and will afford a golden opportunity for the young breeder to start a herd cheap, as well as getting into a family of very rapid breeders and heavy milkers. It is this same family that Mr. W. T. Clay, of Plattsburg, Mo., made his reputation on. Mr. Clay started with one Ruby cow and in 17 years from her and her produce, had produced 237 head. Fully 15 of the cows listed have calves at foot and a number of others will have calves by sale day. Concerning the milking qualities of these cattle, one of the cows listed in the sale gave 1100 pounds of milk in 30 days. This cow was Ruby 3d by Dick Bly 2d. The present bull to which these cows are bred is Prince Joyful 262020. He is a son of Emma's Prince and he out of the great \$1700 cow Emma 17th. The dam of Prince Joyful was Anemone 2d by Count Joyful. As has been before stated, it is pre-eminently a red offering. We do not speak of this because of the reds being superior to the Roans or Whites, but because of the fad for Reds in the minds of some. To any one who is tenacious for the red colors Mr. Willson's offering affords them a splendid opportunity to secure the color of their choice. His catalog is out and ready for distribution and may be had for the asking by simply mentioning The Homestead. In our next issue we shall have something to say concerning the bull offering and particularly some Scotch bulls that are listed in the sale.

Scotch Blood Predominates on the Best Bates Foundation.

B. G. STARK'S SALE OF SHORT-HORN CATTLE

At the Fair Grounds

HUMBOLDT, IA., TUESDAY, OCTOBER 16, 1906.

I AM putting about forty head of cows and heifers and ten bulls in this sale. The bulls are a choice lot of well developed, strong and vigorous young animals. Twelve of the cows will have calf at foot by the Scotch bull Commodore 2d, and some will be rebred to Mysie Lad, my present Scotch bull. Among the bull offering will be two grandsons of Imp. Leyburn, one of the best bulls ever used in my herd, and one of the best bulls ever used in the state of Iowa. I am putting in a most excellent bunch of Standard Fibre heifers some of which are bred to Mysie Lad. I am putting in a splendid lot of useful money-making Short-horns of the very best families. Write for catalog, mentioning Iowa Homestead.

B. G. STARK

Col. F. M. WOODS,
Auctioneer.

LIVERMORE, IA.

F. A. Schaefer & Son sell a draft of Scotch and Scotch Topped Short horns at Raleigh, Iowa, on October 19th.

Last Call for J. Zach Willson's Sale of Short-horn Cattle.

This is our last opportunity to call attention to the prominent sale of Short-horn cattle to be held in the sale pavilion at Morning Sun, Iowa, Wednesday, October 10th, by Mr. J. Zach Willson, of Morning Sun, Col. Griff Johnson will officiate as auctioneer. At this time Mr. Willson will sell fifty-seven head of Short-horn cattle which carries with it almost his entire herd. The offering is divided as follows: Forty-seven head of females and ten bulls. Mention having been previously made of the females, we now mention some of the bulls to be sold, one of which is the Scotch bull, Gloster 252773. This bull was calved December 1, 1904, got by Village Prince and out of Canadian Duchess of Gloster 23th, she by Imp. Indian Chief. Village Prince, the sire of Gloster, was a splendid Scotch bull, got by Imp. British Prince and out of Village Beauty by Sitty-ton Chief. Village Beauty was the best breeding cow ever owned by Mr. A. Alexander during his prominent days as a Short-horn breeder. Gloster is a short-legged, thick bull, lacking somewhat in flesh, but is one of the shortest-legged, heaviest-boned Scotch bulls in Iowa. He has a splendid bull's head, chuck full of Short-horn character and will unquestionably make a great sire. Certainly no bull could have a better pedigree than this fellow. He is solid red and comes of red ancestry on both sides. To the party who is looking for a good Scotch bull and expects to buy him cheap, we could certainly say keep this bull in mind. There are nine other good, strong young bulls, all Scotch topped, four of which are by that splendid bull, Lord Nonpareil. One is Plumed Knight's Last. One is by Lord Darnley, one by Darnley's Best, one by Scotchman 7th and one by Butterscotch, a son of Scotchman and out of Queen Butterfly by that great bull, Plumed Knight. Mr. Willson is presenting this bunch of sale cattle in practical breeding condition only. The cattle are thrifty, fresh from the pastures, with no special fitting other than nature's feed. In all our acquaintance we know of no herd that has furnished more heavy milkers or rapid breeders. It is pre-eminently a farmers' business herd. Mr. Willson is desirous of having all Homestead readers fully notified of the fact that this sale will be positive and without any protection. Weather conditions will not postpone the sale, as it will be held in the new frame pavilion in Morning Sun. In order to make this sale, Mr. Willson has had to draw so heavily on the herd that it means almost a dispersion. As was stated in last week's Homestead, the females are entirely a Scotch-topped lot, principally of the Ruby family. There are, however, three Roan Duchesses which are Lots 23, 24 and 25 of the catalog, the first twenty-two being Rubys. These Roan Duchesses are as richly and royally bred as any of this family found in the herd books. Lots 26, 27 and 28 are choicely-bred Young Marys. Lot 30 is a Duchess of Sutherland sired by Lord Darnley and out of a dam by Plumed Knight. Lot 31 is a thrice Scotch-topped Rose of Sharon. Col. Griff Johnson will sell these cattle for Mr. Willson and will certainly have the pleasure of disposing of as prolific and heavy-milking a herd as has been sold in Iowa in recent years. The cattle are just in nice condition to continue to improve in the new hands to which they may fall. Everything of sufficient age has calves at foot or shows heavily in calf to the Scotch bull before mentioned. We would certainly impress our readers with the fact that this is a golden opportunity to secure some cheap but useful Short-horns. No high prices are anticipated, from the fact that Mr. Willson is not widely known outside of eastern Iowa. This will, of course, militate to his disadvantage, but to the advantage of the wise buyer. Send at once for a catalog to Mr. J. Zach Willson, Morning Sun, Iowa, mentioning The Homestead.

Sale of Flatland Short-horns.

On Tuesday, October 16th, Mr. F. W. Akers, of Laurel, Iowa, will sell in the Laurel new stock pavilion a choice lot of Short-horn cattle. Mr. Akers has been breeding Short-horns in a modest way for a number of years and has achieved more than ordinary success. His exhibition at the Iowa State Fair and his winnings on the beautiful young bull exhibited, is evidence of the high character of stock that he will list for this sale. In addition to the choice string of Short-horns to be sold on the above date, he will also dispose of some good registered Poland China hogs, among which are some royally-bred ones from the standpoint of up-to-date breeding. We note among the Poland Chinas such noted boars as Meddler, Top Chief, Chief O. K., Chief Perfection, Iowa's Perfection, Chief Tecumseh 2d and Old Butler's U. S. and a host of others of equal note. Mr. Akers will sell a few straight Scotch cattle which will be an attraction for all lovers of Short-horns. Among one of the attractions is Gloster's Queen. This beautiful young cow will be four years old October 25th. She was sired by Lord Gloster, a splendid Cruickshank bull of the Duchess of Gloster tribe, while his sire was the show bull, Imp. Banker. Gloster's Queen traces to Miss Ramsden by Duke, while they are sometimes called Louisas. However, to the young breeder we can say that this family of cattle called Centennial Isabellas, Louisas or Miss Ramsdens, are one and the same thing. They are all founded on the cow, Miss Ramsden, by Duke (3639). Some of the top bulls used in this cow's pedigree are as choice as the herd book affords. Following her sire, Lord Gloster, we find Scarlet Velvet, Royal Booth 2d, High Sheriff 2d, then the Cruickshank bull, Wellington; then the Campbell bull, Nobleman, then the Cruickshank bull, Diphthong. Such cows as this are seldom offered for sale, except in the dispersions where everything is listed. The reason that such cows as this and the other good ones listed are offered for sale is that Mr. Akers did not believe that he could afford in his first annual sale to put in all cheaper cattle. Hence he has decided to strip the herd of many of the best females in it in order to make this sale attractive. The offering contains straight Scotch and Scotch-topped cattle of the combined type of best, show yard and milking Short-horns. The show cattle of this year are included in the sale and everything that is listed in this sale will be

sold. A liberal guarantee is thrown about each and every animal offered. Cows sold with calves at foot or showing safe in calf are regarded as breeders, and Mr. Akers places no further guarantee on such, but cows that have been lately bred or open heifers are guaranteed breeders, and if they do not so prove at the end of three months, after proper trial, the purchase price will be refunded. Mr. Akers is very desirous to make this, his first annual sale, a success, and is putting forth every effort to this end in order that when this sale is over he will have convinced the breeders of Iowa that he has sold good cattle and treated them fairly and squarely. Mr. Akers will undoubtedly continue in the business for many years to come, as he finds it profitable and pleasant. However, as his herd is not large, he has had to draw heavily on the best end of it in order to make this offering attractive so that breeders from a distance would feel it worth their while to attend this sale. Before another issue reaches our readers our representative will carefully inspect the offering anew and give some fresh matter relative to the condition at this particular time. Application for catalogs should be made to Mr. F. W. Akers, of Laurel, Iowa.

Townsend's Dispersion Sale.

On October 25th, at Anita, Iowa, Mr. C. E. Townsend, one of the best-known breeders in that part of the state, will make a dispersion sale of his entire herd of Short-horns, numbering about seventy head in all. This sale is made necessary because he is leaving the state and is going to South Dakota to enter another line of business. He sells everything, from herd bulls and breeding cows down to young calves. When he started his herd many years ago he first purchased ten head of Scotch cattle and then began the building up of one of the best herds in western Iowa. There will be about thirty head of Scotch cattle in this sale, including his herd bull, Sovereign Cupbearer, a five-year-old son of Imp. Sovereign, and nine head of young Scotch bulls, nearly all of which are sired by him. He is selling a splendid lot of Scotch cows of the Victoria, Orange Blossom, Mysie and Nonpareil families, and every one of these have representatives in the sale. There will be eleven head of Scotch cows in the sale and nearly all of these will have calf at foot. Those not with calf will be right at calving to Sovereign Cupbearer. The Scotch heifers are nearly all bred to the young Scotch bull, Crimson Count 254377, a grandson of Imp. Fashion Favorite. Among the Scotch cows is Victoria Princess 3d, a daughter of Prince Nonpareil; 6th Nonpareil, a daughter of Canute 2d; Iowa Mysie, a daughter of Victoria Monarch 2d, and an exceptionally well-bred Mysie; Brookside Orange Lassie, another daughter of Prince Nonpareil, and a richly-bred Orange Blossom, and Canute's Orange Lassie 2d, a daughter of the famous old bull, Canute, and another richly-bred Orange Blossom. Most of the Scotch heifers in the sale are out of these cows. Three of these are sired by Imp. Chamberlain's Heir 2d 157365, a bull formerly used at the head of the herd, and a bull that was personally selected from the Philo Mills herd, by Mr. M. E. Jones, of Illinois. There are about eight or ten daughters of Sovereign Cupbearer and a daughter of Iowa Chief in the offering. The rest of the offering are Scotch-topped Young Marys, Belinas, Amelias, Carolines, Matildas and Miss Severs. Mr. Townsend sells everything and it is an absolute closing out sale and there will be some bargains here for those who are wanting good cattle. He has issued a nice catalog which will be sent on application. Kindly mention The Homestead when asking for it.

Richly-bred Short-horns at Auction.

The object of this notice calling attention to the dispersion of Messrs. R. G. Robb & Son's famous Honey Creek herd of imported and home-bred Scotch Short-horns is as a tickler to jog the memory of all who are interested in this line of stock to send this week to Messrs. R. G. Robb & Son, of Morning Sun, Iowa, for one of their sale catalogs and study the rich breeding contained therein. In so doing, kindly mention The Homestead and your application for catalog will receive prompt attention. The writer has known Messrs. R. G. Robb & Son, of Morning Sun, Iowa, well and favorably ever since they engaged in this honorable and lucrative business, and it is with some feelings of sorrow and regret that we are called upon to write the announcement of their dispersion sale. To lose such breeders as these, whose enterprise and rare good judgment has built up a herd second to none in eastern Iowa, is indeed an irreparable loss to the fraternity. Some breeders can retire from the business and the breed and business will be benefited thereby, while the going out of others causes a cloud to rest upon all cattledom. Mr. R. G. Robb has borne the burden in the heat of the day as long as he thinks wise to do so, and as he is seventy-three years of age, who shall say that his day for retirement from the active duties is not at hand? The partnership existing between Messrs. R. G. Robb & Son covers the ownership of all Short-horns in which either of them is interested and this dispersion sale on October 18th will offer an opportunity to secure each and every one of the cattle owned by this firm. After this sale, however, Mr. Tom C. Robb, the junior member of the firm, and his son, will be in the market for another herd of Short-horns and will doubtless be bidders at some of the best sales where good Scotch cattle will be offered in the future. This fact is worthy of notice by the prospective buyers and Short-horn breeders who attend this dispersion sale. This offering embraces the cream of the Short-horns bred or purchased by this firm, as they have from time to time culled and re-culled the herd, reserving only the most profitable and useful cattle they had. We certainly would impress upon our readers the necessity of sending this week for a catalog, believing that a perusal of its pages will reveal some of the richest Scotch breeding stuff, as can be found anywhere. Next week's Homestead will have a few more sample pedigrees. Morning Sun is easily reached by the Iowa Central railroad or the Chicago, Rock Island & Pacific, and free entertainment has been arranged for at the leading hotel in Morning Sun, the Hotel Hungate.

COMBINATION SALE

ABERDEEN ANGUS

... CATTLE ...

TO BE HELD AT THE FARM OF

M. D. KORN, 3-4 MILE SOUTHEAST OF HARTWICK,
..... POWESHIEK COUNTY, IOWA, FRIDAY, OCTOBER 19TH

46 HEAD---34 FEMALES---12 BULLS

A carefully selected draft from the herds of

M. D. Korn, Hartwick, Iowa.
C. G. Korn, Hartwick, Iowa.
Wm. Dixon, Hartwick, Iowa.

U. S. Grant, Brooklyn, Iowa.
A. H. Kimball, Ladora, Iowa.
H. H. Reed, Marengo, Iowa.

This is the first sale of registered Angus cattle ever held in this vicinity and is composed of a good lot of breeding cows and heifers and young Bulls with the following well known strains represented, Pride, Queen Mother, Blackbird, Lady Franklin, Favorite, Drumin Lucy, Miss Copeland, etc. The females will be sired by, or bred to such bulls as Royal Blackcap 3rd, Black Roselawn, Silhouette 2d, Bernier, Blackbird Lord, Elyron and others.

There will be a number of bulls sired by the show bull Royal Blackcap 3d that are good enough to head any herd; also by other as well known bulls.

The females are a good lot and will be presented just in good breeding condition; those old enough will have calves at foot or be bred to good bulls of the well known strains, Blackbird, Queen Mother and Pride.

This will be a grand opportunity for the beginner to buy a few females for a foundation herd. For catalog, write, mentioning this paper, to

C. G. KORN, HARTWICK, IA.

Cols. Silas Igo and J. L. McIlrath, Auctioneers.

Hartwick is on the Belle Plaine and Buxton branch of the C. & N. W. Ry., nine miles south of Belle Plaine, Iowa.

at the KIEHL LIVERY BARN.

COUNCIL BLUFFS, IOWA,
Friday, October 12, 1906.

20 CHOICE
BOARS

Iowa Sunshine 22985

My very
best Sows 20

INCLUDING my entire show herd, together with my second prize Iowa Sunshine boar pig at the Iowa State Fair, with fifty-two in the ring. This is one of the greatest pigs of the year, and here is a herd-head and a show hog for some good breeder next season. Nearly all of my offering will be sired by my great sire of prize-winners, Iowa Sunshine, considered to be one of the greatest sires of show stuff in the West. I am putting in this sale some of my very best sows, many of which have been winners at the Iowa and Nebraska State Fairs. I am also putting in the dam of some of my best winners. Iowa Sunshine boars have made a reputation for themselves and I am putting in my very best in this sale. Send bids to M. T. White, of The Homestead, in care of Mr. Podendorf. Catalog now ready. HORSES.

THE WENONA'S GREAT STUD.

HAVING concluded to make a change in placing STALLIONS before the PUBLIC on account of the unsatisfactory business methods and transaction done in the stallion trade by the buyers, as well as to the sellers by the stallion salesmen, we have concluded to sell our stud from the barn. Our aim is to give our customers the entire benefit of the profits which have been going to the salesmen and to the helper who is assisting in placing the stallion, who usually is one of your own neighbors, (the most influential man of the neighborhood) and the great expense of placing the stallion. The long-time notes, from 3 to 5 years, have to be discounted heavily or carried by the seller, making the cost of the stallion from TWENTY-FIVE HUNDRED to FOUR THOUSAND DOLLARS. The quality of our stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. **WE KNOW WE CAN SAVE YOU AT LEAST 50%.** If you have to have a company to have a horse in your neighborhood, form your own company, and come to the barn, **BE CONVINCED THAT YOU CAN SAVE FROM \$1,000 to \$1,500.**

GOOD AMERICAN-BRED STALLIONS, from \$800 to \$1,000.

FIRST-CLASS IMPORTED STALLIONS, from \$1,200 to \$1,600.

CHOICEST STALLIONS, a little higher.

THESSE are the prices at our barn at Wichita, Kan., and Wenona, Ill. For prices at the GREAT WESTERN BARN, apply to M. C. Gray, Pullman, Wash. We ask all intending purchasers to visit our stables, where we have over 300 Head of Stallions to select from: SHIRES, PERCHERONS, BELGIANS and HACKNEY STALLIONS. Come to Wenona and deal with Bob Burgess, who has been in the business over 32 years, longer than any one man in the stallion trade, and we guarantee to make every deal satisfactory to you. Get your guarantee and insurance direct from headquarters. Visit our barn, see our exhibits at the different state fairs and see the class of horses we are selling for the money. The reason that we ask the above of you is that Bob Burgess is the oldest importer in the business, the largest importer, and have the quality of stock that will suit the people, are perfectly good for their guarantee, and will sell to you more good horse quality for less money than any one. Come to the barn and get the most reasonable terms that can be offered.

ROBERT BURGESS & SON,

WENONA, ILL.

W. A. LANG & CO., - - GREELEY, DELAWARE COUNTY, IOWA.

IMPORTERS AND DEALERS IN CLYDE, SHIRE, BELGIAN, PERCHERON, FRENCH DRAFT, GERMAN COACH AND STANDARD BRED STALLIONS.

WE have always on hand a good selection of the above named breeds. We give the most liberal guarantee of any firm doing business. Our horses are all of the best in their class. Colors, all bays, blacks and dark grays. No old, worn out pickups. We make a specialty of organizing farm companies and know how to do it and give satisfaction. We can't sell you cheap ones for the reason that we don't handle them. Greeley is the great stallion center of Iowa where you can see more ton horses than any other place in America. Write.

LAKEWOOD FARM THE GREAT BREEDING ESTABLISHMENT.

Sweepstakes Boar Offering

IMPROVE YOUR HERDS BY INVESTING HERE.

The Brown & Mickey sale of Choice Durocs

AT OSCEOLA, NEB., OCT. 10th.

Choicely Bred Lot of Boars & Gilts

Offering Strong in Blood of

Sweepstakes Boar, Red Knight 25199.

The Tops From our Two Herds. Profitable Offering in all Respects.

E. J. Brown consigns offering strong in blood of Red Knight, Crimson Wonder, Belle's Echo.

O. E. Mickey's offering strong in blood of Homestead Gold Dust, sired by Gold Dust Jim, Belle's Echo, and Red Knight.

Our offering of Duroc Jerseys on Oct. 10th will be the tops from our two herds. We have decided to make this sale one to be remembered by all and to do this we realize that the tops must be included. Our boar offering will give ample opportunities to select choice prospects. The offering will represent as much prize winning blood as will go through any sale this season. Red Knight was first and sweepstakes winner at Nebraska State Fair 1905. Belle's Echo is the son of Echo King and is out of the great Nebraska Belle. Homestead Gold Dust was sired by Gold Dust Jim. We would be pleased to mail you one of our catalogs. If unable to attend the sale send your bids to G. W. Segrist, representing this paper, or the auctioneer. Look up field note.

E. J. BROWN,

T. C. Callahan, Auct.

O. E. MICKEY,

Osceola, Neb.

All my Breeding sows, 2 and 3 yr. old heifers, and young calves included, about 60 head of females.			

Owing to my removal from the state and entering other lines of business, I am compelled to part with my entire herd of Short-horns.

I T IS with greatest regret that I am parting with my herd of cattle. I laid the foundation of this herd by purchasing ten head of Scotch females and I have always used the best of Scotch bulls. My herd has been one of the best paying herds in the state. The Scotch-topped tribes are representative *Young Marys, Amelias, White Roses, Belinas, Miss Severs, Carolines* and *Matildas*. There will be 9 HEAD OF YOUNG SCOTCH BULLS in the sale, besides my well-known Scotch herd bull, *Sovereign Cupbearer*.

Watch for pedigrees next week. There never was a better time nor a better place to lay a foundation for a herd. Send for a catalog, mentioning *The Homestead*. Address,

C. E. TOWNSEND, ANITA, IOWA.

Cols. Woods & Bellows, Aucts.

Sale at farm 1 mile from town.

VOL. LI. NO. 41.

DES MOINES, IOWA, OCTOBER 11, 1906.

WHOLE NO. 2569

PROLIFICAOY IN THE POLANDS.

This subject has recently been discussed in The Swineherd by the secretary of the American Poland China Record, who, among other things, says:

Once more a "popular notion" has been demonstrated to be wrong. For about as long as I have a recollection, we have been told that the number of pigs in the litter was getting less and less from year to year, and that the Poland Chinas did not farrow pigs enough. A circular recently issued by the United States Department of Agriculture will certainly be of very great interest to Poland China breeders, as it completely disproves all that has been said in regard to the size of the litters farrowed by Poland China sows. The circular referred to should be in the hands of every person interested in hogs, and particularly Poland Chinas.

A very extensive and careful investigation was made of the subject and was conducted by Mr. Geo. M. Rommel, animal husbandman of the bureau of animal industry. The circular states that the investigation was started chiefly because of the predominance of the Poland Chinas over other breeds in the United States, and because charges had been made for years, that the sows of that breed have been decreasing in fecundity.

The statement was made that the bureau was urged to begin experiments looking to the increase of the fecundity of the breed. So the investigation was started to determine just how much of a decrease there had been in the matter of fecundity. The original intention was to use only the American Poland China Record, but the results were so startling and so contrary to expectations that it was thought best to use also the Ohio Record to see if there was any marked difference in the size of the litters as shown by the two Poland China records. The result of the investigation in the Ohio was strikingly similar to what it had previously been in the American Record.

The compilation was made to determine the average number of pigs farrowed for five years, beginning with 1882 and ending in 1886. Then a five-year period beginning with 1898 and ending with 1902, was used. Altogether the investigation comprised nearly 40,000 litters and there can be no reasonable question but what it is approximately correct and represents fairly and accurately the facts in the matter. The figures as published indicate that for the first five-year period the average number of pigs farrowed as shown by the investigation of the litters of both records, was 7.16 pigs per litter. For the five-year period, fifteen years later, from 1898 to 1902, the average size of the litter was 7.59 pigs per litter. The startling thing in regard to these figures is, that it demonstrates that instead of a decrease in the number of pigs farrowed, there has been an increase. During the first five-year period the average was only slightly above seven pigs to the litter, while the average for the last five-year period is a little more than seven and a half pigs per litter.

Not only is this increase in the fecundity quite marked, considering the comparatively short length of time covered by the investigation, but the size of the litters is certainly all that could be desired. Almost all well-posted breeders are agreed upon the fact that from seven to eight pigs to a litter is more desirable than a larger number. I have always doubted the claims that were being made, that the size of the litters were decreasing, and had been intending myself, similar to what the government has made, because I was sure the results would be something like that shown by the figures indicated above. I was not, however, prepared for any such a startling increase as these figures indicate.

This showing is certainly gratifying to breeders of this notable breed of swine, and, as stated by Mr. McFadden, the results of the investigation come as a surprise even to men most familiar with the characteristics of the breed. It would be interesting to learn the real cause of this increase in the fecundity of Poland China sows. No doubt it is partially due to the fact that men are feeding less corn to their breeding animals than formerly, and secondly, the more general introduction of the woven wire fence may be responsible for part of the change for the better. These

fences mean more exercise, more grass and more natural conditions than formerly existed. It is hoped that the record of this notable breed will be maintained along this line, if not increased. Breeders, however, should not rest on their laurels, but should continue to maintain the present standard at least and, if possible, raise it a little higher. Seven or eight pigs are plenty for any sow to raise, but as it is seldom possible to raise all that are farrowed we believe that it would not be too much to expect an average farrow of eight or even nine pigs.

BACK-SETTING EARLY PLOWED SOD.

One of our Missouri subscribers sends the following communication:

I plowed a thirty-acre field of sod last June and July, and I am wondering whether it would pay me to back-set the same this fall. In a measure you could really call it prairie sod, though it is largely composed of red top and blue grass. The land has always been a little wet and I tilled it out last year, so that this is the first year when there was an opportunity to plow it. The sub-soil is somewhat of a gumbo, and it takes a good deal of power to run a sixteen-inch plow. Since plowing the grass has made quite a start and I am thinking of disking the surface right away, and if I thought it would make it work easier next spring I would plow it again this fall. What would be your advice on the subject?

We would have no hesitation in advising this subscriber to do some back-setting this fall. It might be an excellent idea to disk the land before plowing, and possibly harrow it, as much better work can be done in plowing the second time if the surface is uniform.

There would at least be two advantages in getting the land plowed again this fall. In the first place it might be possible to plow at least an inch deeper than it was plowed the first time, while in the second place it will almost insure the killing out of the grass. If corn is to be put on this land next year the labor of keeping the crop clean will be materially lessened by a second plowing. Corn cultivators are weak implements when it comes to the matter of tearing out blue grass in a crop, and for that reason it is much better to go after the grass with three good horses on a good riding plow.

We appreciate the fact that the labor element is quite a factor in this case, because no farmer has time to do work of this kind unless he is convinced that his labor will count for much. Nevertheless, we will advocate the plan of plowing the land the second time if the

soil is sufficiently rotted to stand plowing again.

PROFIT IN HOG FEEDING.

The following communication has been received from one of our subscribers, Mr. W. H. Underwood, of Johnson county, Ill.:

The common mistake made in handling hogs is that of feeding too much. One day's overfeeding will do more harm than can be counterbalanced by several days' sensible feeding. Nothing is more important than regularity. The digestive system of animals adjusts itself to receive food at certain times, and if the animals do not receive it at the proper time they are unnecessarily worried. This results in loss. Frequently, irregular feeding causes the animals to become unduly hungry, so that they eat their feed too rapidly.

It is a mistake to think that any old thing will do for a hog. You cannot expect good meat unless clean feed is used. Corn should be fed in small quantities at first, and it should be gradually increased until the hog's system gets thoroughly used to it. I have always had better results in feeding corn in connection with mill feeds, alfalfa and clover hay. Turnips and artichokes are also good.

It is a mistake to allow hogs to have access to cold and damp sleeping quarters. You practically waste your feed in that case. Plenty of pure water is just as necessary as the feed, and it should be warmed in cold weather. Do not forget also to clean and disinfect their surroundings occasionally, and especially the troughs.

There is some wholesome advice in the above communication. We would like to emphasize the importance of getting hogs on feed gradually, and especially when they are to be fed corn. If one will take two or three weeks, or even a month, to get them on full feed, you will make greater gains during a given period than if an attempt is made to get them on a heavy ration suddenly.

Too much emphasis cannot be placed on the importance of keeping the hog quarters dry, and especially during the fall and winter. The best plan that we have ever found to prevent hogs from piling up is to keep them well supplied with bedding. Just as soon as it becomes tough and damp, throw it out and replace it with fresh. Simply because it is not soaking wet does not mean that it is still good enough to use. A big bunch of hogs running under a shed really ought to have their bedding changed every day or two. It will pay to buy the straw if one does not have it on hand.

We have never liked oat straw for hog bedding, and while ordinarily one has to use what is on hand, at the same time it frequently happens in every neighborhood that wheat straw is available. It

will almost pay to exchange with a neighbor a load of oat straw for a load of wheat straw, providing you cannot buy the wheat straw outright. There is something about the dust in oat straw that is very irritating to the skin of a hog.

FLAX AND OIL MEAL COMPARED.

The following communication has been received from a subscriber, Mr. T. B. Smith, of Kankakee county, Ill.:

Please inform me of the food value of oil meal as compared with pure flax seed. Would you advise feeding flax seed to fattening cattle? Would you think as good results could be obtained by the use of flax seed as from oil meal?

Concentrated foods like oil meal or flax seed are used because of the large percentage of protein or flesh-forming constituents which they contain. Flax seed contains about 22 per cent of protein, while old process oil meal contains about 33 per cent. Some idea of the relative richness of these foods may be obtained by comparing with corn, which shows a protein content of practically 10 per cent.

We can find no record of experiments having been conducted to ascertain the value of flax seed when it is fed to fattening steers. The Iowa Experiment Station, however, found that as high as eight pounds of flax seed could be fed daily to cows without any injurious results. It is no doubt more laxative than the oil meal and because of this will have to be fed cautiously to fattening steers.

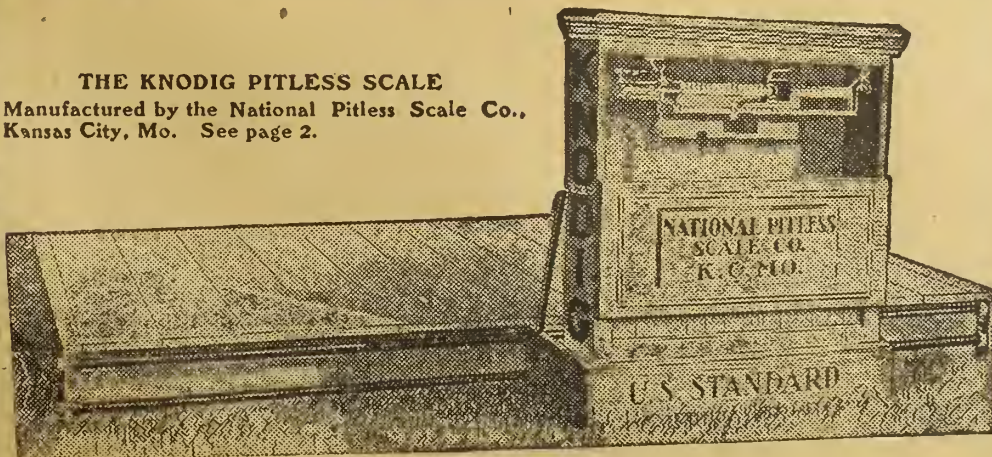

SUGAR BEETS IN KANSAS.

The Kansas State Board of Agriculture discusses the sugar-beet question in its last quarterly report. It seems that seventy-seven farmers of the state harvested 1,700 tons of beets in 1901; seventy-five grew 4,200 in 1902; eighty-six grew 700 in 1903; eighty-seven grew 6,300 in 1904; while in 1905, 123 growers harvested 8,600 tons.

Provision was made by a law passed in 1901 for the payment by the state of \$1 per ton on beets grown in Kansas and actually used for sugar manufacturing. The same year Hamilton, Kearney and Finney counties produced a little over 1,700 tons of beets, which were manufactured into sugar at Rocky Ford, Colo. That year it cost \$22 per acre to raise the beets, which showed a maximum sugar content of 22.8 and a minimum content of 13.3. Fifteen of the most successful growers netted a profit of \$28.48 per acre. The same counties produced practically all the beets raised in 1902 and 1903. In 1904, 23 per cent of the beets produced were grown outside of the Arkansas valley region, where the bounty had previously been paid. A group of Colorado capitalists purchased 27,000 acres of land in Finney and Kearney counties for beet-growing purposes, and early in 1906 a factory was started to be ready for this crop. It is to have a daily capacity for slicing 800 tons of beets. Contracts were secured for 6,500 acres, about half of this within wagon-hauling distance of the factory. The erection of this factory and the acreage of beets tributary to it this year will make the 1906 crop more than four times exceed the total tonnage of all the beets raised in Kansas during the previous five years. The investment made by this company, now known as the Unit-

THE KNODIG PITLESS SCALE

Manufactured by the National Pitless Scale Co., Kansas City, Mo. See page 2.

ed States Sugar and Land Company, represents more than \$300,000 in the factory and equipment. This means the sugar-beet industry is established in the state. The cost of raising beets on land worth \$75 to \$100 per acre is estimated in the Arkansas valley to be \$37.50 per acre.

The average yield runs from twelve to fifteen tons, though with a favorable season and skilful management a yield of twenty tons may be obtained. The net profit where everything is handled in an up-to-date manner usually runs from \$20 to \$40 per acre.

THE CENTRAL HOG HOUSE.

A bulletin has recently been published by the Illinois station dealing with the location, construction and operation of hog houses. The author, William Dietrich, is connected with the animal husbandry department and gives his entire attention to swine. Many of our readers will remember the bulletin prepared by

sunlight at noon on the shortest day of the year passes through window E and falls upon the floor of the south side pen on the opposite side from the window. The lower part of window D in the upper part of the building performs the same function for the pen on the north side of the alley as does window E for

from the floor. This necessitates a flat roof for the part of the building south of the alley.

In Fig. 2 is shown the ground plan of this central hog house. The building itself is marked off in the illustration by the letters O, S, T and U. The alley in the center is eight feet wide, which permits of driving through the building with a wagon, and the pens A are ten feet wide and eleven feet deep. Each pen has a doorway at M leading to the outside, and also one at N leading into the alley. The latter door is hung so that when two opposite doors are open it obstructs the alley. L represents a feed trough in each pen. Fig. K in each pen represents a fender consisting of a two-inch tubular iron bar placed on iron posts of the same dimensions and set in concrete in the floor. This bar is eight

"Life-Saver" Storm Front

Here is just what you want. A perfectly safe storm front that affords protection not only from rain and wind but in case of accidents. It's a life-saver as well as a perfect shield from rain, wind, cold, raw and dusty weather. When adjusted to the buggy it becomes a permanent fixture. Easily and quickly put on or taken off yet always ready for instant use. The horse is always in full view and the reins instead of passing through a hole as in ordinary fronts are in free use ready for any emergency. Plenty of light and ventilation. Roomy enough for third seat to be added if desired. Booklet tells how to get one free. The Safety Storm Front Co., 234 Huron St., Toledo, O.

a larger area than will a similar sized tile drain that is placed at a depth of three or three and one-half feet. In the second place, the thorough draining of a soil to a depth of four feet tends to furnish rather a larger root pasturage for plants than more shallow drainage. On the other hand, we have known instances where four-foot drains operated somewhat too slowly the first few years to justify putting them to that depth.

We recently had occasion to examine into the character of draining that was being done in a fertile section of Iowa. The soil was a rich black loam, but the subsoil in that case was rather stiff. We found that the best farmers were putting their drains down to a depth of three feet. We were told by men who had farmed some of the land thirty or forty years that this depth of three feet had been arrived at through practical experience. Indeed, instances were cited where men had taken up their four-foot drains and made them more shallow, as they operated too slowly.

The exact character of a soil has so much to do with a question of this kind that one can usually get the best information from others in the locality who have had some experience in the operations of drains at different depths.

The hog market was brought to a standstill one day last week at Kansas City. Packers refused to bid. Their action was the result of a misunderstanding as to the application of the new government inspection rules that were to have gone into effect on that day. The buyers thought that they would have to stand the loss of all animals that failed to meet the government requirements after having passed over the scales, and for that reason they refused to bid. It was not until Dr. H. L. Baker, in charge of the government inspectors, said that the old inspection regulation would apply that trading was resumed.

On another page this week, The Litchfield Manufacturing Company, of Waterloo, Iowa, are telling our readers something about gearing on Manure Spreaders. It is worth reading.

THE KNODIG PITLESS SCALE.

Every farmer in the corn belt should have a scale of his own. If he is selling grain or live stock he can usually save the price of a good scale in one year. If you know what your loads weigh before starting from home there is little danger of your being cheated in town, because the town scale or feed-yard man soon learns who has scales. We know of one instance where on a sixty-bushel load of corn the town scale was off 800 pounds, and as corn was selling at fifty cents a bushel a few experiences of that kind would pay for a scale. At this time we desire to call attention to the Knodig Pitless Scale, an illustration of which is found on page one of this issue. This scale has all the advantages and none of the disadvantages of the old-fashioned kind. It is guaranteed to be absolutely accurate, because tested according to the United States standard of weights. It is manufactured by the National Pitless Scale Company, of Kansas City, Mo., and is sold directly to the user, thereby cutting out the middleman's profits. The manager of this company, Mr. Gumbel, has been singularly successful in placing a reliable, though reasonably-priced scale within the reach of farmers. His plan is to let any farmer, stockman, elevator man or grain dealer use the scale one month on trial, and if it is not then satisfactory the company will pay the freight both ways. Without spending a single cent, therefore, you can obtain a trial of the Knodig Pitless Scale. Please insert your name and address on the corner of the advertisement on page 43 and send it to the National Pitless Scale Company, 2011, Wyandotte St., Kansas City, Mo.

DENVER AND RETURN OCTOBER 13TH TO 16TH.

On the above dates the Chicago Great Western Railway will sell round-trip tickets to Denver and return at rate of one fare plus \$2. Call on E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

ARE YOU GOING ABROAD?

To Europe, Alaska, South America, China, Japan, Australia or around the world. Full information, details, lowest rates can be procured from A. J. Chessman, C. P. & F. A., Chicago & Northwestern Railway, 401 Walnut St., Des Moines, Iowa.

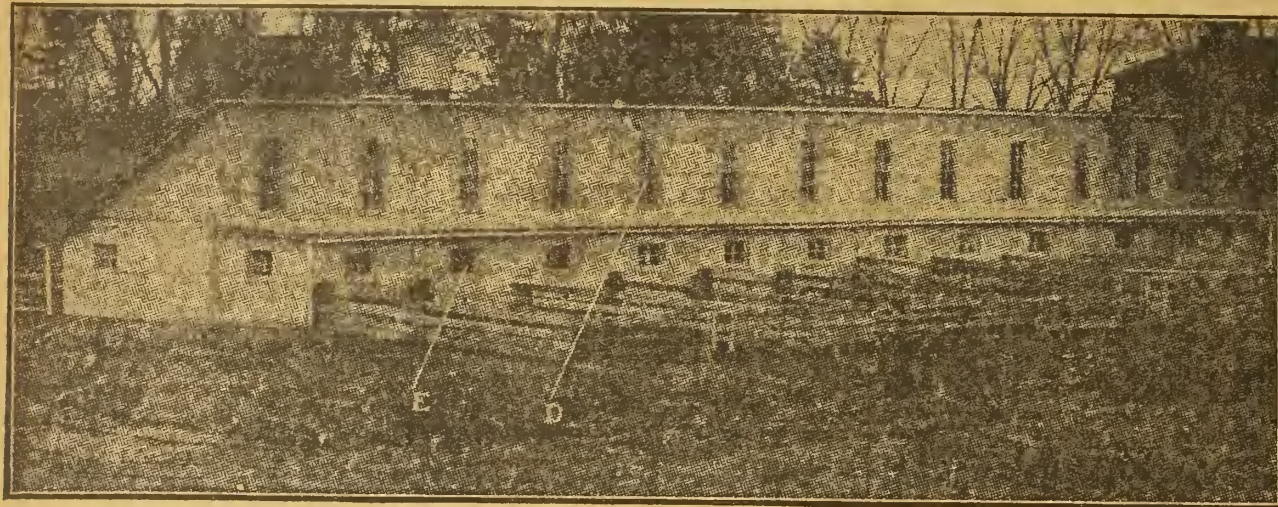

FIG. 1. THE CENTRAL HOG HOUSE.

Mr. Dietrich on the market classes of swine.

Illustrations of one large central hog house are given in this bulletin. In Fig. 1 is shown the plan of a house thirty

the pen on the south side. In order to have these windows admit the greatest amount of sunshine the top window E should be five feet and six inches from the floor. The upper win-

or nine inches above the floor and about six inches from the wall, and is used to prevent sows from crushing their pigs at farrowing time. It is assumed that the sow will necessarily make her pen in this corner, as the other two corners are occupied, two of which have doors and the other the feed trough.

Feed bins, scales, mixing room, etc., are represented by the letters C, D, I, etc., while G represents a small office. All pens open into outside yards, each yard being the width of the pen and twenty-eight feet long. The cost of a hog house with all accessories as outlined above is given as follows:

Foundation, tile drain, floor and chimney	\$649.25
Lumber and windows	639.70
Iron posts, gates, panels and fenders	244.80
Hardware	53.65
Paint and painting (two coats)	54.00
Labor (carpenter)	290.00
Tar and gravel roof	79.15
Scales	100.00
Total	\$2,110.55

The cost of the brick floor with cement filler when the brick is laid flat, as in the pens, is eighty cents per square yard and when laid on edge, as in the alley, \$1.12 per square yard. The four-inch cement floor in the pens cost \$1.00, and the six-inch cement floor in the alley cost \$1.35 per square yard. This is exclusive of the cinders used for the foundation in both the brick and the cement floors.

DEPTH OF TILE DRAINS.

The following communication has been received from one of our subscribers, Mr. S. Coon, of Mitchell county, Iowa:

I am about to do some tile draining and would like a little advice concerning the depth to which drains should be dug. The top twenty inches of my soil is composed of a black loam, the next twenty being a somewhat porous clay. Deeper than that is a mixture of clay and gravel. My mains are already dug and they are four feet deep. There are draws or swales to be drained into these mains, and the fall will be five or six inches to the 100 feet. I will use four, five and six-inch tiles. Now, what I would like to know is how deep these laterals should be dug. Do you think it would drain better if they were put down four feet than if laid three feet deep? The extra foot in depth would cost fifteen cents per rod.

Lateral drains three feet deep are, as a rule, very satisfactory on a very considerable acreage of corn-belt land. The soil described by this subscriber may stand somewhat deeper drainage, as the subsoil is apparently more porous than the surface. Professor Elliott, of the department of agriculture, Washington, gives it as his opinion that the right depth of lateral drains on prairie soil is from three to three and one-half feet. Of course drains put down to a depth of four feet will remove the water from

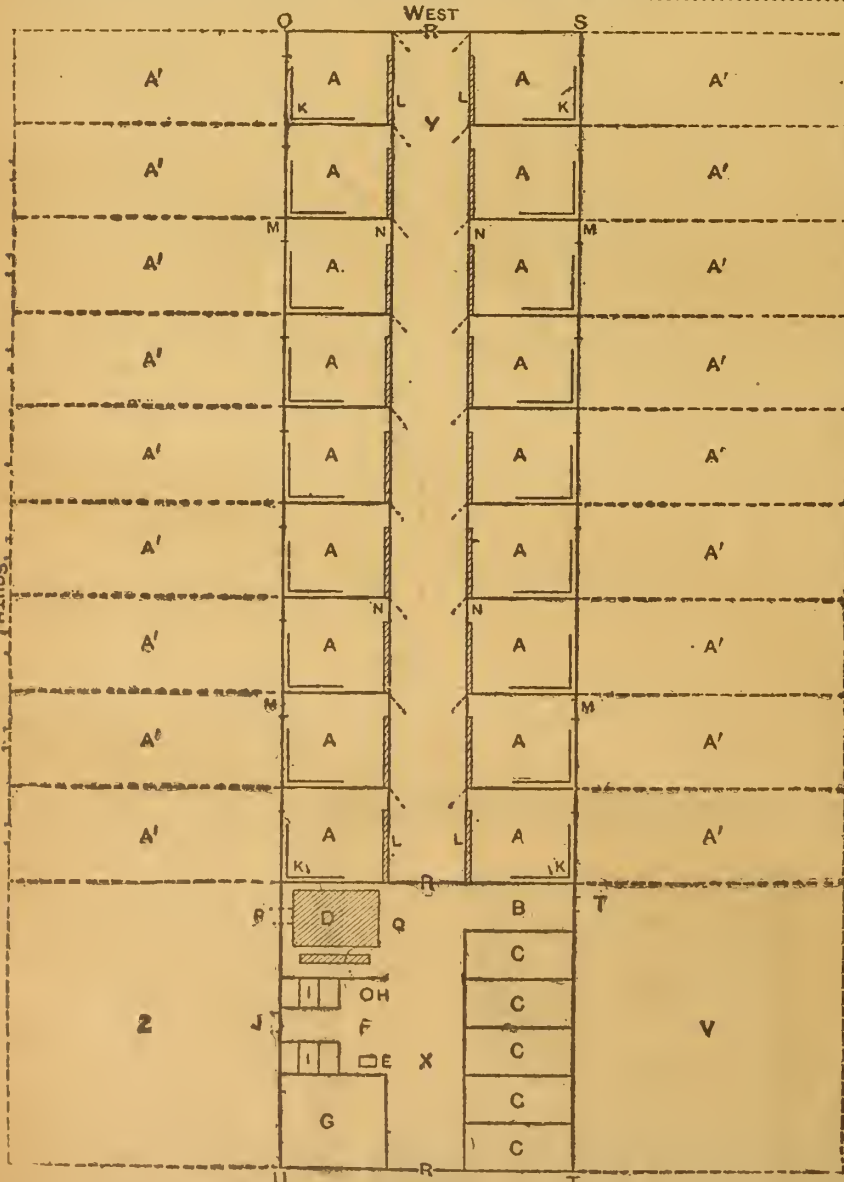

FIG. 2. PLAN OF CENTRAL HOG HOUSE.

feet wide and 120 feet long. It stands lengthwise east and west, with the windows on the south side. The windows, represented by the letters E and D in the illustration, are so placed that the

dow, which throws light into the pen on the north side, should be longer, but a point in this window the same distance above its lower end as the height of window E should be nine feet eight inches

Farm Furrows

Turned by a Practical Farmer.

One way to have good neighbors is to do unto others as if you were the others.

A cheap scrub is the dearest animal on a farm. It may be dear in two ways.

I have lived long enough to know that it is easy to hire a man to dig a ditch the way he wants to dig it.

There are mean hogs as well as mean men, and when the two are found on the same farm there is certainly a great mess.

If boys are required to handle guns, it is well that they be taught how. It is surprising how many men get killed in the careless handling of guns.

An agricultural axiom was written as early as the year 1758, as follows: "The finer the earth is made by tillage, the more it is enriched by rain, dew and air."

A western man has discovered that his poultry does much better when provided a bed spring on which to roost. He says they rest better and thus are made more profitable.

Have you observed that some farmers almost always have good crops? Of course in a bad year they do not have as good crops as they do in good years, but it is safe to say they have the best crops in the neighborhood.

It pays to fertilize crops. If twenty loads of manure on an acre only increases the crop five bushels of corn, there is a gain by it, for that fertility will be evident on that acre for many years.

The wife and daughter should not be required to ask for every quarter they get for spending money. They should be recognized as part of the firm, and should have a good share of the funds without having to beg it. Come, now; be generous and see how much better you'll feel.

Not long since I saw a nice farm dwelling where the farmer was so economical that he planted corn right up to within a few feet of the house. Now it occurred to me that the owner of that house could have arranged for a nice lawn to advantage even if no pecuniary gain could accrue.

On some of the tall and percipitous bluffs of yellow clay along the Missouri river I saw many kinds of weeds and sweet clover growing. Two things came to mind. One was that the weeds were tenacious of life to take a habitation in such a place and the other was that the poor looking clay was fertile.

I am led to wonder what has become of the habit of shaking the table cloth after meals, which has always been so acceptable to the dog, the cats and the chickens. As a boy I learned to look for this act of clearing away the table, but nowadays a crumb pan takes off the scraps. We look in vain for the pretty girl in this old line after-dinner act.

Some men take hold of new and helpful devices very reluctantly. It requires time and a good deal of waiting to get some men to do their best. This reminds me of a man who had his house and barn blown into matchwood by a cyclone and he was carried into the next township, and when he had dug the clay out of his mouth sufficiently to speak and people asked him about the storm, he said, "Why, I haven't heard anything much about a storm." It takes cyclonic meas-

ures sometimes to get men to see where they are.

Have you been successful in killing quack grass? If so, how do you do it?

When providing a salt box to hold salt for the stock, please label it "Salt," so the stock will know what is in the box. This is a suggestion of one of our correspondents.

The man who "had better stock and farm products at home," than those exhibited at the fair, was there this season. He usually shows up, but he seldom exhibits any of the results of his labor.

If prone to look after the affairs of a neighbor, please remember that this is not the forte of a farmer. The lawyer is the only man on earth who can get rich attending to the business of other people.

Occasionally a horse will form a habit of chewing the ends of the halter strap and such other parts of the harness as he has access to. Equal parts of cayenne pepper and fish oil applied to such straps will cure the worst strap chewer.

This is the age of the handy man—the man who applies his thoughts to make things himself rather than to hire them made. He is not only doing these, but he has his eyes open to note what others are doing so he can apply their best ideas to his own needs.

Sam visited the Dakotas and found that things were done on a large scale out there. He says one farmer started out in the spring and plowed a furrow until fall, and then he harvested back. One man owned a farm there that was so big that when he put a mortgage on it, it came due on one end before it was recorded on the other.

After due deliberation and much examination and observation I have come to the conclusion that the edge drop planter device is the best invented today. I watched a planter at a fair fifteen minutes and did not see a break from the usual three grains. It is true that the seed was graded and it is evident that it should be on the farm as well as at the fair.

The time is at hand when a stockman can afford to use some of the coal tar preparations for preventing the ravages by flies. Cattle can be sprayed occasionally with the "stinking" stuff and the flies will give them a wide berth. I believe that some of these preparations can be used to advantage in odoriferous manure piles and thus kill flies before they are born.

Sometimes when there has been a drouth and the pastures are dry, Johnny will be kept home from school to herd the cows in the lane. The cows and the lane will be benefited, but how about Johnny? Johnny should have every advantage possible. There is but one Johnny, but there will be other cows and lanes long after it will be too late for Johnny to get the right start in life.

A barbed-wire fence was heard to make the remark: "I've been in the cattle and horse business for many years, and I have observed that I always got more horses and cattle when I was down and out of repair. I may have to retire, however, as my neighbor, the woven wire, is expanding his domain." It is getting to be a question whether a farmer who raises good horses can afford to have a barbed-wire fence.

A plow that had been left in the ground where used last was heard to say: "I seem to be stuck on my job, but I'll lose all my brightness if I stay here long." "Oh, never mind," said a self-binder in a fence corner, "I'm bound to stay here with you until called to do more binding." Then a hay loader chimed in by saying: "I've had my ups and downs, but this location is damaging to my slats, but I am still 'loading' more trouble on my master."

I picked up an eastern farm paper recently and read an item to the effect that in Dakota there are farmers who grow two crops of clover, from the second of which they get a yield of seed. A new kind of thrasher is employed to thrash out the clover seed, which sells at from \$7 to \$8 per bushel. I wonder. For more than a century farmers have been obtaining seed from the second crop, and for more than fifty years the clover huller has been doing its work, and

One of the largest and best equipped institutions of learning in the west. Over \$700,000.00 has been invested in buildings and equipments.

Special Terms open October 15th, November 27th, and January 2d, 1907.
The new school year opened September 4th, with students in attendance from twenty-one states and Canada, and with an increase of from fifteen to fifty per cent in the various departments of the school.

All regular College Courses are maintained and in addition to these the College maintains

FIVE GREAT ASSOCIATE COLLEGES

The Normal College. This is a thoroughly equipped Normal School which makes a specialty of preparing teachers for all grades of public school work. There is also a special Primary Training Department with practice school. Supervisors Course in public school drawing. Tuition for a quarter of twelve weeks, \$12.00. Send for free catalogue.

College of Pharmacy. The largest and most completely equipped College of Pharmacy in the country. One hundred and seven graduates last year.

Regular Courses leading to the Ph. G. and Ph. C. degrees.

Special Course of three months to prepare druggists for examination before State Boards of Pharmacy.

Correspondence Course for druggists who can not leave their business.

All expenses for tuition, board, room, light, heat, library, gymnasium fee in the Ph. G. course may be reduced to \$206.00, and for Ph. G. and Ph. C. Courses to \$300.00 if paid in advance. No entrance examinations.

College of Music and Oratory. The largest College of Music and Oratory west of Chicago. Fourteen teachers—each an artist. Thirty pianos—four grand pianos. Voice, Piano, Violin, Harmony, Chorus, Orchestral and Band Music. Supervisors' Course in Public School Music.

A Thorough College of Oratory special attention given to preparing teachers for readers and public speakers. Send for catalogue.

Consider the advantages of taking your course at a thoroughly equipped, first-class College, and write for catalogue giving complete information about the work in which you are interested. Remember you can enter any day you are ready to come and your term begins the day you enter. Address **O. H. LONGWELL, President, HIGHLAND PARK COLLEGE, DES MOINES, IOWA**

College of Engineering. The largest and most Engineering Schools in the West. Civil, Electrical, Mechanical, Steam, Traction Engine, Telephone, Telegraph, and Machinists' Courses. Thoroughly equipped machine and wood shops. Complete Electrical and Chemical Laboratories. Shop work from the beginning.

Some specially attractive short courses in Electrical, Steam and Traction Engineering. A regular Machinist's Course where one may learn the machinist's trade. No entrance examinations. Send for catalogue and special information. Tuition, \$20.00 for quarter of 12 weeks.

College of Commerce. This is as complete a College of Commerce as can be found in the United States. It consists of the following departments:

1. Business College
2. College of Shorthand and Typewriting
3. College of Penmanship, Pen Art and Drawing
4. College of Telegraphy

Tuition three month's in Business Course, \$12.00. Scholarship in Shorthand and Telegraphy \$40.00.

Marlin

To kill a grizzly bear at one shot requires a mighty powerful cartridge and a strong, accurate gun. Poor guns have cost many lives among big game hunters. But whether the game be dangerous or not the **Marlin** man always gets perfect service.

Marlin rifles are sure, simple, strong and accurate. **Marlin** rifles are comfortable to carry, balance well and come to the shoulder with that ease and certainty which guarantees good shooting always.

Marlin rifles are made in all calibers for all kinds of game.

Send 6 cents in stamps for a catalogue, and you will surely find the gun you have been looking for, be it anything from .22 to .45-90.

The Marlin Firearms Co.,
135 Willow Street, New Haven, Conn.

the seed sells for nearer \$10 per bushel than any other price. Mr. Editor, wake up!

The matter of postponement of manure hauling at this season of the year in order to further something else should be debated carefully and long before concluding to let the manure remain. Hauling out manure should be regarded as one of the most necessary things to do at this season of the year. Sometimes when other things are allowed to come in the way it is neglected and the accumulation of manure is bothersome.

HOMESEEKERS' EXCURSIONS.

CHICAGO GREAT WESTERN RAILWAY.
On the first and third Tuesdays of each month until November the Chicago Great Western Railway will sell homeseekers' tickets to points in Arkansas, Indian Territory, western Louisiana, Mexico, New Mexico, Oklahoma Territory and Texas at rate of one fare plus two dollars for the round trip, except that a maximum rate of \$23.00 from Des Moines will be in effect to above territory with the exception of Mexico. Stopovers will be allowed in both directions. Limit thirty days, stopovers both ways.

On the first and third Tuesdays of each month until November the Chicago Great Western Railway will sell homeseekers' tickets to points in Arizona, Kansas, Missouri, Nebraska, Nevada, Utah, Wyoming, Alabama, Florida, Georgia, Kentucky, eastern Louisiana, Mississippi, North Carolina, Tennessee and Virginia at rate of one fare plus two dollars for round trip. These have limit of twenty-one days to return and allow stopovers on going trip.

On the first and third Tuesdays of each month until November, homeseekers' tickets will be on sale to Denver, Colorado Springs, Pueblo, at rate of \$23.00 from Des Moines and to Ogden and Salt Lake City at rate of \$29.50. Other Colorado points in proportion, all having limit of twenty-one days to return

DITCHING MACHINE.

The **CYCLONE** Has No Equal Nor Superior

For Cutting Tile Ditch, CHEAP.

QUICK. Perfect. With six horses and two men the **CYCLONE** will easily cut **FOUR HUNDRED** rods of tile ditch, 24 to 30 inches deep, 9 inches wide. Sold under a guarantee to do more work than any ditching machine on earth at same cost. Every Farmer and Ditcher should know all about it. Write for circular, price, terms. **SOLD DIRECT.** A GREAT SELLER. A BIG Money-maker. Manufactured and sold by **JESCHKE MFG. CO., BELLEVUE, OHIO.**

Gold Watch FREE AND RING

We positively give both a Solid Gold Laid STEW WIND American movement Watch highly engraved and fully warranted timekeeper equal in appearance to a Solid Gold Watch; also a Solid Gold Laid Ring, set with a Famous Congo Gem, sparkling with the fiery brilliancy of a \$40-diamond, for selling 20 pieces of handsome jewelry at 10c each. Order 20 pieces and when sold send us the \$2.00 and we will positively send you the watch and ring also a chain. Ladies or Gents style. **ALTON WATCH CO., Dept. 131, Chicago.**

and allowing stopovers on going trip.

To points in Idaho, Montana and Washington homeseekers' tickets on sale the first and third Tuesdays of May, June, September, October and November at rate of one fare plus two dollars for the round trip, tickets having limit of twenty-one days to return.

To points in Minnesota, North Dakota, Manitoba, Saskatchewan and other Canadian provinces, homeseekers' tickets are on sale each Tuesday this year. Have limit of twenty-one days and allow stopovers west of St. Paul.

Full information can be obtained from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

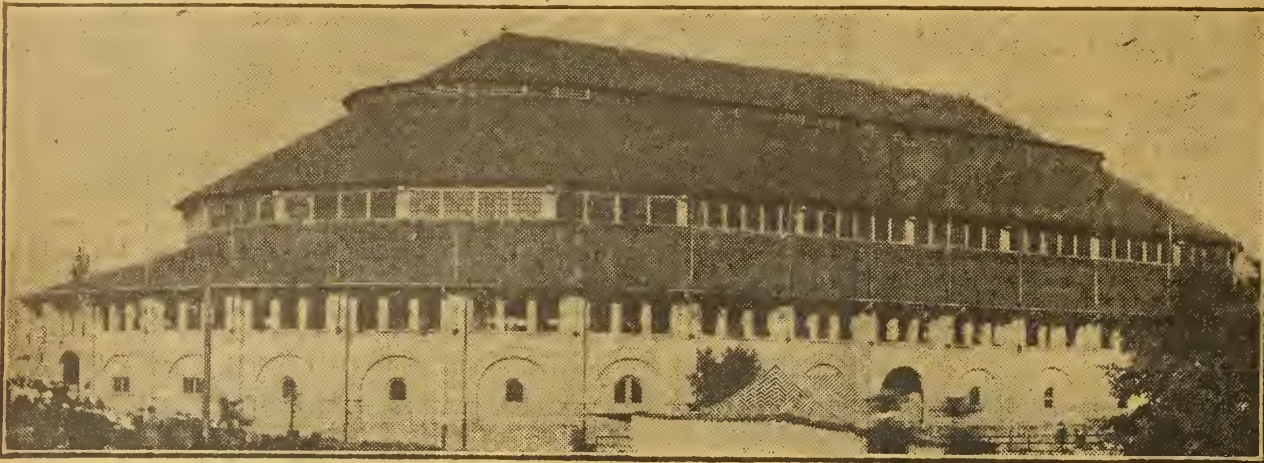

WHAT DO YOU SAY?
Several hundred thousand farmers say that the best investment they ever made was when they bought an

Electric Handy Wagon

Low wheels, wide tires; easy work, light draft. We'll sell you a set of the best steel wheels made for your old wagon. Spoke united with hub, guaranteed not to break nor work loose. Send for our catalogue and save money.

ELECTRIC WHEEL CO., Box 43, Quincy, Ill.

ILLINOIS STATE FAIR

STOCK JUDGING PAVILION

The refusal of the Springfield fair officials to accept the date assigned them by the State Fair Managers' Association cost the Illinois institution a few thousand dollars loss in gate receipts last week—a loss attributable to a few light attacks of wet weather. Not, however, until the fair's money-box bulged with the lucre of three crowded days, did the showers come. The showers of Thursday and Friday cut the attendance, but interfered but little with the fair proper, for the reason that the buildings are sufficiently ample to shelter all and then some. In this ability the Illinois institution stands alone of those of its kind in the corn belt. The appreciation of the people for the large equipment put there by the state is the best example that could be flung in the face of parsimonious sister states. This alone makes Illinois the standard by which all corn-belt fairs are compared.

The Alton shuttle train service between Springfield and the fair grounds was not available this year, and the result spelled discomfort to thousands of weary sight-seers. The numerous wait-a-while switches on the city electric line made travel to and from the fair tedious and tiresome. Here is one of the best fairs of the series with undoubtedly the poorest transportation service of any on the list. The two-hour daily service given by the C. P. & St. L. trains helped some, but before another year nothing should be left undone to increase transportation facilities. If nothing else is done the city line should be double-tracked every foot of the way to the fair ground.

The Illinois State Fair has been doing some work along educational lines that is not yet fully appreciated by the people of the state. We refer to the school of domestic science, operated under the direction of the state farmers' institute and board of agriculture. In a building specially erected for the purpose, experts disseminated information to the farmers' wives and daughters in attendance relating to the proper cooking of foods, the sanitation of the home, care of the sick, etc. In addition to the free lectures given to the public, fifty young ladies from the farm were given a thorough two-weeks' course in domestic science. Year after year this work has been going on quietly, but with telling effect upon Illinois farm homes. Each student afterward becomes, as it were, a missionary in her community, and thus spreads the leaven of enlightenment emanating from the Illinois State Fair. The instruction given during the week by the dairy division of the agricultural college is worthy of the most favorable comment also. The making of high-class dairy products in the presence of interested farmers and their families must accomplish much, as it goes directly to the weakest point of the whole dairying system, namely, the country butter supply. Hundreds and possibly thousands of people saw last week just the conditions butter should be in when the churn is stopped, and the experience will have its beneficial effect on the dairy output of the state.

No feature of the Illinois fair bears comparison with others better than the agronomy division, composed of the exhibits in the "dome" building. The farm produce display was superb this year, and in the matter of corn the exhibits

outclassed all former records. The ten-acre lots as well as the 100-acre entries meant the keenest kind of contest between exhibitors, and a most fascinating and instructive feature for visitors. No man could examine the corn at the Springfield fair and fail to be convinced of the great improvement that has been made in corn in recent years. It was plainly apparent that the agricultural college and the corn-improvement associations are getting in some good work, the practical outcome of which is already found in the increased state yield. The display made in the dome building was a constant center of interest during the week and the miniature reproduction of the experiment station grounds accomplished much by way of impressing visitors with the character of the work being done in their behalf at Champaign.

Some changes were made in the personnel of the board of agriculture at the election held during the week. George H. Madden, of Mendota, formerly head of the speed department of the fair, was made president, his successor from the twelfth district being A. J. Lovejoy, of Roscoe, a man of large abilities and broad experience, one who will render creditable service to the people of the state. J. O. McComb, of Chicago, succeeds James Frake, while C. M. Woods, of Springfield, succeeds Wm. A. Young, of Butler, and the former president, A. D. Barnes, is now vice-president-at-large.

There are things to do yet that can be done only by the board. At present some of the effect of the fair is lost on account of slow judging. There is no excuse for keeping exhibitors in suspense to the end of the week. When the awards are made early, the fair becomes more educational for visitors. Parades

made one of the most spirited and interesting contests of the beef breeds. While it was generally expected that competition would be keen, some of the decisions were in the line of a surprise and not a few of the side ring talent were on the fence when it came to making a choice for the ribbons. Well-conditioned animals of the show-ring type was the rule without exception, making the work of rating a very difficult task, and M. A. Judy, of Beecher, Ill., who was selected to choose the winners, found the onlookers in some cases hard to please, although on the whole, decisions were satisfactory and breeders bore their gains and losses with good grace. The list of breeders are Carpenter & Ross, Mansfield, Ohio (13 head); Adkins & Stevenson, Bement, Ill. (11 head); D. R. Hanna, Ravenna, Ohio (11 head); F. W. Harding, Waukesha, Wis. (17 head); J. C. Roach, Girard, Ill. (1 head).

AWARDS.

Aged Bull—First, Harding, on Whitehall Marshall 209776; second, Hanna, on Missie's Diamond; third, Adkins & Stevenson, on Invincible Hampton 206226; fourth, Carpenter & Ross, on Scot Mint. The champion of many shows needs no comment further than to say that he easily held his place in good company. Compared to his superior, the Missie bull is lacking somewhat in width of body, though a bull of excellent side view and is rather stronger in front than behind. He shows admirable Short-horn character. The next choice was hardly the most favorable one with the onlookers, many preferring the elegant white bull put down to last.

Two-Year-Old Bull—First, Carpenter & Ross, on Highlander; second, Roach, on Baron Hobson. The second choice was of hardly the popular type of winners seen of late, though a splendid rich roan of considerable character.

Yearling Bull—First, Carpenter & Ross, on Avondale; second, Hanna, on Diamond's Mariner; third, Adkins & Stevenson, on Lad's Champion; fourth, Adkins & Stevenson, on Royal Lad. The two latter bulls are sired by Red Lad 149033 and while well made, were hardly up to the quality and finish of the first and second.

Bull Calf Under Twelve Months—First, Hanna, on Diamond's Pride; second, Harding, on Anoka Sultan; third, Hanna, on Scottish Mint.

Bull Calf Under Six Months—First, Hanna, on Diamond's Pride; second, Harding, on The Gods; third, Harding, on Sultan Commander 263132.

Aged Cow—First, Hanna, on Ball Craggan

as beautiful a front is most uncommon as is seen in this promising heifer.

Yearling Heifer—First, Harding, on Clara Belle; second, Harding, on Missie of Brown-dale; third, Adkins & Stevenson, on Amy 2d; fourth, Harding, on Bessie Banner; fifth, Carpenter & Ross, on Rosewood 86th. The high-grade finish and bloom of the first two put them in a class by themselves.

Heifer Six and Under Twelve Months—First, Harding, on Anoka Gloster 2d; second, Harding, on Claréty Choice Goods; third, Adkins & Stevenson, on Amy 3d; fourth, Adkins & Stevenson, on Annette 9th. Calf Under Six Months—First, Carpenter & Ross, on Sweet Duchess of Gloster 2d; second, Hanna, on Diamond Lavender; third, Harding, on Roan Lady; fourth, Harding, on Ramsden Flower; fifth, Carpenter & Ross, on Annagathel. For first choice was selected a splendid calf, of elegant handling, especially over the ribs, and a show animal of great promise in the future.

Exhibitor's Herd—First, Harding; second, Hanna; third, Carpenter & Ross. The herd classes presented some most wonderfully uniform groups, most notably in those of the Wisconsin exhibit, and while one or two stars may bring fame to a herd, it is the uniform excellence throughout that counts for more.

Breeder's Young Herd—First, Harding; second, Adkins & Stevenson; third, Carpenter & Ross; fourth, Hanna.

Calf Herd—First, Harding; second, Adkins & Stevenson.

Get of Sire—First, Harding, on get of Whitehall Sultan; second, Hanna, on get of Bapton Diamond; third, Adkins & Stevenson, on get of Invincible Hampton.

Produce of Cow—First, Hanna, on produce of Missie C.; second, Harding, on Clara 158th; third, Adkins & Stevenson, on Amy; fourth, Harding.

Champion Senior Bull—Whitehall Marshall. Champion Junior Bull—Diamond's Crown. Champion Cow—Anoka Broadhocks. Champion Heifer—Clara Belle.

RED POLLS.

The exhibit of this breed surpassed all expectations and from the large number of animals of strikingly uniform excellence it would appear as if the Red Polls were coming to fulfill the claim that this is a farmers' breed, that is, the all round kind. Those qualified to know, expressed their opinion that it was, without doubt, the grandest and largest showing ever made by the breed in this country. The two essentials of a creditable exhibit, namely, number and quality, were harmoniously combined in the Red Poll classes. Prof. Thos. Shaw, of St. Anthony Park, Minn., made the awards and the universal satisfaction with which his decisions were received was a high tribute to his judgment. Classes of from a dozen to twenty in number made the work of placing an extremely slow and difficult task and with scarcely a cull in any of the rings the difficulty was increased and could be won only by a small percentage of the animals shown. Professor Shaw was enthusiastically complimented over the splendid effort made to bring this breed before the public. From beginning to end there were unusual features of interest from the array of eight aged bulls to the herd display. A few changes were made in the rating compared with previous placings. This was partly accounted for by the fact that several of the herds were showing the effects of delay and privation, due to bad weather. The Hartline exhibit was rather weak in the males, but among the females there was shown three generations, two of them taking first in their classes. The list of breeders is as follows: J. Slimmer, Wau-sau, Wis. (12 head); Geo. B. Buck & Co., Orion, Ill. (5 head); G. W. Coleman, Webster City, Iowa (12 head); Borden Stock Farm, Tonte, Ill. (20 head); Adolph P. Arp, Elridge, Iowa (15 head); Kestel & Schrotberger, Gardner, Ill. (13 head); H. S. Garman, Adeline, Ill. (10 head); Frank Hartline, Strasburg, Ohio (11 head).

AWARDS.

Aged Bull—First, Garman, on Brunce 11287; second, Borden Stock Farm, on Pochto 12042; third, Arp, on Nailer 7396; fourth, Kestel & Schrotberger, on Monarch 11941. A strong class of eight herd headers made it possible

Percheron Group, owned by Crouch & Son.

of live stock should be a much more conspicuous feature of the entire week. Larger quarters should be provided for swine, and while the board must look to the state for building money, yet it is suggested that the very next appropriation asked be for this purpose, as it is most urgent.

CATTLE.

SHORT-HORNS.

The Short-horn exhibit was full of quality from start to finish and for the numbers

Favorite; second, Carpenter & Ross, on Roan Princess; third, Harding, on Moneybuffle Maid; fourth, Harding, on Princess Flora 2d. First selection is a great, massive cow of 1,850 pounds. She carries a very even covering, well placed and with good handling qualities. Some might fault her style. Roan Princess was, to the surprise of some, brought up from third. Her massiveness and great arch of ribs combined in a form of even proportions from end to end gave her the place.

Two-Year-Old Heifer—First, Harding, on Anoka Broadhocks; second, Hanna, on Pleasant Duchess; third, Carpenter & Ross, on Joe; fourth, Carpenter & Ross, on Mina Princess. For first it was an easy pick, and

for Brunce to win only through his excellent type and masculinity. None of the bulls without strong claims for their places.

Two-Year-Old Bull—First, Borden Stock Farm, on Nerod 12699; second, Slimmer, on Dare 13455.

Yearling Bull—First, Kestel & Schrotberger, on Slow Boy 15368; second, Hartline, on January 14613; third, Kestel & Schrotberger, on Rube 15363; fourth, Coleman, on Logan 13500.

Bull Calf Six Months and Under Twelve—First, Buck & Co., on Rambler 14607; second, Borden Stock Farm, on Lucio 14678; third, Kestel & Schrotberger, on Duke 15370; fourth, Coleman, on Leader. Rambler is a calf of most exceptional quality; perhaps he is a

bit too fine and could stand more size, but for form and Red Poll character he approaches perfection. Following him the type was less refined and more up standing.

Bull Calf Under Six Months—First, Borden Stock Farm, on Bruce, 15381; second, Buck & Co., on Monmouth; third, Arp, on Nailer's Boy 15335; fourth, Hartline, on Nick. **Aged Cow**—First, Hartline, on Celia 18038; second, Silimmer, on Nell 18727; third, Arp, on Lala 18480; fourth, Buck & Co., on Eva 3d 16529. A class of nineteen made this one of the striking features of the Red Polled display. It was a sight worth a trip to the fair to see. While Celia is not a remarkable cow in any one quality, she combines many good traits in her makeup. Her type is about as near the dairy form and yet the dual characteristics are there. A cherry-colored, melon coat adds greatly to her general excellence. The second cow had more covering and less symmetry in lines, but was somewhat more compact and had every indication of a good performer.

Two-Year-Old Cow—First, Hartline, on Marie 21533; second, Silimmer, on Duke's Hagar 23778; third, Buck & Co., on Eva Falstaff 3d; fourth, Borden Stock Farm, on Poplin 3d 21852.

Yearling Heifer—First, Borden Stock Farm, on Ultrada 7th 24099; second, Borden Stock Farm, on Marian Charlotte 24101; third, Hartline, on Ruth 23749; fourth, Garman, on Violet 24537.

Heifer Calf Six Months and Under Twelve—First, Hartline, on Lauretta 24755; second, Silimmer, on Cuba 4th 25396; third, Coleman, on Esther 24970; fourth, Borden Stock Farm, on Diantba 24477.

Heifer Calf Under Six Months—First, Borden Stock Farm, on Nopsy 25912; second, Buck & Co., on Little Eva; third, Borden Stock Farm, on Charlotte 2d 25913; fourth, Arp, on Bedelia 25848.

Exhibitor's Herd—First, Hartline; second, Borden Stock Farm; third, Silimmer.

Breeder's Young Herd—First, Borden Stock Farm; second, Hartline; third, Buck & Co. **Calf Herd**—First, Borden Stock Farm; second, Coleman; third, Buck & Co.

Get of Sire, Four Animals—First, Borden Stock Farm, on get of Poehito; second, Silimmer, on get of May Duke 8th; third, Kestel & Schrotberger, on get of Irwin.

Produce of Cow—First, Hartline, on produce of Miss McKinley; second, Garman, on produce of Flybelle; third, Borden Stock Farm, on produce of Charlotte.

Champion Senior Bull—Nerod.

Champion Junior Bull—Ramblor.

Champion Cow—Marie.

Champion Heifer—Loretta.

ABERDEEN-ANGUS.

The Angus display was excellent in every way, and the breed maintained the high standard that usually characterizes the dodie showing. While some of the herds that have been showing went to Missouri this week, there were others equally as good that came from the East. However, what would have happened here in case the western herds had shown up will probably be witnessed in a battle royal at the Kansas City show. The contest was most intense between the herds of Mr. McHenry and Mr. Bradfute. There is some difference in the type of the two collections, the former being compact and rounded in contour; the latter of the growthy complexion. The ratings by M. A. Judy, of Beecher, Ill., were generally satisfactory. Well-conditioned animals were the rule and with no culls many a difficult proposition was found in the classes. The list of breeders includes W. A. McHenry, Denison, Iowa (11 head); W. N. Foster, Stone Bluff, Ind. (9 head); O. V. Battles, Maquoketa, Iowa (8 head); T. L. Rothwell, Mt. Pulaski, Ill. (14 head); D. Bradfute & Son, Cedarville, Ohio (8 head); O. W. McDaniel, Versailles, Ill.

AWARDS.

Aged Bull—First, McHenry, on Baden Lad 61883; second, Rothwell, on Evening View Earl 57911.

Two-Year-Old Bull—First, Foster, on Eraste 2d 78634; second, Battles, on Brookside Fame 73640; third, Rothwell, on Pilot of Keilor Park.

Yearling Bull—First, McHenry, on Star of Denison 82426; second, Bradfute & Son, on Alden of Meadow Brook 846115; third, Foster, on Echoito 83734; fourth, McDaniel, on Castle H. 81995. Easily the smoothest and best in quality was McHenry's bull, though for weight and width he was not equal to second choice. Some would have reversed the next two, giving preference to the blocky fellow over one of prominence at shoulder and hips.

Bull Calf Over Six Months and Under Twelve—First, McHenry, on Prince Pico 93306; second, Foster, on Brookhurst Prince 94956; third, Rothwell, on Ola's King. Prince Pico has held his place consistently throughout the season and will be watched with interest from now on, as his great type and finish are most captivating.

Aged Cow—First, McHenry, on Glenfoil

Rose 63489; second, Battles, on Blackbird of Denison 31st 38949; third, Rothwell, on Ex-cello Endora; fourth, Rothwell, on Loquacious.

Two-Year-Old Cow—First, Bradfute & Son, on Minnie 72461; second, Bradfute & Son, on Twill 72460; third, McHenry, on Barbara McHenry 3th; fourth, Battles, on Marguerite D. 72307; fifth, Rothwell, on Queen's Blackcap 8th. Minnie is a No. 1 heifer, bard to improve on, while beside her was one by the same sire of very even conformation from end to end, well arched on top and compact over the shoulder. No. 3 was somewhat shorter in body, but the equal in finish and quality of any.

Yearling Heifer—First, Bradfute & Son, on Quisiana of Meadow Brook 84603; second, McHenry, on Pride McHenry 45th 82421; third, McHenry, on Abess McHenry 6th; fourth, Bradfute & Son, on Minnie 2d of Meadow Creek 84613; fifth, Bradfute & Son, on Myrtle 2d of Meadow Creek. First choice held her place from the beginning, though the one next her had claim to careful consideration, being an excellently-fronted individual.

Heifer Calf Six and Under Twelve Months—First, McHenry, on Abess McHenry 7th 93307; second, McHenry, on Pride McHenry 53d 93305; third, Foster, on Brookhurst Queen 94955; fourth, Bradfute & Son, on Lavender 4th of Meadow Brook 20279.

Heifer Calf Under Six Months—First, McHenry, on Blackbird McHenry 66th 93314; second, Foster, on Lucia of Brookhurst 94953; third, Bradfute & Son, on Quinne of Meadow Brook 95845; fourth, Battles, on Marguerite D. 2d; fifth, Foster, on Brookhurst Lillian 94957. W. N. Foster came up in this class with a splendid calf that had full right to his place.

Exhibitor's Herd—First, McHenry; second, Battles; third and fourth, Rothwell.

Young Herd—First, McHenry; second, Bradfute & Son; third, Foster; fourth, Rothwell.

Calf Herd—First, McHenry; second, Foster; third, Rothwell.

Get of Sire—First, Bradfute & Son, on get of Lucy's Prince; second, McHenry, on get of Bobby Dobbs; third, Foster, on get of Kentucky Prince; fourth, Rothwell, on get of Blackbird Heatherton.

Produce of Cow—First, Bradfute & Son, on produce of Winsome of Meadow Brook; second, McHenry, on produce of Abess McHenry 2d; third, McHenry, on produce of Privet of Carston; fourth, Foster, on produce of Erica Heatherton.

Champion Senior Bull—Baden Lad.

Champion Junior Bull—Prince Pico.

Champion Cow—Glenfoil Rose.

Champion Heifer—Quisiana of Meadow Brook.

GALLOWAYS.

The awards on this breed were made by M. A. Judy, Beecher, Ill., and while the quality of the show was standard, the paucity in numbers made the work pass off without delay. Galloway breeders have suffered hard at the hands of the railroads and the loss of the Brookside herd in a recent wreck on their way to this fair was most unfortunate. J. E. Bales was compelled to show an unfitted bull in the place of Carty Lad, which was lost on the road soon after he had been made champion at Hamline, Minn. He was out of the great hull, Wortby 3d. Iowa was represented by J. E. Bales & Son, of Stockport, with thirteen head; and Hechtner & Martin, of Princetown, Ill., brought twelve.

AWARDS.

Aged Bull—First, Hechtner & Martin, on Scottish Standard 2d; second, Bales & Son, on Judie's Pride.

Yearling Bull—First, Hechtner & Martin, on Standard Favorite 26550; second, Hechtner & Martin, on Ido of Homedale 27619.

Bull Calf Over Six Months and Under Twelve—First, Hechtner & Martin, on Careful's Druid 28357; second, Hechtner & Martin, on Irwin of Homedale 28972; third, Bales & Son, on Bonnie McDougal 28812; fourth, Bales & Son, on Dorothea's Prince 28813.

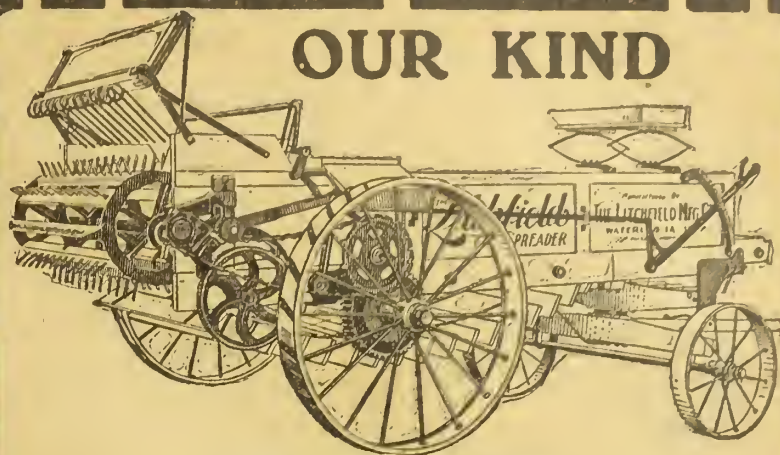

Aged Cow—First, Bales & Son, on Graceful 3d of Garlestown 19297; second, Hechtner & Martin, on Louisa 2d of Durham Hill; third, Bales & Son, on Annie Davids 2d 19459. 26927; second, Hechtner & Martin, on Aleida of Homedale 27116.

Two-Year-Old Cow—First, Bales & Son, on Annie Davids 5th 26927; second, Hechtner & Martin, on Aleida of Homedale 27116.

Yearling Heifer—First, Hechtner & Martin, on Druid's Lora 26219; second, Hechtner & Martin, on Druid's Louisa 26218; third, Bales & Son, on Hawkeye Lady 2714; fourth, Bales & Son, on Lily Torne 3d.

Heifer Calf Over Six and Under Twelve Months—First, Hechtner & Martin, on Druid's Louisa 2d 28856; second, Hechtner & Martin, on Vinola 3d of Naples 28855; third, Bales & Son, on Annie Davids 6th 28780; fourth, Bales & Son, on Lady Ruth 28782.

Calf Under Six Months—First, Bales &

HEAVY GEAR DRIVE.

IT IS extremely amusing to read and listen to the arguments sometimes made by competitors, largely coming from dealers who are in competition with the Litchfield machines—whose hazy ideas of the many features embodied in the superior construction of the Litchfield Spreader often resolving their statements into strong arguments for our machine instead of against it.

To illustrate this we wish to call your attention to the attempted diagnosis of the weak points in the use of gear wheels to drive the beater or distributor. Everybody knows that the beater wheel and the traction wheels on all spreaders must run in opposite directions. Therefore, to hook these two together requires a gear so as to change the direction of the motion, or requires a very unmechanical makeshift used by some of the attachment machines and others, by applying the driving sprockets to the outside or back side of the chain, instead of the inner surface, where it belongs.

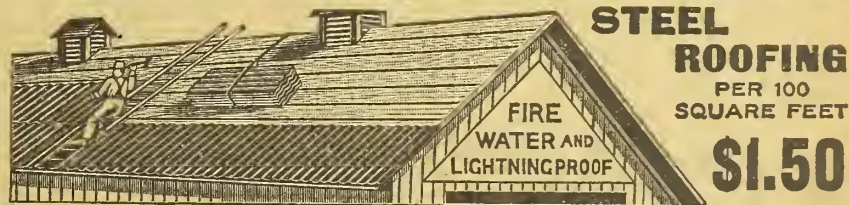

The beater wheel on the Litchfield Spreader is operated by a direct drive chain which receives its motion from a large, heavy, substantial gear, built so strong that no ordinary strain can injure it. This principle of a large gear is the only true principle for changing the direction of the motion. Others may claim that they "drive direct" without gears, but you will find that they either use a small, weak, easily-broken gear at the beater wheel or that they drive with the wrong side of the chain.

Freak improvements that may be all right as talking points to temporarily interest customers are not the kind of improvements that make a five-year guarantee on the Litchfield Spreader possible. We use the heavy gear drive because it is the only successful one.

Our readers will appreciate more fully our five-year guarantee when they understand how these machines are built and why we are able to make such a contract with our customers. The Litchfield Spreader embodies in all parts, but especially in its gear drive, those principles of mechanical construction that are used today and have been used for many years in the successful operation of all substantial, well-built machinery.

We lead in modern improvements, but do not experiment on our customers with "freak ideas." Read our statement next week.

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

Most economical and durable roof covering known. Easy to put on; requires no tools but a hatchet or a hammer. With ordinary care will outlast any other kind. Thousands of satisfied customers everywhere have proven its virtues. Suitable for covering any building. Also best for ceiling and siding. Fire-proof and water-proof. Cheaper and more lasting than shingles. Will not taint rain-water. Makes your building cooler in summer and warmer in winter. Absolutely perfect, brand new, painted red two sides. \$1.50 is our price for our No. 15 grade of Flat Semi-Hardened steel roofing and siding, each sheet 24 inches wide and 24 inches long. Our price on the corrugated, like illustration; sheets 22 inches wide x 24 inches long \$1.60. At 25 cents per square additional we will furnish sheets 6 and 8 feet long. Steel pressed brick siding, per square \$2.00. Fine Steel Beaded Ceiling, per square \$2.00. Can also furnish standing seam or "V" Roofing.

WE PAY THE FREIGHT TO ALL POINTS EAST OF COLORADO except Oklahoma, Texas and Indian Territory. Quotations to other points on application. Satisfaction guaranteed or money refunded. We will send this roofing to you on 25 per cent of the amount of your order in cash; balance to be paid after material reaches your Station. If not found as represented, you do not have to take the shipment and we will cheerfully refund your deposit. Ask for Catalog No. W-600. Lowest prices on Roofing, Eave Trough, Wire, Pipe, Fencing, Plumblings Doors, Household Goods and everything needed on the Farm or in the Home. We buy our goods at sheriff's and receiver's sales. **CHICAGO HOUSE WRECKING CO., 35TH & IRON STREETS, CHICAGO**

Son, on Lady Graceful 28783; second, Bales & Son, on Princess Graceful 23871.

Exhibitor's Herd—First, Hechtner & Martin; second, Bales & Son.

Breeder's Young Herd—First, Hechtner & Martin; second, Bales & Son.

Calf Herd—Bales & Son.

Get of Sire, Four Animals—First, Hechtner & Martin; second, Bales & Son, on get of Imp. McDougal of Turbrush; third, Bales & Son, on Imp. McDougal of Turbrush.

Produce of One Cow, Two Animals—First, Hechtner & Martin; second, Bales & Son, on produce of Annie Davids 2d; third, Bales & Son, on produce of Lily Lorne 2d.

Champion Aged Bull—Hechtner & Martin, on Scottish Standard 2d.

Champion Bull Under Two Years—Hechtner & Martin, on Standard Favorite.

Champion Cow Over Two Years—Bales & Son, on Graceful 3d.

Champion Heifer Under Two Years—Hechtner & Martin, on Vinola 3d of Naples.

HEREFORDS.

As usual this breed brought out some of the first-class animals of the four breeds. Some of the herds that have made the exhibit of "white faces" such a prominent feature of the previous fairs did not make their appearance. However, others that put in a worthy claim for excellence supplied the shortage and made the exhibit prominent and fully in keeping with the reputation of the fair. While there were no aged hulls, this delinquency was overcome by all other Hereford classes being full. Prince Lad stock was much in evidence among the winners, proving his value as a sire by the uniformity of conformation and ability for high finishing that accounted for much of the success of the Van Natta herds in the herd contests. M. A. Judy, of Beecher, Ill., continued his work from the other beef breeds and in his decisions placed special emphasis on a strong, well-made hack that will never need fixing as show yard parance goes. Those who were present with herds were W. S. Van Natta & Son, Fowler, Ind. (14 head); F. A. Nave, Attica, Ind. (13 head); Studebaker Stock Farm, Van Buren, Ind. (10 head); J. C. Andras, Jr., Manchester, Ill.

(13 head); G. H. Hoxie, Tbornton, Ill. (10 head).

AWARDS.

Bull Two Years Old—First, Nave, on Prime Star Grove 184760; second, Van Natta & Son, on Prime Lad 3d 197984; third, Nave, on Royal Dale 192281; fourth, Studebaker Stock Farm, on Dale 2d 175574; fifth, Andras, on Haven's Protector 180981. The first choice was generally considered an easy one, being the most massive and closest built, though aside from his head, his front could have been improved by a better rounded out shoulder. Behind, his deep-meated rounds and smooth rump looked well to the judge. Of different pattern and more lengthy make up was the next in favor, but short bone with plenty of meat on the loin and especially at the rounds gave him appearance that was very much to his favor. Refinement and smooth-turned conformations were less evident in the succeeding places, which, however, does not make them out cull hulls in the least.

Yearling Bull—First, Hoxie, on General Manager 2d 25606; second, Van Natta & Son, on Prime Lad 9th 213963; third, Van Natta & Son, on Prime Lad 16th 213969; fourth, Nave, on Beau Nash 208144; fifth, Andras, on Hummer 4th 200841.

Bull Calf Six Months and Under Twelve—First, Van Natta & Son, on Prime Lad 23th 234346; second, Van Natta & Son, on Prime Lad 25th 234343; third, Hoxie, on Peerless Perfection 10th 234544; fourth, Nave, on Javan 230764.

Bull Calf Under Six Months—First, Van Natta & Son, on Prime Lad 30th 234348; second, Nave, on Harold 235794; third, Nave, on Pauliun 230557.

Aged Cow—First, Nave, on Nut Brown 9th 188681; second, Van Natta & Son, on Rose Bud 169015; third, Studebaker Stock Farm, on Adah 143624; fourth, Andras, on Belle Donald 74th 162625; fifth, Andras, on Viola.

Nut Brown is as elegant a cow as her name would signify, and her superb finish and beauty in front from her neat horn to her full, smooth chest is most pleasing. A covering of good depth and evenness gives a finish that placed her above her rivals easily. Though the next choice is shy of the com-

First Prize Aged Short-horn Cow Ball Craggan, owned by D. R. Hanna, Ravenna, Ohio.

compactness and weight of her superior, she carries a very well-outlined form. Hardly as imposing a front nor the same perfection of smoothness was the verdict of comment on the third, while fourth was more deficient in these.

Two-Year-Old Cow—First, Van Natta & Son, on Princess 19788; second, Nave, on November Maid 17664; third, Studebaker Stock Farm, on Bertalline 182152; fourth, Andras, on Faith 18468.

Yearling Heifer—First, Van Natta & Son, on Prairie Queen 213961; second, Nave, on Juliet 207960; third, Nave, on Jemima 207959; fourth, Hoxie, on Miss Perfection 217079; fifth, Hoxie, on Scarlet Rose 208326. Some very splendid heifers were rejected for the head of this list in favor of a most sturdily-built heifer for first carrying a back of great width and strength. In second choice the type changed, but was again found in third.

Heifer Calf Sixth Months and Under Twelve—First, Van Natta & Son, on Marguerite 234336; second, Hoxie, on Belle Perfection 235447; third, Nave, on Early Rose 224756; fourth, Van Natta & Son, on Prime Lass 3d 234541.

Heifer Calf Under Six Months—First, Van Natta & Son, on Lassie 234333; second, Studebaker Stock Farm, on Rebecca 239566; third, Nave, on Blossim 235789; fourth, Nave, on Jesamine 2d 235796; fifth, Andras, on Improver's Lady 4th 241306.

Exhibitor's Herd—First, Nave; second, Van Natta; third, Studebaker Stock Farm; fourth, Andras.

Young Herd—First, Van Natta & Son; second, Hoxie; third, Nave; fourth, Studebaker Stock Farm.

Calf Herd—First, Van Natta & Son; second, Andras.

Get of Sire—First, Van Natta & Son, on get of Prime Lad; second, Nave, on get of Pretorian; third, Hoxie, on get of Perfection; fourth, Van Natta & Son, on get of Prime Lad.

Produce of Cow—First, Van Natta & Son, on produce of Lenora; second, Nave, on produce of Gladys; third, Van Natta & Son, on produce of Lorna Dune; fourth, Nave.

Champion Aged Bull—Prime Star Grove.
Champion Young Bull—General Manager.
Champion Cow—Nut Brown.
Champion Heifer—Prairie Queen.

DAIRY CATTLE.

JERSEYS.

The display made by this well-established breed of dairy cattle was notable in many respects. Competition was keen from start to finish and each class brought out a nice problem for the judge. The quality throughout was very commendable, although on the point of type there was considerable variation, a few animals tending too much to the ordinary type of dairy cattle rather than to that highly-refined and distinct two-wedged form so much sought for by dairy men. While honors were well scattered, the large proportion that went to the Hood Farm and Overton Hall Farm were suggestive of the sterling merit of the noted herds. One herd of polled Jerseys were exhibited by R. C. Redpath. In the aged cow class there were a dozen in line, while fourteen heifer calves, some of most beautiful shapes and finish, was a feature of the young classes. Professor Scovell found many a difficult decision, but left a good impression on exhibitors, who were, Hood Farm, Lowell, Mass. (17 head); Overton Hall Farm, Overton Station, Tenn. (15 head); Latimer & Jones, Abingdon, Ill. (16 head);

The Tonic Question

is how to make the steers and hogs fat quickest and cheapest—the cows give most milk for food eaten—the teams and driving horses show best condition and fitness.

DR HESS STOCK FOOD

the prescription of Dr. Hess (M. D., D. V. S.) contains the bitter tonics for the digestion, iron for the blood, nitrates to expel poisonous material from the system and laxatives to regulate the bowels. These ingredients are recommended by Professors Winslow, Quitman, Finlay Dun, and all the noted medical writers. Besides increasing growth and milk production, Dr. Hess Stock Food cures and prevents stock disease. Sold on a Written Guarantee.

100 lbs. \$5.00
25 lb. pail, \$1.60
Smaller quantities at a slight advance.

Where Dr. Hess Stock Food differs in particular is in the dose—it's small and fed but twice a day, which proves it has the most digestive strength to the pound. Our Government recognizes Dr. Hess Stock Food as a medicinal tonic, and this paper is back of the guarantee.

If your dealer cannot supply you, we will.

head); J. E. Hatfield, Normal, Ill. (14 head); R. C. Redpath, Baldwin, Ill. (12 head); J. C. Talbot, Georgetown, Ind. (1 head).

AWARDS.

Aged Bull—First, Overton Hall Farm, on Brookhill Fox; second, Hood Farm, on Hood Farm Khedive; third, Hatfield, on May's Handsome Lad; fourth, Wiggins, on Czar of Arden 58543. Brookhill Fox was sired by Flying Fox and compared to the second choice is more angular and of greater scale, though with wonderful quality.

Two-Year-Old Bull—First, Talhott, on Grey Prince of St. Saviour; second, Hood Farm, on Bluebell's Golden Fox; third, Overton Hall Farm, on Rose Bud Fern Lad; fourth, Hatfield, on Sarelle's Vision.

Yearling Bull—First, Overton Hall Farm, on Oakland Fox; second, Hood Farm, on Hood Farm Golden Lad 6th; third, Latimer & Jones, on Shorty's Prince 71929; fourth, Hatfield, on Seaman of Fairview.

Bull Under One Year—First, Latimer & Jones, on Rosette's Fox 72519; second, Hood Farm; third, Overton Hall Farm, on Fancy B's Lad; fourth, Overton Hall Farm, on Silver Laddie.

Aged Cow—First, Hood Farm; second, Overton Hall Farm, on Flying Fox's Pearl; third, Hood Farm; fourth, Overton Hall Farm, on Flying Fox's Wonder.

Two-Year-Old Cow—First, Hatfield, on Sarelle's Baby; second, Overton Hall Farm; third, Latimer & Jones, on Alpha's Pet Lass 19814; fourth, Hood Farm.

Yearling Heifer—First, Overton Hall Farm; second, Hood Farm; third, Latimer & Jones, on Golden Lad's Opa 200052; fourth, Latimer & Jones, on Opa's Opa 200053.

Heifer Under One Year—First and second, Hood Farm; third, Latimer & Jones, on Shorty's Princess; fourth, Overton Hall Farm, on Reve D'Or.

Exhibitor's Herd—First, Overton Hall Farm; second, Hood Farm; third, Hatfield.

Young Herd—First, Hood Farm; second, Latimer & Jones.

Calf Herd—First, Hood Farm; second, Latimer & Jones; third, Hatfield.

Get of Sire—First and second, Hood Farm; third, Latimer & Jones; fourth, Hatfield.

Produce of Cow—First, Hood Farm; second, Latimer & Jones; third, Hood Farm.

Champion Senior Bull—Brookhill Fox.

Champion Junior Bull—Rosette's Fox.

Champion Cow—Hood Farm Golden Happy.

Champion Heifer—Winora of Sugar Loaf.

Grand Champion Bull—Brookhill Fox.

Grand Champion Cow—Hood Farm Golden Happy.

GUERNSEYS.

The Guernsey display was notable for quality in many of the exhibits and probably brought out as good specimens of the breed as are to be found in the country. Mr. Cunningham showed his aged bull, Robinas Standard 7254, which went down in defeat for the first time before Chief of Willowdale on the championship. This bull is a great model for smoothness, quality and conformation. The former bull will be remembered as having been once the property of the late N. K. Fairbanks, of Chicago, and sold in his dispersal. He is from the noted Lily Bruy Boy strain and is a grandson of Materna, the cow that of all breeds was the most economical producer of butter fat at the Columbian Exposition. Awards were made by Professor Scovell, of Lexington, Ky. Natoma Farm brought out some very good animals and as they are doing an extensive dairy business they do not show at other fairs. A list of the breeders follows: L. V. Axtell, Perry, Ohio (18 head); Natoma Farm, Hillsdale, Ill. (14 head); M. D. Cunningham, Kansasville, Wis. (16 head); Frank R. Sander, Bristol, N. H. (1 head).

AWARDS.

Aged Bull—First, Cunningham, on Robinas Standard 7254; second, Cunningham, on Sarograt 8674; third, Natoma Farm, on Majestic 3d; fourth, Axtell, on Little Minister.

Two-Year-Old Bull—First, Sander, on Chief of Willowdale; second, Axtell, on Favorite Duke 2d; third, Robbins, on Roman Emperor 3d.

Yearling Bull—First, Axtell; second, Cunningham, on Hattie's Bennie 10300; third, Axtell; fourth, Cunningham, on Fancy Standard 10302.

Aged Cow—First, Axtell, on Golden Anne; second, Cunningham, on Do Fes 11218; third, Axtell, on Maud Ruskin; fourth, Cunningham, on Fes Dio 9072.

Two-Year-Old Heifer—First, Axtell, on Sallie of Homestead; second, Axtell; third, Cunningham, on Fes Lips Luna 17233; fourth, Cunningham, on Fancy's Princess 18572.

Heifer One Year and Under Two—First, Axtell; second, Robbins, on Natoma's Glendora; third, Cunningham, on Elvera Standard 18575; fourth, Axtell.

Heifer Under One Year—First, Axtell, on Winfred Annette; second, Cunningham, on Piolas Sept. 19843; third, Robbins, on Natoma's Pamabella; fourth, Robbins.

Exhibitor's Herd—First, Axtell; second, Cunningham; third, Robbins; fourth, Cunningham.

Breeder's Young Herd—First, Axtell; second, Cunningham.

Calf Herd—First, Axtell; second, Cunningham.

Get of Sire, Four Animals—First, Axtell; second, Cunningham; third, Axtell; fourth, Cunningham.

Produce of Cow, Two Animals—First, Axtell; second, Axtell; third, Robbins; fourth, Cunningham.

Champion Bull Over Two Years—Chief of Willowdale.

Champion Bull Under Two Years—Natoma Domingo.

Champion Cow Over Two Years—Golden Anne.

Champion Heifer Under Two Years—Nellie of Homestead.

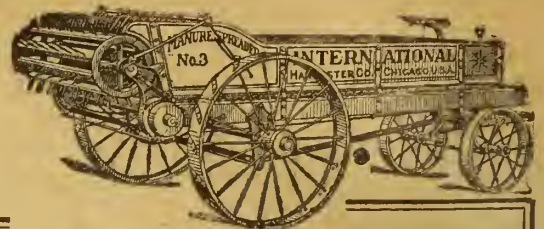

Grand Champion Bull—Chief of Willowdale.

Grand Champion Cow—Golden Anne of Homestead.

AYRSHIRES.

The showing of this hardy breed of dairy cattle was generally conceded to be the best for many years. Although in the hands of a few, some close decisions were required, though small classes made the work of ranking the animals proceed rapidly in the hands of Professor Plumb, of Ohio. In the bull classes there was not so much competition as in the females, where Mr. Crabb made a much stronger showing, winning many of the

I. H. C. Spreader Pointers

A good spreader costs considerable but it is worth more than it costs.

A poor spreader is an expensive luxury, no matter what it costs.

When you buy an I. H. C. Spreader you are buying something standard.

You get for your money—

—A substantial, durable machine

—One that is easily handled

—It handles manure in any condition.

—No spreader made does better work

—No spreader is lighter in draft.

I. H. C. Spreaders are well proportioned machines. They are strong

firsts. The breeders names are as follows: Howard Cook & Son, Beloit, Ohio (14 head); F. A. Crabb, Litchfield, Ill. (14 head); Geo. W. Ballon, Middletown, N. Y. (14 head).

AWARDS.

Aged Bull—First, Cook & Son, on Dunraven of St. Anne 7662; second, Ballon, on Glencairn 4th 8719; third, Crabb, on Imp. Howie's Matchless 9448.

Two-Year-Old Bull—Cook & Son, on Howie's Flash Lad 9054.

Yearling Bull—First, Ballon, on Norman of Prince Lane 9441; second, Cook & Son, on Chieftain 90422; third, Ballon, on Craigie Chief of Pine Lane 9442; fourth, Crabb, on Burnside King's Own 9536 (Imp.).

Bull Calf Under One Year—First, Crabb, on Jack of Avonshire 9803; second, Crabb, on Burnside Wanaut 9537 (Imp.); third, Cook & Son; fourth, Ballon, on Royal Cockade of Pine Lane 10040.

Aged Cow—First, Cook & Son, on Minnie of Ayrlynn 18294; second, Crabb, on Garclaugh Flirt (Imp.) 20391; third, Ballon, on White Star of Woodroffe 18950; fourth, Ballon, on Barcheskie Muriel 18955.

Two-Year-Old Cow—First, Crabb, on Mina 2d's Daughter 18626; second, Ballon, on Barcheskie Blythe Girl 20226; third, Cook & Son, on Garnet of Ayrlynn 19395; fourth, Ballon, on Helen of Bellevue 2d 21408.

Yearling Heifer—First, Crabb, on Burnside Hazel 20576; second, Ballon, on Edna of Pine Lane 20370; third, Cook & Son, on Mable Buttercup 21797; fourth, Cook & Son, on Pansy Buttercup 21796.

Heifer Under One Year—First, Ballon, on Silver Blaze of Pine Lane 21724; second, Cook & Son; third, Ballon, on Miss Lyle of Pine Lane 21725; fourth, Cook & Son.

Exhibitor's Herd—First, Cook & Son; second, Ballon; third, Crabb; fourth, Cook & Son.

Breeder's Young Herd—First, Ballon; second, Cook & Son.

Calf Herd—First, Cook & Son; second, Crabb.

Get of Sire, Four Animals—First, Ballon; second, Cook & Son; third, Cook & Son; fourth, Crabb.

Produce of Cow, Two Animals—First, Crabb; second, Ballon; third and fourth, Cook & Son.

but not needlessly cumbersome—strong where strength is needed, with due regard for light draft and load to be carried.

The I. H. C. apron is driven at both sides, by both hind wheels. This eliminates all binding, friction and undue strain.

It has a vibrating rake to level the load—exclusive feature.

It has a wide range of feed, consequently a large or a small amount of manure per acre can be distributed. It is the only spreader controlled and operated entirely with one lever.

Made in three sizes for each of the two types, Cloverleaf, endless apron, and Corn King, return apron.

BROWN SWISS.

The Brown Swiss made one of the best showings that has been seen at any of the western fairs, both in point of numbers and in general excellence. Most of the animals were notable for their high quality, a little more refined, it is said, than those found in the native land where the cows are used for draft purposes largely. The type shown in all the classes was very similar and among many of the younger animals in both sexes were some very attractive forms and heads. Mr. Barton, the largest exhibitor, is an extensive importer. Systematic breeding has developed some excellent individuals in his herd. Mr. Hazard's stock is from an importation of 1889, but all of his present herd is of home raising. Professor Scovell, of Lexington, Ky., placed the classes. The exhibitors are as follows: F. R. Hazard, Syracuse, N. Y. (15 head); E. M. Barton, Hinsdale, Ill. (17 head); D. C. Frantz, Sullivan, Ill. (4 head).

AWARDS.

Aged Bull—First, Hazard, on Upland Hobby; second, Barton, on Senator G. 1606; third, Barton, on Fleming 1780; fourth, Hazard, on Upland Delirs. The first bull is sired by Duke of River Meadow, the champion at the Pan American show. He is a massive animal and of good proportion.

Two-Year-Old Bull—Hazard, on Owego Nick 2029.

Yearling Bull—First, Barton, on Hollwyn's Boy 2073; second, Barton, on Collier 2075.

Bull Calf Under One Year—First, Hazard, on Upland Nellie's Jeetro; second, Barton, on Ladrone; third, Frantz, on Jumbo F.; fourth, Barton, on Morse.

Aged Cow—First, Barton, on McAlpine 1797; second, Hazard, on Earnestine 2d; third, Barton, on Belle Windor 1964; fourth, Hazard, on Flourine 12th.

Dunham & Fletcher's winning French Coach Stallion.

Two-Year-Old Cow—First, Barton, on Fredericka 2801; second and third, Hazard; fourth, Barton, on Aleria 2936.

Yearling Heifer—First, Hazard, on Upland Tell's Flourine; second, Hazard, on Upland Tell's Prize; third, Barton, on Starling; fourth, Barton, on Lady D. 2999.

Heifer Under One Year—First, Barton, on Thalia; second, Barton, on La Belle; third, Barton, on Servant; fourth, Hazard, on Onleta 3252.

Exhibitor's Herd—First and third Barton; second, Hazard.

Young Herd—First, Hazard; second, Barton.

Calf Herd—First, Barton; second, Hazard. Get of Sire—First, Barton, on get of Barton Boy; second, Hazard, on get of Upland Tell.

Produce of Cow—First Hazard, on produce of Nellie Howlas; second, Barton, on produce of Serva.

Champion Bull Over Two Years—Owego Nick.

Champion Bull Under Two Years—Hollwyn's Boy.

Champion Cow Over Two Years—McAlpine.

Champion Heifer Under Two Years—Tell's Flourine.

Grand Champion Bull—Owego Nick.

Grand Champion Cow—McAlpine.

DUTCH BELTED.

A new departure for dairy cattle at western fairs was found in the Dutch Belted cattle, appropriately named from the large white belt extending around the body. Much attention was paid them by visitors and many were the compliments passed on the breed. Professor Scovell, of Lexington, Ky., rated the classes which were from the herds of D. B. Wilson, Waterbury, Conn. (14 head), and F. R. Sanders, Bristol, N. H. (13 head).

AWARDS.

Aged Bull—First, Sanders, on Anten; second, Wilson, on Proud Duke 490.

Two-Year-Old Bull—Wilson, on Trilby's Son 493.

Yearling Bull—First, Sanders, on William the Silent; second, Wilson, on Jap Toga 565.

Bull Calf Under One Year—First, Wilson, on Prince Louis 791; second, Sanders, on Flying Dutchman.

Aged Cow—First, Sanders, on Echo 2d; second, Wilson, on Ida May 829; third, Wilson, on Hazel S.; fourth, Sanders, on Bessie S. 7049.

Two-Year-Old Cow—First, Wilson, on Cassie Chadwick 1255; second, Sanders, on Olive of M. L. 1162; third, Wilson.

Yearling Heifer—First, Wilson, on Mary Susan 1263; second, Sanders, on Hertgal, Vol. 8; third, Sanders, on Diana of M. L.; fourth, Wilson, on Primrose 2d 1263.

Heifer Calf Under One Year—First, Sanders, on Mountain Queen, Vol. 8; second, Sanders, on Mountain Lily, Vol. 8; third, Sanders, on Oxford Gate; fourth, Wilson, on Rose W. 2d.

Exhibitor's Herd—First, Sanders; second and third, Wilson.

Young Herd—First, Sanders; second, Wilson.

Calf Herd—First, Sanders; second, Wilson.

Get of Sire—First and second, Sanders; third and fourth, Wilson.

Produce of Cow—First, Sanders; second, Wilson.

Champion Senior Bull—Anten.

Champion Junior Bull—William the Silent.

Champion Cow—Echo 2d.

Champion Heifer—Mary Susan.

HOLSTEIN-FRIESIANS.

The Holstein cattle came out this year in unusual numbers and made one of the most creditable displays that this breed has made in 1906. The list included breeders of wide fame and from different parts of the country, and the notable individuals in all the herds were a high tribute to the methods of breeding and selection practiced by breeders. W. J. Gillette, of Rosendale, Wis., the well-known breeder of dairy cattle, made the decisions, which were agreeably accepted. Herds were generally complete, which made a well-balanced show. The aged bulls were fully up to standard, but it remained for the aged cows to play trump card for the breed. Type was very uniform throughout, and no excess of flesh on those animals doing duty at the pail indicated that the proper use of food was being made for a profit to the owner. The list of breeders are: C. F. Stone, Peabody, Kan. (13 head); W. B. Barney & Co., Hampton, Iowa (12 head);

A. B. Nokes & Son, Springfield, Ill. (14 head); Henry Stevens Son, Lacona, N. Y. (14 head); Nick Grimm, Rungie, Wis. (2 head); F. R. Hazard, Syracuse, N. Y. (1 head).

AWARDS.

Aged Bull—First, Barney & Co., on Jewell of Home Farm 24340; second, Stone, on Ethel Alex, Sir Netherland 26123; third, Stevens & Son, on Karel Bros. (imp.) 34917; fourth, Grimm, on Colanthax Prince 2d. The first selection is a great bull, combining splendid conformation with all the style and quality necessary, and maintained his usual place without danger, although he was in strong company. For the next place a very excellent bull was selected, of low-set, deep body, though not up to the style of the first choice. A very neat type fell to third, but was a bit lacking in character and scale, besides his predecessors.

Two Year Old—First, Nokes & Son, on Transum Duke; second, Grimm, on Johannes Rue Lad; third, Hazard, on De Kol Burke Pieterje 36009.

Yearling Bull—First, Stevens & Son, on Karndyke Butteer Boy 34896; second, Barney & Co., on Captain Wayne 40453; third, Grimm, Sir Karndyke de Twittene de Kol; fourth, Nokes & Son, Prince Johanna Gewinna 38985. Captain Wayne was a strong champion for first here, being nearer the growthy, deep-bodied sort, but surrendered this position to a white bull of lighter conformation, but very catching in general proportions and appearance.

Under One Year—First, Hazard, Josephine Lad De Kol; second, Stevens & Son, Inko Hengerwald Johanna Lad 41733; third, Stone, Alexander's Netherland; fourth, Grimm.

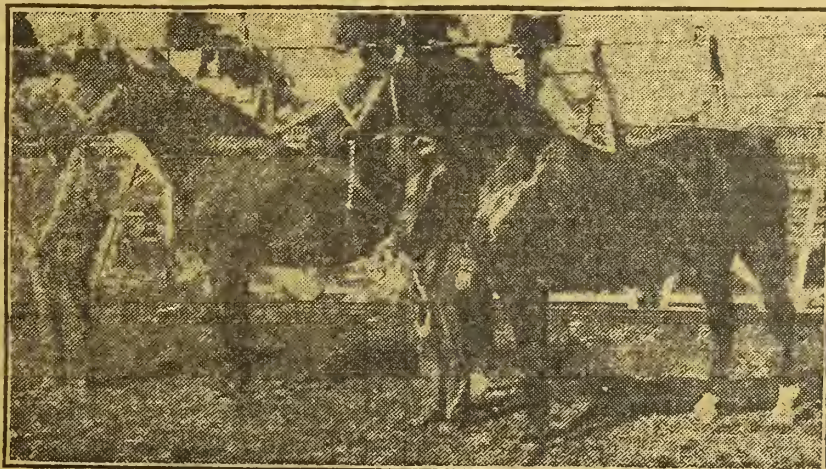

Aged Cow—First, Stone, Maryke 3d, Gerben 4th 54935; second, Barney & Co., Parthena Hengerwald 46004; third, Stone, Wayne's Lady Mecht 52750; fourth, Stevens & Son, Inka Clothilde 60275. This was one of the best displays of dairy cows seen and contained among the eleven some of the best specimens of the breed. Immense odds of good shape and scarcely one presenting any difficulty for the milker were conspicuous. In fact, so many good matrons made it impossible for the placing to do justice to the many unrecognized.

Two Year Old—First, Stevens & Son, Johanna Wayne Waldorf 72800; second, Stone, Princess Pei de Kol 71141; third, Nokes & Son, Shary Brook Farm Empress Josephine 81934; fourth, Barney & Co., Florence Jewel de Kol 72937.

Yearlings—First, Stevens & Son, on De Kol Pauline Ladie Vale 2d 78330; second, Hazard, Netske de Kol Wayne 2d 79816; third, Barney & Co., Empress Gerben of H. F. 3d 79243; fourth, Stone, Queen Josephine Gerben de Kol 78821.

Heifer Under One Year—First, Stone, on Queen Josephine Netherland; second, Hazard, on Alden's Netherland Buik 84982; third, Barney & Co., Myrtle de Kol; fourth, Barney & Co., Mazie Jewell.

Exhibitor's Herd—First, Barney & Co.; sec-

Grand Champion Cow—Maryke 3d Gerben 5th.

HORSES.

PERCHERONS.

The Percheron display was most suggestive of the prominence this breed holds among the breeds of draft horses in the central West. Three states were represented with some first-class offerings and not a ring could be criticized for lack of support. From the stronghold of Indiana came a full quota that came in for much admiration and a large share of the ribbons. Illinois, however, was able to sustain her previous reputation for excellence in this line and supplied, besides many of the firsts, both the champion male and female. Pink, the noted stallion from Wayne, Ill., maintained his position solidly from the first and substantiated again all the claims that have been made for him in the past. The group classes in best five stallions was one of the impressive sights of the show and Taylor & Jones had a quintet that for good, durable bone of a proper amount under most powerfully-made conformations made them the recipients of much favorable comment. Active, well-balanced movers were common in all the classes and perhaps for a showy lot in this respect, with the right build to accompany this good quality, the Lafayette firm were well up in the list. J. F. Meyer, Herbert, Ill., and

Tools That "Handle" Easy

You want tools that give best service and longest wear. Finish is all right—but first, last, and all the time, you want strength, endurance, and proper balance for easiest and most effective use. There is just one way to get such tools—see that every hand implement you buy bears the name

KEEN KUTTER

The Sign of QUALITY.

Take for example a Keen Kutter fork. Test it any way you choose it's the best—tines and tang are drawn and forged from solid crucible steel *without a weld*, spring-tempered in oil, and individually tested.

All Keen Kutter Tools—Forks, Hoes, Shovels, Garden-trowels, Grass-shears, Rakes, Manure-hooks, Axes and a full line of Carpenter Tools—stand the *hardest tests*, and are easier to handle than any other tools.

Every Keen Kutter farm tool has a well-seasoned, straight-grained ash handle. If your dealer does not have them, write us. Tool Book Free.

"The Recollection
of Quality Remains
Long After the Price
is Forgotten."
Trade Mark Registered.

C. E. Smith, Tuscola, Ill., worked on alternate classes which made a very satisfactory arrangement, as long classes would have made it very taxing for one judge. Those who made up the exhibit were Dunham & Fletcher, Wayne, Ill. (17 head); Frank Iams, St. Paul, Neb. (6 head); L. W. Cochran, Crawfordsville, Ind. (13 head); Augustine & Stubblefield, Carlock, Ill. (15 head);

& Fletcher, on Pink; second, Iams, on Bismutte 51863; third, Taylor & Jones, on Quality 32118; fourth, Crouch & Son, on Eaupin 41460. With Pink as a model, the second selection, Bismutte, lacked a little in depth of rib and width of hack, though he is a horse of excellent proportions and good action. The third choice was a trifle below scale, but is a good type. But for too much length in his underpinning the last pick would have probably taken more money.

Stallion Three Years Old—First, Crouch & Son, on Tyron 60411; second, Dunham & Fletcher, on Salvator 59293; third, Taylor & Jones, on Abjudge 58283; fourth, Iams, on Romain 58453. Four splendid animals carried this ring, and as they were the best in most minds of the sixteen in line, their excellence can be assured.

Stallion Two Years Old—First, Dunham & Fletcher, on Satisfort 63380; second, Crouch & Son, on Lascy 64317; third, Taylor & Jones, on Artisan 62026; fourth, Burgess & Son, on Delcasse 45794.

Yearling Stallion—First, Cochran, on Macduff 41257; second, Burgess & Son, on Roget; third, Dunham & Fletcher, on Pink Paragon 43929; fourth, Taylor & Jones, on Brave Boy 45241.

Aged Mare—First, Dunham & Fletcher, on Aquille 47941; second, Dunham & Fletcher, on Corsette 61395; third, Dunham & Fletcher, on Fossette 45255; fourth, Alfred Odiorne, on Dutch. A nice lot of mares to satisfy those looking for good, breedy-looking, durable females, possessing plenty of quality and in nice, plump condition.

Mare Three Years Old—First, Dunham & Fletcher, on Mignonne 61132; second, Dunham & Fletcher, on Britomart 40427; third, Cochran, on Lady of Quality 41255; fourth, Augustine & Stubblefield, on Mina 24203.

Mare Two Years Old—First, Cochran, on Arbella 41260; second, Augustine & Stubblefield, on Maud 45332; third, Dodson; fourth, Augustine & Stubblefield, on Dora 42902.

Yearling Filly—First, Dunham & Fletcher, on Pink Coral 43932; second, Taylor & Jones, on Josephine 44198; third, Taylor & Jones,

Stallion Over Three Years—First, Taylor & Jones, on Quality 32118; second, Augustine & Stubblefield, on Absalom; third, Taylor & Jones, on Cherry King 700; fourth, Augustine & Stubblefield, on Grant.

Stallion Under Three Years—First, Augustine & Stubblefield, on Roland; second, Augustine & Stubblefield, on Blacklist; third, Cochran, on Balzac 41256; fourth, Dunham & Fletcher, on Pink Paragon 43929.

Mare Over Three Years—First, Dunham &

circuit thus far. Second in numbers to the Percheron and with a well-filled exhibit in the female classes, made all that could be desired for completeness. The quality of animals shown, especially in the aged stallions, was with few exceptions above criticism and the clean bone and sound feet in evidence attracted most favorable comment from all who were interested in the contest. While the scale and build of the noted "cart horse" of England is conceded to be the most massive and compact of all breeds, it is not always in evidence to the extent that it was here. With twelve aged stallions in the opening class, all worthy of mention, with larger classes to follow, the prominence of the display can well be imagined, and

Best Five Stallions—First—Dunham & Fletcher; second, Augustine & Stubblefield; third, Cochran.

ENGLISH SHIRES.

The exhibit of this noted English draft breed was a notable feature of the horse show and scored an unqualified success from the standpoint of excellence in the animals shown. It might be compared to a grand preliminary to the last two great gatherings of the season. It was left to Springfield to bring out the best Shire exhibit of the

it was most unfortunate, indeed, that by some ruling in the management other than first-prize animals were allowed to compete for championship honors. In this manner the third prize horse in the aged class was placed up at the head of the list in championship over a horse beating him to first in the original class. The rules on this point are certainly faulty and need revision. The selection of a champion from the first prize list is always a problem perplexing enough for the judges. As no conclusion could be arrived at by Messrs. Myers and Smith, Mr. Beers, of Mendota, Ill., was called in as referee. Not but what this placing was satisfactory with many, yet was out of keeping with custom and not conducive to the well being of a show that had most favorable conditions to start with. The exhibitor's list includes Trumans' Pioneer Stud Farm, Bushnell, Ill. (15 head); Robt. Burgess & Son, Wenona, Ill. (12 head); Taylor & Jones, Williamsville, Ill. (20 head); Finch Bros., Verona, Ill. (12 head); L. W. Cochran, Crawfordville, Ind. (4 head); L. N. & O. B. Sizer, Fisher, Ill.; A. G. Soderberg, Osco, Ill. (3 head); W. B. Emlson, Wellington, Mo.; F. M. Mountjoy, Atlanta, Ill.

AWARDS.

Aged Stallion—First, Taylor & Jones, on Arrowside Duke 8040; second, Trumans' Pioneer Stud Farm, on Holker Collin 21525; third, Burgess & Son, on Bank Nil Desperandum 8453; fourth, Trumans' Pioneer Stud Farm, on Highland Laddie 2297. Not one of the quartet but had some strong claim for first and some difference in type added to complications. Arrowside Duke lacks impressiveness in his masculinity, but otherwise it

VALUABLE HINTS ABOUT ROOFING.

In applying a prepared roofing, nail only at edges; never in the middle of a strip, except where mouldings are used down the center.

For decorative purposes on residences, etc., half round mouldings can be nailed on Ruberoid over the laps and between the seams with neat effect. Before applying these mouldings, dip them in Ruberine Cement, furnished with Ruberoid roofing. After applying, coat them again with Ruberine, which will thoroughly water-proof them.

Fig. 1 shows how Ruberoid Roofing can be applied over gutters.

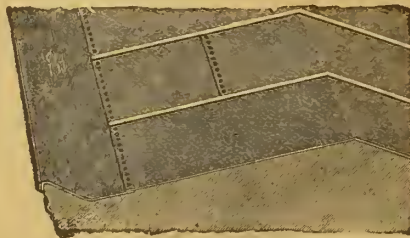

Fig. 1.—Covering Gutters with Ruberoid Roofing. Seams Covered by Mouldings.

Use as long strips as possible for covering gutter. Lap main roofing strip two inches over gutter strip, cement with Ruberine and then drive in the nails and tin caps furnished with Ruberoid Roofing. Ruberoid is the only prepared roofing which will outlast metal for covering gutters. Water will not rot it.

It's good policy not to cut or slit the

roofing more than absolutely necessary. For flashing an inside corner, bend the strip of Ruberoid Roofing as shown by Figure 2. Coat under side of bend with Ruberine and fit into the corner. Then nail and coat thoroughly with Ruberine.

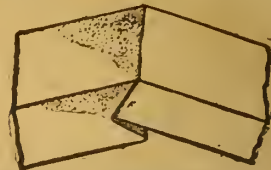

Fig. 2.—Method of Bending for Flashing Inside Corners.

Ruberoid is the only prepared roofing which can be thus bent without cracking. Its peculiar flexibility makes it invaluable for this purpose.

Ruberoid is widely used not alone as a roof covering, but as a siding for barns, poultry houses, etc. Will not melt or run; contains no tar. It is absolutely airtight and water-proof and will exclude cold and dampness from the buildings.

It can be applied in the usual way with nails and tin caps or with half round mouldings, as above suggested for roofs.

Remember, there is only one Ruberoid Roofing and that your own protection against imposition by inferior imitations is to look for the registered trade mark "RUBEROID," stamped on the under side of each sheet about every four feet.

Send for samples and Booklet "L," and ask for a copy of our pamphlet, "Valuable Hints to the Roofer."

would take a keen critic to fault him, as he has a striking top for muscling, a smooth contour, a trifle short, but on timber that is a model for placing and quality. Altogether he is a more snugly-framed horse and cleaner limbed than any of his followers. The second one is more stretchy, a flashy horse of superior moving ability and was favored strongly by some for first place. For third a massive, drafty type was shown, but he lacked a little in style compared with

Tar was placed up probably on his excellent type of a Shire, having that flashy, muscular build of none to much depth and compactness, but with lots of vigor on the walk and trot and displaying the male character well. In second, conformation was the winning card and was about as true in lines and beauty as you find them. Strong, clean limbs finished with dense, abundant horn gave the right qualification for a good draft horse getter. Much the same type with dif-

Champion Mare Any Age—First, Trumans' Pioneer Stud Farm; second, Cochran; third, Sizer, on Trumans' Teneham Blaze; fourth, Soderberg.

CLYDESDALES.

The Clydesdales were in the hands of two breeders, A. G. Soderberg, of Osco, Ill., and W. E. McCoy, of Pleasant Plains, Ill. The former breeder has a great individual in the stallion, Black Douglas, which was recently imported and won at many of the best foreign shows, being champion at the Windsor show. The display was good and contained many useful animals. This breed showed wonderful quality in limb and combined this with fair scale. Of the twenty-seven animals on the grounds, seventeen were from Mr. Soderberg's collection. J. F. Meyer, Herbert, Ill., and C. E. Smith, Tuscola, Ill., judged alternate classes.

AWARDS.

Stallion Four Years or Over—First, Soderberg, on Baron's Hope 12023; second, Soderberg, on Clan Stewart 11658.

Stallion Three Years Old—First, Soderberg, on Ethelbert 12025; second, Soderberg, on Tartan 13105; third, Soderberg, on Milton 13105.

Champion Stallion Any Age—First, second and third, Soderberg.

Champion Mare Any Age—First, second and third, Soderberg; fourth, McCoy, on Cordelia M. 10925.

Get of Sire, Four Animals—First, Soderberg; second and third, McCoy.

Produce of Mare, Two Animals—First and second, Soderberg; third and fourth, McCoy.

Best Five Stallion—Soderberg.

BELGIANS.

The story of the Belgian show is short, but interesting, and the general excellence of draft type combined with clean, strong-boned hocks and cannons is a high tribute to the efforts that breeders and importers are expending to bring this breed into greater prominence in this country. It was certainly an exhibit of quality and many showy movers that could cover ground in no slow time brought general applause from onlookers and surprised skeptic minds of the future of this breed. While the greater part of the money went to one firm it was no reflection on their rivals, as an unusual lot of splendid stallions were found in all stables. Awards were made by the same talent that worked on the draft breeds and while decisions were close the work of tying the ribbons passed off smoothly. The exhibitors were: Taylor & Jones, Williamsville, Ill. (1 head); Robt. Burgess & Son, Wenona, Ill. (10 head); Frank Iams, St. Paul, Neb. (5 head); J. Crouch & Son, Lafayette, Ind. (5 head); Finch Bros., Verona, Ill. (5 head).

Aged Stallions—First, Crouch & Son, on Mon Sauhait 1502; second, Crouch & Son, on Cupidon de Leez 2177; third, Taylor & Jones, on Martin du Hazoir 37562; fourth, Frank Iams, Prusant le Luroux 29344.

AWARDS.

Stallion Three Years Old—First, Crouch & Son, on Chabon 2379; second, Burgess & Son, Birmingham 2248; third, Crouch & Son, Luterus 2272.

Two Year Old—First, Crouch & Son, on Nelson 2274; second, Burgess & Son; third, Finch Bros., Memphis 33360.

Champion Stallion—First, Crouch & Son, on Mon Sauhait; second, Crouch & Son, on Cupidon de Leez; third, Crouch & Son, on Charon; fourth, Crouch & Son, on Nelson.

Champion Mare—First, Finch Bros., on D'Alvaux 277.

Produce of Mare—Finch Bros.

Best Five Stallions—First, Crouch & Son; second, Burgess & Son.

Draft Teams in Harness—Draft team any breed or sex, over 1,650 pounds. First, Alfred Odiorne; second, L. N. & O. B. Sizer; third, F. M. Montjoy.

Same, but weighing over 1,800 pounds—First, Swift & Co.; second, Armour & Co.; third, L. W. Cochran.

GERMAN COACH.

The showing of this breed was principally from one stable and were good representatives of their kind, which fact is in keeping with the policy of the Crouch firm of Lafayette, Ind. Frank Iams was also present with a few good ones. Owing to the extent and general merit of their display, the winnings were mostly secured by the former named breeding establishment.

SHEETLAND PONIES.

The little favorites made a great showing and were quite a trappy, spirited-stepping bunch, with about the right size in most cases, though some of the teams were too thick bodied and slow in movement. In the four-in-hands Chas. E. Bunn, of Peoria, deserves special mention, with his two teams. Exceptionally trim and stylish, with spirit and action nothing short of a high-grade carriage horse. Eight flashy outfits in this entry made the contest exciting and first went to Chas. E. Bunn, second to Geo. H. Simpson, Chicago, and third to Logan W. Black, Jacksonville, Ill. Altogether about 100 ponies made the stalls most attractive to all lovers of the children's horse.

MULES.

Mules are beginning to occupy an important place in the northern shows of the day. This was a very strong and complete show and the mule teams in harness were one of the drawing cards. In this contest four

Have You an Extra Room to Heat?

There need not be a cold room in the house if you own a **PERFECTION Oil Heater**. This is an oil heater that gives satisfaction wherever used. Produces intense heat without smoke or smell because it is equipped with smokeless device—no trouble, no danger. Easily carried around from room to room. You cannot turn the wick too high or too low. As easy and simple to care for as a lamp. The

PERFECTION Oil Heater

(Equipped with Smokeless Device.)

is an ornament to the home. It is made in two finishes—nickel and japan. Brass oil fount beautifully embossed. Holds 4 quarts of oil and burns 9 hours. Every heater warranted. Do not be satisfied with anything but a **PERFECTION Oil Heater**. If you cannot get Heater or information from your dealer write to nearest agency for descriptive circular.

The Rayo Lamp

makes the home bright. Is the safest and best lamp for all-round household use. Gives a clear, steady light. Fitted with latest improved burner. Made of brass throughout and nickel plated. Every lamp warranted. Suitable for library, dining room or parlor. If not at your dealer's write to nearest agency.

STANDARD OIL COMPANY.

splendid teams hitched to wagons paraded around the arena to the delight of the spectators. First went to a 3,700-pound team with a great amount of style and attractiveness; great, massive fellows they were, the kind in demand these days. Second and third were smaller teams but were a surprise for speed and stylish action. First went to Ira Shafer, Sharpsburg, Ill., and second to Chas. C. Judy, Tallula, Ill.

SWINE.

POLAND CHINAS.

The Poland Chinas as usual were out in greatest numbers, there being 529 Polands on the ground. In quality and uniformity the standard this year was high. The Illinois ribbons are generally considered the most desirable of all shows and it is true there are fewer common ones there than at any other fair. But many of the old show men seemed to think the winners at Iowa were fully up to the winners at Illinois; in most all cases certainly the champion at Iowa would give the Illinois champion a close rub. The hog that comes nearest filling a rectangular box was the winner this year. Many breeders considered this show the strongest ever seen at the fair, taken as a whole. Illinois a little more than held her own, but many good ribbons left the state. The champion sow belongs in Kansas and the aged herd prize went to Missouri. In the aged boar class Perfection Challenger was an outstanding winner, a long-bodied, deep hog, smooth and mellow for an old one, though a little weak in loin. Onward stood next, but would have been a winner at many shows. He was some smaller than the hog ahead of him and hardly so good on back and ham, though this feet were good; in fact, the three first-prize boars were coking good ones; better than this class usually is. In senior yearlings Perfection Hart 2d went out, carrying his great size easily on the best of feet, showing refinement and breed character. He has especially good back, heart girth and chest and is nearly an ideal Poland. This hog won at Iowa and carried his form of bloom well. The junior yearlings were a strong class and good hogs went back to their pens without ribbons. The judge took plenty of time to decide and finally picked On the Dot, a broad, deep-bodied hog, one that can carry his top line well, strong back of shoulders, his under line coming very near the ground—a hog very hard to fault. He did not carry his head quite as stylishly as the Indiana prize boar, and that was about the only criticism that could be made. Meddler 2d won second; his style and dash was the subject of much favorable comment. He was not as deep and broad as the first-prize hog, but a top notcher just the same. Separator stood next—a lengthy, growly lad, with plenty of bone, though a little plain in head. Taken as a whole this was said to be the best junior yearling show ever seen at Springfield. The under a year class was the strongest seen this year, according to our best-posted breeders, with seventeen in class, which gave the judge plenty to do. Keep On Meddler was his choice and he certainly is a grand young hog and has a great future before him. Not a single criticism was heard of this hog. His makeup is what the breeders are demanding, a hog showing breed character and early maturity. The pig below him, Regulator 2d, was not far behind him, though possibly not as good in

back as winner in this class. These pigs weighed between 425 and 450 pounds, which certainly helped them sustain the reputation as early maturers. The under six months class is one that requires great skill and knowledge to decide and the price could have been awarded to any of the first four without causing any dissatisfaction. Voter stood first. He had an extra well-sprung rib and his stylish makeup probably helped him win. He is not as fine grained as Kemp's Leader, the second-prize hog. Sir Nigil 2d is a very mellow, fine-grained pig, but was not as even as others. In aged sows there were only four, but they were good ones. Corrector Perfection, the great sow Francis showed at Des Moines, is a broad, deep individual, with extra good hams and a refined head. Not far behind her was Keep On's Best, a half sister to the first-prize senior yearling boar. She is a fine, smooth sow, with length. Lady E. L. is a coking good one; very even from end to end and especially strong over the shoulders. In the senior yearling we find the sow that was later made champion. She was a beautifully-turned sow, almost perfect in makeup, but a little undersized. Silk Finish, the sow that stood next, was of the larger, broody type, though a little heavy in ear. The Francis sow is better in head and ear, but not so large. In junior yearlings Plush and Satin Finish incited considerable favorable comment. They are of the large, stretchy type, one that our breeders would do well to recognize. They are a little plain in head, but show the strong, arched back, though scarcely as much width because of their depth, and they stand up on the best of feet. Hulda's Darkness stood between them and her style and finish won for her. The under a year class was an exceptional one, there being so many nearly matched that criticism is almost impossible. The autumn sows were very even and showy. The Lock and Wellington sow showed the result of careful breeding in refinement and quality. The under six months class presented the usual difficulty for the judge. The first place went to Indiana on a broad-backed gilt showing great quality. The second prize gilt was a trifle coarser in coat. In this class Winn and Kemp each had a bunch of gilts of exceptional merit. In aged herds Lail won first on his Finish sows. His boar was not the equal of the Winn boar, but the quality of the sows was enough to overcome this. In the champion boar class the cream of the show came out and they were an attractive class. On the Dot won, but Perfection Hart had plenty of friends for first place. For champion sow, Louise Oakwood, with her style and quality won over a very good class of sows. Perhaps the Lail sow was her strongest rival. The Poland judge, Ed Klever, did remarkably good work throughout the Poland classes and his decisions were received gracefully by exhibitors and visitors alike.

AWARDS.

Boar Two Years or Over (6 in class)—First, Kaylor, on Perfect Challenger by Chief Perfection 2d, dam E. L.'s Delightful; second, Jones, on Onward by On and On, dam Haines Beauty; third, Carrington, on Model Chief by Model Perfection, dam Lady Black Perfection.

Boar Eighteen Months and Under Twenty-four—First, Brumback, on Perfection Hart 2d by Perfection Hart, dam Wilkes Style 43d; second, Bryan, on Disturber by High Top, dam Lady Foster; third, Wood, on Perfection's Likeness Jr. by Perfection's Likeness, dam Oneida's Beauty.

Boar Twelve Months and Under Eighteen (10 in class)—First, Kemp, on On the Dot by On and On, dam Bashful of Maple Grove; second, Winn, on Meddler 2d by Meddler, dam Thistle Top; third, Glenn, on Separator by Chief Perfection 2d, dam Beauty Perfection.

Boar Six Months and Under Twelve (17 in class)—First, Brumback, on Keep On Meddler by Meddler, dam Lady Keep On; second, Hoer, on Regulator 2d by Regulator, dam Beauty's Ideal; third, Goodrich, on Outlaw by Meddler, dam Serinity.

Boar Under Six Months—First, Winn, on Voter by Meddler 2d, dam Mischievous Louise; second, Kemp, on Kemp's Leader by Hulda's Perfection, dam Hulda's Image; third, Lock & Wellington, on Sir Nigel 2d by Sir Nigel, dam Cleopatra.

Sow Two Years and Over—First, Francis, on Corrector Perfection by Francis Perfection, dam Correct Model; second, Glenn, on Keep On's Best by Keep On, dam Wilkes Style 43d; third, Cotta & Mathis, on Lady E. L. by Perfection E. L., dam Sadie T. 3d.

Sow Eighteen Months and Under Twenty-four (11 in class)—First, Winn, on Louise Oakwood by Corrector 2d, dam Lady Louise; second, Lail, on Silk Finish by Grand Chief, dam Jaunita; third, Frances, on F's Lady J. 6th by Francis Perfection, dam Ideal Lady J.

Sow Twelve Months and Under Eighteen—First, Lail, on Plush Finish by Grand Chief, dam Jaunita second, Garvey, on Hulda's Darkness by Darkness Perfection, dam Hulda's Climax; third, Lail, on Satin Finish by Grand Chief, dam Jaunita.

Sow Six Months and Under Twelve—First, Kelley, on Autumn Dream by Chief Sunshine Dream 3d, dam Kemp's Lady; second, Lock & Wellington, on Beauty Perfection 3d by L. & W. Perfection, dam Beauty Perfection 2d.

Sow Under Six Months—First, Smiley, on gilt by Mo. King, dam Cubanola 2d; second, Kemp, on Perfect Image 1st by Hulda's Perfection, dam Hulda's Image; third, Winn, on gilt by Meddler 2d, dam Mischievous Louise.

Boar and Three Sows One Year and Over (6 in class)—First, Lail, on herd headed by Tom Lipton by Grand Chief, dam June Rose, sows, Silk, Plush and Satin Finish; second, Winn, on herd headed by Meddler 2d, sows Louise Oakwood, April Shower and Daisy; third, Francis, on herd headed by Prince F., sows Corrector Perfection, F's Lady J. 6th and May Queen.

Boar and Three Sows One Year old and Over bred by Exhibitor—Same as above.

Boar and Three Sows Under One Year (6

in class)—First, Kelley, on herd headed by Coastmaster by Chief Sunshine, dam Kemp's Lady; second, Winn, on herd headed by Voter by Meddler 2d, dam Mischievous Louise; third, Lock & Wellington, on herd headed by Sir Nigel 2d by Sir Nigel, dam Cleopatra.

Boar and Three Sows Under One Year Bred by Exhibitor—Same as above.

Four Pigs Under Six Months, Produce of Same Sow (6 in class)—First, Winn, on produce of Mischievous Louise; second, Kemp, on produce of Hulda's Image; third, Lock & Wellington, on produce of Cleopatra.

Four Swine Get of Same Boar Bred by Exhibitor (6 in class)—First, Lail, on get of Grand Chief; second, Francis, on get of Francis Perfection; third, Kelly, on get of Chief Sunshine.

Champion Boar—Kemp, on On the Dot. Champion Sow—Winn, on Louise Oakwood.

DUROC JERSEYS.

In the aged class Commodore was a wonderful hog in many ways. He has great size, weighing 1,080 pounds and carries it easily on the best of feet. His color, a dark cherry, at his age speaks well for him. Junior Jim stood next to him and had refinement and more quality, but did not carry his width as evenly. King Gold Coin stood third. These last two were evenly matched. In senior boars Tokio Paul carried off the honors. He was a showy, mellow fellow and carried his great length well. Junior yearlings was another strong class and the judge spent a good deal of time in picking the winners out of thirteen good ones. Orion King was at last decided upon, although many outsiders differed with the judge in this, as they did in many classes. Ambition stood second. He was a mellow hog with splendid coat, good head and ear. The under year boars were also a strong class, notable for their uniformity. The winner, Shorty Orion, was an extra good one. He stood on the best of feet. He shows a good, strong bone, deep body and carries his back well. Illinois Chief was very much the same kind of a hog and it would be hard to tell just which should win. He lacked a little in length. Any one of the first three could have been placed first without going far wrong. The judge discriminated against high fitting all the way through. The under six months class brought out thirty—the cream of many herds. Cutler won on a pig that closely resembled the winning Polands. He was good

Cutler, Garthage, Ill. (18 head); Real & Richards, Ferris, Ill. (9 dam Miss Watt; second, Deal & Son, on Auditor D. by Golden Hero, dam Hillie's Model; third, Jackson, on pig by Orion Chief, dam Nellie M.

Sow Two Years Old and Over (20 in class)—First, Fagan, Browning, Hess & McCabe, on Foust's Pride by Kan't Be Beat, dam Xenia Queen; second, Manley, on Bethel by Young John, dam Osborn's Best; third, Titter, on Clover Blossom 1st by Crimson Top, dam Clover Blossom.

Sow Eighteen Months and Under Twenty-four (12 in class)—First, Jackson, on King's Lady by Orion Chief, dam King's Lady; second, Teter, on Pearlina by Chief Surprise, dam Cotton Girl; third, Harris, on Lady Queen by Oom Paul, dam Young Queen.

Sow Twelve Months and Under Eighteen (15 in class)—First, Greer, on Lottie S. by Tip Top Notcher, dam Goldie O. 40th; second, Jackson, on King's Lady A. by Orion Chief, dam King's Lady; third, Cutler, on Red Lady by Ely's Improver, dam Red Rose.

Sow Six Months and Under Twelve—First, Cutler, on Lady Kruger by Kruger, dam Orion Lady; second, Jackson, on Annie Orion by Orion Chief, dam Florodora 5th; third, Teter, on Miss Ride by Golden Chief, dam Pride of the West.

Sow Under Six Months (24 in class)—First, Thomas & Hogsett, on You Can't Beat Her by Ambition, dam Bessie Bell; second, same, on Gold Coin by Ambition, dam Golden B.; third, Greer, on Lady G. by Steven A. Douglass, dam Lottie S.

Boar and Three Sows One Year and Over (5 in class)—First, Harris, on Commodore, Lady Queen, Grace F. 2d and Red Silk; second, Jackson, on King Gold Coin, Orion Lady A., Orion Lady B. and King's Lady 1st; third, Manley & Co., on Junior Jim, Bethel, Need and unnamed.

Trumans' Three-year-old Winning Hackney

all over and was very hard to fault. This class was so evenly matched that it was largely a matter of style and condition on which a judge could base his decision. In old sows great matrons came out. They were deep and roomy with splendidly arched back. Foust's Pride was a grand sow, though she was not very far ahead of Bethel. She was very good. She won on her depth, back and coat. The third prize sow would stand a little more fullness behind shoulder. The senior yearlings were also a strong class. King's Lady won on better feet and bone. The first three were very even. Old breeders said they had never seen so much quality in one ring. The sows in the junior yearling class are usually in their prime and make a fine showing. Lottie S. was a tidy young sow, extra good in hams and loin. King's Lady A. was a very deep-bodied individual of good quality. There were eighteen under year sows and all but a few outstanding good ones. The young sows were better on their feet than the older ones, which shows advance went in the breed. The herd classes make a nice showing, perhaps the nicest showing of all. Harris won with his boar, Commodore, at the head, although Jackson had better sows and a class winning boar. The judge probably remembered the old saying that the sire is half the herd. The winning young herd was composed of Jackson's sows shown in other classes. In the show for champion boar Tokio Paul gave Commodore a close rub. He would have been a winner at most any show but in this.

Exhibitors: W. W. Green & Son, Rushville, Ill. (47 head); G. W. Trone, Rushville, Ill. (8 head); Louis Denton, Rochester, Ill. (3 head); A. A. Hill (5 head); C. C. Cramer, Huntsville, Ill. (16 head); H. B. Griffith, Bowen, Ill. (18 head); Manlove Bros. & Nor-

Boar and Three Sows One Year Old and Over, Bred by Exhibitor (6 in class)—First, Manley & Co., on Proud Monarch, Bethel, Need and Shady Nook Beauty; second, Kraschell, on Gold Standard, Perfection Maid, Perfection Maid 2d and Perfection Maid 3d; third, Cutler, on Ill. Chief, Bonny Girl, Cutler's Queen and Goldie C.

SEARS, ROEBUCK & CO., Chicago, Ill.

head); C. T. Rodgers, Petersburg, Ill. (14 head); Ira Jackson, Tippecanoe City, Ohio (10 head). W. E. Spicer, judge.

AWARDS.

Boar Two Years and Over (12 in class)—First, Harris, on Commodore by International, dam Cyclopeda 3d; second, Manley & Co., on Junior Jim by Chitwood, dam by Hulda's Jim; third, Jackson, on King Gold Coin by Gold Coin, dam Cedarvale Queen.

Boar Eighteen Months and Under Twenty-four (4 in class)—First, Trone, on Tokio Paul by Oom Paul, dam Paulina; second, Harris, on Kentucky Colonel 2d by Harris Colonel, dam P. Duchess; third, Manley & Co., on Proud Monarch by Proud Advance, dam by Dandellon.

Boar Twelve Months and Under Eighteen (13 in class)—First, Cutler, on Orion King by Orion Chief, dam King Lady; second, Thomas & Hogsett, on Ambition by A Top Notcher, dam Lib C.; third, Kraschell, on boar sired by Gold Cloud.

Boar Six Months and Under Twelve (15 in class)—First, Jackson, on Shorty Orion by Orion Chief, dam Florodora 5th; second, Greer, on Ill. Chief by Tip Top Notcher, dam Daisy Improver; third, Fagan, Browning, Hess & McCabe, on Helen's Tip Top Notcher by Tip Top Notcher, dam Helen Blazes.

Boar Under Six Months (30 in class)—First, Cutler, on Wonder Boy by Pilot Boy, shown in most classes. Humbert & White carried off a majority of the ribbons with a very strong herd. Some Chesters in the show had a serious defect, that of being weak on feet. Some were also inclined to droop in the back. Joker, the first-prize aged boar, later made champion, was a very good one, and very near the Poland China type. The hog that stood next to him was a little lighter in the hams. Neponset Boy, winner in the twelve to eighteen months class, was a strong favorite for champion and would have looked all right as champion. The under a year class brought out some good ones. Meddler was sweepstakes boar at Des Moines, being extra good in feet, a lengthy pig, with a well-sprung rib. The

IS YOUR ROOF TIGHT?

Congo Roofing will make it so. If it's a Congo Roof it will be tight and it will stay tight. Any roofing is tight for a while, but Congo Roofing stays tight longest. It outlasts shingles and costs less. It is easy to lay and simple to maintain. Write for Sample, which we will be glad to send you free.

BUCHANAN-FOSTER CO.
422 Chestnut St.
PHILADELPHIA

Indiana prize pig was good enough to give the judge a hard one. The under six months class brought out fifteen, but they were uneven in size and the judge was at sea on account of their ages, some being too old for their class and had to be thrown out. He finally selected the Loughbridge pig. Second-prize pig was better in head and ear. Mears brought a very fancy youngster, a late pig, that would have stood higher if his feet had been better. In the aged sow class Springfield Fancy carried off the honors. She showed more style and finish than Sweet Marie, an extra good boar, though a trifle heavy in ear. The sows in this class were very strong and would have compared favorably with the same class in any of the breeds. The sow class was as a rule better than the boars, and showed evidence of having produced pigs, and many were bred. The under one year class brought out a nice, even bunch and the winners were not outstanding. They showed lots of quality and breed character. Champion boar went to Joker. It lay between him and Neponset Boy, but the winner had a better-sprung rib and carried his width a little better. In this champion sow class Springfield Fancy carried off the honors. She is a great sow, of deep body, has a good, strong back, good on feet, especially strong back of shoulders. The exhibitors were: Jno. C. Weddle, Franklin, Ind. (14 head); E. L. Mears, Neponset (25 head); W. L. Dodd (2 head); F. D. Humbert & White, Nashua, Iowa (21 head); McCandless Bros., Barclay (16 head); W. A. Hinkle, Decatur (13 head); F. C. Bow, Ava (4 head); Orr Phillips, Hamlet, Ill. (1 head); J. M. & J. F. Stevenson, Adrian (15 head); Gus Yonica, Olney (15 head); J. A. Loughbridge, Delta, Iowa (15 head). Total, 140 head.

AWARDS.

Sow Under Six Months—McCandless.

Five Pigs Under Six Months—McCandless.

Pair of Pigs Under One Year—Humbert & White.

Boar and Three Sows Any Age—Humbert & White.

BERKSHIRES.

While there were only 123 Berkshires on exhibition at Springfield, the quality made up for the lack in numbers. All the rings were well filled and some notable individuals were shown, among them Lord Premier's Rival, but he went down in defeat in the sweepstakes ring to O. H. F. Sensation, a fine specimen of the breed, standing on better feet than his competitor and a little deeper in body. The sweepstakes sow, Hood Farm Duchess, was a grand specimen, one of the best shown this year. The following breeders were present with their herds: Overton Hall Farm, Nashville, Tenn. (24 head); Hood Farm, Lowell, Mass. (24 head); Morgan County Bank Association, Linderberg, Ill. (5 head); Shropshire, Lexington, Ky. (1 head); C. D. Johnson, Nashua, Iowa (10 head); J. L. Werrick, Cowden, Ill. (6 head); J. Everson & Son, Wellington, Ohio (19 head); J. A. Leland, Springfield, Ill. (7 head); Ravenwood Stock Farm, Nashville, Tenn. (15 head); H. B. Cass, Buffalo Hart, Ill. (7 head); Etzler & Moses, Decatur, Ind. (14 head); Sam Spillman, Sturgeon, Mo. (1 head). The following awards were made by G. W. Berry:

Boar Two Years and Over (7 in class)—First, Overton Hall Farm, on O. H. F. Sensation; second, Spillman, on Robt. Lee 790; third, Hood Farm, on Hood Farm Rex.

Boar Eighteen Months and Under Two Years (3 in class)—First, Etzler & Moses, on hog by Lord Lee; second, Everson, on Loyal Premier; third, Hood Farm, on Sultan of Hood Farm.

Boar Twelve Months and Under Eighteen (5 in class)—First, Herrick, on Lord Premier's Rival; second, DeBow, on Premier Ravenwood; third, Cass, on Victorious.

Boar Six Months and Under Twelve (10 in class)—First, Snopshire, on Bourbon's Model; second, DeBow, on Highland Chief; third, Overton Hall Farm, on Oak Francis 2d.

Boar Any Age—Overton Hall Farm, on O. H. F. Sensation.

Sow Any Age—Hood Farm, on Hood Farm Duchess 17th.

HAMPSHIRE.

The Hampshires made a strong showing and are taking well. The breeders have

about settled on a type and much progress is now being made. The hogs shown, with a few exceptions, were uniform in type and as a whole they made one of the attractive features of the show. Three exhibitors were there: E. C. Stone, Armstrong, Ill. (45 head); Hughes Atkinson, Mt. Sterling, Ky. (25 head); John Goodwine, Jr., Pontiac, Ill. (16 head), making a total of 86 head. Q. I. Simpson, judge.

AWARDS.

Boar Two Years and Over (4 in class)—First, Goodwine, on Legal Tender 660; second, Stone, on Gem Munson 500; third, Stone, on Artisan John 550.

Boar Eighteen Months and Under Two Years (6 in class)—First, Atkinson, on Stone's Duke; second, Stone, on Uncle Jim 851; third, Atkinson, on Teddy 879.

Boar Any Age—Goodwine, on Legal Tender.

Sow Any Age—Stone, on Miss Dale.

TAMWORTH.

This is one of the new breeds to be recognized and gaining in popularity. The showing here was good and the judge pronounced it one of the best exhibits he had ever seen. The type he favored seemed to be satisfactory to the exhibitors, who were Frank Thourber, Carthage, Ill. (16 head); Jas. P. McCollom, Ferris, Ill. (18 head); W. Warren Morton, Russellville, Ky. (19 head).

SHEEP.

COTSWOLDS.

The Cotswolds were few in numbers, but brought out the best show seen so far this year according to the judge and ring side comment. Ribbons were tied where they seemed to belong and the results of the tying gave general satisfaction. The aged ram class brought some good ones. The winner was a large, strong ram, well woolled all over except perhaps just a trifle on the back. There was some criticism over the placing of a lamb over an aged ram, but the lamb was a captivating youngster, carrying one of the best fleeces seen in the show ring for some time. The champion ewe had plenty of competition and the judge worked long on the classes, but she is an exceptional ewe and has been a winner at the principle shows and never has been defeated. The following breeders were present with their herds: F. W. Harding, Waukesha, Wis.; Wilson Bros., Muncie, Ind.; Lewis Bros., Camp Point, Ill. The following awards were made by H. Compton.

Ram Two Years or Over—First, Wilson Bros.; second, Lewis Bros.; third, Harding.

Ram One Year and Under Two—First, Harding; second, Wilson Bros.; third, Lewis.

Ram Lamb Under One Year—First, Lewis Bros.; second, Harding; third, Wilson Bros.

Ewe Two Years Old and Over—First, Wilson Bros.; second, Harding; third, Lewis Bros.

Ewe Any Age—McGonigle & Sons.

SHROPSHIRE.

The Shropshire show was not as large and strong as usual, but among them was said to be the best individuals shown this year anywhere. The aged ram class was very strong and the ram that won was an outstanding individual. Harding's yearling ram won in his class and later was made champion. He has great size, is deep and shows a splendid leg of mutton. His head was well covered, in fact he was woolled clear to the ground. Altamont carried off the championship for ewes on better woolled head and most feminine character. Harding's ram lamb was a catchy youngster.

THREE THROUGH TOURIST CARS TO CALIFORNIA

The Chicago Great Western Railway offers choice of three through tourist sleeping cars to California each week via different routes. One car goes via Kansas City and Santa Fe route; one via Kansas City and Rock Island El Paso route and one via St. Joseph and Santa Fe. No other line offers such a choice of routes. For full information apply to E. J. Sawyer, C. T. A. 514 Walnut St., Des Moines, Iowa.

HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

Fall Care of Grape Vines.

To the Editor of The Homestead:

There is no reason why every farmer should not raise enough grapes at least for his own family, but such is the case.

The grape, unlike other fruits, should receive its pruning in the fall. In fact with the other prerequisite, winter protection, the essentials of successful grape culture, at least the ones most frequently neglected, are the matters to be attended to before the ground freezes.

Volumes have been written on the subject of pruning grapes. An eminent horticulturist on being asked just how to do it said: "Go into a vineyard with an experienced pruner, and watch him."

This is very sound advice and none better can be offered, but few are able to put it in practice. The great majority must of necessity obtain their information second-hand and put it in practice as best they can.

In pruning grapes, it is to be remembered that the fruit grows upon new wood; that is to say, the wood which is to bear next year's crop will grow from a bud next spring. For this reason the old wood should be largely cut out, otherwise the strength of the plant will be expended to support it and there will be little left to force the new growth. The amount of pruning necessary depends upon the strength and vigor of the vine, a strong vigorous plant being able to bear more wood than one which is weaker. In theory, a grape vine should be trimmed to three buds when it is planted out, and at the end of the season's growth the vine which has come from each bud should be cut back to one or two buds and this process followed out every year. By this method, strong, stocky, vigorous vines result which bear a fair amount of excellent fruit. In practice, it is hard to follow any hard and fast rule except that the number of lateral vines must be limited and those which remain must be kept in restraint.

If the pruning is done in the spring after the sap has started the vines will bleed and will not bear that year, but it may safely be done while they are still dormant. Vines which are unpruned through the winter are likely to be broken by the winter winds. It is therefore best to do all pruning in the fall.

There is an added advantage in this if winter protection is to be given, as the vines are much less difficult to handle.

In the matter of winter protection opinions differ. My observation has been that at least from central Iowa

north, winter protection, though not always necessary, is always cheap insurance against damage from frost. The method used is simply to lay the vines on the ground and cover them with three or four inches of earth. Treated in this manner, there is very little danger of loss of plants by frost.

Attention to these two details of pruning and protection in the fall, and to cultivation in the summer, should insure a bountiful harvest.

Franklin Brown.

Polk county, Iowa.

Russell's Duroc Jersey Sale.

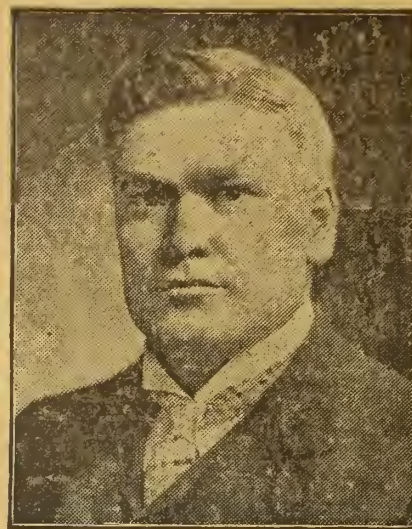

The sale of Duroc Jersey hogs held at Mr. A. F. Russell's farm near Savannah, Mo., on Thursday, September 20th, was well attended and good prices were obtained. There were a number of breeders from Illinois, Missouri, Iowa, and several from Nebraska and Kansas present. Thirty-five head were sold at an average of \$65. The top of the sale, \$350 was paid for S. E.'s Model VIII. 30994 by Mr. H. E. Browning, of Herman, Ill. The following is a list of those selling for \$20 and over:

No.	Name	Price.
2	Sow, D. R. Wilson, Redfield, Ia.	47.50
1	Sow, same	185.00
5	Sow, Kraschel & Son, Macon, Ill.	205.00
6	Sow, Ed A. Baxter, Pawnee, Ill.	210.00
7	Sow, C. A. Wright, Rosendale, Ill.	115.00
3	Boar, J. A. McMasters, Hopkins, Ill.	150.00
8	Sow, J. Coy Roach, Girard, Ill.	67.10
Extra	Sow, S. E.'s Model VIII, H. E. Browning, Herman, Ill.	350.00
56	Sow, S. R. Murphy, Savannah, Mo.	50.00
57	Sow, A. L. Lynch, Mt. Airy, Iowa.	25.00
64	Sow, G. M. McCurry, Maryville, Mo.	50.00
65	Sow, same	72.50
46	Sow, B. W. Haie, Ladonia, Mo.	32.50

Agricola

Mr. J. B. Brown, of Solon, Iowa, on Oct. 4th, sold a select draft of good Short-horn cattle from Waveland herd at disappointing prices. Mr. Brown is one of the most conservative, honorable breeders in the land, and he made every necessary preparation for the comfort and pleasure of his guests. The cattle were a good lot in nice fix. The breeding was good and clean, yet bargains were everywhere present. Mr. Brown can get little comfort or encouragement, as he reviews the low prices secured for many of his cattle. There was no legitimate reason for these cattle not selling for \$20 more on the average per head than the prices obtained. It was bargain day. Fortunately nearly all the offering was bred at Waveland. The cattle were an honest lot of useful matrons that

The sale of Mr. John Weighton, at Audubon, Iowa, on the 2d of October, brought out a fair sized crowd and an average of \$25 was made on the entire offering sold. No very high prices were realized, but it was a

We have had a very heavy run of sheep this week, almost 40,000 larger than last week and prices are 10 to 15 cents lower than at the close of last week. The big run has been made up very largely of lambs and is

This "PEERLESS" Pitless Scale

Laid Down at Your
Railroad Station
Complete For Only

\$46.50

Why Pay More?

The only real difference between the "Peerless" at \$46.50 and other Pitless Scales selling at \$60 to \$100 is in the frame.

Peerless frames are of wood,—the others, costing 33 1/3 to 100% more, are steel; all inside working parts are practically the same.

Then, why on earth should you pay a fancy price when you can buy a thoroughly good scale like the "Peerless" direct from the factory at a saving of all middlemen's profits?

Sold on 30 days free trial. No deposit, no notes to sign, nothing to pay unless you are satisfied, and you are the judge of that!

Let us send you a set. Test them for a month and make up your mind whether they are worth \$46.50. Keep them, if you think they are.

Send for the free "Peerless" Pitless Scale catalog fully describing every part.

You will make a big mistake to buy a high priced scale before investigating the "Peerless."

SORE EYES, Granulated or Inflamed. Relieved Instantly by "Octami." Price one dollar. Satisfaction guaranteed or money refunded. The Idanba Co., Box 363, Kirksville, Mo.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

SCHOOL DISTRICTS—MISSOURI.

A Subscriber, Clifton Hill, Mo.—Three-fourths of my farm is situated in a certain school district, but the portion of it where my buildings are located and where I live is in another district. Can I lawfully send my children to school in the first mentioned district?

Answer.—The board of directors in the school district where three-fourths of your land is located, are empowered by law to admit your children to their school, but you will have to pay such reasonable tuition charges as they may fix in that district, and in view of the fact that you pay school taxes there, the board should make the tuition charges merely nominal.

RIGHT OF WAY—DAMAGES.

Mr. Frank E. Hufford, Cerro Gordo, Ill.—An interurban railway company has surveyed a line for its road along the south side of the farm I occupy. I pay cash rent, but my leasing contract is a verbal one. The company has secured an option on the land. (1) Will I be entitled to damages for the crops which the company destroy in constructing and operating its line? (2) Can I compel the company to construct and maintain a hog tight fence along its right of way?

Answer.—(1) You will be entitled to damages for the crops destroyed by the company. (2) You cannot compel the company to construct a hog-tight fence along its right of way, but only the ordinary lawful fence.

STALLIONS OR BULLS.

Mr. Al. Darbyshire, Washington, Iowa.—I have been told that a law was passed at the last session of the legislature, prohibiting the use of grade bulls outside of the owner's own herd. Is it true?

Answer.—The law you have in mind applies only to owners or keepers of stallions and bulls kept for sale, exchange or transfer, who represent their animals to be pure-bred, thoroughbred, standard-bred or registered, in which case they must have them properly registered, and post copy of certificate on the stable or stall where the animal is kept. There is no law to prohibit the use or service of a grade stallion, or a grade bull anywhere, provided the owner of the animal represents it to be grade.

ADMINISTRATION—TENANT BY CURTESY.

Mr. E. R. Wood, Jefferson, Iowa.—A husband and wife lived in Nebraska. The wife died leaving real estate in her name. (1) Can an administrator be appointed without consulting the heirs? (2) How long can the administration run before settlement? (3) How should a person interested proceed to bring about a settlement? (4) What portion of the wife's real estate will go to the husband by law?

Answer.—(1) He can. The surviving husband is first entitled to be appointed administrator if he applies for it. (2) It should be finally settled in about a year, but the court may grant further time if circumstances demand it. (3) By making application to the county judge, showing good cause why the estate ought to be settled. (4) When a wife dies, leaving real estate in Nebraska, and having no children, the surviving husband is entitled to the real estate during his lifetime as tenant by curtesy. It then goes to the wife's father—if her father be dead, to her mother.

LAST WILL.

A Subscriber, Marion, S. Dak.—A died in South Dakota, leaving all his property by will to B, his wife, she to be the administrator of the estate. There were eight living children. One son had formerly died, leaving a wife and three children, who were living when A died. B was seventy-two years old and unable to attend to her property, and some of the children appointed C, an outsider, to look after it. Two years later C went with B to D, and had D prepare B's will. D swore that C told him every word that was written in the will and when it was finished D read the will to B and asked her if that was the way she wanted it, and she said yes, and signed it, and C and D signed it as witnesses. By this will B mentioned seven of the children by name, leaving each of them \$10, and giving all the balance of her property to the other living child. B was childish at the time. Is such a will good in law?

Answer.—It is a doubtful matter whether the will is good or not. If at the time B signed the will, she was by reason of old age or infirm health, of unsound mind, or if undue influence or compulsion was used over her to induce her to sign it, then it is not good, and

They ship well

Hogs weak in Bone and Muscle cannot reach market in good condition. They find slow sale. Hogs fed entirely on corn are usually poor shippers. Not so, hogs fed on Swift's Digester Tankage.

Swift's Digester Tankage

Arrive in Prime Condition

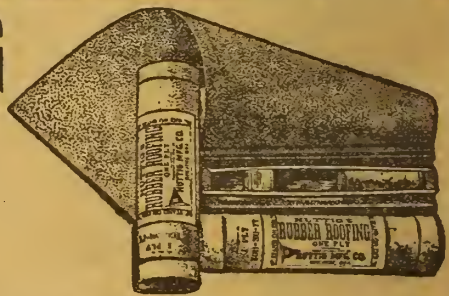

Hogs fed Swift's Digester Tankage (Protein 60%, Phosphates 6%) have dense hard bone and firm muscle which enables them to stand a long haul to market and arrive in prime condition. Write for literature, prices and a sample.

ROOFING THAT WILL LAST.

What the farmer wants for roofing is something that will keep out the water and wind and can be put on easily by himself. After making a series of tests covering a period of several years we have prepared Huttig's Ready Roofing, which we know to be the best quality of roofing ever offered for sale. Our reasons for this are that our roofing is made from the best quality of felt thoroughly saturated with Trinidad asphalt. The treating of this felt with asphalt is what makes the Superior brand of our roofing. Another thing in its favor is that it can be used for the sides of the building as well as the roof, as it keeps out the cold of winter and the heat of summer. When you use Huttig's Rubber Roofing you do not have to repair it every year as is the case with many roofings. There is no wear out to the Huttig brand; it will last for years. Those who have used it find that it is much cheaper than shingles in every way and so easily put on that anyone who can drive a nail can lay his own roof. We have sold great quantities of our roofing to farmers and stock breeders and in many instances they have come back for a second order. We want every reader of this paper to know what Huttig's Rubber Roofing is like and you can find this out by inquiring of your dealer. If he does not carry our roofing just drop us a line and we will send you sample and at the same time tell you all about its different uses. Write to.

Huttig Manufacturing Co., Muscatine, Iowa.

Call for Booklet B.

can be set aside. If neither of these objections to it exists, it is valid and binding.

POWERS OF CITIES AND TOWNS.

A Subscriber, Neosho, Mo.—(1) Can a city construct sidewalks along its streets and collect pay from the owners of abutting property, without a vote of the citizens authorizing the same? (2) Has there been a decision of the supreme court of this state on this proposition?

Answer.—(1) A city has such power by law. (2) There has been no decision denying that cities have such power in Missouri. On the contrary, there are decisions sustaining the proposition. (2) See Springfield vs. Weaver, 137 Mo. Rep., 650, and Moberly vs. Hogan, 131 Mo. Rep., 19.

LOW RATE EXCURSIONS.

The Missouri Pacific Railway and the Iron Mountain Route will sell round-trip tickets to points in Texas and Louisiana for \$20 from St. Louis and \$25 from Chicago on the first and third Tuesdays of each month. Proportional low rates will apply from other points; also one fare plus \$2 to points in Indian Territory, Arkansas and Missouri, and \$25 from Chicago to Pueblo, Colorado

Springs and Denver, with limit of twenty-one days except to points in Louisiana, Arkansas, Texas and Indian Territory, which are limited to thirty days, stopovers going and returning.

Mexico: Less than one fare on the first and third Tuesdays, with stopovers.

California: Low round-trip rates on sale daily to September 1st.

Hot Springs, Ark.: Commencing June 1st to September 30th, one fare plus \$2, good thirty days, on sale daily.

Remember the Missouri Pacific Railway and Iron Mountain Route reach the principal points in the above-named states without change of cars.

For descriptive literature and other information address, Ellis Farnsworth, D. P. A., 186 Clark St., Chicago, Ill.

ONLY \$4.50 TO MINNEAPOLIS AND ST. PAUL AND RETURN.

Via the Minneapolis & St. Louis Ry. Popular excursion Saturday, October 13th. The last chance to visit the Twin Cities at a low rate. Tourist berth rate \$1.00. City Ticket Office, 512 Walnut St.

BUFFALO, N. Y.

On October 10th, 11th and 12th the Chicago Great Western Ry. will sell round-trip tickets to Buffalo and return at rate of one fare plus \$2.00. Return limit October 19th. Full information from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

STOMACH WORMS.

I wish to be informed in regard to stomach trouble in sheep—stomach worms in particular, the cause and remedy, if any. Give symptoms of first attack.

The eggs of stomach worms (strongylus contortus) are taken in on low, wet or tainted pasture by grazing lambs, which, becoming infested, gradually emaciate, and are found to have blanched membranes of eyelids and mouth, white skin, harsh wool and often suffer from scours. Gasoline in tablespoonful doses in six ounces of new milk given two or three times at intervals of three days is the favorite remedy, but lambs must also be generously fed on oats, bran and oil-cake along with good fodders, roots, cabbage, etc. Avoid wet pastures and pastures tainted by old sheep. Lambs, wherever possible, should have new seeded pastures each spring.

LEUCORRHEA.

I purchased a black mare twelve years old a few days ago. She is thin in flesh and does not eat very well, and discharges a thick, white fluid. I notice it most when driving her. A neighbor told me it was the whites. I don't know of how long standing it is or whether there has been anything done for it. Will it prevent the mare from breeding again?

The trouble is leucorrhoea (whites) and will prevent her from conceiving if bred and may be found difficult to cure. Have her teeth attended to by a veterinary dentist. Give her twice daily a tablespoonful of a mixture of three ounces each of fluid extract of ergot and hydrastis canadensis. Once daily flush out her vagina with a luke warm two per-cent solution of coal tar disinfectant

What Zenoleum Does for Hogs

Zenoleum is a remedy now universally used by breeders and feeders, recommended by veterinarians, endorsed and used by Forty-three Agricultural Colleges of the country.

What are the uses of famous Zenoleum for hogs? Read what these people who speak from actual experience have to say about Zenoleum, the

World's Foremost Cholera Preventive.

Ohio Agricultural College.

"Another feature in favor of the use of Zenoleum for swine is that it is probable that hog cholera and possibly some other maladies are transmitted by means of animal parasites, consequently treatment of this sort should be resorted to in order to keep the medium of contamination reduced to the smallest degree possible."

C. S. PLUMB, Prof. of Animal Husbandry.

G. G. Council, Williamsville, Ill.

BERKSHIRE SWINE.

"I beg to state that my hogs are perfectly healthy and have had no disease. We certainly recommend Zenoleum."

Kills Hog Lice

Can You Afford To Take Chances?

Hog cholera has broken out in many quarters. Your herd may escape if you begin now. Zenoleum is certain death to disease germs, it creates absolutely sanitary conditions, it wards off hog cholera, it prevents its spread if the disease has already started, it renders hogs immune.

Most All Druggists Sell Zenoleum.

One gal. Zenoleum, express prepaid, \$1.50.
Five gallons, prepaid, \$6.25.

Order now and be in time. At any rate write today for free copy of the 64-page book, "Piggie's Troubles," which gives all particulars.

ZENNER DISINFECTANT CO.,

31 Lafayette Avenue, Detroit, Michigan.

and in a week change to a similar solution of permanganate of potash; then in same time to a solution of half an ounce of tannic acid in two gallons of luke warm water. Alternate solutions until discharge permanently ceases.

SORE.

I have an imported black Percheron stallion four years old which was imported last November from France. About three months ago I noticed two or three small spots under his belly about the middle of his body, where the hair had come off. I thought it was a kind of itch, so commenced to use some gall cure twice a day. Used that for a month, but it did no good. Then I used coal oil, sulphur and lard for a month and that did no good. I have painted it twice with tincture of iodine. Now all those small spots are in one large place about the size of a man's hand. Some of it looks red and raw. The rest of it looks as though the hair had been rubbed off. Any advice you can give will be very gratefully received.

Wash the parts with a two per cent solution of coal tar disinfectant then rub in a little of a five per cent ointment of ichthyol and lard to each ounce of which add two drams of flowers of sulphur.

SPAVIN.

Please tell me what is the matter with my three-year-old gray gelding. I broke him this spring and worked him moderately until the last of June, when he began to get lame in his right hind leg after standing, but when moved fifteen or twenty rods would go off all right. I had a veterinarian examine him and he said he had a spavin and applied a blister. I turned him into pasture, where he has been since. In about six weeks it seemed better after having applied the blister four or five times, but now he seems affected in both hind legs and when he lies down he will sit up on his hind parts and struggle about for half an hour before he gets up. After struggling some time he will stretch out all four legs and reach back to his left hip with his nose. If I drive him up he will get up at once, a little stiff in his legs, but will soon go off all right. He is in good flesh. After getting up he will pass water, which is without any sediment and the same color as a horse in good health.

Horse apparently is unsound in both hocks from bone spavins, but it is possible that he has also sprained the psoas muscles of his loins by struggling in rising or when at work or exercise. Whatever is done for the cure of a bone spavin causing lameness perfect rest in stall for at least six weeks must be an important part of the treatment. It is useless to fire or blister and then turn the horse to grass. If spavins are present he should be placed in slings and the joints fired and blistered by a qualified veterinarian and then allowed six weeks rest in the standing position.

HEAVES.

I have a four-year-old mare that got wet while plowing last April and took cold. She discharged large quantities of white looking matter from her nose and coughed. The coughing seemed to cause her pain and she would rub her teeth along the edge of the manger. A homeopathic physician who called at our house gave her some medicine and also left some. After four days the cough and running at the nose ceased. About a month ago she commenced to run again, small quantities of white matter from her nose, and coughed as she did at first. It seems to cause her pain and she uses the edge of the manger to rub her teeth. In good weather I let her in pasture by day, feeding her night and morning timothy hay (sometimes), a mixture of clover and several kinds of grass and four quarts of oats. The past two days I have given her three quarts of shelled corn instead of oats, twice a day. While breathing, when expelling air from her lungs she jerks spasmodically at her belly near the flanks. This she has done since April and it does not seem to improve. I have not

Cures Hog Cholera

Chloro-Naptholeum Dip is guaranteed to cure Hog Cholera. Kills hog lice. Heals wire cuts, sores and wounds. It is the greatest germicide, insecticide and disinfectant known. Quick and sure in its action. You can try it at my expense and risk. A gallon of

Chloro-Naptholeum Dip

shipped anywhere, express prepaid, to prove my claims. Send no money. It must do the business or you are not obligated to pay a penny for it. The trial gallon makes 100 gallons when diluted. Give it a test. (If you are located west of the Rocky Mountains, you must pay freight charges.) Simply send your name and address to

NAVICULAR DISEASE—SPLINTS.

(1) I have a sorrel mare six years old, weighing about 750 pounds, that is lame in her left fore leg. I drive two of them to a buggy about twenty-seven miles four days out of the week. The lameness I think is below the knee. The cord in the back part of the leg seems to swell when she stands in the stable over night. She has a little hard lump on the inside of the bone about half way from the knee to the fetlock joint. It is not much larger than a wheat straw, is probably an inch long and feels like what is called a splint, but it has just come since she got lame. She is very lame when I first take her out of the stable in the morning, but when she is driven a little way she gets over it so it can hardly be noticed; only when she goes down hill it seems to bother her more. She is pretty long from the fetlock joint to the hoof and sets back some there, but she does not flinch when you press anywhere except the cord from the knee to the fetlock. The lump is not sore to the touch. Her foot and leg do not seem to have fever in them. (2) I also have a gray horse four years old that has hard lumps about the size of my finger and an inch and a half long on the inside of the bone of both fore legs just below the knee. I think they are splints. They do not lame him. They were on him when I got him, so I don't know how long they have been there. Is there any way of taking them off and will the treatment lame him any?

(1) The seat of the lameness is within the foot (navicular bone and joint) and it is cruel to use the mare in her present condition. The operation of unnerving is the only remedy in such a case and it will have to be done by an expert. (2) Under the circumstances let the splints alone, as they do not cause lameness and might do so if treated by blistering, which is the customary treatment.

NEW TOWNS IN SOUTH DAKOTA.

FLORENCE.

Just platted. Lots at private sale. One

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

SHEEP AS GRUBBERS.

It would be interesting to know how much could have been saved had sheep been employed in the early settlement of a country in the clearing up of brush and timber land. The sheep was actually lost sight of in the clearing of many thousands of acres, and it was only recently that goats were called upon to assist in this undertaking. Goats are invaluable when it comes to killing off brushy growth. Sheep will do the work as surely, but they will not do it so quickly, being graziers first and browsers afterward. The writer has witnessed the clearing of many thousands of acres by the grub hoe, axe and at an expense for labor that could have been done as effectively by sheep without any expense and at the same time the sheep would have paid their way as they proceeded with the work.

Where good sheep are employed as grubbers, there will be a tendency to work them too hard. The owner, in his anxiety to clear his land, will withhold feed from his flock so that they will do more effectual work, and thus suffer loss in thrift of flock. This is unwise. Sheep that are worked too hard will seldom prove profitable, and one should use them as grubbers only secondarily, and not let this feature get in the way of a profitable fleece and a good saleable sheep.

Sheep can also be used as gleaners about a farm and the service they render along this line is incalculable. When turned in stubble, they will pick up any grain that may be left, and will also eat of all kinds of weeds which may be growing there and thus keep them from going to seed. They will clean up the fence rows and waste places and do effectual service that can be performed as cheaply in no other way. When turned in corn fields with proper restraint and management, they will clean up the growth of weeds and foxtail which has been allowed to grow in the corn without doing material damage to the growing corn. Under proper management, a flock of sheep can be made to do as good service as gleaners without doing them any particular harm as could be done by the best methods known to manual labor, and that, too, without any expense. In the employment of a flock of sheep as gleaners, one must not lose sight of the fact that they are to be made profitable and they should not be "over-worked" in a desire to rid a farm of noxious growth of any kind.

SHEEP EDUCATION.

While in attendance at one of the large state fairs the writer was introduced to some of the exhibitors as "the sheep man from Iowa," and in talking with various interested bystanders it was a common thing to hear farmers and stock-

men speak of their long residence on farms and that they knew absolutely nothing about sheep. It occurred to us then that there is need of the gospel of sheep being preached to those who will listen to it.

We believe that a farmer where sheep are not now kept can do no better by his son than to buy him one pair of ewes, make him a present of them and start him on the road to what will likely be his success. When a pair of good ewes have been provided, that son should be given a chance to peruse the best sheep literature extant and he should learn both from the text books and from his small flock. A willing and intelligent son will learn the business in a remarkably short time.

A resident of Wisconsin at one of the fairs took occasion to ridicule some of the residents of Iowa because of the lack of sheep skill shown at fairs by its sheep owners. He was disposed to lay to the soil and climatic conditions of the state of Iowa what should belong to the educational qualities of its citizens. The state being the leading corn and hog state in the union, it is easy to see why sheep have not been first and foremost. When one takes a glimpse of Wisconsin it will be readily seen why sheep have played such an important part in her industry. Sheep can be made just as profitable in Iowa as in any other state in the union. Her soil, climate and farms are as suitable for the industry as can be found in any state or country.

Let boys and young men on farms study sheep. Let old men do the same thing if this matter has been neglected, and in the next decade it will not be necessary to persuade people to engage in the industry.

BREEDING SEASON.

The breeding season is approaching and upon the methods pursued much will depend as to the result. The crop of lambs will be great or small according to the management of the breeding stock.

When the lambs are about four months of age they should be weaned and taken away from the ewes. The dams should be placed upon feed that will build them rapidly after they have been dried off.

In this business nothing pays any better than getting started right. A good ram, well developed, vigorous and in good flesh will be a necessity. The ewe should be coming up in flesh and should not be younger than one year of age at the time of coupling. The practice of breeding lambs is objectionable. There is a great deal of disappointment that comes through the practice of having ewes drop their first lamb when they are about one year old. They often fail to have developed an udder, have but little milk and the result is that they often refuse to own the new born lamb.

In addition to having the ewes in good breeding condition it will be necessary for the breeder to make a good selection of a ram that will stamp improvement on the flock. The best is none too good for even a flock of grade ewes. It is very slow building up with grade and inferior rams. The ram being one-half the flock more attention will be needed to make a selection than the novice is willing to admit. Good ewes well kept will give better satisfaction than a flock of all sorts which have been subjected to almost any kind of neglect.

The Cosgriff Sale.

Mr. Ed Cosgriff, of Clarence, Iowa, opened the week's circuit of sales of eastern Iowa on October 2d by selling thirty-six head of good, useful cattle at something less than \$20 per head less average than he was expecting. The weather conditions were ideal, the preparation was all that could be asked for, and the cattle were presented in nice shape, with but few exceptions, and these were cows suckling big, husky calves. When Mr. Cosgriff led into the ring his herd bulls, Victor Fashion and Scottish Spartan, the crowd was very much impressed with their appearance. After this exhibition seven exceptionally good heifers were led into the ring and presented a beautiful appearance. They were all the get of Victor Fashion, one of Iowa's very best Scotch bulls. Col. Griff Johnston did the selling, and labored hard to get up some life and enthusiasm to the sale, but without much success. No Scotch cattle were offered. Most of the offering was so-called plain breeding on dams' side, tracing to Rosemary by Flash (261). Colonel Johnston resorted to \$2.50 bids in order to get all out of the cattle possible. Good bargains were plentiful throughout the sale. We present the buyers' names of all purchasers of \$100 and over, but all cattle selling at any price are calculated in our average:

FEMALES.

Saddle May, three years, sire Victor Fashion, Thos. Kane, Clarence, Ia., \$145.00
Scottish Beauty 2d, seven years, sire

If You
Can
Tear
This
Leather,
You Get
a New
Pair of
Shoes
FREE.

Softened by hand work
as Indians soften Buck-
skin. Never gets hard—
not even after wetting.

Ask for "Buffalo Calf" Shoes

EVERY pair of Buffalo Calf Shoes has tied to one of the straps a piece of our vamp and upper leather of the size and shape shown in the picture. If you can tear this leather with your fingers we will give you a new pair of shoes FREE.

The reason this leather is so tough and durable is because it is made from the hides of young cattle, tanned by our own special process, which sets the fibre together and increases the wearing qualities of the leather.

Some of our shoes are made with vamp and upper in one piece, so there is no seam to rip. Those made with vamp and upper in two pieces are sewed with three rows of waxed thread, which is extra strong and does not rot when wet. The back seams of Buffalo Calf Shoes are "cylinder fitted," which reinforces their strength at that point.

The soles of Buffalo Calf Shoes are made from Hemlock tanned Texas Steer hides, and all our counters, insoles and slipsoles are solid leather. We do not use any "horn fibre" or moulded counters.

The vamps of Buffalo Calf Shoes go clear over the soles under the toe caps. If you wear out or tear off a toe cap, the vamp toe is still there, and still good.

These are the chief reasons why Buffalo Calf Shoes can't rip, but will outwear all others and stand no end of hard knocks.

If your dealer does not carry Buffalo Calf Shoes, send to us for one of the little pieces of leather in shape of a Buffalo Calf and see if you can tear it out with your fingers. Then you can tell your dealer how tough it is and have him get you a pair of the shoes. Buffalo Calf Shoes are made in all sizes—men's, boys' and youths'—and they do not cost any more than ordinary shoes.

OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

GRAIN FOR DAIRY COWS.

From this time on, dairy cows need grain of some sort at least once a day, and in our experience we find that grain fed them twice will pay. Corn alone is not enough, though it may be used to some extent with reasonable expectation of getting good results.

This time of year, when ear corn is not very solid, it is an excellent plan to take an old knife and cut the ears into lengths of about two inches. Three or four pounds of this chopped corn, along with two or three pounds of bran and the same quantity of oats, makes an excellent and comparatively inexpensive ration. We advise the feeding of oats because there are few farms in the corn belt where oats are not grown. This grain is much richer in flesh-forming constituents than corn, and is therefore milk-making in character.

A little later, where there is a grinder on the farm, the oats and corn may be ground to excellent advantage. A mixture composed of three parts corn and two parts oats, if afterwards mixed with about one or two parts bran, makes a most excellent grain ration for cows. We believe in keeping up the corn part of the ration because, while it is fattening in its effect, at the same time we have always found it a good thing to start the cows into the winter in good condition.

Relation of Butter Fat Content to Butter Yield.

To the Editor of The Homestead:

The following communication has been received from a subscriber of Decatur, Neb.:

I have been selling cream for some time and am not quite satisfied with the test I am getting. Our test runs from thirty-eight to forty-two. From one can I took four and three-fourths pounds of cream and churned it, and it yielded four pounds of butter. In another instance I took five pounds of cream and it made four pounds of butter. This was when the cream tested forty-one. Do you think I am getting a square deal on my test?

The above question is one of considerable importance, inasmuch as it is the direct cause of most all the trouble which arises between creamery and creamery patrons.

As the question is asked directly, it should be answered in the same way, but there are some unknown conditions which will not permit it to be answered in that way.

There are many patrons who think that if they receive pay for a definite number of pounds of fat from the cream-

ery and churn an equal number of pounds of similar cream and get more pounds of butter, the creamery has cheated them. This is not necessarily so.

The above correspondent states that he churned four and three-fourths pounds of cream and got four pounds of butter from it, and another time he took five pounds of cream, churned and worked it, and got four pounds of butter. This seems to be an extraordinary yield. If the butter churned were in normal composition it would mean cream so rich that it would practically be an impossibility to skim and handle it. Normal butter contains about 83 per cent fat and 17 per cent substances not fat (water, curd and salt). About 17 per cent of the butter churned would then be substances other than fat, and theoretically, the cream churned should in the first place have tested 69.8 per cent fat, and in the second case it should have tested 66.4 per cent fat.

On this basis, the creamery test, viz., from 38 per cent to 42 per cent, was too low. There are various reasons for believing that the cream was not so rich as the above calculation would indicate. In the first place, cream testing so high as near 70 per cent fat could not be skimmed and handled successfully on the farm, and secondly, butter churned from rich cream and at a high temperature, as likely it would be average farm conditions, would contain more substances not fat than the above calculation is based upon. The butter churned might have contained as high as 30 per cent substances not fat. In that case, the cream should have tested about 56 per cent fat.

There is still one more condition which might enter in. The correspondent says that the two lots churned were taken from two different cans of cream. If the can of cream was not thoroughly stirred previously to taking the sample, the cream churned would be richer than the average. The top cream naturally would be poured out first, or if dipped without stirring, the richer cream would also have been obtained.

If the correspondent is still in doubt as to whether he is getting a fair test, the writer would advise him to stir a lot of cream well, take a small sample of it and send it to the state experiment station. They will test it right for him at a nominal cost. This is the best way of ascertaining the correctness of a cream test. Even then, allowances should be made for a few per cent variation from day to day.

The test obtained from the creamery is a good one, and indications are that it is not far from being right.

Utah Experiment Station. C. Larsen.

SORES ON HANDS.

Suffered for a Long Time Without Relief—Doctor Was Afraid to Touch Them—Cured by Cuticura.

"For a long time I suffered with sores on the hands which were itching, painful, and disagreeable. I had three doctors and derived no benefit from any of them. One doctor said he was afraid to touch my hands, so you must know how bad they were; another said I never could be cured; and the third said the sores were caused by the dipping of my hands in water in the dye house where I work. I saw in the papers about the wonderful cures of the Cuticura Remedies and procured some of the Cuticura Soap and Cuticura Ointment. In three days after the application of the Cuticura Ointment my hands began to peel and were better. The soreness disappeared, and they are now smooth and clean, and I am still working in the dye-house. Mrs. A. E. Maurer, 2340 State St., Chicago, Ill., July 1, 1905."

The Wabash, "The Banner Route," has arranged for the following low rates, available to the public:

Buffalo, New York, and return, October 10th, 11th, 12th, \$24.15, final limit October 19th.

DE LAVAL SEPARATORS MAKE THE MOST MONEY HENCE ARE CHEAPEST

The first cost of a cream separator does not necessarily make it a "cheap" or an "expensive" machine. The results of its use determine this. If it does not secure all the cream it is an expensive machine no matter how little it cost. If it wears out in a few months it is still more expensive. If you would buy the really CHEAPEST cream separator you must select the one, regardless of price, that saves all the cream, makes the best butter, saves the most time and labor and lasts the longest. Thousands of tests have proven that there is but one machine which will meet these requirements,—that is the DE LAVAL. Regardless of the claims made for other separators, the DE LAVAL is guaranteed to be superior to any other cream separator in every feature of separator practicability, proof of which will be gladly furnished at any time, anywhere, to anyone, upon request. Of course, you don't want mere claims but proof as well and that is what we offer. Are you interested? Write today for a DE LAVAL catalog. It is worth the trouble.

A Cream Separator Without Cost

That is What We Offer You in the

Iowa Dairy Separator

Repeated tests have demonstrated that the "IOWA" is the only Separator that takes out every particle of the cream. Therefore, given a certain amount of milk, for a specified length of time, and the additional amount of cream secured will pay for the machine.

Gold medals at World's Fair and Portland attest the superiority of the "IOWA" over all others.

Made in all sizes from 250 to 750 pounds. Your name and address on a postal card will bring you a handsomely illustrated booklet with full information, price list, etc. Write at once, for every day that finds you without an "IOWA" finds you losing money. Ask for catalog 25. Address,

The Iowa Dairy Separator Co.,
Waterloo, Iowa.

"SOUTHWEST"

Because You Need The Money

It's your business and if you don't attend to it, who will? You cannot afford to keep cows for fun. That isn't business, and, furthermore, it isn't necessary. There is money in cow keeping if you go at it right, and besides there is more fun in going at it right than there is in staying wrong.

You need a Tubular Cream Separator because it will make money for you; because it saves labor; because it saves time; because it means all the difference between cow profits and cow losses.

Look into this matter; see what a Tubular will do for you and buy one because you need it.
How would you like our book "Business Dairying" and our catalog B. 121 both free. Write for them.

ADDITIONAL FIELD NOTES.

A GOOD ABERDEEN ANGUS HERD.

The proprietors of the Rosengift farm herd of Aberdeen Angus cattle, Messrs. Rosenfeld & Siverly, of Kelley, Iowa, furnish the following information in regard to their stock: "The Rosengift herd of Aberdeen Angus cattle are in tip top shape. Just now we are offering for sale a number of big, thick, lusty bulls of gilt-edge breeding at attractive prices to make room for our younger stuff. These bulls are of the Heatherbloom, Barbara, Pride, and other good, old, reliable families that have helped make this breed famous, and we can say, without boasting in the least, that we can show thirty-five of the growthiest, thickest, thriftiest, sappy calves of any herd anywhere, and we remember that 'of all that is good, Iowa affords the best.' These calves were raised under ordinary farm conditions and every cow has raised her own calf without the assistance of any help from a nurse cow. Our herd is composed of cows that are sure breeders, for every cow on the farm of breeding age produced a calf this season. We wish to say a word in regard to our herd bull, Blackene, which we are using extensively in the herd. This bull is a production of the Pierces at Woodlawn farm, and is sired by Blackwood Lad, a brother to Black Woodlawn, and out of Imp. Black Enamel, said by Professor Curtiss to be the best cow in the Woodlawn herd which should prove her right to being an excellent cow. Blackene is a Blackbird, and was used in the Pierce herd until our purchase of him at the dispersion sale last June. He proved himself an excellent breeder for Messrs. Pierce, or he would not have been used as a stud bull by them alongside of such bulls as Prince Ito and Elflock. The breeding cows in the herd are of the close-to-the-ground, easy-keeping type and are of the Pride, Heatherbloom, Barbara and other families, and are sired by Blackbird of Estill 7th, Fond Lad by Gay Lad, Admiral of Estill, Dean of Longbranch, Imp. Squire of Theakston, Beau Elsmere, and other good bulls. We have had very favorable comment from visitors after an inspection of these cows, stating that they were of such a good, even type and no tail-end stuff among them. On February 15th next we will sell forty head of cows and bulls at public auction at the farm, which is less than one mile north of Kelley, and three and one-half miles south of the agricultural college at Ames. The cows that we will sell will be in calf or have calves at foot and every animal will be guaranteed a breeder. The female part of the offering will be around thirty head, and ten bulls twelve months of age or older. Previous to the sale, however, we will continue to sell the bulls above mentioned and they are bargains at the prices that will be named." See advertisement on page 41.

COMBINATION SALE OF ABERDEEN ANGUS CATTLE.

A prominent sale of Aberdeen Angus cattle will be held at Morning Sun, Iowa, October 25th, consisting of thirty-nine head, divided as follows: Nineteen cows from three to eight years old; fifteen one and two-year-old heifers; and five young bulls. This splendid aggregation of richly-bred doddies comes from the herds of Messrs. McElhinney, Cubit & S. E. Edgar; the consignment is fairly divided between the Honey Creek and Cedar Row herds, and embraces the following families: Drumin, Lucys, Georgianas, Zara, Baronesses, Miss Morrisons and Brucehill Violets. This sale will be held in the new pavilion at Morning Sun under the efficient management of Mr. W. K. Henss. Col. Silas Igo will officiate. There is probably no breed of cattle that has grown into greater prominence in the fat steer and block contests than the Aberdeen Angus. This prominence has been brought about through their phenomenal show record; for instance, at the International Exposition in December, 1905, this breed won the championship on single steer, car load lots and on carcass. The records show that they have won grand championship on steer and car load lots four times out of a possible six, and five times out of six on the carcass test. Aside from the absence of horns, the doddies have many other qualifications that recommend him to the thoughtful cattle producer; however, it is not our object in this article to preach a sermon on this line, nor to endeavor to proselyte from the ranks of other breeds. The doddies already has sufficient following to hold him in the high position to which he has attained through sheer dint of merit. Such bulls have been used on these herds as the Drumin Lucy bull, Honest Lad, the Ruth bull, Jadin, strong in Trojan, Erica blood, Victor of Dalmeny, a bull-bred by Lord Roseberry and belonging to the famous Drumin Lucy family. Also the Blackbird bull, Bigger by Equestor; this was a bull of great substance and finish that did remarkably good work. These and the bull, Prince of High-lington, and the Pride bull, Pride McElhinney 12th, have been the most excellent doddies that have been used on these two respective herds. A liberal guarantee is placed on this offering so that every man that buys cattle will be fully protected. The parties who are consigning to this sale are all well-known gentlemen whose reputations have been good and whose guarantee is absolutely good. In fact, Mr. Henss, the manager of the sale, would not for a moment conduct a sale and lend his influence were the conditions not all right in every way. Mr. Henss is himself an Angus breeder of considerable note and reputation. Messrs. McElhinney, Cubit & Edgar are quiet, unassuming gentlemen, who have been breeding good, useful Angus cattle for a number of years until their herds have outgrown their pastures and accommodation, and this offering is simply made to unload a portion of the surplus stock without any thought of discontinuing this most profitable business branch of their farm husbandry. From personal observation of these cattle the writer can say they are exceptionally prolific and that they are a business lot throughout. The sagacious buyer will find here an opportunity to buy Angus cattle well worth the money, as these gentlemen have bred all these cattle, fed them on their own farms from feeds produced on the farm. It matters not what prices these cattle sell at, they will still make some money for the breeder. Address Mr. W. K. Henss, Wayland, Iowa, for catalog, mentioning The Homestead.

summing gentlemen, who have been breeding good, useful Angus cattle for a number of years until their herds have outgrown their pastures and accommodation, and this offering is simply made to unload a portion of the surplus stock without any thought of discontinuing this most profitable business branch of their farm husbandry. FRANK ROCKEFELLER'S SALE OF HEREFORDS.

On October 17th, 18th and 19th at Kansas City, Mo., Mr. Frank Rockefeller will offer 165 head of Herefords selected from his large herd at Belvidere, Kan. There have been few, if any, sales in which more richly-bred animals have been offered. Mr. Rockefeller when buying has been known as a very discriminating buyer, selecting animals for their individual excellence and breeding. In several instances long prices have been paid, as in the purchase of the great bull, Columbus 17th, for which \$5,050 was paid. When Mr. Rockefeller secured Columbus 17th he undoubtedly secured one of the greatest sons of old Columbus. His dam, Aileen, was got by Hesiod 17th, the great breeding bull that preceded Columbus in the herd of Messrs. Benton Gabbert & Son. Thirty daughters of Columbus 17th are listed. There are also twenty-five of his granddaughters in the sale. This will prove a most excellent opportunity to secure the blood of Columbus 17th, and the prospective buyer should not miss this opportunity. There are also daughters of St. Louis March On 6th, Beau Brummel Jr., Free Lance, Lars, Diplomat, Java, Corrector, Earl of Shadeland 73d, Earl of Shadeland 22d, Kansas Lad, Lomond, Climax, Hesiod 29th, Hesiod 85th, Hesiod 2d, Jack Hayes, Lord Prettyface and other leading sires. Where has such an array of sires been represented in a sale offering? Many of America's great herds have been led to success by some of these bulls. This fact should be noted by the prospective purchaser of Herefords, as he will not soon again have an opportunity to secure such breeding and in the quantity offered here. Many of the cows will have calves at foot by, or will be well along in calf to, one of the great herd bulls in service at Mr. Rockefeller's Ranch. The bulls now in service are Columbus 17th, Soldier Creek Columbus 17th, a son of Columbus 17th; Jack Hayes 2d, a grandson of Earl of Shadeland; Rupert Donald, a double grandson of Beau Donald, and Columbus Busy Body. Mr. Rockefeller wishes to reduce his herd, hence this sale. The cattle have not been prepared for sale purposes, which is in favor of the buyer, and the bargains to be had will undoubtedly be many. Every animal listed is a regular worker in the herd and for the number listed comparatively few are cows that have passed six years of age. Mr. C. A. Stannard, of Emporia, Kan., who manages the sale, made all the selections for it and he feels that a more useful lot of money makers could not well be gotten together than will go through this sale. There will be no reserves and the cattle will sell, and at your prices. See page 42 for advertisement and address all communications to Mr. C. A. Stannard, Emporia, Kan.

ABERDEEN ANGUS COMBINATION SALE.

A combination sale of forty high-class Aberdeen Angus cattle from the well-known herds of W. B. Seeley, Mt. Pleasant, Iowa; W. K. Henss, of Wayland, Iowa; J. C. Beaber, of Rome, Iowa, and T. J. Kline, of Salem, Iowa, will be held in the new pavilion on the fair grounds at Mt. Pleasant, Iowa, Wednesday, October 24th. The contributors to this first Aberdeen Angus sale at this point are among some of the oldest and most successful breeders in southeastern Iowa. Mr. W. K. Henss has been breeding doddies for more than twelve years. He is an auctioneer and sells these cattle at auction, as well as breeds them. Few men are as well posted in Angus pedigree as is Mr. Henss. Mr. Seeley made his start in the Angus cattle business eleven years ago and has probably paid longer prices for breeding stock than any other Angus breeder in southeastern Iowa. His first herd bull of note was 2d Mayor of Estill, champion bull of 1895 and 1896. This bull was a stall companion with Gay Lad, who sold at auction in the Evans dispersion sale for \$3,950. He was followed by Black Knight of Estill 9th, who still holds the record of being the highest-priced calf that the breed has produced. He is now followed by a Blackbird Ito, a worthy son of the great \$10,000 Prince Ito. Quite a number of Mr. Seeley's offerings are sired by Blackbird Ito and a number of the females to be sold are bred to him. Mr. Kline entered the doddies arena in 1898. He purchased his first cattle of Mr. Seeley. His first bull was Admiral Dewey of La Crew. The following spring at the Evans dispersion sale he made the judicious purchase of Lucy of Emerson. She dropped him a heifer calf to the service of the \$3,050 Gay Lad and from these he has grown up quite a herd and has carried off first honors for several years at the Jefferson County Fair with cattle of his own breeding. Mr. Beaber first had his attention called to the market-topping doddies through his feeding operations, which proved to him that the Angus steer made greater gains and yielded him more profit than any other breed. Hence, he started into a pure-bred business the same year as Mr. Kline, his foundation stock being purchased from Mr. W. K. Henss. W. B. Seeley and L. McWhorter. From these he had produced a herd that would command a position in the front rank of any of the great herds of the West. We are not out of bounds when we say that each of these breeders has drawn heavily on the best cattle in their herds in order to make this inaugural sale in their new pavilion a success. The sale being held early in the fall, the cattle will naturally come from the pastures without any special fitting. There will only be about ten bulls listed in this sale, several of which are herd headers. Some of these are sired by the great show bull, Blackbird Ito. The offering includes

some of such well-known families as Prides, Queen Mothers, Drumin, Lucys, Ericas, Blackbirds, Westertown Roses, Brucehill Violets, Baronesses and other standard families. The catalogs are out and will be mailed free on application to any of the contributors to this sale. Mt. Pleasant is situated on the main lines of the C., B. & Q. Railroad, twenty-eight miles west of Burlington, and is the county seat of Henry county.

THE HEATHERTON SALE.

The Heatherton herd, from which a draft sale of fifty-seven head is to take place on October 31st, is one of the oldest Aberdeen Angus herds in America. Its proprietor, Judge John S. Goodwin, maintains it on his home farm at Naperville, Ill. Naperville is a suburb of Chicago on the main line of the Burlington Road and Mr. Goodwin is enabled to go back and forth to his offices in Chicago every day of the week except Saturday, which he devotes to the particular interests of his herd. The Naperville property was purchased about four years ago and has been steadily prepared for a permanent home for his cattle. When the herd was placed upon it in January, 1903, it was not large in numbers, but from that time forward no one has been more persistent in buying back the best blood of his own breeding and in buying the best animals of the best strains bred by others until at this time the herd numbers from 125 to 150 head. It has proved very prolific and it has become necessary to make a cut which will reduce the herd practically one-half in size. It is well understood by the breeders that Mr. Goodwin has been perhaps the most particular of any breeder in America to avoid putting into his herd anything but the best blood of the breed and the animals which he is offering for sale are some of the most blue-blooded to be found in all of the breed. Of the famous Blackbird family he includes seven cows, three of which have calves at foot and four bulls. These represent all three of the branches of the Blackbirds; the Blackcap 2d branch being represented by a daughter of Black Lassie Bell, which sold at public sale for \$1,100, and is also represented by Blackbird of Cloverland 6th. The Blackbird 3d branch is represented among the Blackcaps by the famous Blackcap 16th, two of whose daughters and one granddaughter are retained in the herd. The other branch of Blackbird 3d's family coming through Balldalloch is represented by Blackcap Ito 2d, whose dam is a daughter of the \$9,100 Prince Ito. In the Blackbird 4th branch Mr. Goodwin has given up one of his very choicest treasures in Blackbird 19th, the last heifer calf of old Blackbird 8th. Blackbird 19th has a fine heifer calf at foot by the double Blackbird bull, Blackston, as has also Blackbird 33d. Five Trojan Ericas go into this sale, three of them being imported cows. The Heatherblooms are well represented, but one of the choicest things will be the yearling bull, Heather Monk, which is a son of Black Monarch of Emerson, a grandson of Black Monk and a great grandson of Black Knight. The Jilts are represented by six females, three of them with calves at foot, and it is believed that this introduction of the Jilts to the breeding public will put them at once in the fore rank of prime favorites. Six Pride of Aberdeen cows, two having calves at foot and four bulls, making ten in all of this noted family, will contain some of the best things offered in the sale. See advertisement on page 34.

TOWNSEND CLOSES OUT HIS ENTIRE HERD OF SCOTCH AND SCOTCH-TOPPED SHORT-HORNS.

Among the many good Short-horn sales that will occur this fall none are deserving of more attention on the part of our very best breeders than is the closing out sale of Mr. C. E. Townsend, at Anita, Iowa, on October 25th. There are fifty-five head cataloged and thirty head of these are Scotch cattle of the Orange Blossom, Victoria, Mysie and Nonpareil families. His present Scotch herd bull, together with ten young Scotch bulls, all of his Scotch cows and Scotch heifers will go under the hammer and it will be a sale where breeders can secure some good foundation material. The advertisement on page 37 of this week's issue will reveal some as good breeding as has gone through one sale in some time. There will be eleven head of Scotch cows that will have calf at foot or will be right at calving. Among the Victorias will be the two foundation cows, Victoria Princess 3d and Victoria of Brookside, together with their descendants. There will be quite a number of their heifers in the sale, as well as a few young bulls. This family has always been sought after by the very best of breeders and there are some good representatives in this sale. Canute's Orange Lassie 2d is a five-year-old daughter of Canute out of a daughter of Golden Prince and she is one of his good Orange Blossoms. She will also have several daughters in the sale, as well as a bull or two. Orange Blossom of Brookside is another daughter of Canute out of a daughter of Saxon Knight, second dam by Imp. Bandmaster and she will also have several representatives in the sale. Brookside Orange Duchess is another daughter of Canute, bred the same as the preceding cow, and the entire offering of Orange Blossoms that go into this sale are descendants of these three cows. Iowa Mysie is a six-year-old cow, a daughter of Victoria Monarch 2d, and is out of a daughter of Saxon Knight. She is a Mysie with several descendants in the sale. Sixth Nonpareil is a six-year-old cow, a daughter of Canute, and she is one of those

WANTED--A BRIGHT MAN with light team, as salesman in your own locality. Experience not necessary. Steady work and good pay guaranteed to right man. Reference required. For particulars address, Koch Vegetable Tea Co., Box X, Winona, Minnesota.

WANTED A COMPETENT MARRIED MAN to work on a stock farm, must be a practical hog raiser and good all around man. Address, T. S. Cartwright, Marshalltown, Iowa.

richly-bred Nonpareils with several descendants in the sale. The Scotch-topped sorts will be Young Marys, White Roses, Belinas, Desdemonas, Miss Severs and others well known to the Short-horn world. The cows will be bred or will have calf at foot to the Scotch bull, Sovereign Cupbearer, and he will also be included in the sale. The heifers will be bred to Crimson Count, a son of Fashion Plate, and he will also be sold in the sale. The offering is a high-class one and it will be a good place to lay a foundation for a herd. The sale will be held at the farm near Anita, Iowa, on the main line of the C., R. I. & P. railroad, seventy-five miles east of Omaha and sixty-eight miles west of Des Moines. Mr. Townsend has issued one of the most up-to-date catalogs of the season and it should be in the hands of every Short-horn breeder. Write for it at once and kindly mention The Homestead. **LAST CALL FOR THE SHORT-HORN SALE OF F. W. AKERS.**

This is the last opportunity to direct attention to the prominent sale of Short-horn cattle and Poland China hogs from the Flatland herds of Mr. F. W. Akers, at Laurel, Iowa, on Tuesday, October 16th. On this occasion Col. Geo. P. Bellows and A. P. Mason will have an opportunity to demonstrate their ability to part ownership with some most excellent cattle and hogs of approved breeding and superior individual merit. This is Mr. Akers' first offering and it contains some straight Scotch as well as Scotch-topped cattle of superior merit. Mr. Akers' initial winnings at the Iowa State and Marshalltown fair, as well as the Laurel district fair, have been such as to make him feel justly proud of his stock. It seldom happens that a young breeder can go to the Iowa State Fair in the strongest competition in the world and receive such recognition as was accorded Mr. Akers this season. This show stock is included in the sale and should be an attraction to any lovers of Short-horns. One of the choicest young bulls to be found anywhere is the animal on which Mr. Akers captured high honors at Des Moines. We refer to the beautiful red calf, American Leader. He was one year old September 14th and is certainly as true and level in his lines as could be desired, fills well in the twist and the delineation in the catalog after Mr. W. E. Burke, serves well to portray the beautiful true lines possessed by this calf. He is a grandson of Nonpareil King, the great show bull that Mr. H. D. Parsons sold for \$3,500 to go to California. Hence he comes by his good qualities by inheritance rather than accident. His second dam was sired by the great Victoria Cruickshank bull, Victor Baron, and she out of a daughter of Imp. Master of the Mint. This young bull would certainly be a fine fellow to place at the head of some young herd for a beginner. Mr. Akers has a bunch of young heifers of the same type and character that are about as neat in appearance and as breezy looking heifers as can be found anywhere. These heifers would have been a credit to him as a breeder had he exhibited them at Des Moines. The nucleus for a young herd, composed of such young stock as will be sold by Mr. Akers, is worth traveling a long distance to find. It is to be hoped that the farmers and breeders will fully understand that here is a splendid opportunity to buy some most excellent young things in the pink of condition. Aside from this beautiful bunch of young things mentioned are several other good vigorous bulls, some four in number, all yearlings; these are in addition to the great show bull, American Leader. Of cows and heifers of breeding age, there is certainly a splendid array of useful cattle. The herd may unquestionably be styled an honest breeding herd. While Mr. Akers makes no pretense at making a Scotch sale, he does offer some most excellent Scotch cattle in a limited way, noted among which is the beautiful cow, Lot 1 of the sale catalog, called Gloster's Queen. She is a daughter of the Norton-bred bull, Lord Gloster. He belonged to the celebrated Duchess of Gloster family and was sired by that most excellent bull, Imp. Banker, and out of Norton's Duchess of Gloster, she by Imp. Salamis; her dam being Canadian Duchess of Gloster 24th by Imp. Duke of Laverder; thence to Imp. 12th Duchess of Gloster by the world's greatest bull, Champion of England. Gloster's Queen belongs to the famous Miss Ramsden family, the family that furnished two of the most noted celebrities ever imported at Storm Lake during Mr. Luther Adams' career as an importer of Scotch Short-horns. We refer to the invincible cow, Miss Ramsden 9th, and her daughter, Miss Ramsden 11th. Miss Ramsden 9th was said by critical beef judges to be the most modern, thick-fleshed, heavy beef cow carried out on the lightest bone, that was ever seen in American show yards. Gloster's Queen is one of the very useful Scotch cows that should do honor in any herd in which her future home may be cast. A beautiful daughter of hers is listed as No. 2. She is red, calved September 5, 1905,

CHICAGO

and is in every way a worthy daughter of an illustrious mother. Her sire was Golden Crest Jr. and he by Imp. Golden Crest, imported by Messrs. J. G. Robbins & Son. This beautiful holler is worthy of attention from the most critical breeders in the land who desire to add some royally-bred Scotch blood to their herd. In her general make up she is a typical Scot and is one of the sort that Mr. Akers can ill afford to lose from his herd, but as this is his initial sale, he proposes to make it one that will attract the attention of breeders who are looking for something choice. Probably no more valuable cow will be offered to the public in the near future than Lot 3 of the catalog. This is a beautiful daughter of Alice's Prince; her name is Alice Brougham. Her dam was the 12th Lady Brough by Orange Favorite. This bull was got by the great son of William of Orange. We refer to Imp. Prince of Orange, imported by Mr. Luther Adams and sold as a yearling for \$1,000 to Mr. C. C. Platter, of Red Oak, Iowa, who, after using him a number of years, sold him to Messrs. C. C. Bliss & Son, of Kewanee, Ill., who bred this bull, Orange Favorite. This is a beautiful Scotch heifer, but not Cruickshanks; she founds on a Booth foundation. The imported cow was sired by the Booth bull, Baron Killerby. Her sire, Alice's Prince, was bred by Col. W. A. Harris and sired by Lord Aphol, while his dam was no less a personage than the famous Imp. Princess Alice, an own daughter of Field Marshal. Lord Athol was by Golden Knight and belonged to Colonel Harris' celebrated Golden Drop family. This is a splendid cow that should and doubtless will be appreciated on sale day. Lot 4 of the catalog is Golden Autumn, a twelve-months-old red Scotch heifer of the Autumn Lady or Carmine Rose family, sometimes known as Autumn Rose. It is a family that Mr. Cruickshank held in much favor and from it has descended some splendid, useful cattle. Autumn Violet 3d, the dam of this heifer, was sired by Grand Victor 2d, a full brother to Grand Victor that produced so many valuable show cattle for Mr. Geo. Bothwell, of Nettleton, Mo., being by that splendid Cruickshank bull, Grand Elector, and out of Imp. Lady Victoria. Autumn Violet 3d's dam was Autumnal Lady by the imported Cruickshank bull, Imp. Barbarossa. He was a son of Cumberland and out of Barmpton Spray by Caesar Augustus. Thus it will be seen that the Scotch blood lines are all that could be desired in this beautiful heifer. The remainder of the Scotch-horn offering is a useful lot of Young Marys, Annabellas, Rubys, Lydia Langulsh and other prominent American sorts. The catalogs have been ready for mailing for some time, and if not already received may be had for the asking by addressing Mr. Frank W. Akers, of Laurel, Iowa.

LAST CALL FOR R. G. ROBB & SON'S SALE OF SHORT-HORNS.

This will be the last opportunity The Homestead will have to direct the attention of its readers to the very important closing out sale of Scotch and Scotch-topped Short-horns owned by Messrs. R. G. Robb & Son, of Morning Sun, Iowa. In previous issues we alluded to this sale and the character of the offering in a general way. We wish now to impress our readers with the individual merit of some of the choice Scotch cattle whose pedigrees have previously appeared, or appear in this issue of the advertisement in The Homestead. Lot 1 of the sale catalog, Imp. Craibstone Beauty 6th, is certainly a worthy matron to be cataloged as No. 1, and with which to open the sale. She was sired by the great Marr Bessie bull, Craibstone, a son of William of Orange. This beautiful cow is out of Medal Beauty 2d by Lord of the Meadow, a Duthie-bred bull of the Mysie family, and sired by the Brawith Bud bull, Roan Robin. Lord of the Meadow had for his dam an own daughter of the celebrated Field Marshal. This splendid cow has been well known to the writer ever since he was imported, and we have always regarded her as a great producer. Fortunate indeed will be the man who secures her at this sale, because she has been carrying a Graceful Archer calf ever since February 9th. Lots 2, 3, 4 and 5 are all descendants of this famous cow. Lot 2 was calved Oct. 4, 1905, by Graceful Archer, and has some of the showyard character about her. She is called Graceful Beauty, a very fitting name, indeed. Lot 3 is Victorious Beauty, a daughter of Victor Archer. She was calved Nov. 28, 1904, while Lot 4, Golden Beauty was calved Jan. 4, 1903, and is a grand young cow that will calve before sale day. Lot 5 is a daughter of Golden Beauty sired by Victor Archer and is a worthy representative of this famous family. A splendid Victoria cow will be observed in Lot 6, Pleasant View Victoria. This is one of Mr. Cruickshank's most famous families, upon which the reputation of Sittytown was founded. Her sire, Blue Valley Duke 3d, was a Cruickshank Lovely hull sired by Imp. Double Gloster and out of Imp. Lovely 41st by Cumberland. The dam of this cow was by Imp. Earle Marshal, a bull bred by Mr. Duthie at Colynie, he by Cayhurst, he being the choicest production of the young bulls at Sittytown in 1881. The produce of this cow have been so much in demand that there remains today none on the farm. She was bred February 21st to Graceful Archer. The great Smithfield family of winners, the Augusta family, is well represented in Lots 7, 8, 9 and 10, all descending from the famous cow, Imp. Augusta 3d. This famous imported cow, Lot 7 of the catalog, was bred by Lady Cathcart, of Aberdeenshire. Her sire was Royal Pride, a Duthie-bred bull of the Rosebud family, but sired by the Cruickshank Clipper bull, Pride of Morning. She has a beautiful red heifer calf at foot dropped Dec. 22, 1905, by Graceful Archer, and was rebred to him Feb. 20, 1906. This heifer calf is a strictly fancy one, well worthy to grace any Short-horn pasture lot in America. Augusta 5th is by the celebrated bull, Lord Darnley and out of Imp. Augusta 3d. Augusta Pearl is a full sister to Augusta 5th. Lord Darnley was a beautiful roan bull owned by Mr. A. Alexander, of Morning Sun, and belonged to the celebrated Kiblean Beauty tribe, which has produced many prize winners in Scotland, including Mr. Dean Willis' great show cow, White Heather. The breeding of these heifers could scarcely be improved on from a Scotch standpoint. Lots 11, 12 and 13 are Cruickshank Brawith Buds, coming through the Brawith Bud cow, Imp. Foxglove, by Perfection. Lot 11 is the famous cow, Cherry Grove Foxglove 2d. She was by

Scotch Cup and out of Foxglove 4th by the great show bull, Imp. Cupbearer. She has a splendid bull calf at foot, dropped May 6th, to the service of Graceful Archer. Lot 12 is a daughter of this cow, sired by Imperor 2d. This was a Cruickshank bull of the same family as the Foxgloves, his sire being a Cruickshank Secret. Lot 13 is called Honey Creek Foxglove and was by Victor Archer and out of the first cow mentioned. No breeder of Short-horns will make any mistake in securing one or all of these three. Lots 14 and 15 are Gwendolines. Lot 14 is Graceful of Orchard Farm. Her sire was Iowa Scotchman, a choicely-bred Scotch bull bred by Messrs. Cookson Bros. Her dam was Graceful by Gaveston, tracing directly to Imp. Gwendoline by Baron Violet. This cow has a splendid roan bull calf dropped Dec. 2, 1905, by Imp. Clan Craibstone. This bull calf, however, will be sold separate, as the cow has been quiet in calf since March 16th to the same bull. Lot 15 is a daughter of the above cow and full sister to the bull calf previously mentioned. There is scarcely a breeder in the land has ever had a Dorothy in the herd but knows something of the good qualities of this famous family. That grand old cow, Imp. Dorothy, by Shuttlecock, has produced through the Aberdeen Butterflies a long line of female ancestors, and Lot 16 of this offering, Aberdeen Butterfly 16th, is one of these direct descendants. Her sire was the Rose of Autumn bull, Royal Baron. The Dorothy's are pre-eminently a Cruickshank family. This splendid cow has a bull calf six months old by Graceful Archer. Lot 17 is a richly-bred Victoria called Orchard Farm Victoria 3d. She was sired by Iowa Champion, a splendid son of Secret Barmpton. This is but a young cow, only two years old, and is worthy of consideration. One of the plums of the offering is the beautiful Cruickshank Lavender cow, Lavender Blossom of Beaver Creek, and is Lot 18 of the catalog. Thus, it will be seen that the Scotch end of this offering is bred in the velvet, and is in every way worthy of the rich breeding above portrayed. In the entire herd there is not a doubtful or shy breeder being offered. Everything of that character has found its way to the shambles long ago. This is strictly a business herd that has been a source of profit to its owners. The Scotch-topped cattle are of the Young Phyllis, Halstead Surprise, Waterloos, Rubies, etc. A well-bred young Scotch bull will be found in Lot 47. He is a Gwendoline sired by Imp. Clan Craibstone. He is a rich roan and is well enough bred for anyone. Honey Creek Archer, by Victor Archer, is possibly the choicest of the young bulls to be sold. His dam was Aberdeen Butterfly 9th, hence he belongs to the famous Cruickshank family of Dorothy's, previously mentioned. Another good Scotch bull is Exemplar. His sire was Exemplar, a son of Lord Darnley and Summit Simplicity. Exemplar's dam was the imported cow, Anemone. The above should be sufficient and is really all that is needed to remind Short-horn breeders throughout the middle West that at this dispersion sale will occur one of the best opportunities to buy Scotch cattle that have not heretofore been priced to anyone, but were reserved in the herd because of their superior productive qualities.

If in need of barn door hangers insist on having Prouty No. 77, guaranteed for five years.

The Hughes Short-horn Sale.

Carnival week at Cedar Rapids and the annual excursions to Ames was a hoodoo for Mr. John Hughes' sale of Short-horn cattle. A limited number of breeders and farmers attended this sale, where good values were in store for those who did attend. Col. Carey M. Jones, of Chicago, did the selling in a very creditable and able manner, as is his custom to do. No high prices prevailed. Mr. E. W. Edwards, of Williamsburg, Iowa, topped the sale by paying \$200 each for Simplicity 4th, the twelve-year-old Secret cow, and the Scotch Emma five-year-old cow, Ermina 20th. Mr. John R. Brown, of Marengo, paid \$105 for the nine-months-old Belina bull calf. Mr. Foster Winslow, of Belle Plaine, Iowa, paid \$100 for a yearling Young Mary bull, and Mr. H. B. Conkling, of Ord, Neb., had the most excellent good fortune to secure the Cruickshank bull, Strawberry Lad, at \$100. These were the best prices obtained for any of the offering.

Geo. H. Burge's Short-horn Sale.

The buyers certainly appreciated the cattle offered from Wayside farm. Mr. Burge held the fourth of a series of eastern Iowa sales and sold his cattle entirely to Iowa buyers. No one was present outside of the state. A good crowd gathered to do honor to one of America's foremost and enterprising breeders of Short-horns. Mr. Burge left no stone unturned insofar as preparation was concerned. A most sumptuous dinner was provided by the ladies of the M. E. church at Mt. Vernon, which brought smiles to the faces of cold and hungry visitors. The day was raw and chilly. Most of the cattle were in splendid sale condition and were held in the ring alternately by two past masters in their line, namely, Messrs. Matt Baker, and Morely Clark, both breeders of pure-bred cattle. Mr. Burge treated his visitors royally and protected them perfectly, establishing for himself a new and enviable reputation. Col. Griff Johnston did himself honor in the selling of the cattle at very satisfactory prices. The beautiful show heifer, Floradora, topped the sale at \$345, selling to Mr. H. D. Miller, of Morely, Iowa. Mr. C. Kohl, of Mechanicsville, Iowa, paid \$300 for a Nerissa cow and \$255 was paid by Mr. Wm. Hale, of Anamosa for No. 6, and this same price was paid by Mr. Earl Peet, of Martelle, for No. 17, both Clarksvilles. Aside from Floradora, the show heifer, the English cattle outsoled the Scotch. The Clarksvilles and Nerissas as individuals were justly entitled to cut the dash above mentioned. Mr. G. M. Bralnerd, of Anamosa, Iowa, secured a very great bargain in Acrobat, one of the herd bulls, at \$170. Only six females sold under \$100, and four bulls went below this amount. The gratifying subjoined list of buyers paying \$100 and over will be of interest to Short-horn breeders:

FEMALES.

Turbett's Poland China Sale.

Mr. Jas. B. Turbett, of Hanna City, Ill., held his Poland China sale on Thursday, September 27th, as advertised. The local support was not what Mr. Turbett deserved, but every animal cataloged was sold in spite of the fact that prices ruled low. The manner in which the sale was conducted made friends for Mr. Turbett and if he again holds a public sale it will, no doubt, have the support of breeders and farmers throughout the central West. An average of \$16 was made on the entire offering. Cols. C. C. Plumley and Alva Scott conducted the sale in a satisfactory manner.

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

THE AMERICAN HEN ON AN AMERICAN FARM.

Farmers with cheap feed and splendid advantages do not give the attention they should to the profitable hen. In an article recently published in a poultry paper, the following eulogy was passed on the American hen: "More mortgages have been removed from farms throughout the land as a result of careful management of poultry than have ever been lifted by hogs or corn. Whether or not this be true, it is at present an undisputed fact that the American hen produces over \$250,000,000 worth of eggs per year, and more than this in market poultry." This is a broad statement, but when we see the word hen as used in the above quotation it should be understood that it means all the egg-producing class, including ducks, geese, turkeys and their products.

The dairy products of the country reach \$650,000,000, and if there might be added to the above hen figures all the poultry of all kinds and their eggs that are produced in small towns and in village and city lots the actual products would come close to those of the dairy.

In one of the government reports we are told that the poultry business in the United States pays 400 per cent profit per year and in spite of all this the farmer will work hard from morning until night in the fields to gain a livelihood, where if he would spend one-half his time around the hen yard, according to the above figures he would be making a good thing.

It now appears that the cold storage men are going to form a trust with the American hen, even if they did lose some several millions of dollars last winter. One of the daily papers of an eastern state claims that the hen is a foe to trust methods. The commission merchants believe there is no danger of ever cornering the egg market, as the supply is too general and too great to permit a merger. There is not money enough in the banks and financial institutions of America to corner the produce market. A student says there will never be a trust in eggs, for Iowa alone sold in one year eggs to the amount of \$12,000,000. In view of some of the large figures that are abroad, it would appear that a merger of the hen and egg business will give the mergers all the trouble they want before a successful trust can be formed.

CAPOINIZING COCKERELS.

So far as market conditions are concerned and the increase to be obtained by this practice, it is safe to say that it pays to caponize cockerels. A capon will sell for a better price per pound than any other kind of mature chicken, and will also weigh more pounds than any other. There is another feature of the business that is not usually brought to mind by the producer of utility poultry. By caponizing a large share of the cockerels, a great many inferior males are disposed of that would be liable to get into the yards of other poultrymen or give trouble to the breeder who raised them. This is a good way of getting rid of a lot of fowls that would become troublesome at a time when one would not be able to dispose of them. Where it can be done, we would recommend that all surplus males be caponized. In order to do this, it will be necessary for the poultryman to visit some person who can perform this operation and "learn of him." That is the best way, and when one has once learned to perform the operation, it will soon be "an old story."

SUNFLOWER SEED FOR POULTRY.

There is no lack of theoretical writers on the poultry business. We have those who are now writing about the value of sunflower seed for poultry who actually know nothing about the business.

Now, in a nutshell, the matter of feeding sunflower seed to poultry is that if the seed has to be bought, it will be fed but one season, but if it is grown and tested carefully it may be fed several seasons, according to the experience of the feeder. We grow a great deal of it for various purposes, and always have a good supply of it, but to make a

WITH THE EDITOR.

The night was delicious with its gentle breeze and its odorous silence. The shadows deepened and the stars crept out, but the two talked on without thought of going indoors. It was their first talk after years of separation, during which the one had been in the forefront of life's battle in the city, while the other had done duty on the old homestead, "far from the madding crowd." At first the talk had been about the family and the neighborhood affairs; gradually it had drifted to discussion of politics and the national outlook.

"I'll tell you what's the matter. A sort of dry rot has set in. There is a decay of moral fiber in America. It could hardly be otherwise. People no longer attend church, except a few here and there, and there is no religious instruction in the public schools. The old who believed in God and the devil and heaven and hell are dying off, and the young who are coming up don't believe much in anything. They care nothing about God; they're not afraid of the devil, and the thought of a future life doesn't bother them in the least. All most people care about nowadays is a soft snap and a good time. We're in a bad way."

"The successful physician follows diagnosis by prescription. You understand the trouble. Can you suggest a remedy?"

"Oh, it's not difficult to suggest a rem-

edy. The trouble is to apply it. Religious training, or something equivalent to it, should find a definite place in our national system of education."

"How can that be when the schools belong to the people, many of whom are opposed to religious education?"

"Religion has an ethical basis. We must get down to bed rock. There are fundamentals upon which everyone is agreed. We all believe in truth and honesty and purity and kindness."

"You would have the teaching of these a definite part of our educational system?"

"That I would. A republic cannot exist without moral fiber. Athens and Rome perished because they ignored this fact. We have entered upon the path they traveled; the same fate will be ours unless we turn about face."

"I haven't given the matter the thought you have, but I see the situation, the danger that lies ahead."

"Surely no one can fail to, whose eyes are open. It is forcing itself upon public attention. Not long ago a meeting was held in New York to consider it."

"What was done?"

"Nothing definite, I believe. But sentiment was so stirred that one speaker proposed the setting aside of a half day each week for some form of religious instruction in the schools."

"That is a move in the direction you propose."

"Yes; the thing is to recognize the need, then some line of remedial action will be agreed upon. As I said before there are some things everyone believes in. No parent could object to his children being taught to be virtuous. Even now something of the kind is being done in that direction in the schools."

"How is that?"

"Why, temperance is regularly taught in some schools in connection with physiology and hygiene; in others there are bands of Mercy, whose object is to train the children to be kind; the supplementary reading which has become such a feature in many schools is frequently chosen with the idea of inculcating moral lessons; and everywhere, high-minded teachers are working more or less directly along this line. The trouble is, there is, so far, no definite, no concerted action."

"Patience! Patience! You're doing your share, I'll be bound. You have given me something to think about, anyhow. I may be able to help. And, now, don't you think we've talked enough for once? The roosters will be crowing directly. It's time we were asleep."

AMONG OURSELVES.

Most of us are aware of the fact that within the last few years large numbers of Americans have crossed the line and taken up land in the Canadian Northwest. Probably members of this department have been among these emigrants, but until now not one has risen Among Ourselves. Personally I hope that Mrs. Dodge's coming may encourage others. We would be glad to hear more of life and conditions up in Saskatchewan:

Having been raised in an eastern state, I think, to some extent, I have nibbled from all three vines of wood magic. Here in northwestern Canada I find flowers growing that would grace any flower garden, but do not know their names; have never been introduced to them. I can say the same of birds, also. There are so many strange birds here; some very pretty ones. One little fellow, marked orange and black like the Baltimore oriole, only much smaller; also a black bird with white spot on the wings. These always go in pairs and seem very friendly. A pair of them sat on my windowsill through a storm one afternoon. Memory takes me to a grove in Iowa, where a great many birds would gather in the springtime, and little laddie (who has gone to a better home) would call, "Mamma, I have found a new bird; come out and see it." There are no trees in this part of Canada. You who have groves can hardly imagine how inconvenient it is to get along without them. We have no place to meet for picnics or socials. Our houses are too small, so we just stay at home and work. Oh! the Minervian club. What good times they must have. How I wonder if we will ever have a club in this, our new country. Not even an aid society here now. However, I shall at least show the paper to my friends and see how they like it.

The way to have a club is to start one, if you do it, with one other member. It is bad for anyone, man or woman, to do nothing but "stay home and work." It is also unnecessary. If a determined effort be made some way will always be found whereby one can secure recreation.

Letters arguing the subject of woman's work in the fields continue to come in shoals. Write about something else from

How Much Did Your Fuel Cost Last Winter?

Pretty big sum wasn't it?

Now can you figure up how much of the heat generated by that fuel was wasted?

If your stove is the ordinary, putty-jointed, slide-door, under-draft affair, you can safely assume that over one-third the heating power of the coal was lost.

A dollar's worth of stove putty will plug up the seams in twenty stoves—but it won't keep them air tight.

A few weeks' use, and the putty shrinks and falls out, leaving air-sucking cracks, which force the heat and unburned gases up the chimney.

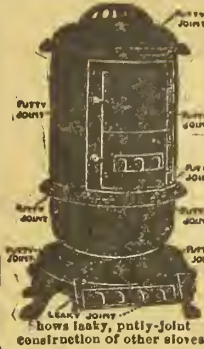

Whether you burn hard or soft coal, a great

percentage of the available heating power is gas—soft coal is fully one-half gas.

To get your money's worth from your fuel you must have a stove which is tight enough to hold back these gases until burned.

And Cole's Original Hot Blast Stove does this.

The air-tight construction (made without stove putty) holds back the gases until they are consumed by the patented top Hot Blast draft. There is absolutely no waste. A hat full of the cheapest coal costing one cent holds fire over night.

Cole's Original Hot Blast Stove For Soft or Hard Coal

All imitations of Cole's Hot Blast lack the patented construction for top Hot Blast; the patented steel collar connection for the elbow casting to stove body, making an everlasting tight joint which cannot open under the fiercest heat; the patented compound hinge for ash door; the guaranteed smoke proof door, and other exclusive features which make the Original Hot Blast the best fire keeper and the most economical stove in the world. Prices, \$10 and Up.

You do not have to wait; we have all our stoves in Kansas City. We are ready to fill your orders the same day they are received. We guarantee safe delivery. Our big catalog is ready for you. Do not buy before getting our catalog and prices.

Kemper-Paxton Mercantile Co. 913 Hickory St. KANSAS CITY, MISSOURI.

ARE YOU READY FOR WINTER?

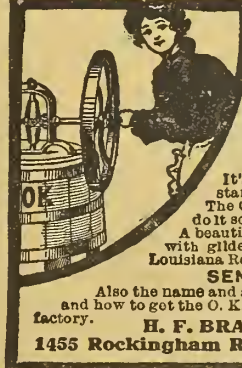

HAVE YOU A FURNACE IN YOUR HOME?

We have some valuable information for you about heating your house, so don't get your furnace till you write us. You will be well repaid for your trouble.

A number of the employees of this paper have Green furnaces in their homes and we would refer you to the editor as to their good points. A good furnace like the Green will last a life time if properly handled. Now don't forget to write us today giving us your address and the address of your dealer. We will tell you just how to get the Green furnaces.

GREEN FOUNDRY & FURNACE WORKS, DEPT. H, DES MOINES, IOWA.

How and Where to Buy a Washer.

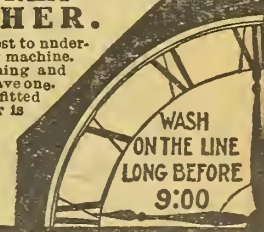

The market is flooded with poor washing machines, free offers, premiums, etc. That is not the cheapest way to get a thoroughly reliable washer. Most of them are expensive and provoking in the long run. Get a guaranteed washer, made by the reliable manufacturer. That's what we want to say to you about the

O. K. ROTARY WASHER.

It's the easiest washer to operate, the simplest to understand. Our guarantee is backed inside of every machine. The O. K. Washer will handle your biggest washing and do it so much better that you cannot afford not to have one. A beautiful machine, too, painted in maroon and fitted with gilded hoops. No warping because the lumber is Louisiana Red Cypress. The lid is steam proof.

SEND US YOUR NAME TODAY.

Also the name and address of your dealer. We'll tell you where and how to get the O. K. washer, and full particulars. Address the factory. H. F. BRAMMER MFG. COMPANY, 1455 Rockingham Road, Davenport, Iowa.

this on, friends. We have given this subject a good deal of attention during the past few weeks; a meeting or two more should see its finish, and there is material enough on hand for several entire programs. Today we shall have a few short letters, first, from Mrs. Grafton, Mrs. Harriet and Uncle Stratton, in the order named:

In regard to our girls working outdoors, I think it is all right if they are strong enough to do it. They get the pure, fresh air and sunshine. They will not work hard enough to hurt themselves, and it is much better than to have them on the streets day and night. I have two girls, aged seven and nine, and one boy, aged eleven. Of course, they are rather small to do much of outdoor work yet, but the boy helps his father with all the chores, and milks three cows; besides, he can come in and get a nice breakfast ready if I am not able. He can bake fine cake, also, and seems to like to do housework, while the oldest girl would rather work outdoors. We are farmers, of course, but we live in the suburbs of the town. We have taken this paper ever since we have been married, twelve years, and

I am sure I could not keep house without it.

I can separate the milk and carry it to the pigs, and shut the windmill off when the tank is full. I have also spent many a day in the garden and doing other outdoor work, and yet have not felt the least bit disgraced by so doing. In turn, on wash day my husband lends a hand by turning the machine and doing the heavy work. He always churns, and even stayed home and kept our two little daughters, aged four and five, while I attended the state fair. I have always thought of married life as a woman trying to be a "helpmeet" as well as a "helpeat." I want to enter a protest against Aunt Ruth's thinking we farm women are good for nothing but doing housework, playing the piano, basket ball, etc. I, for one, am glad I have the health and strength to do the necessary work that often falls to the lot of the housewife in case of a rush on the farm. I must say I enjoy catching up my own horse and driving to town, or go visiting, as the case may be. This I don't have to do when my husband or hired help is around, but often if all are gone for the day and I take a notion to go, either to town or elsewhere, I don't have to sit at home because I'm afraid of the

horse, or don't know how to hitch up (and don't want to learn).

In your August 30th issue on page twelve in the fourth column, beginning "And now Nebraska," and the words, "It depends"—Yes; it depends, but Mrs. W. being blind, our girl not only worked in the house, but out on the farm. She was worth two ordinary hired men. She received her education in the country, here; then taught school, and is now married. Our two boys, one living in a dugout here, and the other a janitor of town school house, getting his education, can cook, bake, wash and do any house work. While we notice "It depends," yet we believe let boys and girls learn all work.

These three letters were grouped with a purpose. It will be noticed that each of them gives us a glimpse of homes where father, and mother, and sister, and brother seem to share and share, working wherever their services are needed. There can be no doubt but that this is the right spirit. The most pronounced opponent of women working in the fields, or of men working in the kitchen will admit that. The point of divergence comes when application of the principle comes up for consideration.

Although she says nothing about it directly, Grandma will bring this point out:

I must say that I agree with Aunt Ruth to a great extent. No mother is entitled to the name of mother who allows her girls to ruin their health doing men's work. Mothers know what girls are destined to go through with in this world, that they will need all their strength. The few dollars that the girl saves her father and brothers today some other man will pay out in doctor bills later on, after she is off father's hands. I have no use for basket ball, for I think girls get enough outdoor work when the chickens and garden are well tended. After she has mastered the art of cooking, sewing and housekeeping, if she has run out of anything to do she had better study a good doctor book and learn to take care of the health of a family. Men need not get in a pinch with their work; let them leave the field in time to do their chores, the same as a woman stops washing or canning fruit to get the meals. Take a peep inside the house of some of your outdoor slaves; look at the way the house is kept. I could name nine homes where they aren't clean enough to be healthy, but they saved a few dollars. A woman is called the weaker half. Why is she expected to do three-fourths of the work? I really think it is for lack of sense on her part. A mother can lie awake half the night with a crying baby, then she is expected to do as much work next day as if she got a good night's rest, and she is ignorant enough to try to do it. An old gray-haired father said to me once: "My son fills a felon's cell because his mother always made the girls do his work for him, and when he knew his chores would be done he loafed in town, and that is how he fell in bad company." I think it is such management that has ruined many a home. Teach the boys that their chores will always be waiting for them and they will always be there to do them. And as for it making girls stronger to do men's work you had better take a look at some of them when they reach the age of thirty-five; you will see how healthy (!) it has made them.

Two of the points Grandma makes should be carefully noted. It is too frequently a forgotten fact that the girls

of today are the mothers of tomorrow, and that motherhood makes tremendous drains upon a woman, not alone physically, but mentally and morally; also it is a fact that money saved is not always money gained.

A cooking apple, firm of flesh, sound and good, but a trifle acid, that is what Grandma gave us. Donna Juanita brings us a golden pippin, mellow and just tart enough to make pleasant eating:

Dear Mrs. Streeter, when the clouds get full of moisture it just must rain, and when people are full of faults they must show them. Why do men have contempt for women? Why do they hate to go to church? Why do they do all those other things you ask about? They generally do only some of them, and they are naughty little grown-up boys whose mothers failed to teach them better. Willie Brown, across the street, always attended church, always sang in the choir, always raised his hat to ladies, always spoke of them with the greatest of respect, was neatness personified. John Smith seldom went to church; when he did he always sat as near the door as he could, so he could slip out before the last amen was finished, for fear someone might think he had really been to church. He was guilty of all those faults you speak of, and perhaps a few more. But perhaps his mustache was curled a little the nicer, perhaps he wore just the tie that matched the latest fashionable suit of clothes, perhaps he drove the fastest horse and owned the nicest buggy, and perhaps a great many other things. You loved church work, you loved to have things neat and clean. But as the husband is, the wife is. "Thou art mated to a clown and the grossness of his nature shall have weight to drag thee down."—Alfred Tennyson. You shut your eyes to his faults and only thought of his nice habits, and in place of letting the race die out you chose him for the father of your children. Heredity and environment always tell. Little John comes home from school, throws his books and slate across the room, his cap under the table. The pantry is daubed with bread, butter and jam. He grows up to make some other neat, loving woman miserable. Whose fault is it? I say woman's fault for choosing such men for husbands. If father's and mothers choose to raise such boys, let them, but nice girls have no right to marry them. We are not called upon to sacrifice ourselves for that kind of missionary work; but once you have chosen him for your husband, bear your burden as patiently and gracefully as you can.

How sensible Donna Juanita is! If only girls would look ahead a little and think of a man as something more than a sweetheart with nice manners or good looks or some other external possession! And if only mothers would be wise and so train boys that when grown they would make good husbands! I am a thorough believer in the right of suffrage for my sex, but that does not prevent my recognizing the fact that we women have a number of "rights" of which we do not avail ourselves as we should.

HOME AND HOME MAKING.

LITTLE HELPS BY THE WAY.

I mourn no more my vanished years:
Beneath a tender rain,
An April rain of smiles and tears,
My heart is young again.

The west winds blow, and singing low
I hear the glad streams run;
The windows of my soul I throw
Wide open to the sun.

No longer forward nor behind
I look in hope or fear;

But grateful take the good I find,
The best of now and here.
—John G. Whittier.

MOTHER'S HYMN.

Up to me sweet childhood looketh,
Heart and mind and soul awake.
Teach me of thy ways, O Father,
For sweet childhood's sake.

In their young hearts, soft and tender,
Guide my hand good seed to sow,
That its blossoming may praise thee,
Wheresoever they go.

Give to me a cheerful spirit,
That my little flock may see
It is good and pleasant service
To be taught of thee.

Father, order all my footsteps,
So direct my daily way,
That, in following me, the children
May not go astray.

Let thy holy counsel lead me;
Let thy light before me shine,
That they may not stumble over
Word or deed of mine.

Draw up hand in hand unto thee,
For thy word's sake, unforget—
"Let the little ones come to me
And forbid them not."

—From the German.

A WOMAN MAY BE INDEPENDENT.

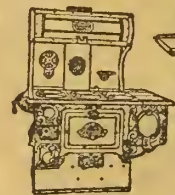

If a woman can make preserves, pickles or pound cake, and secure purchasers; if she can knit shawls, sweaters and slumber-shoes, if she can raise poultry or Angora cats; if she can, in brief, send out from her home any product whatever that people want and will pay for, she need not be worried. She will lie down at night tired and complacent, and while retaining her grasp on the home in its essentials, she will not feel that she is a pensioner on her husband's bounty. No wife should ever acknowledge that she feels herself this; no wife ever is this in any true sense. A wife is neither mendicant nor pensioner, but, unfortunately, many wives actually feel, and silently resent, the blundering attitude of otherwise good husbands in this commonplace particular.

TENTS TO RENT

FOR STOCK SALES, ETC.

MANUFACTURERS of all canvas goods, also Slickerine, a waterproof dressing for all canvas goods.

Peoria Tent & Awning Co., Peoria, Illinois.

Would that the good men's eyes were opened!—Margaret E. Sangster in Woman's Home Companion.

A SMILE.

Small Boy—I want to see Dr. Jones, please.
Maid—He's not in now.
Small Boy—Well, directly he gets back, will you tell him to come to our house—sharp—and take away that baby he left last week? It's in the way!

FOR THE HOUSEKEEPER.

A Kitchen Scrap-Basket—Every day innumerable paper scraps accumulate in the kitchen and there are always pasteboard boxes being emptied, as, for instance, the boxes that gelatine comes in, or those for cereals and other such things. It is a splendid idea to have a scrap-basket handy for this purpose. An old peach basket might be painted with enamel and answer for this purpose, but do not attempt any decorative bows or trimming, for it will only form nests for dust or cock roaches or kitchen odors.

Care of Brooms—The cleansing of brooms is rarely thought necessary, but they require cleaning as much as anything else, and if washed occasionally will be found to last far longer than otherwise. About once a week prepare a good lather of hot water and soap, and into it dip the broom; shake it until it is nearly dry, and hang it up, with the bristles downward, until quite so.

Silver and Silver-Plated Ware.—The use of soap gives either solid silver or silver-plated ware a leaden appearance. When tarnished, rub them with a little whiting wet with water, then wash in warm soft water, and polish with a piece of soft chambray. The discoloration of egg on silver spoons or forks may be removed by washing them in water in which potatoes have been boiled. This potato water, with a little salt in it, should always be saved, and articles washed in it with a woolen cloth, rinsed in clean warm water and polished with chamois.

Furniture Polish and Cleaner—Lined oil, one ounce, turpentine, two ounces. Mix in a bottle and shake before using. First, well dust the furniture, then rub on the polish with a piece of flannel, doing only a small portion at a time, rubbing briskly with two or three soft cloths, finishing up with an old piece of soft silk.

FOR THE COOK.

A Novel Sauce—A sauce made by frying a sweet green pepper, minced, after removing the seeds, with a small onion, also minced, adding, when these are tender and a golden color, a cupful of the thick part of stewed canned tomatoes, is delicious with poached or buttered eggs, or with an omelet.

Baked Potatoes—Select smooth, medium-sized potatoes, wash, and put in a dripping pan. Bake in a hot oven forty minutes, or until soft. The potatoes are put in a dripping pan so that all may be drawn at one time to try them. Test the potatoes by taking one up in a holder or towel, and if they are soft and mealy inside, they are done. Baked potatoes are cooked in their natural water, and when done the skin should be broken to let out the steam. If this is not done, the steam inside condenses again, and farms water, and the result is soggy baked potatoes.

Cheese Muffins—These are nice in cold weather for lunch or supper. Make a raised muffin batter and when filling the tins scatter on finely cut cheese. Some prefer to insert one wedge-shaped piece in each. With good coffee they constitute a satisfying beginning for those blessed with good appetites, and the pleasant odor stimulates those who must be tempted and attracted by novelties.

Sweet Potato Pie—Two cups of flour, one-half cup of butter, one-half cup of milk, one-half spoonful of baking powder (or if sour milk is used a small pinch of soda), a little salt. Mix together one cup of grated coconut, one cup of mashed sweet potato, one cup of sugar, one teaspoonful each of cinnamon and ground cloves, two cups of sweet milk, two eggs. Line well-greased pie plate with the paste and pour into potato

The International Sunday-School Lesson.

Fourth Quarter. Lesson II. Matt. XXV. 1-13 October 14, 1906.

The Ten Virgins.

Late, late, so late! and dark the night, and chill!
Late, late, so late! but we can enter still.
"Too late, too late! ye cannot enter now!"

No light had we. For that we do repent,
And learning this, the Bridegroom will relent.
"Too late, too late! ye cannot enter now!"

No light! so late! and dark and chill the night.
O let us in, that we may find the light.
"Too late, too late! ye cannot enter now!"

Have we not heard the Bridegroom is so sweet!
O let us in, though late, to kiss His feet.
"No! no! too late! ye cannot enter now!"
—Alfred Tennyson: Idyls of the King.

This parable fairly teems with oriental incident and coloring. It has been called beautiful, simple, rich in instruction, and fullest in many-sided meaning. It is one of several touching the consummation of the kingdom of God.

There were ten virgins. The number suggests wholeness or entirety, ten being the all-comprehending number. The virgins were alike in that they all had lamps. They all wanted to meet the bridegroom. They all slept. But the things in which they agreed were mere accidents. The thing in which they differed was the essential. Five (the number is not significant, certainly not of the proportion of those who are elect) had oil with which to make the festive illumination. The other five were vain and thoughtless, looking only at appearances, personally unready, and vainly expecting to have their lamps filled on a sudden from the common store.

The wise could afford to nod (literally) and sleep. They were furnished. But the foolish only gave further illustration of their inveterate folly. Time they spent in sleep might better have been employed in seeking the needed store.

There is a true touch of orientalism in the suddenness of the bridegroom's arrival. The time could not be scheduled, as upon a modern railway time-card. The dialogue between the wise and foolish is pathetic. "Give us!" is the futile plea of folly. "Not so!" is the strong, repellent negative of wisdom. There is really no severity, much less irony, in the reply and accompanying advice.

The fate of the foolish, on the face of it, seems remediless. The time when they could have gotten the oil was past. They were late in troubling themselves. The time when the illumination was needed was over. The bridal party was already in the brilliancy of the banquet-hall, and the door was shut. How could the bridegroom recognize those who had not been of the company to bid Him welcome and lead Him to His bride?

So much for the pictorial side of the parable. In its spiritual application the minutia count for little, and one needs to be on guard against excessive allegorizing. In a general way it may be said that the ten represent the whole visible church, part of which to this day has the form only (creed and sacrament)—the lightless lamp of a mere ecclesiastical confession. The other part has the lamp of churchly form, filled with the

"eternal substance of the spirit of Christ." There is a continuous, deadly antithesis: Wheat and tares; true and false; dead and living; wise and foolish. But the external similarity is so great that we are cautioned against judging and dividing.

In the ultimate analysis it is reduced to a personal matter. Each virgin brought her own lamp. No one can stand for another. Holiness of another cannot avail for us. The Lord's arrival is the testing-time, discovering to all alike whether in the lamp of profession there is the oil of reality or not. It is the dividing-time as well. Each is on the side of the door for which he has prepared himself. There is no favoritism. Orthodoxy has long maintained that the door never will be opened to the foolish once excluded—that the decrees of judgment are eternally irreversible. It must be acknowledged that this cruel creed is voiced in gentler terms than ever before, and that there are not wanting those of untainted orthodoxy who deny it. As between conditional immortality or future probation as means of relief, the latter is to be preferred; and Canon Farrar's followers in the "larger hope" increase.

Analysis and Key.

1. A parable on the consummation of the kingdom of heaven. Literary and oriental characteristics of the parable.
2. Particular meaning. (1) Ten virgins represent the whole visible church. Divided into two classes. Wise had form and spirit. Foolish had form only.
- (2) Lord's second and sudden advent. Test of character; the day declares it.
- (3) Personal element in religion emphasized. Each for himself; no possibility of interchange of spiritual life.
- (4) The irreparable loss of the "foolish" questioned in current theology.

The Teacher's Lantern.

No parable sets forth more lucidly the probationary character of the present life.

Analogies abound. As childhood stands related to maturity, apprenticeship to trade, studentship to profession—so the whole present life stands related to the life to come.

Stated categorically: As fractional periods of life stand related to the whole life, so the whole life in this world stands related to the eternal life in the unseen world.

There is philosophy as well as poetry in the lines of Alice Cary:

The hues that our tomorrows wear
Are by our yesterdays forecast.
Our future takes into itself
The true impressions of our past;

and of George Eliot:

Our deeds still travel with us from afar
And what we have been makes us what we are.

Robin Fitzpatrick was a local celebrity in Highland county, Ohio, fifty years ago. Rising one night, he witnessed a magnificent meteoric display. In an ecstasy he cried to his wife: "Betsy, get up! The Lord has come!" and remembering his friend, he said: "Neighbor

Hott don't know the Lord has come. I'll run over and tell him." Neighbor Hott was found in hiding. Not being so well prepared for the Lord's coming as Robin, he had crawled under his bed.

Argos lost his head when he closed the last of fifty pairs of eyes. While Ulysses slept, his sailors loosed the baleful winds of Aeolus. So the classics are woven and interwoven with legends strikingly illustrating the necessity of eternal vigilance. It remains, however, for the Divine Teacher, divesting the subject of quaint fiction, to define the ethical principles involved, and ground the necessity upon a moral basis.

The spirit of true Christian watchfulness is sometimes lost in the mazes of arithmetical calculations of the date of the second coming of Jesus. He watches best who serves most diligently.

The strong impression made by the Lord's teaching is apparent even in the favorite names given by early Christian parents: Gregory the Greek, Vigilantius, the Latin word for watchfulness.

THE DES MOINES DAILY NEWS

AGAIN MAKES AN EXCEPTIONAL OFFER OF 25c FOR THREE MONTHS TO TRIAL SUBSCRIBERS.

The News is the only paper published at the Capital City that is not controlled by party politics. All the news is published in a condensed and readable form in an independent and fearless manner. If you would know the facts about all state and national questions, just as they are, you will enjoy reading The News.

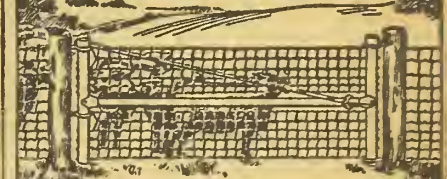

Daily market reports, farm news, household hints, sporting gossip, and everything that goes to make a complete metropolitan paper are regular features.

Every reading person in Iowa now has an opportunity to see just how good The News is by sending 25c to the Des Moines Daily News, Des Moines, Iowa, for a three months' trial subscription. The paper will be stopped promptly at the end of the three months unless you decide to renew.

Messrs. Isaac Novinger & Sons, of Kirksville, Mo., offer some rare bargains in lands adjoining the town of Kirksville. Land buyers or anyone hunting a farm home should investigate the lands offered.

Mr. T. S. Cartwright, of Marshalltown, Iowa, wants a competent married man to work on a stock farm. He must be a practical hog raiser and a good all-around man. See advertisement on page 18.

Messrs. N. H. Adams & Son, of Decorah, Iowa, are desirous of purchasing clover, buckwheat, and other field seeds, and they make request to Homestead readers, in their advertisement on page 12 of this issue, to send samples and get bids before selling.

The Koch Vegetable Tea Company, of Winona, Minn., want salesmen in every locality. Experience is not necessary and they announce in their advertisement on page 18 that they will give steady work and good pay to the right man in any locality. References are required.

The Hardin-Hatton Company, of Fort Wayne, Ind., are placing on the market a perfect preservative for shingle, tin, felt and iron roofs. They will deliver at the buyer's station, ten gallon cans at the price of sixty-five cents per gallon. Their advertisement appears on page 11 of this issue.

Mr. E. J. Trumbauer, of Patterson, Iowa, is offering a number of good Iowa farms for sale on page 24 of this issue of The Homestead. The sizes and prices asked for the different farms are stated. They are highly improved and within a mile of town. For full particulars address the advertiser.

Messrs. Armitage & Moffit, of Afton, Iowa, are offering for sale an improved 160-acre farm, forty acres of which are under cultivation, in their advertisement which appears on page 24 of this issue. This farm will be sold on easy terms and is located near town and school. They have other bargains in all sizes of farms.

Three hundred and twenty acres of nice, smooth, black, productive land, situated 100 miles southwest of Kansas City, are offered in exchange for stallions. The farm has fair improvements, is close to town, and corn, wheat, or alfalfa can be raised on it. For price of land and further particulars in regard to it, read the advertisement on page 25. Address Box A, Eureka, Kan.

We wish to call the attention of Homestead readers to a new advertisement appearing in our columns for the first time this week. We refer to the advertisement of the Cyclone Ditching Machine manufactured by the Jeschke Manufacturing Company, of Bellevue, Ohio, which appears on page 3. The claim is made this machine has no equal or superior in cutting tile ditch, doing it cheaply, quickly and perfectly, and is sold under a guarantee to do more work than any ditching machine on earth at the same price. The president of this company writing in regard to the machine, says: "This machine is strongly built and perfect in its adjustment and modern in every way, giving universal satisfaction. There is no machine on the market that can produce better results for the money invested and we have no trouble where the ground is in ordinary condition to cut from 400 to 500 rods of ditch per day with six horses, driver and operator, making a ditch from twenty-four to thirty inches in depth and nine inches in width, leaving it ready for laying the tile. This machine we sell direct to the consumer and it is not placed in the hands of either jobbers or dealers. The price of the machine is \$250 f. o. b., Bellevue, Ohio. We can always secure a very low freight rate to any part of the United States. We are making quite a few foreign shipments, which proves the utility of the machine. It is sold under a positive guarantee and Iowa should give us a good trade."

Thousands of young men are now leaving the farm and taking good positions with large business houses and corporations in the cities. A few years ago it was almost impossible for a young man or woman born and reared on the farm to secure a position in the city unless they had connections either by relation or otherwise who possessed enough influence to make a chance for them to get a start. The great demand for young men and women in banks, mercantile establishments, railroads, telegraph offices and other business enterprises which has grown up during the past few years has changed conditions all around. The growth of this demand has caused the establishment of the modern business college, designed to give the farm boy and girl enough insight into business to make them valuable to the business man, and is therefore competent to teach the young man or young woman can quickly gain all the knowledge necessary to hold a good paying position in the largest offices, and this is not the best of it. If the business college possesses a reputation for turning out well-educated pupils it has influence to get every one of its graduates permanent situations in large offices where they have every opportunity for advancement. Such a college is Boyles Business College, located at 1804 Harney St., Omaha, Neb. Mr. Boyles, president of the college, is a practical business man, and is therefore competent to teach business. He has a corps of the very best instructors it is possible to find, and his college occupies the most modern and thoroughly-equipped new building devoted to college purposes in the West. Mr. Boyles has published a catalog which is very valuable to any young man or woman who contemplates taking a business course. It gives all the information necessary and is sent free on request. See advertisement on page 18.

GOLDEN SEAL IN DEMAND.
Many of our readers do not know the value of this common plant and we are glad to say that the Northwestern Hide & Fur Co., of Minneapolis, pay a good price for it, as well as for many other things named in their advertisement which appears on page 20.

GET YOUR ORDERS IN NOW FOR WRIGHT'S STOCK FEEDERS.

October 15, 1906, is the last day on which Mr. C. A. Wright, "the stock feeder man," of Rosendale, Mo., will hook orders for feeders and he pay the freight. Mr. Wright regrets that he can no longer pay freight, but

the cost of material has advanced to a point where the paying of freight must be discontinued. Order now and save the freight, no matter whether it is a pig, calf or chicken feeder. The price is \$10 f. o. b. cars Rosendale, Mo., and if your order is in by October 15th Mr. Wright pays the freight. See page 20 for advertisement.

SEND FOR FREE ROOFING SAMPLE.

Black Diamond, one of the lowest-priced ready roofings on the market, bases its claim to attention on its record for durability. The claim is pretty well proven, too, for all its advertisements illustrate from photographs various buildings which have Black Diamond roofs, which are from ten to twenty-three years old and still in good condition. Black Diamond was the earliest ready roofing to be put on the market, and it has been sold continuously for over thirty years. It has proven its value under all kinds of tests, and its sales per year exceed those of all other ready roofings combined. Free sample may be had for the asking. Address the nearest office of the Barrett Manufacturing Company, Black Diamond Dept., New York, Chicago, Cleveland, Allegheny, Kansas City, St. Louis, Minneapolis, Philadelphia, New Orleans and Cincinnati.

A POINTER TO FARMERS.

Read the advertisement of the Allen Investment Company, of Kansas City, Mo., in this issue. They are advertising a splendid farm for sale which is located in Harrison county, Iowa. At the price they quote it is certainly a snap and will make the man that buys it money. It's so seldom a good farm is quoted at this price that it pays to look after it quick when it is. This farm is worth more money. Iowa land is as good as gold. Write the Allen Investment Company at once. Don't delay, as this farm will go quick at this price. It is close to splendid markets and has every advantage. The Allen Investment Company also have other lands, and our readers will find this firm absolutely reliable and responsible in every way. They handle nothing but good lands and can be depended upon to make good their representations in every particular.

DO YOU TURN YOUR HORSES OUT IN WINTER?

If so, we want to call your attention to a very important matter. Horses which have been used steadily at work, either on the farm or road, have quite likely had some strains whereby lameness or enlargements have been caused. Or perhaps new life is needed to be infused into their legs. Gombault's Caustic Balsam applied as per directions, just as you are turning the horse out, will be of great benefit; and this is the time when it can be used very successfully. One great advantage in using this remedy is that after it is applied it needs no care or attention, but does its work well and at a time when the horse is having a rest. Of course it can be used with equal success while horses are in the stable, but many people in turning their horses out would use Caustic Balsam if they were reminded of it, and this article is given as a reminder. Read the advertisement on page 16 of this issue.

SHIP THE HAY AND GRAIN DIRECT.

Many farmers may think that they cannot get as much for their hay and grain if shipped direct as they can otherwise but this is not so, as we know that the commission firm of Messrs. Freeman Bros., of Chicago, Ill., are in a position to get the highest price for any of our readers who may ship them their hay or grain. This firm have been advertisers of ours for many years and we know their dealings are always satisfactory to their customers. In some conversation which a representative of this paper had recently with Mr. Freeman, he said that this season they expected to handle large quantities of grain, as well as hay, and that it would be their aim to see that every man who shipped any grain or hay got every penny it was worth. Mr. Freeman said he thought the hay was worth as much now as it would be any time this winter. Our readers will find the advertisement of this company on page 18, and we would deem it a favor for our people who may have hay or grain to sell to write Messrs. Freeman Bros. for prices.

COZY HOMES.

The discovery of a new wick principle, so effective and yet so simple that it is a wonder no one thought of it before, has revolutionized the manufacture of oil heaters and lamps that explosions, smoke and smell, caused by imperfect wick arrangement, may safely be regarded as things of the past. This new wick attachment is to be found on the Perfection Oil Heater. Interesting tests show that, although the heater gives intense heat, the wick cannot be turned too high or too low, absolute safety thus being assured. One other feature which is worthy of mention is the smokeless device which prevents all smoke and odor. The portability of the heater also commends it for general household use. Heater is very light and can be easily carried about. Its simple operation, usefulness in heating water and warming cold rooms make it a most handy and useful article in any home. This heater is so far superior to other oil heaters, and is of such fair price that its universal adoption is but a matter of time. The Rayo Lamp, which is made by the manufacturers of the Perfection Oil Heater, is without doubt the best lamp for all-round household use. Is equipped with the latest improved burner, and gives a bright, steady light at small cost. Suitable for any room, whether library, dining room, parlor, or bed room. The Perfection Oil Heater and the Rayo Lamp form a combination that for real home comfort cannot be equaled. When consideration is taken of the simple operation of both heater and lamp, their absolute safety, the intense heat generated by the one, and the bright and steady light given by the other, all without smoke or smell, their value in any home, large or small, can be somewhat appreciated. Sold by all good dealers. See page 9.

KILL THE PARASITES.

We have received many letters during the past spring and summer asking a question something like this: "My stock is lousy; what can I use to kill the lice and not hurt the animals?" For the benefit of these

GOOD corn, wheat, clover and blue grass land, in the famous Elmwood belt of Missouri, on easy terms. White & Shroat, Palmyra, Missouri.

inquirers and the many stockmen who are having the same trouble, but have not written, we want to say a few words about lice, mites, fleas, etc., on stock. The first thing to be said is, these pests should not be there. They are expensive any time, and especially so now, when all feeds are high priced. Besides the feed it takes to keep them they make the stock look rough and skinny, giving to all who see them an impression that the owner is not a good manager. If this applies to any of your stock, whether it be horses, cattle, sheep, hogs or chickens, take our advice and go after the parasites. Use a coal-tar dip that is non-carbolic; then you are sure you will not injure the stock if you follow directions. A non-carbolic dip is one from which the poisonous and irritating qualities have been removed. These, if allowed to remain, are likely to do injury by blistering or exfoliating the skin, irritating the eyes or membrane whenever it comes in contact with it. For these reasons it will pay you to see that the dip you use is non-carbolic. You can get such a coal-tar dip free from these objections of any druggist for about \$1.35 per gallon. Each gallon will make seventy-five to 100 gallons of dip. The Kresol Dip is entirely satisfactory and not expensive. Get some of your druggist or write the manufacturers, Messrs. Parke, Davis & Co., Detroit, Mich., asking for their booklets telling how to use it and where it can be bought. After you get it use it as directed. For horses and cattle mix in proper proportion (don't guess at it) with water and put it on with a brush, broom or coarse cloth. Use plenty of muscle on this job, so you will get right down to the skin, where the trouble is. Repeat in ten or twelve days to kill any lice that have hatched out since the first treatment. If we were treating calves, pigs or sheep we would dip them. If you don't feel like huying a steel dipping tank, make one of cement or wood. No farm utensil will pay for itself quicker than a dipping tank. Even after you get the stock clean you will find it a decided advantage to dip frequently, just to keep them in good health. Whether you hand-dress or dip, there should be a second application a week or ten days later to kill the parasites that have hatched out since the first treatment. This is very important, for unless the new brood is destroyed the stock will soon be in as bad shape as before. Do not undertake to use any dip strong enough to kill the eggs or nits at one dipping. These eggs are usually enclosed in a tough, resistant covering. Anything strong enough to penetrate this covering will be very apt to lujure the eyes, ears or skin of the animals. Another point to be remembered is, that no matter how thoroughly you rid an animal of vermin, if you put it back in a stall or pen that is alive with parasites, your work counts for little. Use new quarters for a month or more, if possible. If you cannot do that, clean out the old ones thoroughly. Get all the litter, loose boards, etc., out of the way, then sprinkle or spray with the dip solution. If this is well done you will probably have no trouble on that score. The whole job is not so hard or long as it might seem. With a supply of the dip and a determination to clean up, one man can do a great deal in a day, and by keeping at it for a few days accomplish the end sought. The main thing is to get at it. Do it now, as the office men have it. If it cannot be done now, cut this slip out, fasten it upon the barn door, keep it there until you find a day when you can do the work, and remember every day you neglect acting on its advice you are throwing away good money in feed that goes to fatten lice, mites, ticks, fleas and other insect pests instead of the stock.

A beautiful souvenir is given away by the Culter & Proctor Stove Co., of Peoria, Ill., to those who are interested in a steel range, cast range, cook stove or heater, as per the advertisement on page 23. Look it up.

SOUTHWEST

The Land where Men make good

It is easy to make good in the Southwest. Everything is in your favor. Good rich land costs only a small part of what similar land costs where you now live. Crops are bigger and bring higher prices. The climate is mild and healthful. Everything is right. Now is the time to sell your few acres in the North and buy a big farm in the Southwest. Land values are rapidly increasing. The farm you can buy now for so little will double or triple in value within the next year or two.

A letter addressed to the Southwestern Colonization Bureau, St. Louis, will bring you free copies of complete and authentic pamphlets covering all sections of the Southwest—Missouri, Kansas, Arkansas, Oklahoma Indian Territory, Texas, New Mexico and Louisiana.

A letter to any of the following members of the Bureau will bring reliable, detailed information about the particular section represented by the member addressed. Write to-day while it is on your mind.

Southwestern Colonization Bureau
315 Kinloch Bldg. St. Louis, Mo.

WHY RENT A FARM

when you can own as good or better one for the rent you pay for one year?

GEO. W. HARBIN
Waterloo, Iowa.

FALFURRIAS

In the Artesian Belt of South Texas 100,000 acres of cheap, rich lands, artesian water, healthful climate. We ship the earliest vegetables, Bermuda onions, melons, and cotton. Fine lands for corn, cotton, alfalfa, grapes, lemons, oranges. Write for literature and excursion rates.

FALFURRIAS IMMIGRATION CO.
Falfurrias, Tex. or Kemper Bldg. Kansas City, Mo.

The Best Lands in the State of Texas

Wheat, oats, corn, cotton, fruit, truck and stock farms; fine schools; good water; healthful climate with mild winters. These lands we sell at reasonable prices, from \$1 an acre up. Don't delay. Prices are constantly advancing.

GROESBEECK & CO.,
Stephenville, Erath County, Tex., on the Frisco.

CHEAP BOTTOM LANDS

I deal in St. Francis Bottom Lands—where crop failures are unknown. I have choice tracts of timber and improved lands for sale near railroad and within twenty to thirty miles of Memphis, Tenn. I have had thirty-three years' practical experience in logging, clearing and cultivating these lands; can tell you the whole truth about them. Write, or come, and I will show you what they grow. Address

J. G. STERN, Madison, Ark.

SOUTHWEST TEXAS

Sell your high priced land and come to Texas, where farmers harvest a crop every month in the year. No blizzards; no long winters, necessitating feeding your stock six months. Dry farming, corn and cotton, making farmers rich. In artesian districts alfalfa, truck and fruit bring phenomenal results—\$300 to \$800 per acre not unusual. Dry farm lands \$2.50 to \$10. Artesian lands \$5 to \$15. Write for information.

NICHOLSON & FURNISH, Moore Bldg. San Antonio, Texas. Branch Offices: Artesia, Carrizo Springs, Cometa, Spofford.

Fine Oklahoma Farms

There is no better land in the United States for wheat, oats, corn, cotton, alfalfa, vegetables or fruit than I can sell you in the most fertile belt of Oklahoma for \$10 to \$35 an acre. Mild winters; healthful; ample rain; plenty of good water; a stock country, schools, churches, railroads; GOOD markets; natural gas; rural telephones; rural free delivery. I know I have what you want and will show you if you will write or come and see.

S. C. GEORGE, (the Land Man) Apache, Okla.

YOU OUGHT TO KNOW

Have you heard about our wonderful Rice Lands, that bring more revenue than any other lands in America?

Do you know that they will also produce fine crops of corn, oats, cane, cotton, fruits and vegetables?

Do you know that three new railroads thru this section are going to make the price of land jump?

Write us and let us send full information.

Farm Wanted I WANT a highly improved Iowa, Illinois, Indiana or Ohio farm worth from twenty to thirty thousand dollars in exchange as part payment for a large well watered central Missouri stock and grain farm on navigable river, 5 miles from Rock Island railroad, midway between St. Louis and Kansas City, containing 1,900 acres. Present price is \$25 per acre. This property will increase enormously in value as part payment for a large well watered central Missouri stock and grain farm. Write for particulars and describe your farm fully. **A. S. LOOMIS, 909 Chestnut St., St. Louis, Mo.**

MISSOURI LAND

IS BETTER at present prices than a gold mine. Come and we will take pleasure in showing you. 509 acres well improved, all kinds of fruit and the best of water, and the low price of \$40 per acre buys it. 220 acres three-fourths of mile to Kirksville. As good prairie land as you will find in Missouri. Fair improvements. This is an ideal lying farm and \$65 per acre buys it. 80 acres, 2 miles from Kirksville, nice improvement, a lovely small home at the slaughter price of \$60 per acre. 82 acres, one-fourth mile to Kirksville, good improvements and as near an ideal home in every respect as can be found, and we are only asking \$90 per acre for it. 132 acres one-half mile to Kirksville, good improvements, all kinds of fruit, no better land in the state, every foot can be farmed with any kind of machinery. This looks good to anybody, but it is better than it looks and we are putting the low price of \$80 on this ideal home. 180 acres, 90 rods to Kirksville, good building, good fence, all kinds of fruit, the best of water and worlds of it, cistern in house, in fact, everything is right. No better or finer lying land in the state. \$70 per acre will buy this home.

ISAAC A. NOVINGER & SONS,

KIRKSVILLE, ADAIR COUNTY, MO.

P. S. WE are not real estate dealers, we own the land herein described and furthermore our home is not for sale. We simply have more than we can handle.

IOWA FARMS FOR SALE.

CROPS NEVER FAIL.

CALIFORNIA In the beautiful Sacramento Valley, Sunset, Colorado offer best opportunity in California for the farmer, fruit grower and stock raiser. Tracts of 10, 20, 40 acres or more of the richest land, all under irrigation. Abundant water at low rates. New model town now building. Two railroads. Good markets for all products. Dairying and stock raising very profitable. Ten tons alfalfa to the acre. Peaches, pears, grapes, figs, etc., pay well. Good roads, good schools, churches, electric lights, etc. A rich and prosperous farming community. Four thousand acres just subdivided and now offered for sale on easy terms. Just the place for a home. Near Feather River, with fine hunting and fishing. This is the land of the Big Oak Trees. Write for free illustrated pamphlet. Mention this paper. Sutter Irrigated Farms Co., 1109 Post St., San Francisco, Cal. (Agents wanted.)

WHY BUY LAND AT FANCY PRICES

IN the Canadian northwest, thousands of miles from markets, when you can buy good quality land in the **Clover and Tame Grass Belt** of Minnesota, near two railroads and less than 100 miles from the Twin Cities or 70 miles from Duluth, at \$5 to \$10 per acre, easy terms? Wholesale tracts at dealers' prices. Agents wanted. For particulars apply to the owners.

THEO. F. KOCH LAND CO.,

801 Globe Building, ST. PAUL, MINN.

William Lampmann,

Station A, Box 11, Omaha, Neb.

DEAR Sir:—Please send me, free of charge, full information about

IDAHO IRRIGATED LAND.

Yours truly,

(Name).....
(Town)..... (State).....
(R. F. D.)..... (Box).....

FARMS IN Eastern Central Kansas, FOR SALE

IN German settlement, also farms in Catholic settlement. Fine churches and schools. Land in Dickinson county, Kansas, is producing large yields of wheat, corn and alfalfa, apples, peaches, fruit of all kinds. I can sell you land for \$25 to \$40 an acre that is producing as much as land in Indiana and Illinois that is selling for \$100. Write for list of farms and kind you want. I will give you the very lowest prices

JAMES SHEERAN,
Dickinson Co., Solomon, Kan.

IOWA FARMS

FOR SALE AND FOR RENT.

WE have over 100 of the choicest Iowa farms for sale from \$55.00 to \$90.00 per acre. We have five or six large farms to rent. Write us for catalog and map of Iowa. It is free.

THE ALLEN LAND & LOAN CO., LAURENS, IA.

IOWA FARMS

FOR SALE BY THE HONEST LAND MEN in the great CORN and BLUE GRASS region. All kinds of fruit and best water. See Madison Co. before you buy. Write at once for the largest and finest list ever issued in Iowa. Three hundred (300) choice farms. Address,

HAMILTON BROS., WINTERSSET, IOWA

Oklahoma Lands.

UNEQUALLED opportunities for homeseekers and investors. Millions of acres of the richest farm land in the United States is now owned by Indians who want to sell. Restrictions are being removed so they can sell. Write for particulars and map.

A. J. WALDOCK & CO.,
OKLAHOMA CITY, OKLAHOMA.

IOWA FARM

240 ACRES, good dwelling, 2 barns. Land lies well, but part some rolling; abundance water piped from spring to large tank; has apples, peaches, cherries, grapes, small fruit; about 7 miles to town; fine roads; all could be used for corn. Easy terms; this is a snap. Write us, or better come and see this before it is sold.

BOSSERMAN BROS., MURRAY, IOWA.

FARMS, STOCK RANCHES, CITY PROPERTY

BOUGHT, sold and exchanged. We have a large list of the best farm lands in eastern Kansas for sale. Visits or correspondence of prospective purchasers solicited. Ref. Hartford National Bank. **Hartford Land Co., Hartford, Kansas.**

800 ACRES, Keith County, Nebraska, six miles from Ogalala, a fine horse and cattle ranch. About 200 acres in cultivation; 200 acres in tame pasture, balance good wild pasture. The owner will sell on favorable terms or will take some town property or small farm in part payment.

BOX 81, INDEPENDENCE, IOWA

Missouri Farms. Write for State Map, Booklet and Weather Report. Sent Free. **BAZEL, J. BEEK,** Chillicothe, Missouri.

FIELD NOTES.

The Duroc-Jersey sale of E. Z. Russell, Blair, Neb., has been called off.

Write Mr. Geo. H. Lawsbe, of Harlan, Iowa, if you want Chester White boars.

Oxford Down rams are offered for sale by Mr. S. S. Stolt, of Kiron, Iowa.

Cotswold rams are offered for sale by Mr. A. Latimer Wilson, of Creston, Iowa.

Twenty-five Berkshire boars are offered for sale by Mr. C. S. Buckley, of Holstein, Iowa.

Messrs. Norrish & Bevington, of Kingsley, Iowa, have a few good Tamworth boars for sale.

The big kind of Poland Chinas are offered for sale by Mr. F. H. Long, of Manning, Iowa.

Choice Ohio Chief boars are offered for sale by Mr. W. D. Pittman, of Lake City, Iowa.

Mr. J. D. McDermott, of Anita, Iowa, has a few good young Scotch Short-born bulls for sale.

Mr. Roy Rockwell, of Paullina, Iowa, is offering a nice bunch of Poland China boars for sale.

Two hundred choice Duroc Jersey pigs are offered for sale by Mr. W. J. Wendt, of Marcus, Iowa.

Mr. M. A. Cromwell, of Gilbert, Iowa, announces a public sale of Duroc Jerseys on February 21st.

Mr. Albert Bell, of Lake City, Iowa, has forty Duroc Jersey boars for sale at very reasonable prices.

Messrs. Cbandler Bros., of Kellerton, Iowa, offer some great imported Shropshire rams and ewes for sale.

Mr. L. Sheets, of Carson, Iowa, offers to trade a good bunch of mares for land or a draft stallion.

Messrs. Reubel Bros., of Rockwell City, Iowa, are offering some splendid Poland China boars for sale.

Mr. Harman Gruver, of Brewster, Minn., is offering a good bunch of Duroc Jersey boars and sows for sale.

Messrs. Clark & Tryon, of Wausau, Neb., are offering forty head of Duroc Jersey fall and spring boars for sale.

One Hundred Crimson Wonder Duroc Jersey boars are offered for sale by Mr. H. L. Cantine, of Quincy, Iowa.

Mr. John S. Goodwin, of Naperville, Ill., claims October 31st as a date to hold a sale of Aberdeen Angus cattle.

Choice Duroc boars at reasonable prices for the next thirty days can be bought of Mr. Delmar McCann, of Kennard, Neb.

Write Messrs. J. W. Knowles & Son, of Craig, Neb., for prices on their Poland China boars. They have some good ones.

Some good Duroc Jersey boars sired by Echo King and Red Chief I Am are offered for sale by Mr. Smith Brown, of Waterloo, Neb.

Mr. E. F. Escber, of Manning, Iowa, is now ready to price his Poland China boars sired by his great 1,000-pound boar, Gay Monarch.

Mr. S. P. Hartman, of Ottumwa, Iowa, has male and female Poland China pigs of spring farrow for sale. His advertisement appears on page 43 of this issue. The boars at the head of Mr. Hartman's herd are

All Dude 26315 and Wonder Chief 103475. For prices and other information, write Mr. Hartman.

Mr. A. H. Brett, of Mason City, Iowa, names November 9th as a date for selling Short-horn cattle and Clydesdale and Percheron horses.

Messrs. Wm. Ray & Son, of Defiance, Iowa, have some well-bred Poland China boars for sale. Read their advertisement on page 41 and write them.

Large Improved Yorkshires are offered for sale by Mr. Fred Rabeller, of Leigh, Neb. They have one of the best herds of this particular breed in America.

If you want a good Duroc Jersey boar sired by the great Orion J. or Crimson Wonder Jr., then write or go and see Mr. M. A. McWilliams, of Wall Lake, Iowa.

Thirty good Poland China boars are offered for sale by Mr. John Schmieder, of Remsen, Iowa. These are the same as he won first and second prizes with at the Interstate Fair.

If you want a right good Duroc Jersey boar sired by an undefeated sweepstakes boar, you will have to send your order to Messrs. Edmunds, Shade & Co., of Kingsley, Iowa.

If you want a Poland China spring boar sired by Ohio Sunshine 2d you can get him by sending your order to Messrs. Wm. Uhe & Sons, of South Omaha, Neb. They have some good ones.

A three-day breeders' sale of registered draft horses is announced to take place on January 9th, 10th and 11th, at Bloomington, Ill. Mr. C. W. Hurt, of Arrowsmith, Ill., is the manager.

If you want a good Poland China boar sired by the noted Nebraska State Fair Winner, Oakland's Prospect, you can get them by sending your order to Mr. Chas. M. Hulbert, of Oakland, Neb.

If you want a good Glenwood Critic pig write that bustling young Duroc Jersey breeder, Mr. A. W. Lamb, of Monroe, Neb. He has some good ones and prospective winners for next year.

Mr. Austin Renshaw, of Blair, Neb., has some good Duroc Jersey boars sired by Junior Jim, the noted Iowa State Fair winner this year. If you want a Junior Jim pig write him at once.

The Ardmore Stock Company, of Holstein, Iowa, are offering the best bunch of Berkshire boars they have ever raised, and they have had some good ones. If you want one of the best you should order right away.

No better Poland China boars can be bought, nor from a more reliable breeder, than from Mr. Henry Dorr, of Remsen, Iowa. He always has the good ones and his prices are within the reach of anyone wanting a good boar for the money.

Mr. U. G. Davidson, of Manson, Iowa, has some good boars left that are sired by Crimson Wonder I Am, the noted sweepstakes boar, also the sire of sweepstakes winners. Go after him at once with an order if you want to be in the winning next season.

Mr. J. L. Barber, of Harlan, Iowa, is offering a bunch of Chester White boars for sale that are not only good, but are either sired by a prize-winning boar or are out of a prize-winning sow. If you want this kind you had better send him your order at once.

Mr. John Tighe, of Stanton, Neb., and Mr. Clarence Wallace, of Wisner, Neb., whose sale of Duroc Jersey boars was held on October 2d at Wisner, Neb., report that thirty head sold at an average of \$30.00, the lowest-priced animal selling for \$20 and the highest at \$75.

If you want a Duroc Jersey boar sired by Crimson Wonder Again, the Iowa State Fair sweepstakes boar this year, you will have to bustle your order to Mr. H. S. Allen, of Russell, Iowa, at once. He owns him and has his get for sale, also some good ones by Top Notcher Again.

Mr. John Weighton, of Audubon, Iowa, has a nice bunch of Duroc Jersey boars that he is offering for sale and will be priced right if taken soon. We suggest to Homestead readers who want a boar that they can get one here and get him right if they send their order to Mr. Weighton at once.

Messrs. Stow & Gingrich, of Hamburg, Iowa, have a cracking good bunch of Duroc Jersey boars for sale. These are out of sows and are sired by boars that have been pronounced the best of the breed. If you want a good one it will pay you to write the above firm or go and see them.

Mr. T. A. McMahon, of Craig, Neb., has one of the best bunches of Duroc Jersey boars for sale that is to be found in the West, and they are all out of prize-winning stock. He is pricing these at a figure that will move them during the next thirty days. Send him your order at once and he will treat you right.

Mr. W. L. Bonnett, breeder of Duroc Jersey swine, of Birmingham, Iowa, in furnishing copy for his advertisement found on page 44 of this issue writes: "My pigs are nice, growthy fellows, of good bone, good length, good color and stand on the best of feet. They will be quoted at reasonable prices, breeding and quality considered."

Mr. F. M. Jenkins, of Pomeroy, Ill., proprietor of the Cyclone herd of Duroc Jersey swine is offering young hogs of both sexes for sale in his advertisement on page 44 of this issue. They have good color, heavy bone, good length, and are strong and vigorous and from prolific families. Mr. Jenkins' prices will be found reasonable.

Mr. Willard Miller, breeder of registered Shropshire sheep, of Anita, Iowa, has an advertisement on page 16 of this issue, offering rams and ewes for sale. In furnishing copy Mr. Miller writes: "The ewes that I am offering for sale are now being bred to an extra good imported ram. I added to my flock some imported bred ewes last winter and also had some arrive from England on August 8th of this year."

Messrs. Allen Bros., breeders of Aberdeen Angus cattle, of New Sharon, Iowa, write that they have sold their Pride bull, Prond Blackcap, which they have been advertising in The Homestead, to parties in southern Iowa. They say: "We are being snowed under with inquiries concerning him. We have a fine Queen Mother bull three years old that we will sell, also a number of Favorites, Prides, etc., sired by Proud Blackcap and bidding fair to be his equal." Write

them for prices, or better still, go and inspect their stock. See advertisement on page 41.

Mr. S. J. Miller, of Kirksville, Mo., can furnish Fox Terrier pups, the rats deadly enemy. They are eligible to registry, are well marked and by one of the best dogs in America.

A Poland China bred sow sale containing about sixty head is announced to take place at Algona Iowa, on February 15th, by Messrs. H. H. Styer, of Whittemore, Iowa, and M. P. Dan, of Burt, Iowa.

Mr. B. F. Richardson, of Dubuque, Iowa, has some very fine Angora does and one buck and some choice Scotch Collie dogs which he is offering for sale on page 34 of this issue of The Homestead.

Mr. Leroy A. Hayes, of Knoxville, Iowa, announces on page 34 of this issue of The Homestead that he has a fine bunch of Collie pups from working parents for sale. Pedigree will be furnished with each dog sold.

In our report of the Interstate Live Stock and Horse Show, held at St. Joseph, Mo., an error was made in the report of the Chester White classes. We stated that the grand champion boar was Missouri Chief 13466, while as a matter of fact it was Missouri Chief 3d 18840. This winning hog was bred and shown by Mr. J. J. Hall, of Graham, Mo., in whose interest we are glad to make the correction.

Mr. J. A. Russell, the red hog man of Corning, Iowa, wishes us to say that his sale Durocs are doing fine and that he cannot part with any of them until his October 27th sale, at which time he sells ten Proud Advance gilts and four boars; a nice string of useful stuff sired by Tip Top Notcher Jr., Orion Improver, Choice Goods, Higgins' Model and others. His catalogs are out. Send for one. See advertisement on page 45.

Mr. John Schneider, breeder of Poland China swine, of Remsen, Iowa, writes as follows in regard to his stock: "My hogs are doing well. I have thirty good spring boars sired by Winning Perfection 105015, the hog that sired the young boar that won first place at Sioux City this fall. They are growing, have good length, good bone, with nice finish, smooth coats, good heads and ears, and stand right up on their toes with good straight legs. I have hogs good enough to head any herd. Some of them are sired by All Dude and Keep On 3d. They are good pigs and I will sell them right." See advertisement on page 43.

Messrs. Wheatley & Ward, of King City, Mo., breeders of Aberdeen Angus cattle, exhibited their herd bulls, Hale Lad 2d and Maplehurst Petros, winning fourth and fifth places, respectively. This was the first time this firm had ever exhibited stock from their herd and the cattle were not especially prepared for show purposes. With the amount of fitting most cattle receive the Wheatley & Ward herd would make a strong showing. Their herd now numbers upwards of 200 head and some good, strong bulls ready for service are being offered. See page 21 for their advertisement and should you write them kindly mention this paper.

The fifth annual sale of Short-horns from the Lakewood herd owned by Mr. H. G. McMillan, of Rock Rapids, Iowa, is announced to take place on Wednesday, October 24th. The offering will consist of forty-seven head, ten bulls and thirty-seven cows and heifers. They are a representative lot of Scotch and Scotch-topped cattle in fine breeding condition. Several of the bulls are extra good, and the cows and heifers are of the best, all being bred to the famous Scotch herd bull, Morning Joy. This will be an excellent opportunity for Homestead readers to get a good young bull or cows and heifers in calf by one of the best bulls of the breed.

Mr. John Werner, of Lake Preston, S. D., recently purchased of Mr. C. C. Norton, of Corning, Iowa, the young Scotch bull, Cricket, a son of Banker's Victor and out of a cow called Calla by Golden Victor, the bull that won at the Iowa State Fair and all the other leading fairs a number of years ago, and was afterwards bought by Mr. Frank Harding. This young bull goes to head his South Dakota herd and should prove a great find. He is bred in the purple and traces in all his crosses to the most noted Cruickshank cattle. Messrs. Thompson Bros., of Hurley, S. D., also bought a son of Imp. Bapton Admiral out of a Princess Royal cow and they won second on him this year at the South Dakota State Fair.

Mr. M. M. Elmendorf, breeder of Duroc Jersey swine, of Lacona, Iowa, in furnishing copy for his new advertisement on page 45, writes: "Please announce that my Durocs are in fine shape and that the boars are good, big, strong fellows, with plenty of bone. The sows are mostly spring gilts, but a few spring and fall yearlings will be offered. I have purchased a son of Tip Top Notcher, so I am pretty well stocked with his blood. You will remember that Duke is a state fair prize winner and one of the best-bred boars of the breed. His sire is old Kan't Be Beat, dam Cedar Vale Queen VI. by Top Notcher. I bought Duke of Messrs. Watt & Foust, when a pig six months old. He was three years old the 10th of September, is very sure and a splendid pig getter, is in fine breeding condition, weighing about 650 pounds, but can be made to weigh 900 pounds. He is worthy of a home in some first-class herd."

Messrs. Bridgford & Nesbitt, breeders of Poland China swine, of Aledo, Ill., in sending in change of copy for their advertisement found on page 34 of this issue of The Homestead, write: "We have thirty-five spring boars of February, March and April farrow for sale, and also a few fall boars of 1905 farrow that are ready for service at any time. Our boars are sired by four good herd boars, including Faultless Perfection 2d 70889, Young Delight 104550, U. S. Lad 2d 105143 and Perfection's Model 94305. This is the best lot of boars we have ever offered to the readers of The Homestead. We also have seventy-five head of sows for sale, ranging in age from three years old down to spring gilts that we will sell, either open or bred. We can furnish parties with what they want in pairs or more unrelated. Will price this stuff worth the money considering breeding and quality. Our stock is of good length with plenty of bone and finish and we would like to

have interested parties write for what they want or come and see the stock for themselves. We purchased while at the Iowa State Fair a young boar sired by the first-prize yearling boar, On the Dot, to breed our young gilts to."

Messrs. Rosenfeld & Siverly, of Kelley, Iowa, write: "Please ask Mr. W. B. Story, with whom we were talking at the Iowa State Fair, to write us. We have misplaced his address and as we have some business to transact with him, we would like very much for him to write us."

On Thursday, October 18th, beginning at 12:30, Mr. O. R. Phelps, of Taintor, Iowa, will offer for sale sixty head of Poland China swine. The offering will consist of forty boars of all ages and twenty open gilts. Mr. Phelps believes that this is the best consignment of hogs he has ever offered to the public. They are heavy-boned, growby and full of quality, with the very best of breeding. Write him for catalog.

Messrs. P. S. & S. Barr, of Davenport, Iowa, write as follows: "Our Poland China boars are a strong, vigorous lot of heavy-boned pigs, out of ancestors of best breeding and shape. We are offering special low prices on car lots of Short-horn or Polled Durham cattle to those who come to see them. A number have calves at foot, three to six months old, and are rebred. Call or write, Farm, two miles northeast from city." See advertisement on page 43.

Mr. E. D. Keasy, of Wiota, Iowa, writes as follows: "Please claim February 12th for my Poland China bred sow sale in The Homestead. My well-known boar, Contractor, winner at the Iowa and Nebraska State Fairs, that I recently purchased of Mr. George White, arrived home in the very best of condition and he will be used on the greater portion of the brood sows that I will offer in my sale. You can say to Homestead readers that they will have an opportunity to buy some of the best sows of the breed in my sale and they will be bred to prize-winning boars."

Mr. H. S. Allen, of Russell, Iowa, breeder of Duroc Jersey swine, writes: "We still have some big-boned, good-bodied Top Notcher Again and Leatherstocking 2d boars for sale. They will weigh from 200 to 300 pounds, March farrow and some of them carry quality enough to head good herds. We also have the big yearling Long Notcher by Top Notcher Again for sale, as we cannot use him any longer. This boar won seventh in senior yearling class at Iowa State Fair. He has mammoth size, will weigh 650 pounds and has a nine-inch bone. He will make a 900-pound hog when fully grown. Some breeder that wishes to add size to his herd will find a bargain in this hog at \$50. We have March boars for both farmer and breeder at bargain prices." See advertisement on page 46.

Mr. U. G. Davidson, of Manson, Iowa, owner of Crimson Wonder I am, and breeder of Crimson Wonder Again, both sweepstakes boars, writes: "My boar lot will soon be in full bloom. Boars are coming on finely and the prospect looks even better than last year. Among recent visitors of the herd was Mr. S. G. Collicott, of Lake City, Iowa, who purchased a yearling son of Crimson Wonder I am. This boar was one of the six best prospects in the herd last season, and if fitted for the show, would probably have been at the top with the other Crimson. Mr. B. C. Moats, of Polk City, Iowa, also visited the herd; he purchased two boars sired by the old Monarch, and they were not the poorest pigs in the bunch, either. Please say to the parties who write me for prices that they are not to get scared and think the pigs have no quality because the price I ask is not equal to the value of a 160-acre farm. Parties who visited the herd last season, also parties who purchased on mail orders, seemed to find plenty of quality, and I have fully as many high-class in the herd this year. All breeders in search of good goods are urged to come and inspect my herd." When writing Mr. Davidson mention The Homestead. See advertisement on page 46.

Mr. Clyde H. Smith, of Riceville, Iowa, whose new advertisement of Duroc Jersey swine appears on page 45, writes: "These pigs I am offering for sale are the best lot I have ever raised and I have been breeding registered Duroc Jersey hogs for eight years. After visiting seven of the best herds of Durocs in northwestern Iowa, I failed to find a better bunch of pigs than my own. The dams of the pigs I am offering for sale are by Clover Leaf Hero, he by Waneta Hub; Advance Boy, a full brother to Proud Advance; Jumbo Jack, Nero, Denver Jr., Reliance and other good boars. I prefer to have prospective purchasers visit and inspect my stock, and I never have any trouble to please buyers who look at my herd. Careful attention is given mail orders and I have never had a complaint from a pig shipped on mail orders in the eight years I have been in the business. I have many letters from appreciative buyers. My prices are low considering quality and breeding. I have lately purchased a son of Iowa Notcher, winner of first at Des Moines, Hamline and Sioux City fairs. He is out of a sow that was three times a winner. I also bought a pig out of a full sister to W.'s Choice, the sow that won first and sweepstakes at Sioux City in the two-year-old class. I will book orders for gilts bred to either of these boars at prices that are right."

Mr. C. F. Shaffer, of Wellman, Iowa, one of the leading breeders of Poland China swine and Short-horn cattle, writes that business is brisk, having made the following sales recently: Male pigs to D. E. Bush, Washington, Iowa; Godfrey Sommers, Kalona, Iowa; A. Faulkner, Wellman, Iowa; Louis F. Hess, Amana, Iowa; John Scheib, Wellman, Iowa; Middle Amana Society, Amana, Iowa; A. A. Aller, Keota, Iowa; Chris Bockhorst, Kalona, Iowa; L. J. Derby, Rubio, Iowa; W. D. Augustine, Keota, Iowa. Mr. Shaffer has on hands about forty head of March, April and May boars. They have good length, good hams and shoulders, are on short legs and have nice black coats of hair, with nice heads and ears. These pigs are sired by his two great herd boars, G.'s Perfection Jr. 89471, and Black Chief 99855. He also has a choice lot of young bulls, six to ten months old, all deep reds, sired by his prize bull, Laurel Knight. These bulls are of the low-down thick-fleshed kind, with well-sprung ribs, straight, level backs, with

fine heads and horns. Mr. Shaffer sold last week the six months old Scotch calf to Mr. Jno. Olinger, of Keota, Iowa. Mr. Olinger has secured a fine animal to head his herd, as he has the making of a show bull. Mr. Olinger has visited a number of herds and expressed himself more than pleased with his purchase. Write Mr. Shaffer for prices and pictures of his herd bull and boar.

Mr. B. C. Marts, of Polk City, Iowa, in furnishing copy for his Duroc Jersey sale advertisement which will be found on page 34 of this issue, writes: "The pigs that I am going to offer for sale are doing nicely and some extra good ones will be sold. The sale will occur on October 26th and the offering will consist of twenty males and twelve gilts, sired by such hogs as Keep On 2d, Proud Advance, Golden Rule, Col. Perfection, Model Jim, Joe Patten and Park Lad. Catalogs are ready and can be had for the asking."

On Monday, October 15th, Mr. Claud Huffman, of Scranton, Iowa, will make a public sale of forty head of Duroc Jerseys at his farm, five miles southwest of Scranton, Iowa. There will be twenty-two spring boars, sired by Larchwood's Echo 40415, and he will also sell this same boar in the sale. He sells ten spring gilts and a number of brood sows with litters. He has reserved the best for this sale and in fact has not sold anything out of the herd. Mr. Huffman is a young man who has gone out and has bought some of the top sows and, being a good care taker, he now comes forth with a crop of pigs that would be a credit to many of the older breeders. Cols. Luther & Son will cry the sale and will be pleased to handle any mail bids sent them.

Messrs. Isaac A. Novlinger & Sons, of Kirksville, Mo., write: "We have just completed thrashing for this year and have our granary bins full. Our crops are good, considering the dry weather we had this spring. Our hay crop was some lighter on account of the drouth, but made one and one-half tons to the acre; our oats thrashed out forty-two bushels to the acre of first class quality; our rye made twenty bushels to the acre, and our millet thrashed out thirty bushels to the acre. The millet was very heavy and will, we believe, make two tons per acre after thrashing. Our corn, all over the seventy acres, at least, will go sixty-five bushels to the acre. We call this pretty good for a dry season. Now if land that grows such crops in a dry season would suit some of your readers, let them come to see us at once, as we are advertising some of this kind of land. It is located adjoining one of the best towns in northern Missouri and for good schools this locality is surpassed by none. This is certainly a great advantage; let us educate the boys and girls, live close to a good market, have rural mail routes and telephones and good roads. This is in fact the garden spot of northern Missouri. A crop failure is unknown in Adair county. Now if any of the readers of this paper want good land at half what it sells for in Iowa or Illinois, quality and location considered, they will have to hurry, as procrastination is a thief of time. Our Short-horns and Poland Chinas never looked better. We have some very choice Cruickshank bulls ready to go to head some good herd. Write us your wants, if interested, or come and see us and do not fail to mention this paper." See advertisement on page 25 of this issue.

GOOD SHORT-HORN BULLS FOR SALE.

Messrs. G. P. Tyrrell & Son, of Oxford Junction, Iowa, are offering four good Short-horn bulls for sale on page 34. These bulls are splendid in conformation and are richly Scotch-topped. Three are reds and one very choice roan of the Nelly Bly or Lady Elizabeth family. Note the page and write them if interested. This firm are thoroughly reliable and will do just as they agree to.

PIONEER SHEEP BREEDERS.

Messrs. Daniel Leonard & Son, of Corning, Iowa, are pioneer breeders of Shropshire sheep, having bred them for over forty years. They have improved their flock from time to time by importing the very best rams from Canada and England. They always have a splendid bunch of rams for sale and can sell an excellent bunch of ewes. If you want a ram or a few ewes it will pay you to write these well-known breeders and kindly mention The Homestead.

REGISTERED STALLION AND JACKS FOR SALE.

On page 34 will be found the advertisement of Mr. L. Sheets, of Carson, Iowa, who is offering registered stallions and Missouri-bred jacks for sale. He has one Hambletonian and one Morgan stallion, and five jacks for sale, also a bunch of twenty-five good mares. He will trade these for land and would entertain a proposition for a registered draft stallion. Write him and mention that you saw the advertisement in The Homestead.

THE ONLY HOG AND SHEEP WATERER.

Now that winter is approaching is the time for farmers and breeders to think of stock waterers. One of the most simple, durable and reliable tanks on the market is the Only Hog and Sheep Waterer, manufactured by the Only Manufacturing Company, of Hawarden, Iowa. This waterer is guaranteed to run in freezing weather and the manufacturers say that they stand behind their guarantee. The waterer was shown at the leading fairs this fall and was pronounced by stockmen to be all that they claimed for it. Write the above firm for prices and testimonials.

BIG-BONED CHESTER WHITES.

Elsewhere in this issue will be found the announcement of Mr. A. A. Hummer, of Keswick, Iowa, who breeds the large-boned, lengthy, deep-bodied type of Chester Whites that is so much sought after by the leading farmers of the West who are endeavoring to increase the size of their swine. A Homestead representative recently inspected some of the Pioneer blood that is strongly represented in Mr. Hummer's herd and found that the Pioneer strain is one of the largest and most growthy that we have seen in the middle West. Mr. Hummer has an unusually large supply of pigs for this year's trade, of March, April and May farrow. Length, size, heavy bone, good, short heads, with short, stubby feet, are some of the prerequisites on which Mr. Hummer has laid great stress in building up his Chester Whites to their present

"MACBETH" is the sterling mark for lamp-chimneys.

You can't get a poor lamp-chimney with my name on it.

MACBETH lamp-chimneys fit, don't break from heat, and are so shaped that they get the most light from the oil consumed.

All lamp-chimneys break. Mine break only when they are dropped or knocked over.

My Index is free.

Address, MACBETH, Pittsburgh.

standard. Homestead readers in need of a Chester White boar of the above description can find it at a very reasonable price by addressing Mr. A. A. Hummer, Keswick, Iowa.

DISPERSION OF WOODLAND SHORT-HORNS.

Every reader of this paper interested in Short-horn cattle should look up the announcement of Mr. W. I. Wood, of Williamsport, Ohio, and send for illustrated catalog at once, kindly mentioning this paper. The catalog is profusely illustrated with photographs of many of the cattle to be sold and is worthy a place in every home. Plan to be present sale day.

BIG-BONED DUROC JERSEY FIGS.

On page 34 will be found the advertisement of Messrs. G. P. Tyrrell & Son, of Oxford Junction, Iowa, offering some exceptionally choice, large-boned, cherry-blond boar pigs and gilts for sale. The exceptional offering of Duroc Jerseys from this breeding establishment is worthy of investigation. This is unquestionably the best offering that this firm has ever been able to put on the market. They are using a boar secured from the Iowa Agricultural College which has proven a ten-strike on the Tyrrell herd. Farmers' prices only are asked. There are eighty head to select from. THE CHAMPION DUROC SALE CIRCUIT.

Four of the good Duroc breeders of Illinois, Messrs. McNeil Bros., of Bowen, Ill., Fagan, Browning, Hess & McCabe, of Hersman, Ill., Ed. A. Baxter, of Pawnee, Ill., and Fred Kraschel & Son, of Macon, Ill., have selected October 30th to November 2d inclusive, as the dates for their annual public sales. Each herd is headed by a prize-winning boar. Each herd consigns nothing but top stuff. Every reader of this paper interested in Durocs should arrange to be present at each and every one of these sales if in the market for choice breeding stock of either sex. In our issue of next week we will have something to say regarding each offering, but would advise our readers to write for catalogs at once, kindly mentioning The Homestead, and arrange to be present during the week of these noted sales.

HUNTER & SMITH'S JERSEY CATTLE.

Messrs. Hunter & Smith, of Beatrice, Neb., the prominent breeders of A. J. C. C. Jerseys have a new advertisement on page 41 in which they are offering young bulls got by Emanon, the champion Jersey bull at the Iowa State Fair and Sioux City Exposition last year and grand champion at National Dairy Show at Chicago, Ill., Iowa and Minnesota State Fairs this year. Here is an opportunity to get the blood of one of the greatest Jersey sires in America. The calves are out of imported and St. Lambert cows; all the heavy-milking stock and regular workers. A few females, cows and heifers, will be priced reasonably for the quality. No firm of breeders in America are in better position to furnish high-class Jersey cattle than are Messrs. Hunter & Smith. Write them, mentioning this paper if wanting either bulls or females. They have the goods and will take pleasure in showing their herd.

F. W. AKERS' SALE OF POLAND CHINA HOGS.

Mr. F. W. Akers, of Laurel, Iowa, will sell on October 16th, at the new pavilion in Laurel, a very select lot of Poland Chinas, some thirty-five head, on the same day of his Short-horn sale. We shall not attempt to enter into detail concerning this beautiful consignment of Poland Chinas further than to say that the very best and most prominent blood lines of the present modern Poland China will be found in this offering. We will dwell for a short time on the character of the present herd boars. One of them is O. K. Perfection, sired by Perfection Bloom, which is more than a half brother in the blood of Chief Perfection 2d. His sire was Chief Perfection; dam Lady U. S. 1. O. K. Perfection's dam was Cisco Lady by Illinois and he by Chief Perfection 2d. Another of the herd boars is Sunshine Chief by Chief Sunshine. Sunshine Chief's dam was Sunbeam's Gem, she by Black Chief and her dam by Chief Perfection 3d. The third herd boar is Harris' Perfection, a double great-grandson of Chief Perfection 2d and Ideal Black U. S. with a cross of Hands Up thrown in for good measure. There is a nice lot of young boars and gilts consigned to this offering. A number of the offerings are out of ancestors that have won prominent prizes, not only at the Iowa State Fair, but at the Omaha Exposition and other prominent shows. The blood lines of the sows from which these hogs descend are fully equal to the herd boars previously mentioned. Mr. Akers cordially invites the swine men to come early and review this stock in plenty of time so that they may thoroughly understand the offering, and he accords them that hearty welcome that all breeders of registered

stock extend to each other. The catalog will be sent on application by saying you saw this notice in The Homestead.

CHAMPION HERDS OF CHESTER WHITES

The Chester White herds of Messrs. Humbert & White, of Nashua, and New Hampton, Iowa, represent prize-winning stock at the leading state fairs of the year, as well as many years past. In another column in this issue will be found the record of their winnings at the Illinois State Fair last week. Naturally they took the lion's share of the premiums and have some extra good stock for sale, mostly sired by their herd boar, Combination. If you want good breeding stock it is well to buy from this firm, as they have shown successfully at the leading fairs for several years and in every case have taken the major portion of the premiums shown for. Write this firm at once for prices and descriptions, kindly mentioning The Homestead and watch for further particulars in our next issue. Their advertisement is on page 34.

JACKSON'S DUROC JERSEYS.

No breeder of Duroc Jerseys in this country has met with more success in the show rings than has Mr. Ira Jackson, of Tippicanoe City, Ohio. Readers of this paper are familiar with the prizes which this herd won at the Iowa State Fair. On another page of this issue will be found the report of the Illinois State Fair, where Mr. Jackson was again successful. One of the pleasant features of the show was the fact that much stock shown came from the herd of Mr. Jackson. On page 34 of this issue his announcement appears, in which he is offering forty hogs for sale by Orion Chief and Kruger and out of sows by Kant Be Beat, Chief Surprise and Col. Finch. If in need of an extra good boar related to prize winners at Illinois and Iowa State Fairs write at once to Mr. Jackson as per the advertisement, kindly mentioning The Homestead. Further particulars regarding this good herd will appear in later issues.

MANLEY & CO.'S DUROCS AT ILLINOIS STATE FAIR.

On page 10 of this issue will be found the report of the Duroc show herd at Illinois State Fair last week. One of the best exhibits on the ground was that of Messrs. M. H. Manley & Co., of Lyons, Neb. Breeders were much pleased with stock shown by this firm on account of the size and bone combined with the quality which has made this herd famous throughout the entire country. While the judge did not as a rule favor this type, the breeders present were unanimous in expressing their opinion in praise of this herd. Duroc breeders should follow the example of Messrs. Manley & Co. and strive to secure size and bone and quality. On account of the recent floods the day preceding their sale Messrs. Manley & Co. now offer for sale the entire lot as cataloged, which includes a number of sows bred to Junior Jim, the second prize boar at Iowa State Fair. Visit this noted herd and make your selections.

HIGH CHIEF DUROC SALE.

Readers of The Homestead interested in Duroc Jerseys will do well to secure the catalog of the High Chief Duroc sale, of Mr. H. E. Watson, of Edinburg, Ind. High Chief was a prize winner at the World's Fair and is a son of Ohio Chief, one of the best hogs the breed has ever produced. Mr. Watson has selected for this occasion twenty fall yearling sows sired by this great boar; five spring yearling sows and four fall boars by High Chief; one yearling sow by Sure Winner, four spring boars by Top Nother Chief, and a few select yearling sows and boars by American Chief and Harrison Chief. We take pleasure in recommending this lot of hogs to our readers. The opportunity should not be overlooked to secure the blood of the noted High Chief and breeders throughout the middle West will do well to secure one or more of this lot of High Chief yearlings as attractions for their brood sow sales. Bids sent to Mr. D. M. Pierce, representing this paper, in care of Mr. Watson, will be properly handled. Write for catalog at once as per the advertisement on page 38 of this issue, kindly mentioning The Homestead, and arrange to be present at Edinburg, Ind., on Saturday, October 20th.

LAST CALL FOR G. VAN PATTEN'S DUROC SALE.

"Down where the good ones grow," was our head line to a field note last week and we headed it that way simply because it was the fact about this gentleman's herd. He grows the good ones at Sutton, Neb., and on October 18th you will have an opportunity to inspect as strong a lot of Durocs as this veteran breeder has offered in any sale. He has selected some choice hogs of spring farrow sired by such noted boars as Billy K., Beauty Wilkes and a few by a son of Billy K. The Billy K. got won fourteen ribbons at the Nebraska State Fair this fall and some of these will be included in the sale. About as choice a sow, or rather gilt, to be offered is No. 34 in catalog. She was sired by Billy K. and out of Miss Morton 1st. She was second at Iowa State Fair this year and her litter sister, No. 35, was also a winner at Nebraska with No. 34. Both are choice gilts that are worth long prices. They are the kind that go out and raise good litters and then fit readily for the fairs. These two gilts should bring good money and should be purchased by some up-to-date breeder who will give them the care they deserve. Mr. Van Patten has them in good condition and they should be treated so for future good. Nos. 38 and 39 are two litter sisters that are good. They are sired by Billy K. and out of Lady May. In the boar lot we find No. 1 marked as a winner and the deed was done at the Iowa State Fair where a strong class was exhibited. He was sired by Beauty Wilkes and is possibly the best boar included in this sale. You can imagine what he is if he was good enough to win at Iowa. Several other choice boars sired by Beauty Wilkes are included in the sale. You can rest assured that you will get your Durocs in the best of condition and as to reliability of the breeder we need not speak as every breeder as well as farmer who reads has heard of this well-known herd

of Durocs. His hogs have won recognition wherever shown and we believe his herd is as strong as any in the state today. The writer inspected the herd recently and was very much surprised to find his sale stock in such good condition. They are just right to go out and do the buyer good. One of the bargain sales will be the one mentioned and one of the snags will be the two-year-old boar sired by Forty Kings. This hog should go into some good herd. He will please anyone looking for a large, roomy fellow. Look him up in the catalog and see what Mr. Van Patten says about him.

THE BIG TYPE OF POLANDS.

Mr. J. T. Elerbeck, of Beatrice, Neb., has as choice a lot of pigs as you will find in any herd. These pigs have bone and growth galore. If you want a herd boar from large, roomy sows and sired by Logan B., he by the great Logan Chief, you should write Mr. Elerbeck at once. He also has some choice ones sired by a son of King Do Do. We believe this herd to have as strong an offering as you will find any place in way of good herd headers. It is worth your time to write for prices. You can buy them worth the money as well. Look up his advertisement on page 43.

SPECIAL PRICES ON POLAND CHINA BOARS.

On page 43 will be found the advertisement of Dr. H. Pritchard, of Wisner, Neb., who has 100 head of extra good Poland China hogs for sale. These are sired by Big Tom 2d, his 1,000-pound boar; Wisner Chief, one of the best sons of Chief Tecumseh 3d; Perfection Keep On and Black Joe. These hogs are the kind that have size and finish and are a splendid lot of well-developed fellows. The largest will weigh about 175 pounds and all are spring hogs. The doctor has over 300 head on hand and he can furnish a car load of hogs and sows or he can furnish a car load of each and he will make it an object to the man that will take them in bunches. We know of no place where a man can get a better bargain than of Dr. Pritchard. He has a grand lot of good brood sows in his herd and he has as good a bunch of hogs as will be found anywhere. It will pay anyone who is wanting a boar or a bunch of hogs, or a few good sows to call and see him at once. This offer is good only for the next thirty days.

O. I. C. PRIZE WINNERS AT AUCTION.

Breeders of the O. I. C. hog who are hunting material to add to and improve their herds should remember the O. L. Kerr sale to be held at Independence, Mo., on Friday, November 2, 1906. Mr. Kerr, by his energy, his study of the breed and his desire to promote the white hog industry has done as much for the breed as any one man in America. He is one of those men who realize that there is room at the top, and were there more men like Mr. Kerr breeding the O. I. C. it would not be long before we would see as many O. I. C. hogs on the farms of the Missouri valley as we see of the other breeds. Some say the O. I. C. does not do as well as others breeds, but there is where they make a grave mistake. Take a trip to Mr. O. L. Kerr's, at Independence, Mo., on November 2d, and he convinced that the O. I. C.'s bred by him will grow to as many pounds in the same number of days as will any of the breeds and under no more favorable conditions than are found on other hog farms of America. The writer has, within the past two years, made several trips to Mr. Kerr's farm, and the improvement in the O. I. C.'s seen there show that Mr. Kerr understands the breeding business. The blood of the World's Fair winners has been intensified, more quality is seen and the size and prolificness have been maintained to a degree that is most pleasing. At the Missouri State Fair last week Mr. Kerr exhibited about twenty head. More honors were added to his already good winnings, and this week these same hogs will be shown at the American Royal, and next week we will give the

WANTED

THE NAME OF EVERY PERSON WHO OWNS A HORSE

WHAT is out of condition or sick. If you have one that won't eat well, has distemper, or a cough, has become lifeless and lacks "go," looks bad, or has anything wrong with him, we want the chance to cure him for you. Just write us, telling what's the matter and we will send you a bottle of

GRAY'S TONIC PREVENTIVE FREE

On trial. Use it all and if it fails to benefit, it won't cost you one single cent. We mean this and our guarantee is as good as a gold bond. If it does improve your horse's trouble, you pay us after you are satisfied of it. Isn't that fair? Write us about your horse. You don't have to buy. We will tell you free what to do for him. living sire. Morrison's Bell Top comes in for his credit as he will have some choice ones in the sale that are really good. This hog is out of the great Nebraska Belle. There will be several related to the great Crimson Wonder and some sired by Pericles. The offering will be far stronger than any previous offering sold by this firm. The sows included

A richly bred Cruickshank Victoria cow and heifer calf included in the dispersion sale of C. E. Townsend, Anita, Ia., October 25th.

PILES

FISTULA--NO MONEY TILL CURED

L. T. Brooking, owner of grain elevator, Funk, Neb., writes under date of August 22, 1906: "I suffered for 20 years with severe rectal troubles; was operated on by specialist, securing only temporary relief. My case was ulceration, fissure and contraction. The cure at your institution was complete, and I have no fear of a recurrence of the trouble."

All diseases of the rectum treated on a positive guarantee and no money accepted until patient is cured. Send for free 352 page book, a treatise on rectal diseases and hundreds of testimonial letters, valuable to anyone afflicted. Also our 132 page book for women. Both sent free. are of fall and spring farrow and the fall sows are good, strong individuals with plenty of size and quality and lots of good color. Tho gilts have made a very good growth in the last few weeks and today they are looking their best. One of these royally bred gilts bred to Kant Be Beat would figure out something on the sensational order if the dope is correct. The sale will be held at the farm on the Street Car line, cars leaving Lincoln every forty minutes. Headquarters at Hotel Royal, located at Fifteenth and O streets, Lincoln, Nebr.

GOOD FIRE-ARMS.

On page 3 of this issue will be found the advertisement of the Marlin Fire-arms Company, of New Haven, Conn. This company make a rifle weighing three pounds eleven ounces, with a twenty-inch barrel, which sells for \$12.50. Their rifle with a twenty-inch octagon barrel sells for \$13. Their twelve-gauge, take-down, twenty-six, twenty-eight, thirty or thirty-two inch barrel, six shots, weight six and seven-eighths to seven and a quarter pounds, sells for \$38.50. This is a heavy barrel of special smokeless steel and is of the very finest quality obtainable. Some neat folders have been prepared by this company illustrating and describing their rifles. These will be sent on application. Address the Marlin Fire-arms Company, New Haven, Conn.

SECKMAN'S CLOSING OUT SALE OF DUROC JERSEYS.

One of the most important Duroc Jersey sales of the year is that of Mr. Geo. W. Seckman, of Ripley, Ill., which will be held on Wednesday, October 24th. The reputation made by this herd is too well known to comment upon. Everything goes, as Mr. Seckman has determined to close out his entire herd. This gives to breeders of the central West an unequalled opportunity to secure the best this famous herd affords. It is only in dispersion sales that breeders are given the opportunity to secure the brood sows and herd boars which have produced the kind of stock which have made this breed famous. Mr. Seckman refused tempting offers for some of his brood sows, but solely because he had determined that once he advertised a closing out sale he would not sell his best sows and offer breeders the culs. Mr. Seckman says the following of his herd in making announcement of this sale: "The Gold Dust herd has shown through our great State and World's Fairs for the past twelve years, and made a record that will stand as a towering monument for it. At the great St. Louis World's Fair in the best show ever seen of the breed, where I met all the best herds in America and in open competition with those herds, I won on eight head of hogs twelve prizes, including champion boar and grand champion on Tip Top Notcher, that recently sold for \$5,000, and champion herd of Illinois—a record never equaled by any breeder in America." Two herd boars, Ohio Chief 2d, a son of the noted World's Fair boar, Ohio Chief, and Silkworm, a son of Oom Paul 2d and out of Dotie, the grand champion sow at the World's Fair should interest all breeders in search of herd boars of show-yard type and individuality. In our next issue we will have more to say regarding this noted sale. If you are not on Mr. Seckman's mailing list, write at once for catalog and plan to be present at this, the most noted Duroc dispersion sale of recent years. A special train, after the sale

of Mr. T. E. Laurie on Tuesday at Jacksonville, Ill., will give breeders an opportunity to get to Mt. Sterling the evening before the sale. Bids sent to Mr. D. M. Pierce, representing The Homestead, will be properly handled if breeders find it impossible to attend in person. Get catalog at once. It tells the story. Mention Homestead when writing.

F. A. KRUSE HAS CHOICE DUROCS.

On page 47 of this issue will be found the advertisement of the above named gentleman located at Waco, Neb. Mr. Kruse has recently purchased a new herd header to assist in the herd. This pig is sired by Chief of Chief and out of Gold Dust Beauty. Golden Chief is one of the good ones found at the state fair this fall. Mr. Kruse has such blood as Improver 2d, Teddy R., Jay's Perfection and Lucky Boy represented in his herd. He is pricing his hogs worth the money and you will find bargains. Write him today.

THE NORTHERN NEBRASKA DUROC JERSEY SALE CIRCUIT.

The opening gun in the Northern Nebraska Duroc Jersey sale circuit will be fired at the home of Messrs. M. S. Moats & Son, of Randolph, Neb. This firm was out at the fairs for the first time this year and the way they went after the ribbons was an eye opener to some of the old timers in the show ring. Their offering will be very largely sired by Duroc Challenger's Wonder, a son of old Duroc Challenger and a winner at both the Nebraska and Interstate fairs this year, and by Crimson Critic, a winner of second prize in the yearling class at the Nebraska and third at the Interstate fair this year. He is a son of the noted prize winning boar, Glendale Critic, also a leading winner at the Iowa and Nebraska State Fairs and also at the Interstate fair in 1905. Another boar used in the herd and the sire of some of the stuff in the sale is Chimes Advance, a son of the noted boar, Proud Advance. It will be an offering throughout such as has never before been made in this section of Nebraska and it will pay the best breeders to attend their sale. Among the number that they are selling is a matured sow called Beauty Moats with a litter by Chimes Advance, and there will be two other good sows with litters in the sale and seven matured sows will be sold, open. Here is a good chance to get some good sows at the buyer's price. Some extra good fall boars will be offered for sale, and will doubtless find ready sale, as yearling boars are scarce and the demand for this class seems to be growing each year. One dandy fall boar that should go to head some good herd is by Cherry Boy, by Oom Paul's Baby by Oom Paul, and the dam of this pig is Young Edith by Orion. Here is breeding to suit any one and the boar is as good as his breeding would indicate. We will tell you more about him next week, so don't forget him. The spring boars are a uniform, growthy lot, and some of them will make herd headers of the first rank.

MILLER AND BLACK, AT RANDOLPH, OCTOBER 17TH.

Into this combination sale will go some very good spring and fall Duroc Jersey boars, as well as some good, useful sows. Most of the pigs in Dr. Miller's offering are sired by Duroc Jim, a grandson of old Orion. This is a smooth, well-made boar, and has sired some good stuff for Dr. Miller. Another good boar in use is Long Challenger by Duroc

Challenger's Redeemer, and several litters by this boar will be sold in the sale. Two good fall boars by Duroc Jim and out of Medina II, by Duroc Reformer are worth looking up. They are Nos. 25 and 26 of the catalog. Three good yearling boars are sired by Ponca Valley Chief, a son of Red Chief I Am. This is something good, and the dam is by Liberty Boy, a Bowman & Fletcher-bred boar. Look these up on sale day. Some good spring boars are by Duroc Challenger's Wonder, which was a prize winner at Lincoln and Sioux City this fall. At the head of Mr. J. W. Black's herd of Durocs is the good boar, Critic's Wonder by Glendale Critic. His dam is Moat's Choice by Gold Dust Jim. This is surely the best of breeding, and the boar is a splendid individual. Look him over carefully on sale day. Mr. Black has a dandy litter of Junior Jim pigs and he is putting in four boars that are hard to beat. They are sired by Junior Jim and have for dam Lady of Mt. Pleasant by Orion. These pigs are good enough to go into any herd and should not be forgotten. A dandy March boar by Chimes' Advance and out of Daisy Profit by Dandelion, will go in the sale. There is also included a good spring boar by Stut's Wonder. This sale will be a splendid opportunity to buy some of the best stuff at a fair price, and we urge our readers to write for a catalog and attend this sale.

THIRD DAY AT W. C. HOLMES' ORMOND, NEB.

On Thursday, October 18th, Mr. W. C. Holmes will sell a draft of thirty-five spring and fall boars from his herd headed by Duroc Challenger's Redeemer. This boar is a son of Duroc Challenger, as his name would imply, and he shows many of the traits that are common to the sons of the old sire. He has great spring of rib, a splendid arched back, a full ham and heavy bone. He is very smooth on the sides for so large a boar, and has a very neat head and ear—much better than is usually found on a herd boar of any breed. Another good boar assisting this one in the herd is by Young Orion, and has for dam Lady Kruger by Long John. The dam of Lady Kruger was Kruger Belle by Red Chief I Am. This is certainly breeding to suit, and this ought to make a good herd boar. Mr. Holmes will offer six head of fall boars, mostly sired by Stut's Wonder, a boar formerly owned by Mr. Holmes. Look up these fall boars when you go to the sale. Mr. Holmes will also sell a good lot of spring boars in this sale.

LAST CALL FOR THE F. A. SCHAEFER & SON'S SHORT-HORN SALE.

At Raleigh, Iowa, on October 17th, Messrs. F. A. Schaefer & Son will sell a draft of fifty head of Scotch and Scotch-topped cattle, and it will be an offering that any of our breeders can make good selections from. In previous issues of this paper we gave in full detail the breeding of many of the cattle that will go in this sale, and we believe that those who are interested have already secured one of their catalogs. It is not out of place, however, to call the attention again to the imported cow, Cella 9th, and Duchess of Gloster 47th, that will be sold in this sale. Besides these there will be a number of richly-bred Scotch heifers and some very good cows. The Scotch families will be best represented by the Duchess of Gloster, Orange Blossom, Gwendoline and Miss Ramsden families. There

will be about ten bulls in the sale, among which will be one of their Scotch bulls, Bridal Archer and a son of Choice of Archers. The latter is red in color, of the low-down, blocky, thick-fleshed sort, and is a bull that will meet with considerable favor with buyers on that occasion. If you have not already sent for a catalog do so at once and mention The Homestead when writing.

SONNELAND SELLS DUROCS OCT. 13.

The get of the famous World's Fair sweepstakes winner, Tip Top Notcher will be sold in the sale of August Sonneland at Harlan, Iowa, on October 13th. He also sells the get of Tip Top Notcher Chief 2d and Fancy Orion Chief. The Duroc Jersey breeder who has been in search of this famous strain can now get it near home instead of going away back East, and there will be abundance of it in the Sonneland sale. He will sell Tip Top Echo, a yearling boar by the great Tip Top Notcher, and a boar that has been used at the head of his herd. Mr. Sonneland has reserved so many daughters of this boar that he is compelled to sell him. He is a good breeding boar and some enterprising breeder will have an opportunity to pick up a well bred hog in this sale. Last winter Mr. Sonneland went East and secured some of the very best sows bred to Tip Top Notcher and that is how he now happens to have boars for sale by this famous sire. If you want some of this noted prize winning blood it will pay you to go to the Sonneland sale at Harlan, Iowa, on October 13th.

LAST CALL FOR THE WEHR DUROC JERSEY SALE.

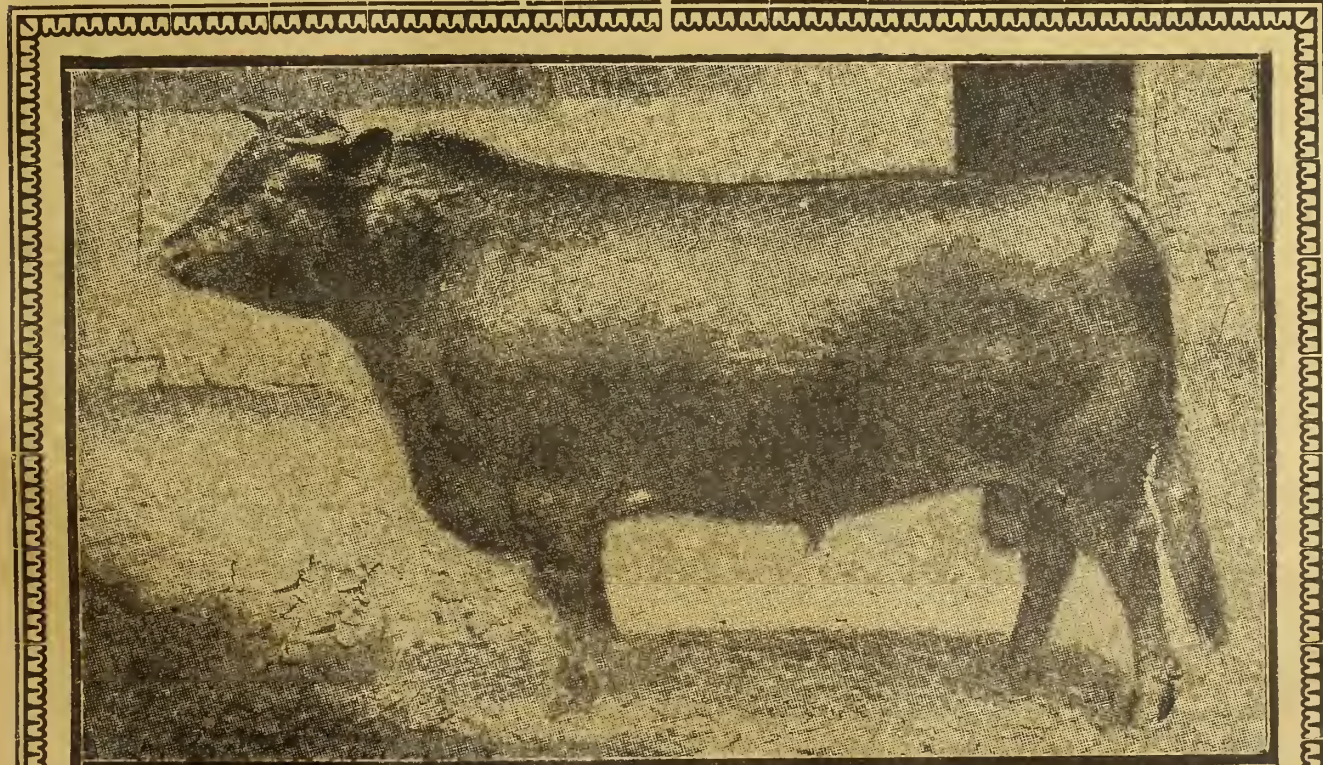

Forty head of Duroc Jerseys will be the number that Mr. J. E. Wehr will sell in his sale at Portsmouth, Iowa, on Saturday, October 20th, and these will be the cream of this year's crop. Everything has been reserved for this sale, so that those who attend will have an opportunity of securing the tops of his herd. There will be twenty-five spring boars in the sale, fifteen gilts and a few good brood sows, some of which will have litters. He will sell Proud Advance Again, the boar that won first at Minnesota and third at the Interstate Fair, and he will be the kind that many a breeder can use in his herd. He is one of the most finished boars ever sired by old Proud Advance. All of the good things that Mr. Wehr showed at the fairs this fall will be included in this sale, and among the number will be some that are good enough to go anywhere. Mr. Wehr has been a good buyer and a good helper at many of the best sales and he hopes to have a good representation of breeders at his sale. Remember the date, October 20th, at Portsmouth, Iowa, and be sure to attend this sale.

SONNELAND'S CLOSING OUT POLAND CHINA SALE.

On Saturday, October 13th, at Harlan, Iowa, Mr. August Sonneland will close out his entire herd of Poland Chinas, composed of herd boars, brood sows and fall and spring boars and gilts. His herd boar is Tip Top Dude, a son of the noted boar, Winning Dude, first-prize hog at the Nebraska State Fair in 1904. This boar was shown at the Pottawattamie county fair in 1905 and won first, and also won second at the Shelby county fair, where will be found one of the best shows in the state among the county fairs. He is the sire of a great deal of the young stuff that will be sold in the sale. There are five litters by Hamilton's Perfection, a boar used in the herd of Mr. John Cox. This boar is a half brother to the great Mischief Maker, G's Perfection, Perfect Perfection, the sire of Keep On, and other noted hogs. He will also be sold in this sale to close up a partnership. There will be a Standard Chief 2d sow in the sale and a couple by Perfect I Know. Mr. Sonneland will hereafter devote his entire attention to the breeding of Duroc Jerseys, and therefore everything in the way of Poland Chinas will be disposed of. There will undoubtedly be some good bargains in this sale, because he never spared the price when laying his foundation for a herd.

MAHR'S POLAND CHINA SALE.

On Saturday, October 20th, at Corning, Iowa, Messrs. G. H. & J. L. Mahr will sell fifty-six head of Poland China boars, gilts and brood sows with litters, and we would call the attention of those who are wanting size and bone to this sale. There will be two tried yearling boars in this sale. One of these is Mahr's Perfection, a double grandson of Chief Perfection 2d. He is a boar with abundance of quality and is a good breeder. They are selling him because they are retaining his gilts. He is good enough to go to the head of most any good herd. The other yearling is Mouw's Chief, a son of Orange Chief by Chief Price and out of a daughter of Wonder 2d. In him we have one of the big kind, a wonderfully long hog with plenty of bone and a hog that will easily weight 900 or over when matured. He is thin in flesh just now, but the breeder who is looking for a big one will be able to get him in this hog. He traces in all his crosses to the big strains of Poland Chinas and therefore will fill the bill of a great many who are now wanting that kind of a boar. The boars and gilts are sired by Ideal Perfection, a son of Big Perfection, the boar that formerly headed the herd of Mr. Harvey Moats, at Villisca, Iowa; Move On 2d, a son of old Move On, and the two yearling boars referred to above that will be sold in this sale. There will be three daughters of Big Perfection in the sale and daughters of this well-known hog have always been in demand in this section of the state, because he was one of the best boars that has ever been used in southern Iowa. One of these sows is Queen Perfection and she is one of the best that has ever been in their herd and she is good enough to go into any herd. She will be sold open.

VICTORIA'S PRESIDENT 208996 OF MAINE VALLEY.

This noted Victoria Cruickshank bull heads the herd of Messrs. McKeever Bros., of Farley, Iowa. He was bred by Messrs. Jordan & Dunn, and is by Prince Nonpareil; dam, Victoria 87th by Imp. Craven Knight. His second dam was Imp. Victoria 81st by Gondolier; third dam, Victoria 77th by Dunblane. He is a bull of exceptional fleshing qualities and splendid scale. He was weighed when three years and eight months old and tipped the scale at 2,330 pounds, being then in just good condition. He has proven himself an exceptionally good breeder. Messrs. McKeever Bros. are now offering some extra good young bulls just turned a year old and sired by this herd header. Also a few cows with calves at foot or in calf to this bull.

There are several other good brood sows in the offering and some very choice gilts. The fall boars are good, growthy, heavy-boned, lengthy fellows, full of vigor, and the man that wants a hog that will get him an abundance of pigs will be able to get what he is after in this sale. They are also putting in the tops of their spring boars, so that anyone who wants a spring pig can get them in this sale. Write Messrs. G. H. & J. L. Mahr, Corning, Iowa, for catalog and then go and attend the sale.

DR. ALEXANDER ON HOG CHOLERA.

A new treatment for hog cholera, first suggested by Dr. A. S. Alexander, Professor of Veterinary Science at the University of Wisconsin, has proved successful in some cases reported from the West. It is being given a thorough test by a number of those interested in securing a remedy for this fatal disease, which appears to be quite prevalent this season. The treatment recommended is to use a solution of zenoleum as a rectal injection, while giving the affected hogs, or those which have been exposed to the contagion, a certain amount of full strength zenoleum in their feed. Of course good sanitary conditions, the rigid quarantining of affected animals, and a diet which will aid in restoring the digestive organs to a healthy condition, form an important part of this treatment. If you are raising hogs, write the Zenner Disinfectant Company, 31 Lafayette Ave., Detroit, Mich., for particulars regarding this treatment, which will be sent free to all applicants. Better do this at once so as to be prepared for emergencies, and stamp out the disease before it has a good start in your herd. See advertisement on page 15.

H. S. CHAPMAN'S GOOD OFFERING OF POLANDS.

On October 23d, Mr. H. S. Chapman, of DuBois, Neb., will sell about fifty choice Poland China pigs of March farrow. These have been inspected by a representative of this paper and we can say that we found them not wanting in any class. He has the large, roomy type with plenty of size and quality. They have strong backs, good heads and ears, good feet and bone. The boars are an exceptionally good lot to see. They are such as sell for themselves on sight. The strong sire, King Do Do by Expansion and out of Me Over Orion, is a hog of good size and well proportioned. The majority of the offering is sired by King Do Do. Some choice ones are sired by Long Fellow by Johnson's Chief. The hog was well named, owing to his extreme length and size. His pigs are very good. Mr. Chapman can be reached from Pawnee City or DuBois, Neb. The sale will be held at his farm. If you want good Nebraska Poland Chins try and attend this sale. The catalog is now ready. G. W. Segrist will attend this sale and any bid entrusted to him will be honorably handled. See page 35.

OVERHOLSER SELLS DUROCS OCTOBER 16TH.

The second day of the circuit, October 16th, is when Mr. L. L. Overholser will entertain the breeders and farmers at his farm near Diagonal, Iowa, with the best bunch of Durocs that he has ever offered at public sale. Mr. Overholser always sells good Durocs, but he never had such an offering, breeding and individuality combined, as will go through his sale ring on the above date. He will not make a brood sow sale, and therefore the cream of his boars and sows will be sold at this time. There will be a splendid litter by that noted boar, Proud Advance, and they have been well grown out, consequently will make desirable stuff to buy. He will have quite a bit of the get of Ring-leader and King Walnut in the sale. These two herd boars have been good sires in the Overholser herd and some of the highest priced stuff in his last sale was by these two boars. He will sell King Walnut in this sale. He is a son of the great sweepstakes boar, Improver II, and he is good for several years' service yet. There will be several Ringleader sows in the sale, also a nice litter by the old Iowa State Fair sweepstakes boar, King Perfection. There will be spring boars in the sale by Proud Advance Jr., Chicago Boy and Tom Watson Jr. All in all it is the best offering Mr. Overholser has ever made. Write for his catalog and mention The Homestead.

HECTOR COWAN'S SALE.

The fourteenth annual Short-horn sale of Mr. Hector Cowan will be held at his farm, near Paulina, Iowa, on October 23d. He sells forty head in this sale, twenty-three of which are Scotch cattle. The name of Hector Cowan has long since been identified with the very best of Short-horn cattle, and from his herd has come many of the best things that now hold prominent places in some of the most noted herds in the United States. His coming sale will be no exception to the rule, and he freely admits that he has never sold a better lot of Short-horns than he is putting into this sale. There will be thirty females and ten bulls in the offering. Eight of the bulls are straight Scotch. The Scotch families are represented by Miss Ramsden, Brawith Bud, Secret, Mysie, Undine and other Scotch tribes. There will be about ten daughters of Imp. Nonpareil in the sale. As a special attraction he has consented to put in Imp. Patience and Imp. Miss Law. The former is a low-down, blocky red cow, full of quality and good enough to go into a show herd next year. As an individual she is hard to beat. She is four years old and is in calf to Imp. Nonpareil. Miss Law is a large, broad-backed roan, and one of the best cows he has ever had in his herd. As attractions these two cows are hard to beat and no man will go wrong in buying them. The females will all be bred to Imp. Nonpareil, the bull that has stood at the head of the Cowan herd for several years, also to Anoka Archer, the young bull recently purchased of Mr. Frank Harding, and a full brother to the \$5,000 champion, Ceremonious Archer. He is putting in some likely young bulls. One of the best of these is a son of Victoria Baron and out of a daughter of Mysie's Chief. He also puts in a well-bred Mysie bull, a son of Aberdeen Chief. The offering is a good one, both from the standpoint of breeding and individual merit. The cattle have been on grass

all summer and fall, but they are in nice condition. In fact they are in much better condition than cattle usually are when not especially fitted for sale. Write for catalog and mention The Homestead.

THE MILLER POLAND CHINA SALE.

On page 34 of this issue is the initial announcement of the public sale of Poland China males to be held at Brooklyn, Iowa, on Wednesday, October 24th, being the property of Messrs. J. L. Miller & Son. This is the second Poland China sale held by these gentlemen, their first occurring last February, which was a decided success. The offering on October 24th is pronounced by Messrs. Miller & Son to be as good as any that will go in the sale ring this season. They have selected twenty fall pigs and twenty spring pigs, representing all the leading strains of the breed, and the boars are the kind the breeders have been asking for. They are a good, growthy lot, are in good breeding condition and there is not a pig in the bunch that is not right up on his toes, with extra good back and nice, glossy coat, which all breeders like to see. There are individuals in this lot good enough to head any herd, hogs that will make prize winners in the right kind of hands. Messrs. Miller will guarantee every pig to be a breeder with proper care. They sold thirty-two head last year, every one of which proved to be a breeder. There is not a poor-backed or poor-footed animal or an undesirable hog in the entire offering of forty head. Write for their catalog, which will be out about October 15th.

Z. I. GROUT'S DUROC JERSEY SALE.

One of the best offerings that will be made in the Southwestern Duroc Jersey sale circuit will be that of Mr. Z. I. Grout, at Tingley, Iowa, on October 17th. The boys should by all means arrange to attend the Grout sale, because he has an offering that is not only a credit to himself, but is also a credit to the Duroc Jersey breed. He is selling forty head in his sale, consisting of thirty-two sows and eight boars. If the boys want tops they will get them here. There will be ten crackling good Proud Advance sows in the offering, also seven choice gilts by the great state fair boar, Perfection Chief. There will be a Proud Advance spring boar in this sale that is one of the best males ever sired by that noted old boar. There will also be some good boars by Perfection Chief out of May Janice, winner of third prize at Des Moines in 1905. The Proud Advance sow that he showed at Des Moines and the one that took the eye of the breeders is looking better than when he showed her and she is a sow that would fit well in any herd. The offering in general is among the very best that will be sold this fall, and there will be things in his sale that breeders can double their money on. The boys cannot afford to miss the Grout sale, especially if they want the good ones. Write him at once for catalog and be sure to attend the sale.

REECE'S SHORT-HORN, CHESTER WHITE AND SHROPSHIRE SHEEP SALE.

On Monday, October 22d, at his farm near Prescott, Iowa, Mr. L. C. Reece, one of the best-known breeders in southern Iowa, will make a sale of twenty-four head of Short-horn cattle, forty head of Chester White hogs, and twelve head of Shropshire sheep. There will be seven young bulls in the sale, including the pure Scotch bull, My Choice. He is a son of Vermont, a bull bred by Mr. C. C. Norton and out of Imp. Carnation, the best cow in the Reece herd. This cow was imported by Mr. M. H. Cochrane, of Canada, and she was the highest-priced cow in the McAduff herd in 1904. This young bull has a right to be good and he is certainly bred in the purple. He is a good individual and is in nice condition. He should go to the head of some good herd and we hope that there will be enough breeders at the sale to look after him. A large part of the offering is sired by Vermont and represents such families as Ianthes, Josephines, Young Marys, Rose of Sharons and Dalmies. The cows will be bred to Sarcasm's Count, a son of Imp. Count Violet, and he is as richly-bred a Cruickshank bull as is to be found in the state. There will be several other young bulls that will be appreciated when sale day arrives. Some of the cows will have calf at foot. Mr. Reece is putting up a good offering of cattle and he says that he will not sell an animal in this sale that he does not know to be all right. He will sell forty head of Chester Whites, and the reputation of his stock and his herd stands second to none in this country. He has been one of the foremost showmen and has made all the leading state fairs, and he never fails to get his share of the ribbons, besides a few that the other fellow was looking for. Mr. Reece has possibly won as many ribbons on his Chester White hogs as any other breeder that shows at the Iowa State Fair. Speaking of his old hog, Prescott Boy, he says: "This is, I believe, one of the best two-year-old Chester White boars living—a large, massive fellow, with style and finish, has fine head and ear, good back, well-sprung rib, and has proven himself an excellent breeder, stamping his uniformity on his offspring. Buy a gilt or young boar sired by him to add to your herd; it will add value as well as quality. He was never equaled in the show ring, winning three grand championships last year and was the champion boar at the Iowa State Fair. A look at him sale day will convince any Chester White breeder that he wants some of his get." He is selling a grand lot of young boars in this sale; also some very choice gilts, and some very superior brood

sows. There will not be a Chester White in the sale that is not a prize winner or sired by a well-known prize winner, and it is an offering that is seldom made in the West. He will also sell twelve head of Shropshire sheep, nearly all descendants from an imported ram and an imported ewe. As Mr. Reece is closing out his flock of sheep it will be a good place to go and get a few well-bred Shropshires. He will be pleased to send his catalog to all those who ask for it. When writing kindly mention The Homestead.

LAST CALL FOR ISAAC'S DUROC SALE.

At Red Oak, Iowa, on October 17th, at the Stover Feed Yard, is where Mr. T. H. Isaac will sell a draft of fifty-five head of well-bred and exceptionally well-developed Duroc Jersey boars and sows. If there is any man that is entitled to a good sale, it is Mr. Isaac, and if there is any man that we would like to see have a good sale it is this same breeder. He is a man that never goes to another sale that he does not do some good and he is not a stingy bidder when he bids. However, it is not on these grounds alone that he is entitled to the patronage of those who are wanting Durocs, but it is because he has the kind of Durocs that the farmer and breeder is looking for. His present offering is sired by the following boars: Robert H. by Pilot Jr.; Belle's Red Chief, a son of Red Chief I Am and out of the great brood sow, Nebraska Belle; Educator, a son of Indicator; Hardy's Improver, a son of the sweepstakes boar, Improver II; Brighton Wonder, a full brother to the great Crimson Wonder, and a few by other boars. A representative of The Homestead has seen the Isaac offering and we take pleasure in urging farmers and breeders to attend the sale. We will assure them that not a man will be disappointed with his offering. As a feeder and a grower of pigs he has few equals and his pigs have plenty of stretch and lots of bone. He is putting in the best he has, several of which he has shown at the fairs this fall and won premiums on. Write him for catalog and kindly mention The Homestead.

HUMBERT'S PERCHERONS.

On page 34 of this week's Homestead will be found the advertisement of Messrs. L. H. Humbert & Son, of Corning, Iowa, one of the best-known horse importing firms in the state. Their twenty-seventh importation of Percheron horses arrived direct from France about the middle of September and they brought over some two, three and four-year-olds, as good as have ever crossed the waters. They are nearly all blacks, one or two splendid grays being among the number. The junior member of this firm always selects his own horses, and being a native of France, does not need the service of an interpreter. They are therefore enabled to save this expense and in turn are able to give the buyer the benefit. They have about eighty head of stallions and mares on hand and there are some among this number that are hard to beat. There is no better judge of a Percheron in America than Mr. Humbert and no man has more advantages, nor knows more about where to buy than he, and when it comes to selling a horse he can offer inducements that cannot be duplicated elsewhere. They have endeavored to always keep a high class of stallions on hand. They select horses with good bone and good action and have a number of ton horses now in their barns and several that will make a ton and over when they are matured. They also have a few stallions on hand that they bred themselves and they can price these right. They have a few good mares on hand that should be seen to be appreciated. If any of our readers want a good Percheron stallion or mare they should by all means go and see the Humbert horses.

LAST CALL FOR JONES' ABERDEEN ANGUS SALE.

One of the best Aberdeen Angus sales that is to be held in the near future is that of Mr. W. H. Jones, of Quimby, Iowa. The sale will be held at his farm about three miles northwest of town and he will sell forty-five head of cattle. There will be thirty-five head of females and ten bulls. The cattle will be sold right off grass, but will be in nice breeding condition and will contain some of the very best families known to the Aberdeen Angus breed. Among the females will be three daughters, two of them with calves at foot. Two Prides, three of them with calves at foot, two Ericas, two Heatherblooms with calves at foot and nine Janettes, four of which will have calf at foot. The calves will be sired by Cherokee Blackhawk 59521 and Imp. Edward R. 61744. The cows and heifers of breeding age will be bred to Cherokee Blackhawk and Edward R. by Imp. Edward R. He will sell about ten young bulls and these represent some of the best-known families. Among the good ones to be sold is Eva Essex, a double-bred Erica. She is a smooth, well-rounded heifer and a typical doddie. Another good one is Ellnor of Maple Grove, sired by the richly-bred Earl Essex, at the head of the herd of Mr. James Williams. Heather Mable is a true Angus cow and the dam of some of the best youngsters in the herd of Mr. Jones. She is a heavy milker and belongs to the class of cows that feed their calves and push them forward at remarkably rapid rate. The calves are all sired by the intensely-bred Blackbird bull, Black Hawk of Quimby. There is probably no better-bred Blackbird bull than this one. His sire was the great show and breeding bull, Woodlawn Lad. Many of our best breeders can help themselves by attending Mr.

Jones' sale. He is selling a class of Angus cattle that are in demand and the families that are represented in this sale are the very best known to the breed. Kindly write Mr. Jones at once for catalog and mention this paper.

MANIFOLD'S DUROC JERSEY SALE.

October 19th, at Shannon City, Iowa, is when that veteran breeder, Mr. Geo. R. Manifold, again sells Duroc Jersey hogs, and he is one of the men that always has some of the best things known to the breed in his annual sales. He certainly has them this year and he is selling his great Iowa State fair litter sired by Proud Advance and out of an Orion Dandelion sow. The dam of this litter, Nan Orion, is one of the greatest brood sows in the state of Iowa. Her litter won third at Des Moines in 1905 and this year won fourth as produce of sow. It is useless for us to talk about this litter. They must be seen to be appreciated, and to see them is to buy them, that is all there is about it. They are the cream of the breed. Another good Proud Advance litter is out of Princess Wonder by Duroc Wonder, and another good Proud Advance boar is out of a daughter of Roycroft Sensation. He sells a very choice boar pig sired by W. L. A's Choice Goods out of Annetta by Tom Watson, a direct descendant of Ohio Chief. The boys cannot afford to pass this pig up, no matter what the price is to get him. There are some good litters in this sale sired by Corrector 9739 (A.) and out of Decatur Belle M. and Iowa Star. We will simply say to all the boys that they will make a mistake if they pass up the Manifold sale. It is one of the best of the year. Write him for catalog at once and mention The Homestead.

WHITE & DEWEY'S SALE.

October 18th, at Shannon City, Iowa, is when Messrs. Grant White and C. M. Dewey will sell forty head of Durocs, including their show herds. This is the fountain head of the Proud Advance blood, these two breeders being members of the Proud Advance Stock Company. The most of their offering is sired by Proud Advance, consequently it may be classed a Proud Advance sale. Mr. Dewey sells two fall boars, four spring boars and one spring gilt by Proud Advance, also two boars and one sow by Miss Bob's Wonder, he by the great Crimson Wonder. He will also sell one boar and two sows by the great Tip Top Notcher and a litter by Red Look, a son of Ringleader. Mr. Dewey has his offering in splendid shape and the boys will all like it, because his offering is first class in every particular. Mr. White will sell twenty-five head and he has taken considerable pains to have the good ones. His offering is largely sired by Proud Advance. One of his best litters is out of an Orion sow and another is out of Russell Belle, while another is out of Miss Queen. He is also selling two Ohio Chief boars out of the sow that topped the Harding sale last spring. He will offer three fall yearling sows that are half sisters to Mr. Shade's noted sweepstakes sow, and he also sells a Proud Advance yearling sow that is as good as they grow them. Both the offering of Mr. White and Mr. Dewey will be found strictly all right, and there never was a better time nor a better place to secure the blood of the noted boar, Proud Advance than will be in this sale. Write at once for catalog and mention The Homestead.

LAST CALL FOR THE B. G. STARK SHORT-HORN SALE.

Lovers of good Short-horns should not forget the sale of Mr. B. G. Stark at Humboldt, Iowa, on October 16th. This well-known breeder has selected fifty head from his herd for this sale and it is with considerable pleasure that we call the attention of our readers to his offering. There will be fifty head in the sale and about forty of these will be cows and heifers. There will be at least fifteen cows with calf at foot by the Scotch bulls, Commodore Jr. and Standard Fibre and the rest of these that are old enough will be safe in calf to these same bulls and also to a son of Aberdeen Prince, and he now stands at the head of the Stark herd. The families represented in this sale are mostly Young Phyllises, Young Marys, Arabellas, Amelias and other well-known families with five and six good Scotch tops on them. He is putting in a splendid bunch of Standard Fibre heifers in this sale. This bull formerly headed the Stark herd and was one of the best breeders Mr. Stark ever owned and these heifers will prove all that we say about him when sale day arrives. There will also be cows and heifers in the offering sired by such well-known Scotch bulls as Aberdeen Prince, Prince of Athens, Dauntless Victor, Dompter and Searchlight, the latter being a Norton bred bull by Imp. Banker and out of a daughter of Imp. Salamis. His best cow is Thistle Duchess 2d, a seven-year-old daughter of the Scotch bull Thistlewood. She is a grand good individual and has been a prize winner every time she has been shown. She is a cow of great scale and abundant quality and she will be sold with calf at foot by Standard Fibre. This cow will fit well in any herd and it is too bad we have not more like her. Another good proposition that he offers in the way of a female is Myrtle 2d. She is a three-year-old and is now suckling her third calf. She is large and a splendid milker and a thirteen-month-old bull of hers will also be sold in the sale. Among the bulls will be a few that will be sired by Dompter, a son of Imp. Leyburn, at one time at the head of the Stark herd and one of the most noted bulls of his day in the state of Iowa. There will be about ten young bulls in the sale and they are good, growthy and well-developed fellows. The entire offering is composed of the very best Scotch blood on some of the most noted Bates foundations. It is an offering of good individuals, not loaded with fat, but the kind of cattle that always goes into the hands of the buyer and does well. We

DON'T BUY GASOLINE ENGINES

alcohol engine, superior to any one-cylinder engine, revolutionizing power. Its weight and bulk are half that of single cylinder engines, with greater durability. Costs less to buy—less to run. Quickly, easily started. Vibration practically overcome. Cheaply mounted on any wagon. It is a combination portable, stationary or traction engine. SEND FOR CATALOGUE. THE TEMPLE PUMP CO., Mrs. Meagher and 16th Sts., Chicago. THIS IS OUR FIFTY-THIRD YEAR.

UNTIL YOU INVESTIGATE "THE MASTER WORKMAN," a two-cylinder gasoline, kerosene or oil engine, with greater durability. Costs less to buy—less to run. Quickly, easily started. Vibration practically overcome. Cheaply mounted on any wagon. It is a combination portable, stationary or traction engine. SEND FOR CATALOGUE. THE TEMPLE PUMP CO., Mrs. Meagher and 16th Sts., Chicago. THIS IS OUR FIFTY-THIRD YEAR.

know of no sale that contains any more of the practical money-making Short-horns than will be found in the Stark sale. When you buy of him you know that there is a breeder behind the cattle whose reputation is gilt edged. He has been breeding Short-horns for the past thirty-three years and no man enjoys a better reputation for integrity and square dealing than does the man who is making this sale. Remember the sale will be held at the fair grounds, Humboldt, Iowa, but when writing for catalog address Mr. Stark at Livermore, Iowa. Kindly mention Iowa Homestead when writing.

W. E. MARRS' SALE OF DUROCS.

On Tuesday, October 23d, at his farm joining Albany, Mo., Mr. W. E. Marrs, of Albany, Mo., makes his first sale of Durocs. Mr. Marrs feels that his hogs have not had the publicity necessary yet he knows he has the goods and if buyers will come he will let them have the hogs and at their price. The writer has seen the hogs and he does not hesitate to say that Mr. Marrs will offer such a line of stuff as will do the purchasers good. Some herd boar material will be found in Mr. Marrs' offering. The herd boars are not only well bred, but are breeding boars of much merit. Several yearling boars are included in the list. Some are by Cole's Duroc and out of Improver 2d sows, others are by Improver 2d and out of sows of another line of breeding. The entire crop of spring pigs are by the herd boar, Pilot J., a boar that did service in Mr. R. J. Harding's herd before Mr. Marrs bought him. The writer on a recent trip to Mr. Marr's farm saw several boars and gilts that would look well in any herd. Good colors, good backs with well-sprung ribs and good, sound feet and legs are found in Mr. Marrs' offering. Those who want Durocs that are right in every way will find them here. Write today for a catalog and arrange to be with him sale day. Col. R. W. Mitchell and P. E. Wilkerson will do the selling. See page 37 for advertisement and when writing Mr. Marrs kindly mention this paper.

LYNDALD POLAND CHINAS AT AUCTION.

Saturday, October 20th, is the day on which A. F. Graves, of King City, Mo., proprietor of the Lyndald herd of Poland Chinas, will sell a draft of forty head from his herd. Fall boars, fall sows, early spring boars and a number of spring gilts will be included in the offering of fifty head. Those who know Mr. A. F. Graves best know that he never does things by halves and when arranging for this sale he selected his best stuff with the intention of making such an offering as would be a credit to any herd in the corn belt. Those who are hunting herd boar material can find it at Mr. Graves' place. He has the individuals backed by a pedigree that is absolutely good. The hogs have been well grown and will show their worth. We last week had the pleasure of inspecting the offering and are pleased to say that Mr. Graves has hogs that will fit creditably in any herd. The Tecumseh strains have been mingled with the Perfections to such an extent that quality exists throughout the herd. We had hoped to have a catalog so as to be able to give the breeding of the major portion of the offering and the lot numbers of several promising things but this will have to be deferred another week. In the meantime we urge all our readers who may be in the market for Polands that are well bred and well grown to write Mr. Graves for a catalog and kindly remember to mention this paper. The advertisement will be found on page 38.

WRIGHT COUNTY, IOWA, SHORT-HORN BREEDERS' SALE.

On October 23d, Mr. T. A. Davenport, of Belmont, Iowa, will open the big three days' sale of Short-horns that will be held at Clarion and Belmont, October 23d, 24th and 25th. Mr. Davenport makes a valuable draft sale of about forty-five head from his noted Pike Timber herd. His offering includes twenty-five head of cows, largely with calves at foot; thirty-five females all told, and ten bulls, four of which are Scotch. He sells in this offering a splendid young Scotch bull sired by Imp. Charmer, which is a full brother to the great bull, Philo Hay. The remainder of the younger things are all sired by Imp. Kinellar Stamp. The complete catalog of Mr. Davenport's offering has not yet reached us, but the bulk of the offering are Young Phyllises, Young Marys, Rose of Sharons and kindred sorts, richly Scotch-topped with the best Scotch bulls obtainable. There will be twenty daughters by that celebrated bull, Imp. Charmer, the majority of which will be safe in calf to or have calf by Imp. Kinellar Stamp. Mr. Davenport considers these beautiful daughters of Imp. Charmer as valuable an offering as will go through a sale ring this season. It has been the aim of Mr. Davenport since the beginning of the Short-horn business, which is fourteen years ago, to offer at each succeeding sale a little better class of cattle than its predecessor had been. With that end in view he has kept buying and keeping some of the best Short-horn cows and herd bulls that were obtainable. As this is the life work of Mr. Davenport, he has the reputation at stake and a future before him that forces him to put in a good class of cattle for this sale. It is his sixth annual offering and all previous sales have given entire satisfaction. Hence we predict for this offering that same merited success that has crowned his efforts in all preceding sales. The cattle will be sold in their every-day working clothes, without any attempt to fit them especially. It is one of the largest offerings of cows with calves at foot to be sold this fall. This is the best guarantee that any man could possibly give of the breeding value of a sale consignment. Should any female bred no prove to be in calf, Mr. Davenport will allow her return, and if he fails in delivering her safe in calf within six months, the purchase price will be refunded. All

hulls sold by him will be guaranteed breeders. The sale will be held at Pike Timber farm five miles southwest of Belmont. Free conveyance will be furnished for all parties from a distance. Col. George P. Bellows will officiate for Mr. Davenport and we predict for this sale the attention and merited success that it deserves.

LAST CALL FOR H. G. WARREN'S DUROCS.

The offering of Durocs to be shown by the above named gentleman, located at Inland, Neb., will be good, strong pigs of both sexes and with a line of breeding that will please you. This is the first sale ever made by Mr. Warren and on October 20th the breeders, as well as farmers, will have an opportunity to get the choice stock at prices to suit. It is your gain here and you can expect to get the best of Durocs, as this gentleman has secured only the very best when he started in the business. His judgment was well shown when he purchased the very best stock at the winter sales. His offering will consist of about forty head. These are sired by such boars as Belle's Model, Morrison's Bell Top, Higgins' Model, Warren's Improver by Improver 2d and Teddy K. sired by Billy K. His offering is very strong and you cannot go wrong on attending this sale or sending a bid. The offering is not at all large in number, but makes up in quality where it falls low in number. Mr. Warren will make some of the older breeders stand back in way of good, choice offerings. His sale will be held at his farm about five miles from Inland and about six miles from Harvard. You can reach Inland on two roads, the B. & M. and Northwestern. Mr. Warren's sale follows the G. Briggs sale. Write for his sale catalog and post yourself on the offering. Mr. G. W. Segrist will attend the sale.

CROSS' DUROC SALE.

The forthcoming Duroc Jersey sale of Messrs. L. W. Cross & Son, of Mason City, Ill., which will be held on Wednesday, October 17th, offers many hargains in good, strong-boned pigs of the right type and quality. Most of the spring stuff is sired by Buddy T.'s Best 42431. This boar was sired by Buddy T. and is out of Owaneco Belle by Gold Chief, the first-prize and sweepstakes boar at Illinois State Fair, 1904. Buddy T.'s Best was third in the under six months class at Springfield last year and in his yearling form weighs over 500 pounds. All of the fall stuff in the sale is sired by Gem's Top Notcher, a boar from the good herd of Messrs. T. W. Stoner & Son, of Henry, Ill. His sire, Top Notcher's Rival, was by old Top Notcher. A very fine lot of fall gilts should attract the attention of breeders expecting to hold sales in the spring. Two boars and two gilts by Major R. and out of My Dream IV., she a litter sister to first-prize young herd at Illinois State Fair last year, should attract the attention of careful buyers. They were farrowed March 20th. A litter of fall gilts farrowed October 1st by Gem's Top Notcher and out of Edith G. 69922 by Cloth of Gold 23283 are extra good ones and will please discriminating buyers. The offering is a good one and we are pleased to recommend it to our readers. Look up the advertisement on page 41 and write, mentioning The Homestead, for catalog. Bids sent to Mr. D. M. Pierce, representing this paper, will be properly handled.

THE GOOD ONES WITH THE GOOD LINE OF BREEDING.

Breeders of Iowa and Nebraska should take special notice to the H. L. McKelvie offering of Polands to be sold at his farm near Fairfield, Neb., on October 26th. This breeder has one of the real good offerings to be sold in the state of Nebraska and we feel safe in trying to induce the breeders of the neighboring states to come to this sale. You will be well repaid for your trouble and expense if you are looking for hogs that are all bog. We do not know of a better offering where feet are so good and the hogs in the condition to do the buyer the good they expect, as the sale to be held on the above date. Then we find the herd cholera proof. This alone is worth your consideration, as you well know what cholera does to your hogs. The entire offering will number about fifty of both sexes. The boar offering is what you would consider a great one, as the proprietor has consigned several boars that should sell for the three-figure mark. The aged boar, Kodak, will be offered, as well as two of his yearlings with a few spring pigs. Kodak 2d was sired by Kodak and is out of Best of 1899 by Shattuck's Choice. This boar is now in his fifth year. His get prove him one of the very good sires and Mr. McKelvie will use one of his get in the herd, as well as using some of the sows. The sire is a very spry fellow with a large bone, good feet and plenty of stretch. His two yearlings, Big Kodak and Jim Crow, are very large fellows. Jim Crow is a hog that would please any breeder with one exception, his front feet are not as good as you would like. This was thought to have been caused by cholera. In looking over the others in the litter you will find the best of feet. Outside of his feet he is a show hog and the kind that win in the warmest competition. Mr. McKelvie has used this sire and is not at all pleased at selling. His full brother is a boar considerably rougher, with more stretch, but the same kind that gives the needed length to the short chunky Polands. No. 2 in catalog is called Hadley Last by Hadley Jr. This hog is a two-year-old and one that should be looked after. He has some pigs in the sale that will show him as a breeder. He is a large-boned hog, being very close to the ground and a very easy feeder. One of the real choice pigs in the sale is Nemo, sired by McK's Choice Tec. 3d, he by Chief Tec. 3d. This fall boar is a hog that will please nine-tenths of the breeders. He has a very good head and ear, the best of feet, good, straight legs and a good, large bone. He is a royally-bred hog and one that comes from a family of winners. He is out of a litter of ten. A full brother won third last fall at the state fair, while a half brother won second this fall at Nebraska, and afterwards sold for \$150 as under a year old boar. A good bid should be sent to get him. Several of the spring pigs are good, as you will see on sale day. As we said before, we feel safe in asking breeders from any state to attend this sale or send a bid to the auctioneer or Mr. G. W. Segrist, owing to the fact that the goods will be offered. In our

next issue we will give you more about the spring pigs to be offered. Mr. McKelvie has not over estimated his pigs in his foot notes and in looking over the catalog don't be misled. He has told the facts as you would prefer. Look up display advertisement on page 35. Mention The Homestead when writing for catalog.

LAST CALL FOR THE SOUTHWESTERN IOWA DUROC JERSEY SALE CIRCUIT.

The opening day of the Southwestern Iowa Duroc Jersey sale circuit will begin at Mt. Airy, Iowa, on October 15th, when Messrs. A. L. & U. S. G. Lynch will sell twenty boars and twenty-five sows. Among the very choice spring boars in their offering is a litter of three boars by the great Ohio Chief and out of Will's Pride. Nos. 15 and 16 of this litter are good and their breeding entitles them to a place at the head of good herds. Nos. 4 and 5 are fall boars sired by Corn Cracker and out of Madrid Belle by Wauwata Hub and they are lengthy fellows with plenty of bone. No. 6 is a good February gilt, sired by Luther Top Notch and out of a daughter of Pilot 2d. Another good spring litter is by O. B. Advance by Proud Advance. They are also selling two aged boars, Corn Cracker and Iowa Lad. Both of these hogs have earned a good reputation at the head of their herd and now that they have retained \$0 many of their gilts, they have decided to put them in the sale. There will be several litters in the sale sired by both of these boars. There will be a couple of spring gilts in the sale sired by Alix Pride, a litter brother to the great sow, Alix II. There will be a yearling sow in the sale sired by old Parnell Banner and her dam is a daughter of Ohio Banner. The Lynch boys are putting up a good offering and all of their best things have been retained for this sale, so they deserve a good attendance on the part of breeders and farmers, and in turn they are selling a splendid bunch of hogs. Their catalog is ready. Write for it and mention The Homestead.

LAST CALL FOR WINTERMUTE'S POLAND CHINA SALE.

On Tuesday, October 16th, at his farm near Blockton, Iowa, is where Mr. J. H. Wintermute will make his sale of great, big Poland Chinas. It is with pleasure that we call the attention of Homestead readers to this sale, and especially to those who are seeking the great, big type of Poland Chinas. The big per cent of his offering will be sired by his present herd boar, Jumbo 8159, a boar that will weigh in his present condition 815 pounds, and can easily be made to weigh 1,000 pounds. He descends from a family that is noted for their size and bone and he is a breeding hog that transmits his same qualities to his offspring. There will be sixty head in the sale about equally divided as to boars and sows. Nos. 1, 2 and 3 are boars and are sired by Jumbo and are out of Darkness 2d, a daughter of old Sweepstakes, and one of the biggest and best sows in southern Iowa. This litter is one of the best he has ever raised and no man will go wrong in buying one of these. He is saving the gilts out of this litter for his own herd. He also offers a fall boar sired by Longfellow H. and out of old Giantess, and he is one of those heavy-boned and extra-length fellows. There is a spring litter in the sale sired by Jumbo and out of Miss Jumbo and he also offers a good fall boar out of the same sow and sired by the same boar. The man who wants a bunch of good sows of the big strains, with lots of length and plenty of bone, the kind that always make good brood sows, they will get them in the Wintermute sale. The offering is a good one and is the kind that they are all looking for. Mr. Wintermute has made all arrangements to care for the hogs and hopes to see all those who believe in the type of hog that he is raising with him on sale day. Write for his catalog and mention The Homestead.

THE MEADOW DALE SHORT-HORN DISPERSION SALE.

Associated with Mr. G. J. Mack and Mr. T. A. Davenport in the Wright county three days' circuit of Short-horn sales is Messrs. Rice & Lindsay, of Clarion, Iowa, who will on Thursday, October 25th, the third day of the series, disperse their entire herd of fifty-one head of partnership Short-horns. In order to dissolve that partnership, Mr. Rice having purchased a farm of his own will go into business for himself in the same line. This dispersion sale affords a golden opportunity for breeders of Short-horns to select some splendid specimens of heavy-making Short-horns, also a number of young bulls. The real attraction, however, of the Rice & Lindsay sale, is the head of the herd, Victor Prince, 193385. This is a beautiful bull, calved Nov. 19, 1901, bred by Messrs. H. Cargill & Son, of Cargill, Ont. He was sired by that splendid bull, Golden Drop Victor, bred by Mr. Wm. Duthie and sired by Nonpareil Victor that was imported from Mr. Duthie's herd to Nettleton, Mo., by Mr. George Bothwell, who owned him up to his death. Three of the sons of Nonpareil Victor, bred by Mr. Bothwell, sold respectively at \$1,610, \$1,510 and Nonpareil King at \$3,500; one of the former bulls later selling as a show bull for \$2,500. Victor Prince, aside from the choice line of aristocratic members of the household on his sire's side, and for his dam Imp. Coral Countess. She belongs to the Coral family. This family has furnished some splendid cattle, among them some show stock. Victor Prince is a massive, thick-fleshed bull, weighing 2,300 pounds, and is unquestionably one of the very best and thickest bulls in northern Iowa. He was the outstanding first-prize aged bull at the recent Wright County Fair. The cows in this offering are in calf to this bull, which gives them a double value. This bull must easily be classed among the \$500 bulls or over. However, he may not bring half this amount at this dispersion sale, but he will nevertheless be sold for whatever value the public cares to place on him. As this will be the third of the week's sales, there may be an opportunity to buy some cheap cattle; in fact, the owners are prepared to take modest prices for these cattle inasmuch as they are not extensively known away from home. This, however, does not bar them from owning and selling some very good, useful, business Short-horns. With the present high values of land we can conceive of no use that a farmer can put this land to that will pay so great a revenue as to buy cattle of this character at any price that they

Smith and Davis, Box 2, Ames, Iowa.

are likely to bring at this sale. It is a day of convincing value; fewer cattle must be kept on the high-priced acres that represent many more dollars of value than has been the custom and practice of our forefathers. Every business at the present time requires closer application and better and more economical business methods applied than were so applied by the pioneers of this great middle West. It has been often stated by the wise heads that "he who makes two spears of grass grow where only one grew before is a benefactor." So it is with these Short-horn cattle. He who produces cattle that when ready for market are worth double those of his neighbors, has accomplished this same purpose. These are the kind of cattle offered by Messrs. Rice & Lindsay, as well as their colleagues, in this three-day circuit of sales.

WOLF CREEK HERD WITH 200 HEAD OF PIGS.

Our reliable breeder and friend, Mr. T. L. Livingston, of Burchard, Neb., is now offering about 200 head of pigs to the public, or rather is topping this number for the breeders and farmers. The herd here mentioned has well earned the reputation of good hogs and square dealings. The owner is known to this breed and his hogs have proven worthy ones wherever you may find them. He has changed his advertisement in The Homestead and you will find same on page 44. The 200 head are sired by such boars as Combination. This sire was responsible for the \$280 pig sold in the Kirkpatrick sale last fall. He is one of the grand, good sires and his get are strong and even wherever you see them. Some are sired by Top Chief by Kan't Be Beat and others by Valley Chief by St. Elmo. The last named hog was used in the Van Patten herd and he was represented at St. Louis by having some winners to his credit. The herd of sows represent such noted families as Gold Dust Jim, Glendale Critic, Glendale Prince and Duroc King. The herd is now stronger than ever in the blood lines and you will find Mr. Livingston along with the top notchers as before, and again we will say that you can send your bids to him and get good ones or none at all. He believes in giving results to all and we have never heard a word against his business career. You will notice that the blood is the same that has been winning at the different fairs. Look up his advertisement and write him expecting to receive a reply with facts only.

THE LINCOLN DUROC COMBINATION SALE.

The real choice offering of Durocs to be offered by three breeders located in the vicinity of Lincoln, should attract your attention providing you are looking for a class of Durocs that are choice in breeding as well as individual merit. The sale will be held at the farm owned by Mr. A. Wilson, of Bethany, Neb. Breeders are requested to stop at the Royal Hotel, where the headquarters are established. The sale will be one of merit, as each gentleman has consigned a small number from his herd and these are supposed to be good, strong animals. The offering consigned by Mr. A. Wilson, of Bethany, Neb., is one that he should feel proud of. His hogs have made a good growth and he has treated them for the best results to the buyer. He will sell fourteen, including three Ohio Chief boars. These are out of the great sow, Morrison's Peach, by the great Crimson Wonder. This sow was the top-priced sow in the Morrison sale last winter. He paid the sum of \$410 for her, and has shown his good judgment by bringing up her Ohio Chief litter to where it is. He will have a few sired by Aethelred sired by Tip Top Notcher. This hog has been pronounced one of the best sons of the great \$5,000 boar. Four pigs sired by him will be offered. The boar, Aethelred, will be included in the sale and should be taken by some reliable breeder who cares for good breeding. There will be a few good ones sired by Morrison's Bell Top, he being out of the great sow, Nebraska Belle. You will like Mr. Wilson's offering. Mr. W. A. Kirkpatrick comes to the front with a list of seventeen animals from his royally-bred herd. These are as good as the veteran breeder has ever offered in any previous sale, and they are fit to do you lots of good. Mr. Kirkpatrick is the better known of the trio interested in the sale and understands what is required to make an offering as choice as can be. His hogs are good and will please you. His offering represents the blood of such boars as Crimson Wonder, Fancy Crimson, Red Chief I Am and Belle's Echo. Mr. Kirkpatrick has probably the last of the great Crimson Wonder get and he has decided to include some of it in his consignment on October 17th. One fall boar sired by the noted boar and out of Lincoln Girl by Surprise is one that you should watch. He is good all over and will make the kind that breeders use at the head of the herds. Part of this litter has been sold for the sum of \$560. You will see that they are choice. There will be a few good pigs sired by Fancy Crimson Wonder that you will like. He has sired the most of the spring offering. One very good pig is sired by Combination. This is the same blood that topped the sale last fall on a spring pig. Crimson Wonder's brother has two good ones in the list. You should look over the offering, as you will like them. Mr. E. K. Young, of Havelock, Neb., consigns about twenty head of good,

DEHORNING STOPS LOSS

Cattle with horns are dangerous and a constant menace to persons and other cattle. Dehorn them quickly and with slight pain with a **KEYSTONE DEHORNER**. All over in 2 minutes. Not a harsh method. Leaves a clear, clean cut. Cows give more milk; steers make better beef. Send for free booklet. **M. T. Phillips, Box 38, Pomeroy, Pa.**

strong Durocs. This gentleman has the line of breeding that will please you. He has invested in good, strong stock to use in his herd and we are sure you will find his offering to your satisfaction. He will have a few fall boars sired by Captain Hall that should please you. Some nice spring stuff sired by Malcolm's Model and out of a Gold Dust Jim sow are good in all respects. His entire offering is as good as will be found in the sale and it is up to you to attend the sale. Mr. Young has pigs sired by Luther H. by Hambletonian that are good. His herd of sows in service are strong ones that raise good litters in goodly numbers. The three gentlemen in the sale are all reliable breeders and in Mr. Kirkpatrick we have a breeder that has worked for the betterment of the hog business. We feel safe in asking you to attend these sales, as you will be treated to a good, strong offering. The headquarters will be established at Hotel Royal, Lincoln, Neb. Mr. J. M. Morrison & Son, sell on Tuesday, October 16th. Try and attend both sales. Look up the advertisement on page 39.

CUTLER, REIL & COOPER'S DUROC SALE.

"Last but not least" by any means comes the Duroc sale of Messrs. Cutler, Reil & Cooper, at Ferris, Ill., on the closing day of the Grand Champion Duroc Circuit, Saturday, October 27th. These three gentlemen are the proprietors of three excellent herds of Duroc Jerseys, numbering all told over 250 head. Forty head have been selected for this occasion. The story of the Duroc show held last week at the Illinois State Fair shows the winnings of this firm. No one herd of Durocs shown from Illinois won as many ribbons as that of Mr. N. B. Cutler. If he can breed this class of stock which wins in as strong a show as the Illinois State Fair put up this year, he can suit breeders who are in the market for high-class stock. Messrs. Reil & Cooper have equally as good stock in this sale. The get of Top Notcher King, Pilot Boy, Illinois Chief, Hanley, Double Track and other noted sires make up this offering. The sale consignment is equally divided as to sex, there being twenty boars and twenty sows and gilts of both fall and spring farrow. Quality, style and finish predominate throughout the entire offering. Breeders who want good, useful stock cannot do better than to be present sale day. Catalogs are now ready for distribution and will be sent to all who write as per the announcement on page 36 of this issue. Bids sent to Mr. D. M. Pierce, representing The Homestead, will be properly handled. Arrange to spend the entire week in attendance at the Grand Champion Sale Circuit. Mention The Homestead when writing.

MIHILLS' DUROC DISPERSION.

An offering which should attract more than ordinary attention is the dispersion sale of Mr. M. Mihills, at Norfolk, Neb., on October 20, 1906, at which time he will dispose of his entire herd. It is only owing to his poor health during the winter months that obliges him to sell. Mr. Mihills has been a consistent buyer of some of the best blood and quality and the crop of spring pigs, good growthy, vigorous fellows, reflects credit upon the man whose judgment mated their parents. Jack Orion, a son of Orion and out of Lady Dandelion by Dandelion, is a grand spring yearling herd hog which Mr. Mihills has had in service and from which he has some fine pigs. This hog is a very smooth, broad-backed, deep fellow, with good bone, and a prominent breeder offered a very tempting figure for him before he had decided to sell out. He is a bog fit to head a strong herd. A bid placed on him will not be amiss, and place it well up or you won't land him. Owing to a very unfortunate accident the other herd hog, Belle's Echo Prince, a sire of some of the spring crop, was killed some time ago. He was by Belle's Echo, he by Echo King and out of Nebraska Belle. His dam was Red Beauty by Red Wilkes and a half brother to the sire of the second-prize pig at the Iowa State Fair this season. There will be one spring and one fall boar by a son of Hambletonian and out of Dandelion dams. There will be two litter sisters to Jack Orion, and their dam, Lady Dandelion, among the sow offering. Her sire was Dandelion and out of Iowa Queen. Then there will be Belle Echo Bell, a litter sister to Bell Echo Prince, also granddaughter of Proud Advance. The balance will be of March and April farrow, about equally divided as to sex, and sired by the herd boars, Jack Orion and Belle Echo Prince. They are a vigorous, growthy, well-conditioned lot and, as Mr. Mihills is retiring from the business on account of ill health, everything must be sold.

LAST CALL FOR C. A. WRIGHT'S SALE OF DUROCS.

Breeders and farmers who want Duroc Jerseys should not forget the sale of Durocs to be held at Mr. C. A. Wright's farm, near Rosendale, Mo., on Thursday, October 18th, at which time Mr. Wright sells eighty head of as good Durocs as will be sent through a sale ring in Missouri this year. Mr. Wright will not hold a bred sow sale, neither will he hold back a number for the private treaty trade. He sells the best of his year's production and hopes to clean up all at this sale. The boar offering is strong. The two herd boars, Larchwood King and Challenger, are a pair of tried and proven boars fit to do service anywhere. They are the principal sires of the offering and are the sires of Mr. Wright's winners at the Iowa State Fair and the Interstate show held at St. Joe. The spring boars are growthy and some good herd boar material will be found among them. In sows Mr. Wright is offering a strong lot. Among these is the sow, Little Beth 61032, the champion sow at the Interstate show at St. Joe, and her two gilts of March farrow got by Parnell Banuor. A good gilt will be found in Lot 66. She was got by Challenger and out of Cerle by Sneed's Champion. At the Interstate she was awarded first in class for sows under six months. A pair of fall sows listed as Lots 69 and 70 will be found absolutely good and will make great breeding sows. Two litter sisters to these also go in the sale. The writer doubts if three better gilts than Lots 37, 38 and 39 will be found in any sale this year. They were at St. Joe, but were not shown. Had they been, Mr. Wright would have won more blues. They were got by Larchwood King and out of Fancy Girl 2d by Field Marshall. One thing buyers should remember is, that all sows selling for \$50 and over may be left at Mr. Wright's to be bred to Butler's

Orion, his new herd boar. Butler Orion is a large yearling with a very heavy bone, a strong, arched back, with well-sprung ribs. He has the breedly appearance so essential in a sire and pigs by him will undoubtedly prove to be the right kind. Mr. Wright sells at his farm near Rosendale, where every arrangement for the comfort of visitors may be had. Parties from a distance should come to Rosendale or Wyeth. See catalog for time tables and arrange to spend the day with Mr. Wright.

O. A. STANLEY'S ANNUAL SALE OF POLAND CHINAS.

One of the good sales of Poland Chinas to attend this fall will be that of Mr. O. A. Stanley, of Sheridan, Worth county, Mo., on Monday, October 22d, at his farm four miles southeast of Sheridan, Mo. Mr. Stanley holds annual sales and has sold hogs to many good breeders and in this, his eight annual sale, there will be a line of attractions that should go to good herds. For this sale Mr. Stanley has selected twenty boars and twenty-five sows, the tops of over 100 head. The boar offering will be headed by the great breeding boar, Joe Profit, a son of the Ohio prize winner, Joe C., a Wilkes boar. His dam, Lady Profit, is a granddaughter of Happy Perfection. Mr. Stanley sells Joe Profit in order to retain a number of his daughters as brood sows. As a breeding boar he has made good and the twenty head of his get that go in the sale will show his value. They are attractions worthy of note. One of the best litters by him is out of Nellie Allerton by Allerton Jr., he by Allerton Tecumseh, the hog that did so much for Mr. W. T. Garrett. These are of November, 1905, farrow, three boars and three sows, all of the big kind and desirable. Two sows of July 29, 1905, farrow and out of My Hanna Lady by Shamrock will make great brood sows. Their litter brother goes in the sale weighing close to 500 pounds. Someone hunting a herd boar should look after him. He is an extra heavy-boned hog and should make a great sire. A spring litter of this sow and by Joe Profit will furnish some attractions, four extra good gilts and a boar. A Giant Perfection litter out of Missouri Queen by Size Me Up will be found desirable things to buy. Giant Perfection was got by P. W. Perfection and out of Mr. Fred Rood's great brood sow, Giantess. Their dam, Missouri Queen, also goes in the sale with five other tried and proven brood sows that raise good litters. Write for catalogs and try to be with Mr. Stanley sale day. If you want hogs with bone, size and quality Mr. Stanley has them and will sell to the highest bidder. See page 35 for advertisement and when writing kindly mention The Homestead.

DISPERSION OF LILAC HILL FARM SHORT-HORNS.

On October 24th Mr. G. J. Mack, of Clarion, Iowa, will disperse his entire herd of Short-horn cattle. Owing to the recent loss of his companion, this herd will be thrown on the market without any reserve. Such a thought as this had never entered Mr. Mack's mind until recently when he found his home broken up and the conditions so changed that continuing in the business of Short-horns was an utter impossibility, situated as he is. His sale will be the day following Mr. T. A. Davenport's draft sale at Belmond. They are only about ten miles apart, hence buyers can arrange to attend the three-days' circuit with profit to themselves. Mr. Mack's herd embraces fifty-six head; quite a number of straight Scotch and the remainder Scotch-topped. Among the Scotch cattle we note such grand cows as Nonpareil of Lilac Hill. This is a two-year-old heifer sired by Imp. Morning Star. She belongs to the celebrated Nonpareil family, tracing to Imp. Nonpareil of Kinellar by the Cruickshank bull, Luminary. These Nonpareils are regarded by breeders of Scotch cattle as one of the choicest families. The sire of this heifer, Imp. Morning Star, was one of the herd bulls at Mr. N. A. Lind's Beaver Creek herd up to the time of his disastrous fire, at which time both Imp. Morning Star and Fancy's Pride were burned. Imp. Morning Star was sired by the Duthie bull, Pride of the Ring, the highest-priced calf in the Collynie sale of 1898. His sire was Pride of Morning. This beautiful heifer is certainly an attraction to any sale. Lot 3 is a nicely-bred Duchess of Gloster, tracing through the very best of sires to Imp. 12th Duchess of Gloster by the world's renowned bull, Champion of England. Here is breeding fit for a king. Lot 4, Oakland Duchess, is of this same family, but is sired by Mr. F. A. Edwards' famous old stock bull, Duke of Oakland 2d. This is a choicely-bred heifer and is certainly none the less valuable because of being by such a grand sire as Duke of Oakland 2d. Lot 7 is the dam of Lot 4, and, of course, is of the same breeding, except the top sire, which was Logan, he by Lord Victor, a son of Imp. Spartan Hero, and out of Imp. Victoria 66 by Lord of the Isles. Lot 5 is Martha Orange Blossom, a daughter of Prince Mysie, he by Gwendoline Lad and out of Mysie Aberdeen, she by Imp. Amburst. This is a nicely-bred Orange Blossom of one of the older imported strains of this famous Cruickshank family. She traces to Imp. Orange Blossom 18th by Viceroy. The Orange Blossoms are considered the best-looking family of the Cruickshank tribes. They are founded on the same foundation as the Queen of Beauties, all coming through Queen of Scotland, a daughter of Edith Fairfax. It will be remembered that Mr. Marr's greatest herd bull was of this family, and the imported cow, Orange Blossom 18th, sold in 1876 for \$3,500. She probably had as much to do with bringing the Scotch cattle into prominence in an early day as any other potent influence. Lot 6 is another of the Nonpareils; in fact, is the mother of Lot 2. Following the Scotch cattle are a choice lot of Zelas or Fashions, largely the get of that grand old bull, Philo Hay. The offering is interspersed with some Young Phyllises and other American sorts that at the present time are being looked upon with more favor than for some time. At the recent sale held by Mr. George Burge at Mt. Vernon the choice individual Scotch-topped cattle sold higher than did the straight Scotch cattle, with one exception, that being the noted show beifer, Florodora. We shall not mention the number of good bulls to be sold by Mr. Mack except collectively, other than Lot 1 of the catalog, the herd bull, Grand Count. This is one of the choicest-bred Scotch bulls to be sold this

year. He is six years old, is a roan bred by Mr. Arthur Johnson, of Greenwood, Ont. He was sired by Imp. Merryman, a son of Reveller, he out of Marigold 3d by Nero, she out of Marigold 2d by Red Prince, she out of Marigold by Queen's Guard. The dam of Grand Count was Imp. Martha 3d. She belongs to the Scotch Mysie family and traces to Mr. Cruickshank's noted Mary Anne by Sillery Tribe. Grand Count is a half brother to Carry Nation, the cow that topped the Harding sale last spring at over \$800. He is also the sire of Messrs. Watts & Sons' show and breeding bull, Sentinel. All the cows in this sale bred since March are in calf to Grand Count. Those bred prior to that time are in calf to Mysie's Gloster. Some of the calves at foot are by this same bull, while others are by Philo Hay, he by Imp. Charmer and out of Imp. Ruddington Daisy. Application should be made direct to Mr. G. J. Mack for his beautiful catalog of this dispersion sale.

NORTON'S CRUICKSHANK BULLS.

To the breeder who wants a herd bull whose breeding is along the most approved lines and whose individuality will entitle him to a place among the foremost in the land, we would direct him to that noted Cruickshank breeder, Mr. C. C. Norton, of Corning, Iowa. At the present time he has a few young bulls that are entitled to go to the head of the best herds in this country. Among this number is a two-year-old called Sultan. He is a son of Imp. Bapton Admiral and is out of a daughter of Imp. Salamis. He is a Cruickshank Secret, a red in color and of decided showy yard type. This bull is one in a thousand and is good enough to head any herd in America. He is particularly good in his lines, both top and bottom, and his head and horns are about perfect. Another very promising yearling is called Cinch. He was sired by Banker's Victor out of a daughter of Imp. Salamis, and his granddam was by Imp. Bandmaster. His third dam is Imp. Charly, bred by Mr. Duthie, and one of the best cows imported by Mr. Luther Adams. He also has a couple of good Duchesses of Gloster bulls for sale and a good Lavender bull. The man who is wanting a good herd header will not be disappointed in these bulls. We know of no herd where we could direct a breeder to go and get as good bulls as these we have mentioned above. If any of our readers are wanting a bull of this kind it will pay them to make a trip to see these bulls.

COMBINATION SALE OF ANGUS CATTLE AT HARTWICK, IOWA.

A prominent sale of Aberdeen Angus cattle will be held on the farm of Mr. M. D. Korns, three-fourths of a mile southeast of Hartwick, Iowa, on Friday, October 19th, at which time forty-six head of choice Angus cattle will be sold, divided as follows: Thirty-four females and twelve bulls. This combination sale is made up from choice selections from the well-known herds of M. D. & C. G. Korns, of Hartwick; A. H. Kimble, of Ladora; U. S. Grant, of Brooklyn; Wm. Dickson, of Hartwick, and H. H. Reed, of Marengo. It is a choice lot of cattle from every point of view. Hartwick is located on the Belle Plaine & What Cheer branch of the C. & N. W. Ry., and about four miles and a half from Victor, Iowa, on the main line of the C., R. I. & P. Ry. Free conveyance will be in waiting for parties coming over the Rock Island, at Victor. Col. Silas Igo and J. L. McElrath will perform on the auctioneer's stump. The selections from these herds have been made with the end in view that the cattle sold would be such as would prompt those who purchased to come to this Angus center from year to year for further stock. There will be a choice lot of cows and heifers in this sale that are either well forward in calf to the leading herd bulls of these respective breeders or will have calves at foot by these same bulls. Messrs. M. D. & C. G. Korns are consigning animals sired by, bred to or have calves at foot by, such sires as Gay Blackbird Jr., a grandson of the noted Gay Blackbird, Blackwood Jim, a double bred Blackbird sired by Blackbird Jim, dam Blackwood 2d. The bulls in the Korns Bros. consignment are, with one single exception sired by the great Blackbird bull, Blackbird 3d, one of the choicest bulls of the breed. This exception is the splendid Pride bull, Walnut Dell Prond R., whose sire is Royal Blackcap 3d, he by Black Jam, a son of Jim Jam and out of Blackcap 8th by Black Monk, her dam being Blackcap 5th out of Blackcap 2d, a full sister to America's champion bull, Black Knight. Blackcap 2d was out of Blackcap, the greatest Angus cow, and for that matter the grandest beef cow ever imported to America from Sir George McPherson Grant's celebrated Ballindalloch herd. This beautiful young bull's dam was Pride of Glendale 13th, she by Golden Abbott. Her dam is Pride of Glendale 5th by Roseleen and out of Pride of Glendale 2d by Peerless Knight and out of Pride of Huntley Grange, she by Energy of Ballindalloch and out of the Pride cow, Pride of Aberdeen 10th. This bull contains in his pedigree as much prize-winning blood as it is possible to find in this celebrated breed, and from an individual standpoint, this young bull is fully worthy of the rich pedigree that goes with him. The families consigned by Messrs. Korns Bros. are Prides, Drumlin Lucys, Kinchroty Favorites, Alicas, Easter Tulloch Margarets, Rose of Clockhills and other well-known families. Mr. A. H. Kimble is contributing an excellent consignment of Prides, Miss Copelands and Princesses. He is selling a most excellent cow in Pride of Glendale 24th. This is a beautifully-bred Pride of Aberdeen cow that is a regular breeder and splendid producer. He also sells Longbranch Veta, a full sister to the noted show cow, Valleta of Longbranch; also a heifer of hers sired by the Imp. Blackbird bull, Blackbird Royal. All of Mr. Kimble's females of breeding age have calves at foot or are safe in calf to the Queen Mother bull, Black Roselawn, sired by the show bull, Mayor of Veta 2d, Mr. U. S. Grant consigns a choice lot of Queen Mothers, Nosegays, Alicas, etc. One of these being a choice Queen Mother cow by Black Jock of Alta, he a son of Wellington's Pride. A number of other good ones consigned by Mr. Grant are by his former herd bull, Silhouette, a Queen Mother bull bred by Mr. Willis Sturges. His consignment of bulls were all sired by this animal. Most of his females are well forward in calf and present a useful lot. Mr. Harry H. Reed is only listing five head for this sale. They are Blackbirds, Green Ladies and Princesses.

He sells a splendid two-year-old Blackbird bull in Blackbird Lord. This is a choicely-bred bull, both sire and dam being bred at McHenry Park. The four females consigned by Mr. Reed are by Jeffrey 2d, Oakfield, Black King and Black Roselawn. Mr. Wm. Dickson only contributes three head, two heifers and an exceptionally good, young bull, just one year old, sired by the McHenry-bred Blackbird bull, Bernier, a son of Imp. Proteros. The heifers consigned by Mr. Dickson are of the Lady Franklin and Rothiemay Queen families. Taken altogether this is a very desirable lot of practical, useful cattle. It is the aim and desire of all the breeders contributing to so establish themselves by offering good cattle at this, their initial sale, that in the future when their fellow breeders and farmers desire to purchase some useful doddies they can find in this vicinity as good cattle offered by as responsible men as can be found anywhere. The catalogs have been somewhat belated, but are now ready to mail to all Homestead readers who make application on postal card or by letter to Mr. C. G. Korns, sale manager, at Hartwick, Iowa.

CASTLE'S DUROC SALE—LAST CALL.

On page 38 of this issue will be found the final announcement of an important Duroc Jersey sale, that of Messrs. E. M. Castle & Son, of Joy, Ill. This firm have been buying in the best sales and from the best herds and their offering will not disappoint any one in search of good stock. At the head of their herd they are using three extra good boars: De Soto's Model 33131, by De Soto 15155, is an extra good breeder. His dam, Kansas Beauty 66200, is by London's Jumbo 15125, the by Jumbo Red, a half brother to Ohio Chief. Another of the herd boars is Iowa Plummer. His dam, Clover Belle 60750, is by American Royal, he being first and champion boar at Nebraska State Fair, 1904, and a winner in other big shows. Prairie Acrobat is the last of the herd boars. He is a grandson of None Such, the sire of Hanley and his dam, Sarah Muller, comes from the Muller family of sons which made the herd of Messrs. T. W. Stoner & Son noted throughout Duroc circles. In the sale consignment which consists of fifty head the get of Champion Paul, he by Oom Paul (the boar which won more first and sweepstakes ribbons than any boar living or dead), are represented by three good boars and a gilt farrowed March 10th. The dam of this litter is by Tip Top Notcher, two boars by Proud Advance and out of Coral Suen by Parnell Banner should attract the attention of breeders looking for herd boars. A boar by Tip Top Notcher and out of Sue C., by Kruger, the sire of much of the good stuff in the noted herd of Mr. Ora Jackson, will please some one in search of such a boar. Three boars by Major R., and out of McCabe's Dream, by a Top Notcher, are an extra good bunch. A very fine yearling son by Richie Perfection, he by Van's Perfection, is found in Interstate Lady. She should attract the attention of some breeder who wants to secure an extra good sow. The offering is made up of useful stock and the breeding cannot be excelled. As this is Mr. Castle's first sale he has put in stock that under other conditions would have been reserved. The catalog tells the story and will be mailed to all who write for it as per the announcement on page 38 of this issue. Bids sent to Mr. D. M. Pierce, representing this paper, in care of Messrs. Castle, will be properly handled. Kindly mention this paper when writing.

FEMALES IN WOODLAND DISPERSION.

No breeder of Short-horn cattle, or any reader of this paper in search of good Short-horn cattle, should overlook the unusual opportunity to secure excellent Scotch and Scotch-topped cattle as presented in the dispersion of the Woodland herd, the property of Mr. W. I. Wood, of Williamsport, Ohio. One hundred head will go under the hammer on Thursday, October 18th, at Washington C. H., Ohio. This herd represents the work of a life time. Mr. Wood's father laid a most excellent foundation and the work has been carried on by his son, as will be evidenced by the offering which has been cataloged for this sale. The bull portion has been presented to readers of this paper. This week we wish to call attention to some of the females in the offering. It would be impossible to go into detail regarding the offering, but we wish to go on record as saying that few if any sales of recent years contained as many good cattle as will be found in this herd. Seventeen head are sired by Imp. First-in-the-Ring 162100, and about twenty head are bred to him; fourteen head are sired by Choice-of-the-Ring 187237, and about sixteen head are bred to him; eight head are sired by other sons of Imp. First-in-the-Ring, and five head are bred to them; five head are sired by Woodland Sultan 214548; two head are sired by Whitehall Sultan. Others are sired by Woodland Coronet, Monarch Abbotsburn, Nominee, Lovet Champion and other good young bulls. Forty head are sired by Imp. First-in-the-Ring and his sons, and fifty head are bred to Imp. First-in-the-Ring, Choice-of-the-Ring, Woodland Coronet and other sons of Imp. First-in-the-Ring. One of the best producing cows in the herd is Imp. Scottish Nell. She is the dam of Woodland Coronet, one of the herd bulls consigned to the sale, and Woodland Nell, she by Choice-of-the-Ring, 43d Duchess of Gloster by Knight of the Thistle is another of the good ones. She is safely in calf to service of Imp. First-in-the-Ring since April. Missie W., a Marr Missie by Whitehall Sultan, has been a very good producer. She is safe in calf to Choice-of-the-Ring since January. Proud Fancy 2d is the daughter of First-in-the-Ring and Imp. Proud Fancy the dam of Choice-of-the-Ring. This heifer should go to some good herd. A full sister a year younger, Proud Fancy 3d, is also included. Isabella of Woodland 6th is a grand, good heifer by First-in-the-Ring. She is safe in calf to Woodland Coronet. Imp. Dalmeny Duchess 5th by the Duthie-bred bull, Dictator, is one of the grand, good cows of the sale. She is a good milker and easy feeder and has a red bull calf at foot sired by Imp. Pride of Scotland 195715. Spicy of Broaddale 9th represents the noted Spicy family which have done as much if not more to make the herd of Mr. H. F. Brown noted throughout Short-horn circles. She is safe in calf to First-in-the-Ring. There are in this offering numerous representatives of the most noted families. No breeder can afford not to be present sale day. The breeding, individu-

ality, quality and type of this offering are such that we feel that this opportunity should not be overlooked. The heifers are a most promising lot and are fit to go into the best herds. The farmer or breeder who wishes to secure some extra good Short-horns should plan to be present sale day. The catalogs are now being mailed and are highly illustrated with photographs of cattle consigned to this sale. Every reader of this paper interested in good Short-horns should write at once for catalog, kindly mentioning this paper.

HIGHLY-BRED HIGH-CLASS ANGUS AT AUCTION AT ALEDO, ILL.

The Mercer county breeders, who will hold an auction of Angus cattle at Aledo, Ill., on October 23d, have struck the keynote, by selecting for it only meritorious animals, all agreeing that the cull should have no place there. The most fashionable families are represented and individually the offering is one of the best that will go under the hammer this season. C. A. Bopes, of Reynolds, Ill., who owns one of the largest and best herds of Angus cattle in America, consigns about seventeen head on this occasion. He has used in the herd two Estill-bred stock bulls, viz.: Eugene Estill and Black Knight of Estill 8th, both of which did grand service. The present stock bull, Royal Blackcap 2d, is a double Blackbird of the Blackcap strain, he being sired by the noted Black Jam and out of a dam that is a full sister to the champion Blackcap King. Royal Blackcap 2d is believed to be the best and best-bred Blackbird bull in service today. A son and several daughters of this bull are included in the auction by Mr. Bopes. The bull, Palamon B., calved March 13, 1905, is a Ballinalloch bred, descending maternally from Imp. Katinka, a daughter of the renowned Young Viscount, and the pedigree is topped with the most famous of Blackbird blood. Palamon B. is a youngster of grand scale, excellent back and well quartered. He certainly has claims as a high-class herd head. A very highly-bred Blackbird heifer is Blackbird of Hamlet 8th, just turned two years old, and intensely bred along Blackbird lines. She was got by the double Blackbird bull, Knight of Estill 5th. The second dam, Blackbird of Sunny Slope, was by the double Blackbird bull, Bunce, a son of the celebrities, Imp. Bushranger and Imp. Blue Ribbon, the highest-priced animals of their breed in America in their day; while the third maternal dam was by the celebrated Young Hero and out of the record-breaking cow, Blackbird of Corsica 2d, a Highland Society champion and first cow of the breed to bring \$2,000 in America. She is in calf to the Trojan-Erica bull, Gilt Edge, bred by Mr. McWhorter, sired by Scottish Boy and out of Imp. Una, and being used on the Royal Blackcap 2d heifers by Mr. Bopes. A richly-bred Trojan-Erica heifer is cataloged in Erinna of Hamlet 5th. She is Blackbird-topped and descends maternally from Erica 3d, the dam of the renowned Young Viscount. There is also a handsome Queen Mother heifer consigned by Mr. Bopes, and some Shaempston Duchesses and Webster Fowls Queens that for type and the characteristics that have made the breed famous would indeed be difficult to surpass. They are valuable and useful animals in maintaining the standard of excellence of the breed. They are topped out with the most fashionable and Erica blood and should be appreciated by the best breeders. The catalog should prove interesting and will be mailed as per advertisement on page 40.

OPPORTUNITY HEREFORD SALE

On page 34, Sale Manager D. R. Mills, of Des Moines, Iowa, advertises the "Opportunity" Hereford sale at Mt. Pleasant, Iowa, Tuesday, October 30th, to take place in the fair grounds sale pavilion consisting of some sixty head, three-fourths of which are young cows and heifers, with numerous calves and about fifteen choice young bulls, consigned largely by Henry county breeders whose names are enumerated in the advertisement. In considering the excellent lot of females that have been gotten together by Mr. Church for this sale it would be hard to individualize, as both in breeding and in merit they are so uniformly good that a reference to one could be applied equally as well to another. They are largely one, two and three years old, with but two or three exceptions and find in their pedigrees very close up the names of the great show bulls, Phil Amor, Corrector, Eureka and others equally as meritorious. One of the young bulls is a son of Wilton Alamo 6th, he by Wilton Grove by Sir Wilfred, with The Grove 3d in another branch of the sire's pedigree, and Corrector not far off in the pedigree of the dam. Mr. Wright's three head are strictly fashionable in their blood lines, one of them being a daughter of Wilton Alamo 6th; another of Alto Beau 8th, and another of Pre-emptor, one of Messrs. Gudgeon & Simpson's best productions. They are one, two and three years old and a reference to their pedigrees would prove their merit in that respect. The three bulls and one cow which Mr. J. B. Brook, of Bentonport, Iowa, sends forward are all by Columbus 51st, he by Columbus, and back of that Earl of Shadeland 41st, Garfield and Thickset. One of them is from a dam also strong in the blood of old Garfield through the Peerless Wilton tribe, with a further strengthening of Anxiety blood. Another possesses strong Earl of Shadeland breeding on the side of his dam, and the third is sufficiently well bred to justify belief in his breeding value. The cow by the same sire has several Anxiety crosses on the side of her dam. She is but two years old and should be an attraction. The first thing in the consignment of Mr. John Sarr, Jr., is a daughter of Phil Amor, the noted son of Anxiety 3d, who, in addition to that, has on the side of her dam the names of Wilton Grove, Thickset, and a dozen other animals that have helped to make the breed famous. There is not much better in blood lines than this pedigree presents. One bull is by Roderick, he a son of Princes, that has been adding to the fame of his great sire, Lamplighter, by producing prize winners at state fairs this fall. Another cow is by a son of the great show bull, Corrector, with close Anxiety connections on the side of her dam. The Tade cattle are rich in the blood of Garfield, Lord Wilton, Regulus and others of note. Messrs. Wallbank's and Burke's cattle are a combination of Beau Real and Quickset breeding with lots of Anxiety blood in important places. Mr. Shep-

herd's Expert 220859 is a fine bull by the highest-priced animal sold at the Rockwith dispersion sale, while the dam of his other bull, Equity 220853, was one of Hockwith's best breeding cows, two of her calves selling to Mr. Funkhouser at the sale. Mr. Robinson's three young bulls by grandsons of Java and Corrector should also attract attention as well as the high-class females he has listed by a grandson of Lord Wilton and descending from Anxiety 4th on the maternal side. Catalogs are ready and will be cheerfully sent upon application to Mr. D. R. Mills, Sale Manager, Des Moines, Ia.

THOMAS & HOGSETT'S DUROC SALE.

Thursday, October 25th is the date on which Messrs. Thomas & Hogsett, of Golden, Ill., will hold their first annual public sale. This will be the fourth day of the Grand Champion Sale Circuit and the day immediately after the closing out sale of Mr. Geo. W. Seckman, at Ripley, Ill. The offering listed by this firm consists of fifteen spring boars by the grand champion boar, Tip Top Notcher; Big I Am, first-prize boar at 1904 Illinois State Fair; Buddy K. IV., first and champion boar at 1905 Illinois State Fair, and second this year in the grandest array of aged boars ever seen in a Duroc show in Illinois; Ambition, first-prize boar at Illinois State Fair in 1905 and breeders' choice for first honors in class this year, though he was given second place, and other noted sires. One herd boar called Red Jacket, he by Tip Top Notcher and out of a Perfection Wonder dam, is also included. The yearling gilts in the sale are by Big I Am, Oom Paul Jr. and are out of some of the best brood sows. Fourteen spring gilts are listed, the same breeding as the spring boars. Last week Messrs. Thomas & Hogsett made their first show at Springfield and the prize list as noted on another page of this issue tells the story. We take pleasure in recommending this firm and their stock to our readers and we feel sure that everyone in attendance on sale day will be well pleased with the offering in every way. Much of the success of the breed in Illinois is due to the good work and earnest support which Messrs. Thomas & Hogsett have given Duroc interests during the past season. Their herd is made up of tops and the sale consignment is of the useful, well-bred sort demanded and sought after by the best breeders. Catalogs are now ready for distribution and will be mailed promptly to all who write as per the announcement on page 36 of this issue. If you cannot be present sale day, bids sent to Mr. D. M. Pierce, representing The Homestead, will be properly handled. Please mention this paper when writing.

GRIFFITTS' DUROC SALE.

One of the prominent breeders of Duroc Perseys in Illinois is Mr. H. B. Griffiths, of Bowen, Ill., whose first annual Duroc Jersey sale will be held on Friday, October 26th. Mr. Griffiths has selected from his herd only such stock as will please discriminating buyers. It is his wish and aim that when he issued an invitation to the Duroc Jersey breeders of the central West the offering would be such that no disappointment would be felt by those attending his sale. We are sure that for usefulness and profit few better lots will be sold this season. The blood lines represented in this offering include the best known to the breed. The consignment listed includes five fall yearling gilts, ten spring gilts, four sows, two of which will sell with litter at side, three yearling boars, eight fall yearling boars, ten spring pigs of choice breeding, including two boars out of Helen Blazes V., litter sister to Helen Blazes III., the \$1,000-sow in the Fagan, Browning, Hess & McCahe sale last winter. To the breeder who wants the top breeding coupled with show-yard individuality, this sale offers unusual opportunities. The individual makeup of the offering includes the get of such noted boars as Tip Top Notcher, grand champion boar at World's Fair; Top Notcher Chief, junior champion and reserve grand champion boar at World's Fair; Fancy Orion Chief, one of the best sons of Orion Chief, a World's Fair winner; Big I Am, first-prize boar Illinois State Fair 1904; Ambition, first-prize boar Illinois State Fair 1905; Hanley, first at Ohio and Indiana State Fairs 1905; Golden Echo, and Griff's Banner, a grandson of the World's Fair winner, The Lad For Me. This collection of blood lines backed by superior individuality is certainly worthy the consideration of every Duroc breeder. Catalogs will be sent to all who are interested in good Durocs if they will write Mr. Griffiths as per the announcement on page 36. If you cannot be present sale day, bids sent to Mr. D. M. Pierce, representing The Homestead, will be properly handled. Kindly mention this paper when writing.

GREER'S DUROC SALE.

The Grand Champion Sale circuit of Duroc Jerseys will be opened on Monday, October 22d, by Messrs. M. W. Greer & Son, of Rushville, Ill., who offer for sale at public treaty on that date forty-five head of choicebred Durocs. On account of the superior railroad facilities Messrs. Greer have decided to hold their sale at Bushnell, Ill. The offering includes twenty-five fall sows, ten fall boars and ten or twelve head of March pigs. The get of Tip Top Notcher, Oom Paul, S. A. Douglas, Gold Dust, Kruger II., Toko Paul (first prize boar Illinois State Fair last week), Kruger Again and Buddy K. IV. make this offering one of the best ever sent through the auction ring. We quote from the catalog in regard to this good offering: "We have thus far been able to dispose of our surplus stock at private sale, and are not a little proud of the fact that we have had a very good trade among our friends and neighbors close at home, and also of the further fact that we have supplied herd herders for some of the best herds in several different states. As an evidence of the reputation in which our herd has been held by good breeders, we will state that when Mr. Seckman came home from St. Louis, flushed with the honors won at that great show, and wanting something extra good to use in his herd, he came to Oak Grove Stock Farm and bought Major R., and declared him to be the most phenomenal yearling he had seen that year. Also that at least four of the good things that went through his great sale last winter, and some of the good things yet at his farm, were bred by us. And again, when Messrs. Harry Browning & Co. organized for business, one of the first things they did was to come to us for a pig to place at the head of their herd, and declared

him to be one of the best they had ever seen. We have exhibited at the Illinois State Fair for several years, and at the fair of 1902 our herd won the second largest list of prizes of all herds exhibited that year. But we realize the fact that it is not a question of how many ribbons we can show, not how many good hogs we have sold in the past, but have we the stuff now? Ab, that is just what we want to prove to you, and therefore invite you to come and see." In our next issue we will have more to say regarding this offering, but would advise our readers who are in search of breeding stock of the right kind to be present on Monday, October 22d. On another page of this issue appears a report of Illinois State Fair held last week. All of the prize winners shown by Messrs. Greer are consigned to this sale. Write for catalog at once and if you cannot be present send bids to Mr. D. M. Pierce, representing this paper, in care of Messrs. Greer at Bushnell, Ill. Mention Homestead when writing.

LAURIE'S DUROC SALE.

The second day of the Grand Champion Sale Circuit of Duroc Jersey sales has been allotted to Mr. T. E. Laurie, of Jacksonville, Ill. Train service from Bushnell is such that breeders attending the Greer sale will be able at little expense to attend this sale. Immediately after Mr. Laurie's sale a train leaves Jacksonville for Mt. Sterling, Mr. Seckman having secured a special train from Bluffs, Ill., to Mt. Sterling so that all breeders may have an opportunity to attend Mr. Laurie's sale and get to Mt. Sterling in time to secure a good night's rest and get to the farm in plenty of time to look over the offering and make selections before sale commences. Mr. Laurie's consignment is made up of ten fall yearling boars, ten yearling sows and ten spring gilts. They are sired by He's Our Pride 29031, grandson of Top Notcher and Kant Be Beat; Buddy K. 20855, Mayor Junior 29315, winner of first at Illinois last year; one gilt and one boar by Gold Cloud 26131, first and sweepstakes Illinois 1904. They are a growthy lot of pigs, a good bunch all the way through. Mr. Laurie has been a liberal purchaser of the best stock to be had. An examination of his catalog reveals the fact that many of the best herds have been drawn upon for their top stuff in order to improve this herd. The offering is a choice one and the hogs are in nice breeding condition. Mr. Laurie is deserving of the support of every reader of this paper. Send for catalog at once and plan to be present sale day. Bids sent to Mr. D. M. Pierce, representing this paper, will be properly handled. Plan to be present on Tuesday, October 23d. Mention The Homestead when writing.

LAST CALL FOR BLAIN'S GOOD, GROWTHY POLANDS.

The opportunity has been presented to get a hog that has license to grow into a 700 to 900-pound hog. The Blain herd has not only produced the big kind, but has furnished enough quality to cause good crosses in most herds. The farmer is seeking a hog that has size, bone and quality combined. The Blain herd has established a trade on this type and the general cry is for something that will sire and produce enough hogs to be noticeable as well as take all parts in the hog business. Why has this herd topped the spring offerings for so many years? Simply because the people are wanting this type. Not only large hogs, as some might think, but instead, you will find them good enough to carry off the ribbons at the shows. The last Nebraska State Fair found the Blain output in the winning. The last fall sale made an average of about \$57 on an entire spring pig offering, and the prices were not at all high, but, instead, the offering was even and the buyer was there to take home a choice boar or a promising brood sow. The very best of sires have been traced to the Blain herd and we could name at least twenty of the greatest boars of this breed that have been purchased direct from this man. The herd is located at Pawnee City, Neb., and has been treated for the best results for both seller and buyer. The offering on October 17th promises to be the equal of any previous one from this herd and as many choice ones will be found as ever. The grand herd boar, Johnson's Chief, was used on many of the sows, and his get are good, strong boars and gilts. We need not call special attention to any one litter, as the entire lot afford enough strong features to be attractive and on sending a bid it might be well to say that you will leave it to the man entrusted, as it would be hard to miss out on any litter. Johnson's Chief has several very good ones. Pawnee Wonder by Glenwood Chief by Wonder's Perfection has some choice ones with as much quality as you will find in the offering. Major Blain by Blain's Tecumseh has a few good litters that will not be disappointing to you. Major M. also comes in for his share of the good ones. We are always glad to write about the Blain herd, as we feel that the purchaser will not be disappointed in any way. The offering will consist of fifty-five head of both sexes and these are as strong a lot as were ever offered from the Blain herd. If unable to attend this sale send your bid to representative of this paper or auctioneer. The sale will be held at the new sale pavilion recently erected by Mr. F. Howard. Look up the advertisement on page 38.

SHORT-HORNS AT MT. PLEASANT ON NOVEMBER 1ST.

The Mt. Pleasant, Iowa, "Opportunity" Short-horn sale is advertised by Mr. D. R. Mills, Sale Manager, on page 34, where a full list of consignors will be found. Catalogs are now ready and will be cheerfully forwarded upon application to Mr. Mills. Among the attractions, an extensive consignment of twenty head, mostly females, is included from the Cedar Lawn Stock Farm, of Mr. Philip J. Schoene, of Summerfield, Ill. A number of them are sired by Dick Taylor 12375, a son of the Scotch bull, Imp. Harvester 9278, that was a noted sire in the C. S. Barclay herd. His get were prominent in show rings, including quite a number of herd bulls that attained more than usual prominence. Other Scotch sires of prominence in these pedigrees are Ladrona, a son of the noted Harris-bred Lavender bull, Galahad; Duke of Gravois, a son of the great Cruickshank bull, Imp. Craven Knight; Goldbug, a Brawith Bud grandson of the renowned Champion of England; Grand Viscount, another Cruickshank Brawith Bud

by Lavender Viscount; Pride Perfection, son of the Duthle-bred Cruickshank Myale bull, Imp. Scottish Pride; Kirklevington Duke, a Bates Kirklevington, etc. Messrs. Grimes Bros., of Montrose, Iowa, catalog a pure Scotch five-year-old bull, Gold Stream 17721. This bull belongs to the Nonpareil family, one which stands among the most important of the Cruickshank families of Short-horn cattle. His sire was invincible, also of Cruickshank breeding, and his dam was a daughter of Imp. Spartan Hero, bred by Cruickshank, second dam by Vice Consul bred by Cruickshank, and third dam the imported cow, Nonpareil Princess. This is a Cruickshank pedigree of extraordinary strength and an enumeration of the entire line of sires as will be found in the catalog is a most convincing evidence of the breeding value of this animal. Mr. W. G. Burkhardt, of Fairfield, Iowa, contributes some females which are of the very best lines of Bates breeding, being daughters of Wild Eyes Duke 5th. This bull was a son of Royal Waterloo whose dam was also the dam of Perulated Wild Eyes, one of the most noted Bates-bred bulls in America. One of the cows, a three-year-old, traces to Imp. Waterloo Duchess 3d through a line of Bates-bred sires, largely from the noted Vaile herd. The other traces to Imp. Water Girl by Grand Duke of Waterloo and is equally valuable from a pedigree point of view. Mr. Burkhardt also includes a two-year-old Waterloo Duchess bull. His sire was Lily's Chief, a son of Imp. Matabele Chief, a superb red bull bred in Aberdeenshire, Scotland. Fuller details will be included next week. Manager Mills states that a few additional entries can be accommodated if sent in at once. For catalogs and entry blanks address Mr. D. R. Mills, Des Moines, Iowa, to whom entries should also be sent for the Kansas City, South St. Paul, and South Omaha breeders' sales.

AN IMPORTANT DUROC SALE.

Thursday, October 18th, is the date selected by Messrs. Hurlburt & Rasmussen, of Taylorville, Ill., for their fourth annual sale of Duroc Jerseys. These gentlemen have been modest in their claims regarding their stock, but the writer, representing The Homestead, is pleased to recommend the offering to readers of this paper. The pigs have not been pampered, but are offered in excellent condition for breeding purposes. The spring pigs in this sale are sired by seven different boars whose veins are filled with some of the most noted blood in Duroc history, either being prize winners or tracing directly to prize winners. At the head of this herd will be found the good boar, Kraschel's Wonder 37771, he by Allison Jr. Perfection. This boar is a strong, smooth hog, with nicely-arched hock and a dark, smooth coat; stands on the best of feet and legs and is a wonderful breeder, as the stock sired by him will show to breeders sale day. Another boar which has been used extensively is Forest Chief 24807. He was sired by Chief of Indiana, he by Chief of Ohio, a litter brother of Ohio Chief. Messrs. Hurlburt & Rasmussen have selected the tops of their herds and breeders will not be disappointed in the offering. A fall sow by Kraschel's Wonder and out of Owanecco Belle 27504, a half sister to Gold Cloud, first and sweepstakes at Illinois State Fair in 1904, will please discriminating buyers. A litter sister is equally as good, and a spring boar and gilt represent the get of this noted sow in this sale. Three fall sows and a spring litter out of Madge H., a half sister to Gold Cloud, are attractive bargains. A very nice gilt is by Gold Cloud and out of Mayor Queen by Mayor Jr. Mayor Queen was one of litter that won third at Springfield last year. Rosa K. 94758 is a two-year-old sow by Buddy T. She sells with litter of six pigs. Rosa K. II., a yearling sow out of Rosa K. has a fine litter of nine by Kraschel's Wonder which sell with her. Mr. Rasmussen's consignment is a nice one. A fall sow farrowed in September by Kraschel's Wonder and out of Owanecco Beauty by Morton's Chief, will make an attractive brood sow in the spring sales. A litter sister and a spring litter of same breeding are equally as good. A fall sow and spring litter by Kraschel's Wonder and out of Dora by Red Cloud are as good as any in the sale. An April litter of two gilts and two boars by Condo C., second prize boar at Illinois State Fair, 1903, first at same fair in 1904 and second in 1905 is out of Louise W. by Nona Such, the sire of Hanley. Louise W. was out of Echo Queen by Echo King and sells with litter of eight nice pigs. The offering is one of quality and size and breeders should arrange to be present on sale day. Bids sent to Mr. D. M. Pierce will be carefully handled. Write for catalog as per the announcement on page 38 of this issue, kindly mentioning The Homestead.

LAKEWOOD SHORT-HORNS AT AUCTION.

On page 38 of this issue will be found the announcement of Mr. H. G. McMillan's sale of forty-seven Short-horn cattle, to be sold at Rock Rapids, Iowa, October 24th. On this date Mr. McMillan will sell thirty-seven cows and heifers, all of breeding age, seven of which are Scotch of the richest lines of breeding. He will also sell ten bulls, three of them Scotch. Among the Scotch females to be sold is one beautiful three-year-old cow, Duchess of Gloster; one three-year-old Brawith Bud; one six-year-old cow called Rosette. This is a Canada-bred cow, sired by British Knight; she belongs to the celebrated Cruickshank family, the Rose of Autumn. Sadie Victoria 2d is a beautifully-bred Victoria cow sired by Scottish King. She traces directly to Imp. Victoria 71st. Ballad Lass is a choice eight-year-old cow and belongs to the Scotch Bessie tribe. A splendid three-year-old Scotch heifer we find in Evangeline; the same may be said of a nicely-bred three-year-old Orange Blossom. These comprise the Scotch families of females that Mr. McMillan is putting on the market at this time. Among the ten bulls offered are some suitable to head herds. This sale will be held the day following Mr. Hector Cowan's sale of Short-horns at Paulina, Iowa, and the accommodations for getting from the Cowan sale are ample for all those who wish to attend the great Lakewood offering at Rock Rapids the following day. All of the females in Mr. McMillan's offering are bred to that splendid bull, Morning Joy. He is a handsome, dark red Scotch, bred by the Hon. M. H. Cochran, of Hillhurst, Can. This bull belongs to the celebrated Campbell Mina family. His entire pedigree runs

Prop. Union View Herd
Duroc Jersey Swine

B. C. MARTS,

Route 1
Polk City, Iowa.

rich in the best blood ever used at Collynie and Sittytton. He was sired by Imp. Joy of Morning, which was the highest-priced Scotch bull ever imported to America up to 1899. He was first sold at the Collynie sale to the late Mr. W. S. Marr for service at Upper Mill, where he was secured for the Hillhurst farm at a long price. His sire was the Cruickshank Clipper bull, Pride of Morning, the Highland Society champion at Aberdeenshire in 1894. He was also first in his class and winner of the Duke of York's medal for the best Short-horn. And in 1893 he won first in the Short-horn Society's prize of \$100 at the Royal Northern. Joy of Morning, it will be remembered, was of Cruickshank's famous Jessica tribe and was sired by the invincible Scottish Archer. Thus, it will be seen that those who secure females at the Lakewood sale bred to this great bull will have an opportunity to get something choice in the way of cows. More concerning this sale will be found in our next issue.

New Record for Durocs.

The long-looked-for sale of Mr. R. J. Harding, of Macedonia, Iowa, was held at Carson, Iowa, on October 3d and attracted breeders from Iowa, Nebraska and Missouri, while mail bids were sent from the above states and from Illinois and Kansas. The previous records for a pig was broken in this sale. Chief Model, a son of Ohio Chief and out of the great Nebraska Belle sold for \$480 and was purchased by Mr. O. E. Osborn, of Weston, Iowa. Messrs. August Son-neland, Harlan, Iowa; A. E. Poush, Charl-ton, Iowa, and A. F. Hager, Avoca, Iowa, were the bidders that remained to the last. The next highest price was \$425 for a son of Orion and out of Proud Lady, the \$1,275 sow. He went to Mr. W. A. Rankin, of Carson, Iowa. Mr. A. E. Poush being the runner up. Forty-three head averaged \$50. Chief's Model, the son of Ohio Chief, and the son of Orion, mark the highest price ever paid for a pig, and a new record has been placed to the credit of Mr. Harding's Crimson Valley herd. Colonel Callahan, assisted by Colonel Mossman, cried the sale. Below is a list of those selling for \$25 and over:

No.	BOARS.	Price.
17.	Chas. Ayer, Macedonia, Iowa....	\$ 32.50
18.	Gco. A. Robinson, Prescott, Iowa....	37.50
19.	Jas. Fender, Carson, Iowa.....	36.00
20.	Wm. Aeff, Oakland, Iowa.....	36.00
21.	Jas. Fender.....	33.00
22.	Grant Mackercel, Griswold, Iowa....	31.00
51.	J. H. Isaac, Red Oak, Iowa.....	52.50
52.	Bubert Rodengough, Macedonia, Ia.	52.50
2.	Grant Mackercel.....	72.50
1.	O. E. Osborn, Weston, Iowa.....	480.00
11.	W. A. Rankin, Carson, Iowa.....	425.00
13.	E. K. Young, Havelock, Neb.....	70.00

"Black and All Black: the Angus 'Doddle' and No Surrender!"

ABERDEEN ANGUS AT AUCTION.

AT HEATHERTON FARM, NAPERVILLE, ILL., OCT. 31, 1906, 1 P. M.

57--HEAD Prime In All Respects 40 Females-----17 Bulls. HEAD--57

Come and see if a fair selection has been made from the cattle in the Heather-ton herd. You will probably meet more Angus breeders than have assembled at a sale in recent years. Thirteen cows with calves at foot, cows in calf, heifers and young herd headers. An inspection of the Heather-ton herd in its twenty-fourth year and in its new home will interest breeders. Beginners may buy with confidence that later knowledge will not cause them to discard the blood lines chosen from this herd. The offering consists of thirteen Blackbirds, twelve Prides, eight Jilts, six Trojan Ericas, six Rose-buds, five Zaras, four Heather Blooms, etc.

Naperville is twenty-eight miles west of Chicago on the main line Burlington road and through trains and suburban service. Send for Heather-ton Herd History, second edition, and also sale catalog at once, mentioning this paper.

JOHN S. GOODWIN 184 LaSalle Street CHICAGO, ILL.

FORTY SPRING BOARS

sired by ORION CHIEF and KRUGER and out of dams by KANT BE BEAT, ORION CHIEF, CHIEF SURPRISE, COL. FINCH and other noted sires.

\$50 Buys boar related to Iowa and Illinois State Fair winner bred as above \$50

If you want an extra good spring boar, write

IRA JACKSON,

TIPPECANOE CITY, OHIO.

Mention Homestead when writing.

POLAND CHINA BOAR SALE

ON WEDNESDAY, OCT. 24, 1906

.....From the Willow Lawn herd of Messrs J. L. Miller & Sons, of Brooklyn, Iowa.....

ON the above date we will sell at public auction forty Poland China boars, twenty of which are of March farrow, the balance last fall's pigs. The fall boars are sired by J. L. Perfection 105711, a great grandson of Chief Perfection 32199. The dam of J. L. Perfection is Dickens 19278, by Gobel 61315. The spring boars are sired by W. L. Chief 105709 by Longview Chief 71057. The dam of W. L. Chief is Jilt's Favorite 215300 by Longfellow Tecumseh 63823. The boars are extra long, good full backs, and not a bad footed individual on the place. We have bought our breeding stock from the leading Poland China breeders of the state and have been in the business twenty years. The dams of some of the spring boars are Bess Chief 26824 sired by black U. S. 8455, her dam being May Chief 227423, of Chief Tecumseh strain. Longstar 263362 farrowed ten-five boars and five sows, she sired by Black U. S. 8455, her dam Starlight 2d 186983. Pedigrees will be furnished on day of sale. There will be free conveyance from Chelsea, Hartwick and Brooklyn.

J. L. MILLER & SONS, - - BROOKLYN, IOWA.

TRIGGS GETS THEM GOOD FOR HIS SALE.

AT
DAWSON, NEB., OCT. 25, 1906.

50 HEAD BOARS Bone, Feet, Growth, Vitality and Quality. **GILTS 50 HEAD**

The kind that make 700 to 900-pound hogs. Offering mostly sired by MAJOR M. by BLAIN'S TECUMSEH. He will weigh close to 1,000 pounds. Sows represent blood of KING DODO, PROUD PERFECTION, CURTIS CHIEF, ROYAL BLUE 2d, FIRST QUALITY, TECUMSEH SUNSHINE and JOE GIBBS.

My offering is the same type as the Blain hogs. I am selling a class of Poland that you will appreciate. Several choice boars that should be taken by breeders. Choice sow prospects. G. W. Segrist will attend sale.

JNO. TRIGGS, Prop. DAWSON, NEBRASKA.

Cols. L. W. Leonard, C. H. Marion, M. W. Harding, Aucts.

SALE OF IMMUNIZEDPOLAND CHINAS....

AT MY FARM NEAR FAIRFIELD, NEBRASKA, OCTOBER 26, 1906.

50 HEAD OF CHOLERA PROOF HOGS 50

Hogs with quality and size combined. The breeding that has made good the world over. Some choice yearlings: *Big Kodak, Jim Crow, Chieftain*. Very promising fall yearling sired by *McK's Choice Tec. 3d*. Several strong spring pigs of both sexes.

My list of sale stuff is par excellence. I am safe in saying that the stock will be far the best offering ever made by me. My hogs have had the run of alfalfa pastures and treated for future use. Large, roomy sows with the best of breeding. Look up field note elsewhere. G. W. Segrist will attend sale. Catalog now ready. S. & O. McKelvie sell October 25th, at Fairfield, Neb.

H. L. MCKELVIE, PROP., - FAIRFIELD, NEB.

COL. T. C. CALLAHAN, AUCTIONEER.

....STANLEY'S ANNUAL SALE OF POLAND CHINAS....

AT FARM NEAR SHERIDAN, MO., MONDAY, OCTOBER 22, 1906.

20 BOARS OF FALL AND SPRING FARROW. SOME HERD HEADERS HERE.

25 SOWS. SIX TRIED BROOD SOWS. OTHERS ARE OF FALL AND SPRING FARROW.

JOE Profit a sow of Joe C. an Ohio prize winner and Giant Perfection and of Ferd Rood's great sow Giantess are the principal sires. Joe Profit goes in the sale. *Chieftain* Wray's Front Rank, Vanguard, Shamrock and other great sires. All are the large heavy bodied and I know they will please you. Write for catalog which gives full particulars.

A. O. STANLEY, - SHERIDAN, MISSOURI.

56---POLAND CHINAS---56

To be sold at Young's Livery Barn in Corning, Iowa, on Saturday, Oct. 20, 1906, commencing at 1:30 o'clock sharp. Consisting of two tried yearling boars; nineteen fall boars; twelve spring boars; twenty three tried sows and gilts. Some sows with young litters.

THE boars and gilts are sired by Ideal Perfection 38309, Move On 2d 36805 and Mouw's Chief. Mahr's Perfection 40604 and Mouw's Chief are included in this sale. Mahr's Perfection bred by E. L. Jimison, Oneida, Ill., is a good hog and should head a good herd. Mouw's Chief bred by Peter Mouw, Orange City, Iowa, is one of the large kind, is a good breeder and should head a herd for someone. Our fall boars are good growthy, heavy boned, lengthy fellows and any one wanting a fall boar should attend this sale—they are scarce. Come, help yourself; we furnish the goods—you make the price.

G. H. & J. L. MAHR, Piper Bros., Aucts., Brad Newcomb, Clerk. CORNING, IOWA.

...COMBINATION SALE...

OF

ANGUS CATTLE

**TO BE HELD IN THE SALE PAVILION AT
MORNING SUN, LOUISA CO., IA.,
ON THURSDAY, OCTOBER 25, 1906.**

This is a select draft of thirty-nine head from the herds of McElhinny & Cubit and S. E. Edgar, of Morning Sun, Iowa, and consists of nineteen cows from three to eight years old, fifteen yearling and two-year-old heifers, and five young bulls. This is no "housecleaning" sale, but a bunch of high-class cattle. Here the buyer can find cows in their prime with calf at foot and rebred, or young heifers, with all their usefulness before them, or bulls to sire the "market-topper." The families represented are: Baroness, Chloe, Brucehill Violet, Drumin Lucy, Georgiana, Jennet, Miss Morrison and Zara. Arrange to attend this sale, where you can see representative animals of "the breed that beats the record." For catalog, address

W. E. MARRS' SALE OF Duroc Jerseys

At Albany, Mo., Tuesday, October 23.

25 BOARS.

25 SOWS.

These are largely the get of Pilot J. 26311, he by Pilot 12075. His dam, Dora, was got by Elmo 7175. Pilot J. was formerly used in R. J. Harding's great herd. The dams are daughters of the great show boar, Improver II., Cole's Duroc, Masterpiece and Golden Duke. The Improver and Cole's Duroc sows were bought at the great Bowman & Fitch dispersion. I think I have hogs to please you. Send for catalog, mentioning this paper.

East Linn Farm, 4 miles Northwest of Springville,
Linn Co., Iowa, Tuesday, October 16, 1906.

20 Boars---20 Gilts.

Sired by Iowa Chief 37453, Rosewood 31345, Cracker Jack 38885 and King Perfection. All prize-winning boars and sires of prize winners. The pigs are the tops of my spring crop, nothing being reserved, and they are an exceptionally good lot, smooth, growthy and strong boned. My catalogs are ready; let me send you one. Address,

W. S. PENN, Col. J. H. Lathrop, Auct. SPRINGVILLE, IA.

WARREN'S WELL BRED OFFERING OF — DUROCS

At Inland, Neb., October 20th, 1906.

Choice pigs of both sexes. Large, roomy gilts with good color. Strong lot of spring boars. Bone, feet, strong backs and vitality. Offering strong in blood of Improver 2d, Hambletonian, Billy K., Rays' Choice, Big John and Higgins' Model. Several good herd headers noticeable.

My first sale will be one of quality, finish and of good color. My hogs have been selected from the best herds of this breed. I have paid long prices for my foundation stock. This sale will not be a disappointment to those who may attend same. My sale follows the C. Briggs sale at Clay Center, Neb. Catalog now ready. G. W. Segrist will attend sale.

H. E. WARREN,

Col. T. J. CALLAHAN, Auctioneer.

INLAND, NEB.

Another Choice Offering

FROM

... VAN PATTEN HERD OF DUROCS ...

TO BE SOLD AT SUTTON, NEBRASKA, OCTOBER 18, 1906.

...THE CHANCE TO BUY REAL HERD HEADERS...

40 HEAD OF TOPS 40

Some choice animals sired by the great Billy K. Others sired by Golden King, Beauty Wilkes, etc. Billy K. sired the prize winners at Iowa and Nebraska this fall. He is now dead. Get some of his get. The strong two-year-old Golden King is included; five choice sows.

My offering will be up to past ones from this herd. I believe my lot of 35 boars are as strong as will be found in any ring this season. The grand sire, Billy K., has passed away, but has left several choice pigs that prove him what we claim. His get, as well as Beauty Wilkes, were winners at two great shows. I am offering some pigs that should be taken by breeders seeking herd headers. Catalog now ready. G. W. Segrist will attend the sale.

FIFTH ANNUAL SALE

OF

LAKEWOOD SHORT-HORNS

AT ROCK RAPIDS, IOWA, WEDNESDAY, OCT. 24TH.

47 HEAD-10 BULLS-37 COWS & HEIFERS

A splendid lot of Scotch and Scotch-topped cattle in fine breeding condition. Several of the bulls are extra good and the cows and heifers are the best we have ever offered and bred to our famous Scotch herd bull, Morning Joy. A great opportunity to get a good young bull or cows and heifers in calf to one of the best bulls in Iowa. Send for catalog to

To Be Offered

OCTOBER 17th, 1906, at PAWNEE, NEB.

My offerings have topped all sales on spring pigs in Nebraska. Have shipped hogs to all parts of the United States.

Have furnished many noted herd headers.

My offering will be up to past sales held by myself. I feel confident the buyer will be well repaid for his trouble. The farmer demands a hog with size and vitality, as well as hogs that sire and produce large litters. The hogs are in good breeding condition. The sows are as choice as the boars. The opportunity is presented. Look up field note elsewhere. Catalog now ready. G. W. Segrist will represent this paper.

50 HEAD OF

TOP DUROC-JERSEYS

SELL AT AUCTION

JOY, ILLINOIS, OCTOBER 16th, 1906.

Thirty spring boar pigs, good enough to head any herd, five summer and fall yearling boars that are sensational, ten fall gilts that will make sale toppers next winter. A few choice sows with litters by their sides. The spring pigs in this sale are sired by Desota's Model (the Kansas State Fair winner), Iowa Plummer, Prairie Acrobat, Champion Paul, Major R., Proud Advance and Tip Top Notcher.

A FEW OF OUR SPECIALS.—A summer gilt by Iowa Plummer out of Roycroft Interstate is an extra good one. Another good one by Iowa Plummer is out of Prairie Fancy. This is a very handsome sow, broad, long and square. She has a litter brother that is a great prospect. Plummer's Winner by Iowa Plummer out of Prairie Winner by Indiana is a fall boar that is phenomenal both in breeding and individuality. Three boars by Desota's model out of Stoner Girl (the top of the Stoner fall sale) by Tip Top Notcher. A fine litter by Champion Paul out of Prairie Top Notcher by Tip Top Notcher that are something extra. One spring boar by Tip Top Notcher out of Daisy Kruger by Kruger. Here is a herd header. Another litter by Major R. out of McCabe's Dream by A Top Notcher, and a fine litter by Proud Advance. Write for one of the catalogs at once, mentioning this paper. Send bids to D. M. Pierce, representing this paper, in my care.

HEAD

At the Fair Grounds

HUMBOLDT, IA., TUESDAY, OCTOBER 16, 1906.

AM putting about forty head of cows and heifers and ten bulls in this sale. The bulls are a choice lot of well developed, strong and vigorous young animals. Twelve of the cows will have calf at foot by the Scotch bull Commodore 2d, and some will be rebred to Mysie Lad, my present Scotch bull. Among the bull offering will be two grandsons of Imp. Leyburn, one of the best bulls ever used in my herd, and one of the best bulls ever used in the state of Iowa. I am putting in a most excellent bunch of Standard Fibre heifers some of which are bred to Mysie Lad. I am putting in a splendid lot of useful money-making Short-horns of the very best families. Write for catalog, mentioning Iowa Homestead.

OPPORTUNITY TO GET THE BEST OF THE BEST DUROC BLOOD.

MORRISON & SON'S**Strong Offering**

OF

DUROCS**At College View, Neb., October 16, 1906.****15 Ohio Chief**

Boars out of Village Pride by Improver 2d, Lady Top Notcher, Miss Bob. Others sired by Morrison's Bell Top, out of the great Nebraska Belle; others by Cole's Duroc and Pericles.

The sows in the herd represent Dan Patch, Improver 2d, Crimson Wonder, Orion, Van's Perf. and others of note.

The real bargain sale of the season. Think of it. A sow selling for the reasonable sum of \$100 gives you free service to the great Kant Be Beat (\$2,500 boar and the great sire of show hogs as well as winning wherever shown).

Where can you get better blood than you will find here?

Our offering embraces the choicest of the choice. We have the best lot of boars and gilts ever offered by us. We have size, finish and color. The breeders cannot find better opportunities than we are offering you. Come and inspect our offering. Visitors are always welcomed. Our catalog is now ready. Look up field note. G. W. Segrist will attend this sale.

Scotch and Scotch-topped

SHORT-HORN SALE.

Raleigh, Ia., October 17, 1906.

50 HEAD. 40 Cows and Heifers and 10 Bulls.

About 16 head of Scotch cattle, including the imported cow, Celia 9th, and our Scotch bull, Bridal Archer.

IN our sale will be found some of our very best cattle representing such choice and well known families as Duchess of Gloster, Orange Blossom, Miss Ramsden, Gwendoline and other popular families. There will be a choice lot of young heifers in the sale, and some good young bulls, including Sittyton Archer, a son of our great herd bull, Choice of Archers. We think here is the best young bull we have ever raised. The rest will be Scotch-topped on the very best foundations. Several of the cows will have calf at foot by Choice of Archers and the most of them will be bred to him. Those who are looking for good cattle are invited to attend our sale. Write for catalog at once and mention Iowa Homestead. Address,

F. A. SCHAEFER & SON,

Col. Geo. BELLOWS, Auctioneer.

RALEIGH, IA.

MERCER COUNTY BREEDERS'

AUCTION OF HIGHLY BRED AND MERITORIOUS

ABERDEEN ANGUS

CATTLE

AT THE FAIR GROUNDS, ALEDO, ILL., TUESDAY, OCT. 23, 1906

Six bulls and thirty-seven cows and heifers are cataloged, including the double Blackbird-topped Ballindalloch K. Pride bull Palamon B, a yearling of beautiful symmetry and grand scale; the Trojan-Erica heifer Erinna of Hamlet 5th; the double Blackbird heifer Blackbird of Hamlet 8th; the Blackbird show heifer Shadeland Blackbird 3d; and other good ones the get of such sires as Royal Blackcap 2d 49527, Black Knight of Estill 8th 29493, Imp. Alick of Theakston 61676, Guinea of Taylor Ridge 28854, Duke of Marlborough 22827, Hector of Lakeside 25647, Countersign 52492, Britton 52876, Rotanta 10364, Jasper M. 52670, Teutonic 52489, Aldine of Woodlawn 24231, Custodian 52498, Kenovet 62448, Sultan 2d of Greenview 22772. The most fashionable families are represented. The offering is absolutely free from culls, and for short-legged, thick-fleshed animals of grand quality and scale that will advance and maintain the best type of the breed, it is rarely equaled.

Mercer county has within its borders more registered Aberdeen Angus cattle and more men interested in them than can be found in any other county in any other state in the union. We are proud of the cattle we shall submit for public valuation on this occasion, and we invite, not only our friends, fellow-breeders and farmers of Mercer county, but also those of other counties and other states to attend this auction and see the Angus here he reigns supreme. Consignors: C. A. Bopes, Reynolds, Ill.; G. E. Thornton, Millersburg, Ill.; G. E. Atkins, Aledo, Ill.; J. E. Reed, Aledo, Ill., and S. Lee, Aledo, Ill. Parties attending sale will be met at Reynolds, Ill., on the Rock Island railroad, and Seaton, on the Iowa Central railroad. For catalog address,

COMBINATION SALE ABERDEEN ANGUS

... CATTLE ...

TO BE HELD AT THE FARM OF

M. D. KORNS, 3-4 MILE SOUTHEAST OF HARTWICK,
..... POWESHIEK COUNTY, IOWA, FRIDAY, OCTOBER 19TH

46 HEAD---34 FEMALES---12 BULLS

A carefully selected draft from the herds of

M. D. Korns, Hartwick, Iowa.
C. G. Korns, Hartwick, Iowa.
Wm. Dixon, Hartwick, Iowa.

U. S. Grant, Brooklyn, Iowa.
A. H. Kimball, Ladora, Iowa.
H. H. Reed, Marengo, Iowa.

This is the first sale of registered Angus cattle ever held in this vicinity and is composed of a good lot of breeding cows and heifers and young Bulls with the following well known strains represented, Pride, Queen Mother, Blackbird, Lady Franklin, Favorite, Drumin Lucy, Miss Copeland, etc. The females will be sired by, or bred to such bulls as Royal Blackcap 3rd, Black Roselawn, Silhouette 2d, Bernier, Blackbird Lord, Elyron and others.

There will be a number of bulls sired by the show bull Royal Blackcap 3d that are good enough to head any herd; also by other as well known bulls.

The females are a good lot and will be presented just in good breeding condition; those old enough will have calves at foot or be bred to good bulls of the well known strains, Blackbird, Queen Mother and Pride.

This will be a grand opportunity for the beginner to buy a few females for a foundation herd. For catalog, write, mentioning this paper, to

C. G. KORNS, HARTWICK, IA.

H. C. GUMBEL,
The Man Who Stands Back of the
"Knodig" Pitless Scale.

Let Me Send You a Knodig Pitless Scale On 30 Days' Trial

My Direct-From-Factory Selling Plan Saves You Jobbers' and Dealers' Profits.

You Have Nothing to Pay Until You Are Satisfied. No Deposit—No Notes to Sign—No Obligation of Any Kind.

My Scale Is Used by the U. S. Government, Which Proves Its Quality

I WANT every Farmer, Stock Raiser, Elevator Man and Grain Dealer in the land to get acquainted with the New Model Knodig Pitless Scale, with the patented protected bearings. My big free scale book just from the printers tells all about the "KNODIG," and it's a mighty interesting story, too!

I don't care whether you expect to buy a scale now or in the future, or for the matter of that, whether you ever expect to buy one,—send for the "KNODIG" book, anyway. It contains over 40 half tone pictures that will interest you, and it is chock full of good common scale sense from cover to cover.

You just simply can't read this book without getting interested in the "KNODIG" and if you don't want one yourself, I'll take my chances on your saying a good word for my scale to your neighbors. Why, two-thirds of the thousands of Knodig Pitless Scales now in use in this country were sold as a result of satisfied users telling others about it.

Yes, that's just the kind of scale the "KNODIG" is!

* * * *

MAY BE you are thinking about buying an expensive, old style Pit Scale. If so, just take my advice,—don't! I can not only save you from \$40 to \$60 in the cost, but I will also give you a better scale in the "KNODIG." Here is why it is a better scale:

The Knodig Pitless Scale sets entirely above ground. All the working parts are inside the eight-inch steel frame. No pit is necessary. Therefore, the "KNODIG" does away with the following annoying and expensive features of the high priced Pit Scales:—

Digging and walling a pit, renewing broken and rotten timbers, dipping water and breaking ice, replacing rusted parts caused by pit dampness, removing platform to get at the trash and dirt.

Now, understand me,—please! I don't say that the old style Pit Scales may not be all right for those who can afford to pay a fancy price, never expect to move their scales, and do not mind the trouble and expense of keeping them in repair.

But,—if you can save about half in price,—have no pit to dig,—no big lumber bills,—no expensive Stone Mason, Bricklayer or Carpenter jobs for foundations,—and get a better, more convenient and satisfactory scale in every way.—

—Why shouldn't you prefer a Knodig Pitless Scale?

* * * *

REMEMBER, too, that the "KNODIG" is portable. It is personal property, the same as a plow or wagon, and can easily be taken down and moved anywhere on your premises, wherever the work may happen to be. The Pit Scale is immovable. The foundations are of brick or stone for a fixed location. Should you sell your land, the pit scale goes with it under the law.

And the recently patented Protected Bearings on the Knodig Pitless Scales give them a big advantage over all other scales. They are always ready for instant use, which saves money, time and temper. No ice or snow to cut away from "KNODIG" Bearings in winter, no dust or dirt to clean out at any time; nor can rain, snow or sleet interfere in any way with the sensitively accurate weighing feature of this scale. Absolutely accurate weighing is what you want, isn't it?

Knodig Pitless Scale bearings are made of black diamond and silver tool steel, proved by experience to be absolutely the best steel for the purpose.

Write for the Free Knodig Scale Book today. Sure!

H. C. Gumbel, Gen'l Mgr. National Pitless Scale Co.,
2011 Wyandotte Street, Kansas City, Mo.

The pivots are ground, gauged and tempered by expert scale makers, and the scales are sealed by an expert sealer.

* * * *

HERE'S how I save you money on scales of high quality:

All scales, including the high priced pit scales, are sold through Jobbers, Dealers, Agents and Salesmen, who all take their profits out of the scale by the time it reaches you, the user. My new Direct-from-Factory Selling Plan now saves you all these middlemen's profits, because I have cut out absolutely everyone who stands between you and me in the sale. You pay only one small profit on the "KNODIG" over and above the actual cost of labor and materials in producing it.

No other scale in the world is sold this way. If you question this statement, just write to any scale manufacturer and see how quickly he will turn you over to some agent or dealer. But why should you pay more for the privilege of buying scales through a third party?

Does it make them any better to pay this extra profit? Is there a

single reason why you should not deal directly with the factory? You buy Stoves, Incubators, Organs, Buggies, and a hundred other things that way, and save money by doing it. Then, why not—Scales?

In adopting this policy of direct selling, I realize that I am making many powerful enemies for the "Knodig" Scale. For I am antagonizing every scale jobber, mail order concern, dealer, agent and salesman in the country, who will naturally, in self defense, talk against the "KNODIG" and in favor of the scale that gives them, instead of you, the extra profit.

So, you see that I must rely solely upon you, the man who pays for and uses the scale, and I ask you to decide for yourself where your real interest as a scale buyer lies—whether with the scale that comes to you burdened with a "rake-off" for the middlemen, or

the "KNODIG" which you can now buy direct at a saving of one-third to one-half.

* * * *

LET me prove that the "Knodig" Pitless is the scale that you want. Let me send you a set on 30 days' free trial. Test them in your own way in the actual weighing of your stock, grain, hay and produce and make up your mind for, or against, the "KNODIG."

You have nothing to pay until you are satisfied,—no deposit,—no note to sign,—nothing to do but give the "Knodig" a fair, honest trial at my risk. If it doesn't please you, just send it back and I will pay freight both ways and the expense of setting it up on your place. Could any offer be fairer?

The "KNODIG" must satisfy you or no sale. No buying a "pig in a poke" when you deal with me. You take absolutely no chances, you run no risk of any kind, because you try before you buy this scale. For, you see, under my plan the Knodig Pitless Scale must actually sell itself on its merits.

Please send me your big free Knodig Scale Book by first mail.

HOGS BREAKING DOWN.

The following communication has been received from one of our subscribers, Mr. F. C. Wilson, of Decatur county, Iowa:

I wish you would tell me what is the matter with my hogs and shoats. They seem to get stiff and lame in their hind legs, and while some of them get over the trouble, others do not. What is the cause and also the remedy?

There are a number of ailments that might result in stiffening the hind quarters of hogs. In the first place, it frequently happens that too heavy feeding of corn causes a weakening of the bone, the result being that animals break down. This is apt to occur where they are not supplied much pasture or grains or feeds other than corn. Corn does not contain enough flesh-forming and bone-making material and the man who uses it without supplementary feeds is always taking chances of having trouble. Of course if they have plenty of pasture and exercise they will very often go through in good shape. If the ailment in this case is due to corn we would advise the use of supplementary feeds such as shorts, bran or oil meal. Tankage is also an excellent food in a case of this kind, as it is a most satisfactory flesh and bone builder. Stiffness may be due to rheumatism. This, in our opinion, is the cause of a good deal of trouble among hogs. Sleeping in damp quarters is invariably the cause of this ailment. We have known instances where it resulted when hogs were compelled to sleep on drafty floors. The hog can stand some hardship, but nothing will throw him out of condition quicker than air drafts that circulate through his sleeping quarters. Bedding in any case should be used liberally from this time on for hogs. It will not only keep them dry, but as the cold nights approach it will prevent them from piling up and they will consequently do much better than if compelled to sleep on the bare floor or in damp quarters. If the food of these hogs seems to be responsible for the trouble it might be necessary to do a little drugging in order to more quickly bring them to their normal condition. We have found that a good teaspoonful of sulphur mixed with the food about three times a week will do more to a

hog that is out of condition than anything we have tried. If this is used, however, they must surely have access to good, dry quarters, otherwise there is danger of them taking cold and this may result in lung fever.

STACKING SORGHUM.

A subscriber asks about the best way to handle sorghum. He states that he has already put it in the shock and is doubtful whether it is better to leave it there or to put it in the stack.

This is practically a labor question. Sorghum will usually cure out sufficiently in about a month if left in the shock to be stacked with a reasonable degree of assurance that it will keep well. It is heavy work at all times, but if it is put in the stack some time during the fall much disagreeable labor will be saved later.

The objection to leaving it in the field is that it invariably freezes to the

ground, so that hauling during the winter necessitates some digging and chopping. We have known instances where it has been put in the barn after being thoroughly cured in the shock. It gets a little warm at first, but usually cools down without spoiling.

INDICATIONS OF GAINING ABILITY IN STEERS.

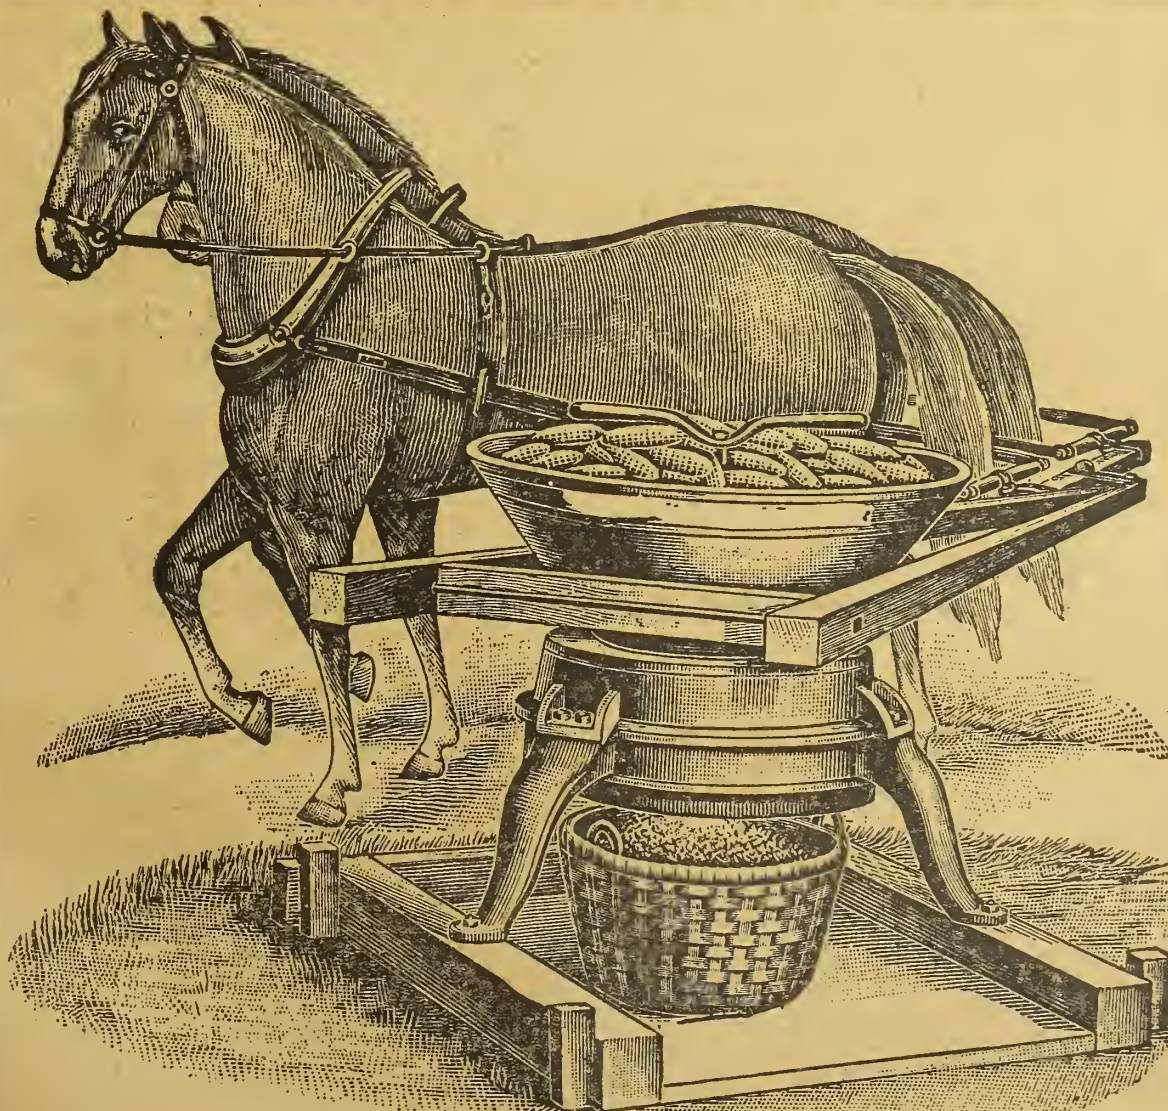

In his book on "Profitable Stock Feeding" Professor Smith, of the Nebraska Experiment Station, gives some attention to the beef type in the feed lot. Concerning the external indications of gaining capacity Professor Smith says:

Fortunately for the man who huys cattle for the feed lot, there are certain external qualities which serve as an index to feeding capacity. (1) The abdominal cavity, occupying the middle of the animal, should be roomy. A steer, slender and tucked up in body, is unable to utilize a large amount of feed and therefore cannot make heavy gains. There should be not only good depth and

breadth of body in the abdominal region, but this breadth and depth should extend forward to include the chest cavity. (2) A lack of width through the chest would indicate that the vital organs, including lungs and heart, are restricted in development. An animal having poor chest development is invariably a slow feeder. This seems reasonable in view of the fact that the lungs and heart play so important a part in purifying the blood and forcing it to circulate throughout the entire system. The blood being the medium which carries off worn-out tissue and replaces it with fresh matter taken from the digestive tract, is a most important factor in digestion and assimilation. If there is a lack of lung development—indicated by narrow chest, slender neck at the base, and small nostril—the oxidation, or purification, of the blood must be correspondingly slow. (3) An active, healthy circulation of blood, and active digestion and assimilation are also indicated by the character of the skin and the hair. The outer skin is a continuation of the inner skin, which constitutes the stomach and the intestines. If the outer skin is dry and harsh, lacking in pliability, we may expect a poorly nourished inner skin. A soft, pliable skin, covered with a thick, mossy growth of soft, fine hair, oily in appearance is almost a certain indication of active digestion and assimilation of food.

Drawing the skin between thumb and forefinger is the surest way of determining its handling quality. In buying steers for the feed lot, however, this is not often possible, because of the timidity of the animal. A feeder of long experience learns to associate a bright, healthy coat of luxuriant hair with gaining capacity. He learns to avoid the skin having the appearance of being drawn tightly over the body. These are qualities which may be observed by the eye.

Experienced feeders know that one might talk on this subject until doomsday and still leave the beginner to pick up nearly all of his knowledge on the subject by experience. When one has put his own dollars into a carload of steers, and repeated this several times, he finds the type that makes him money. However, the description given by Professor Smith is a good one, and even the experienced feeder cannot place his ideal too high. Blood of course will tell, though after all it is more a matter of individual merit in the animal itself than a question of breed when it comes to making gains in the feed lot. There is not much difference in the relative powers of assimilation between good ones of the various breeds, the merit of the strictly beef type animal being found in the greater value of the cuts when such an animal is finished. We need not only to pick out the type that will make the gains, but one that when finished will attract the buyer.

If any of our readers want to buy a feed grinder, one of the most useful machines on the farm, and want to buy it without any trimmings that go with such articles when bought from dealers, we would recommend them to the Western Harness & Supply Co., 53 Main St., Waterloo, Iowa. This concern manufacture a full line of feed grinders, feed cookers and tank heaters and are known among the feeders as one of the best lines on the market, and they sell them direct from their factory to the farmers, giving them the benefit of the factory prices. All their goods are sold in this way. That accounts for the very low prices. They sell their Knox Big Grinder for \$23.25 and guarantee it to grind fifty bushels full of corn per hour and also guarantee it against breakage for two years. They would be glad to ship their Knox Big Grinder to any of our readers on ten days' free trial. The Western Harness & Supply Co. are a concern our readers may safely deal with. They publish a catalog, giving a full description of their wares which they manufacture and place direct in the hands of the users. It will be sent on application.

THE HOMESTEAD

A Practical Journal for the Farmer,
Stockman, Fruit Grower, Poultryman,
Gardener and Housekeeper.

ENCOURAGING AGRICULTURAL COLLEGE STUDENTS.

During recent years the agricultural colleges and experiment stations have been taking an important part in building up an improved agricultural and live stock industry in the corn belt. The part taken by these institutions in exhibitions, notably the International, which is annually held in Chicago, has done much to break down the old prejudice that those in charge of these institutions were theorists and therefore not capable of giving practical instruction that would help the man out on the farm.

We have at hand a communication from Mr. J. Ogden Armour addressed to the president of the International Live Stock Exposition at Chicago, which reads as follows:

We all recognize and appreciate the work done by our agricultural colleges in advancing the cause of agricultural education in this country through the character and extent of their exhibits of live stock and field products at the international show.

With a view of stimulating their efforts to give an increased evidence to our farmers of the great value of their work, I hereby offer to you the sum of \$5,000 to be distributed annually at the International Exposition in twenty agricultural scholarships to be competed for by the state agricultural colleges at your exposition.

The competition for the scholarships to be based upon animal and grain exhibits from the several colleges and such other forms of agricultural student competition as may be recognized or established by the International Live Stock Exposition. The details governing the competition to be determined by the management of the said exposition and to be known as the J. Ogden Armour scholarships.

It is my desire that the recipients of the scholarships should be limited to boys whose parents are unable to give them the advantage of an agricultural education.

Pres. J. A. Spoor replied to the communication received from Mr. Armour as follows:

On behalf of the directors of the International Live Stock Exposition Association, as well as for myself, I beg to acknowledge your favor of the 5th inst. and to accept with many thanks your most generous offer of \$5,000 to be distributed annually at the International Live Stock Exposition in twenty agricultural scholarships to be named the J. Ogden Armour scholarship.

This endorsement by you of agricultural education is most timely and worthy, and the safeguarding of the scholarships so that they may only be given to boys who might not otherwise have the advantage of a college education is a wise provision. The International Live Stock Exposition, founded for the advancement of agriculture and the improvement of live stock, is honored in being made the medium through which your liberal endowment is to be distributed, and I beg to assure you that every assistance in the power of this Association will be rendered to carry out the provision of your scholarship awards, so that the greatest possible good may be derived therefrom.

Please accept our renewed thanks with full appreciation of the generous spirit and motive that has prompted the gift.

We are not informed as to just what disposition will be made of the sum of money donated by Mr. Armour. We believe, however, that the directors of the International are sufficiently in touch with affairs at our agricultural colleges to dispose of these scholarships in a manner that will accomplish the greatest possible good for central West agriculture.

VALUE OF WEIGHT IN WORK HORSES.

There is more than the usual amount of interest being taken in the showing of draft horses this season at the state fairs. The Percheron, Shire, Belgian and Clydesdale classes at every fair held in

The crisp autumn days are at hand; October, the most delightful and characteristic of the fall months in this part of the world, is more than half gone; the distant approach of winter is signaled by the cool breath of the advancing season, and the farm takes on the brisk activity betokening the coming end of another year. The Homestead always welcomes the fall and winter seasons, because they bring it into closer relations with the farmer and his wife, with the boys and girls on the farm, and with the hired help in field, feed-lot, barn and kitchen. Pages neglected or forgotten in the summer, when the call of the growing crops is urgent, and when the heat and burden of the day make intellectual effort difficult, are eagerly sought when fall and winter come. We are all human—even editors—and rejoice when "our turn comes."

The Homestead was honored this year by being selected by the National Agricultural Press League to represent that important body as a member of a committee of three farm papers, through duly-designated representatives, to appear before the congressional postal commission and state the wishes of the agricultural press respecting postage on newspapers and magazines. The other members of the committee were the Farm Journal, of Philadelphia and the American Agriculturist, of Springfield, Mass. The hearing was held at New York, October 1st to 5th, and was full of interest to all concerned. To be thus chosen from among the 500 farm papers of the country to voice the sentiments of the farm press west of Pennsylvania was a mark of confidence deeply appreciated by the publisher.

A pleasing feature of this gathering of publishers of all classes to present their views of postal policy to the commission was the complete absence of the spirit of bitter rivalry which used to mark such gatherings. There were duly-authorized representatives of the periodicals, the daily newspapers, the trade papers, the fraternity organs, the local weekly press, the Sunday school papers

the corn belt have been well filled, and the quality throughout has been uniformly of a high order. In most cases the classes have been filled with imported animals, and while it is a most excellent sign of the times to find that horses purchased abroad are selected with great care, yet there are those who regret that so much attention is being paid to the importing of animals and so little to breeding them in our own country. To this it may be said that it will be many years before America will have enough good draft mares to raise her own supply of stallions. Those who have tried to breed them here have found out that the difficult problem is to keep up the scale. The market demands the big horse. It wants quality, but it pays well for weight.

Professor Craig, in his book on "Stock Judging," gives the following table which shows the weight and price of drafters in the Chicago market in the early nineties:

Average weight.	Average price.
1,400	\$155.87
1,450	159.15
1,500	169.15
1,550	176.56
1,600	176.62
1,650	208.64
1,700	212.89
1,750	236.14
1,800	258.33

According to this tabulation the increase in weight from 1,400 to 1,800 pounds advanced the price upwards of \$100, thus making the 400 pounds increase worth a little better than twenty-five cents per pound. The figures given here no doubt apply quite accurately to prices at present, meaning that a premium of twenty-five cents per pound is paid for weight in the draft horse for every pound added between 1,400 and 1,800 pounds.

Although weight, as indicated above, sells for good money, there never was a time when more emphasis was placed on quality of limb than the present. A horse with the meaty bone is discounted in the central markets today compar-

and practically all sorts of recognized publications, but there were among them only those courteous differences of opinion which mark the intercourse of gentlemen with each other. It has almost passed into a proverb in these latter days that the publication which devotes any part of its space, much more a considerable part, to criticism of a competitor or its methods, never meets any large measure of success. The effort to injure a rival indicates a bad spirit—a spirit not consonant with the good feeling which attracts others into business relations. The modern publisher builds up his own publication and, if questioned about a competitor, says a good word for him. He never seeks to injure a business rival or to tear down the results of his labor.

The advertising columns of The Homestead are crowded, these days, with interesting, important and valuable announcements. We believe no other weekly agricultural journal in the world contains so much advertising, of so varied a character and representing so many different advertisers. In both commercial and live stock advertising the ascendancy is noticeable. The stockmen of this great, prosperous, mid-western land of plenty have learned that no other weekly agricultural paper reaches so many progressive, intelligent, thrifty farmers and breeders as does The Homestead. A well-worded advertisement, offering desirable stock for sale, never fails to attract the attention of the vast army of Homestead subscribers, now nearly 85,000 in number.

"We are more than pleased with the results of our advertising of 'the Akin Husker' in The Homestead," write Messrs. Smith & Davis, an enterprising firm of Ames, Iowa. "Every mail brings us orders from it. We have received orders from wherever your paper circulates; and the orders we are receiving indicate to us that your circulation extends all over the United States, as well as into Canada, for we received an order from a Canadian farmer who said he

noticed our advertisement in The Homestead. We placed our advertising in The Homestead, the Wisconsin Farmer and the Kansas City Farmer and Stockman on the low combination rate you offer, and we feel that we made no mistake in so doing. We hope to continue with you as the seasons come and go." An entire issue of The Homestead could be filled with just such expressions as the above, but one must suffice.

Shall it be 100,000? We mean the circulation of The Homestead. Less than two years ago it was 60,000; today it is nearly 85,000 and still steadily growing. How long this growth shall continue and how soon we shall reach the 100,000 mark depends largely upon the favor and friendship of those whose names are already on our lists. We have a very vigorous and active circulation department, to which we have recently largely added; but canvassers, club agents and solicitors can succeed only in the degree in which The Homestead makes friends for itself. The present growth is more largely due to the friendly commendation of our present subscribers than to all the agents who are soliciting subscriptions for us in the corn fields and at the farm houses of the West. This good service our friends are doing for their favorite farm paper was never so productive of results as now.

While advertising increases in volume and value from year to year, it is The Homestead's policy not to neglect the reader. As pages are added for advertising, reading matter is also added; and our editors are under instructions to spare neither money nor effort in securing the best that the world of practical and scientific agriculture affords. We are determined that no issue of The Homestead shall ever go out which will not prove worth a whole year's subscription to the studious reader. This high standard will neither be abandoned nor lowered. So long as our present generous patronage continues, it will, on the contrary, be steadily elevated.

SAVE YOUR BACK

Electric Wheel Co. 83 43, Quincy, Ill.

tion of the principles and also giving comparative results for lands variously situated in the district. The common problem of sub-districts or main ditch with laterals is also treated, with solution for assumed conditions showing a method by which each sub-district will pay for its own lateral and for its share on the outlet or main ditch.

The mathematical work will be of interest to engineers and drainage commissioners, while the general principles will be appreciated by property owners liable to assessment for drainage improvements. Methods and principles are noted for assessing dry land, highways, railroads, etc., also appraisal of damages to farm and railroad property, together with quotations from the recent United States supreme court decision in an Illinois case whereby railroads must provide bridges for ditches along natural waterways at their own expense, the only award of damages being for the excavation of the ditch.

Methods for making the survey are briefly given, also data required on the map, and a suggestion for the report to the board of supervisors which will show the value and advisability of establishing the district.

In writing for the bulletin ask for No. 6, Vol. III.

DRAINAGE ASSESSMENTS.

The engineering experiment station of the state college at Ames has just published a comprehensive bulletin on the important subject of drainage assessments, which can be secured free by writing to Director A. Marston, Ames, Iowa.

The bulletin is by Prof. L. E. Ashbaugh, of the civil engineering department, who has been employed as state engineer on drainage work by the executive council for the last two or three years, and who, in addition, has had much experience at drainage engineering in Iowa. The method of making drainage assessments which he presents is one that has been thoroughly tried in his practice and that of many other drainage engineers in the state, and which has received extremely favorable comment from all who are connected with drainage assessments.

General principles which should govern assessments are first noted. Conditions are then assumed and by aid of map and chart an actual assessment problem for a simple drainage district is worked out, thus showing the applica-

Farm Furrows

Turned by a Practical Farmer.

Some men can do more work and any kind of chore sitting behind the stove in the grocery store.

The fly that hangs around a screen door all day to get to light on a piece of sticky fly paper must feel pretty cheap.

As a rule, one never misses the summer until the retirement of the straw hat makes one think of the overcoat issue.

Sam says he knows a man with a wooden leg who wades around in the grass in the summer time with the hope of getting even with the chiggers.

The world is pretty well divided after all. In the winter the rich get to see all the theaters and in summer the poor can take in all the circus parades.

A farmer who started in a small way grew insolent as he became opulent, which very often occurs. I have observed that as soon as a tadpole loses its tail it begins to kick.

Whenever a tree first comes into bearing is the time to fully determine the variety of fruit, if a small boy does not get there first, in which case one may have to wait another year.

"The world owes me a living," says an unthrifty man. Yes, that is so, but he will have to hustle around and make the collection. The world owes every man a living who is willing to help get it.

When a farmer plants a field of corn, the issue with him is to obtain a large yield, but quite often he forgets, neglects or does the wrong thing and fails. There is more than merely the selection of good seed.

It is to be hoped that the man who produced seedless grapes will try his hand on producing a watermelon with handles so picnickers can carry them easily. Of course there are others who would be helped by this improvement.

Under special care, two litters can be made to pay. Those who have had the most experience along this line say that breeding should be done in November and June, and that the pigs should be weaned when about three months old. Good blue-grass pasture will work wonders for the two-litter sows.

We often hear people say: "He is a bright and intelligent man, but he drinks so hard." The latter part of the quotation gives a lie to the first. Can a man be bright and intelligent and drink to excess? If he drinks at all he is liable to drink to excess, and for that reason it is safer to let intoxicants alone.

Working with the hands and muscles and letting the brain rust is one-sided farming. Some can succeed in this way of doing, but it is not always the wisest plan. Because a man can lift a barrel of salt in a wagon is no reason why he should, when he can use a skid. We should use a skid more and lift less.

The food and dairy commissioner of Iowa states that rotten eggs come under the name of impure food and that those who sell them are subject to the provisions of the pure food law. Certainly no person will claim that a decayed egg is pure food. The question is—who is responsible for the sale of rotten eggs?

Don't you like to hear a story told like this? "I remember once—I think it wuz in November—let me see—no, it wuz in October—still that couldn't be fer I remember that when I got up in th' mornin' ther' wuz ice in th' basin—anyhow it wuz either in November or October—let me see—no—well anyhow—but I'm gettin' ahead o' my story—what I meant t' say wuz—now I'm gittin' it straight—it wuz th' day Mrs. Johnson brought th' irons home."

In some parts of the new Northwest, on the Canadian side, there is a good deal of talk about organizing or arranging for governmental insurance of crops against hail. There is great damage done to crops there by hail and it is proposed to tax all farmers and pay losses to the unfortunate. About 2 per cent of the acreage last year was destroyed by hail. Taxes to the amount

It will go to you at once, by return mail if possible, all prepaid and absolutely free of all cost.

Montgomery Ward & Co., Michigan Avenue, Madison and Washington Streets, **Chicago**

of two and one-half cents per acre would meet this loss. Since many losses mean only one-half crop, the levy would be much less.

While talking to a Minnesota man recently who has been a dairyman, he told me that he once advocated the special-purpose cow, but since he has spent some months traveling over the state of Iowa he has about changed his mind, and is now ready to speak a word for the general-purpose cow. He says Iowa conditions are not like those of Minnesota.

Any boy, girl or cripple can drive a manure spreader and do better work than the strongest and best man can do by hand. By its aid, manure may be spread on any soil without injuring the growing crop or being in the way of putting in a crop. It can be used in spreading manure on a field that has been planted to corn without injury to the crop. One can spread manure with his Sunday-go-to-meetin' clothes on. Oh, it is a great invention.

An exchange says that a driving horse

will last longer in a hilly country than on a level plain, and will go more miles in a day, week or year, up hill and down, than on a level. I wonder if this is so? It is true that in a level country the horse is liable to go faster and go fast longer than when he has to walk uphill and walk down many of them.

A seed bed for wheat should be made as fine as ashes, and the nearer one approaches this condition, the better. For best results, no particles of soil should stick together. It was by perfect preparation of the soil that Lawes and Gilbert succeeded in raising forty crops on the same land in succession, and over thirteen bushels of wheat per acre were raised the last year.

The potato seed question has been debated a good deal. It has been claimed that none but large potatoes should be planted, and again many have claimed that the matter of size is not important. Wise growers have ascertained that the size of the potato is not as important as the number and size that grew

in a hill, and they select seed only from such hills that have a great weight of uniform tubers. This is worth considering.

There are two kinds of farmers in every neighborhood. One kind really farms the soil in such a manner that it will not wear out, and the other farms like a beggar begs. The latter wants to get all he can from the soil without putting anything back. Such men are miners, for they seem to think the supply of fertility was placed there just like the supply of coal.

While watching some shoats that were being continually put through a dipping arrangement at a fair it occurred to me that lice would have a difficult time to get in their work on hogs that were given such treatment. I also wondered how long lice would stay on a hog that had access to a hog wallow. A hog wallow saturated with some lice killer would approach a self-dipping device and it seems to me that the hogs would enjoy it immensely.

THE AMERICAN ROYAL

Notable get of Gallant Knight, owned by T. K. Tomson & Sons, Dover, Kan.

Of the great multitude of fairs and expositions, few there are that to an exact degree fulfil the purpose for which they are created. The American Royal, of Kansas City, is one of the few that started out with a definite purpose in view and succeeded in attaining the end designed for it. The American Royal is not an exposition of everything on earth, but is primarily a breeder's show. Its five years of history is but a history of battles between the great herds of pure-bred live stock emanating from corn-belt states. State fairs are but preliminaries to the great Kansas City show. There the minor battles are fought and the sifting-out process carried on. The tail-enders in all the live stock classes tackle it once, possibly twice, and then drop out for good. The herds good enough to fall heir to ribbons at the state fairs generally stay in until the story of the great American Royal is told. The character of the exhibit throughout last week indicated that the sifting-out process was complete this year, and as a result the best that has ever been shown at Kansas City in quality and in numbers was on exhibition.

As said before, the American Royal is primarily a breeder's show. It is held at the stock yards of an important center of a large and productive agricultural territory. The judging pavilion is a commodious tent, with a seating capacity of 5,000, which has answered the purpose thus far most admirably. The barns for housing the live stock are the stock-yards stables. These are ample in capacity, admirable in design, and withal comfortable for man and beast. The fair is managed by men who know the needs and wishes of exhibitors and visitors, and who have the ability and resources to supply them. This year the fair was more largely attended than ever before. The seating capacity was more than taxed several times during the week, and it would not be surprising if in the very near future more space would have to be allotted to visitors. Of course, compared with state fairs, the total attendance is not large, though when five or ten thousand people come together to see a strictly live stock fair, a fair without frills and without amusement features, it is surely an indication that there is a very substantial interest being taken in the breeding and feeding of pure-bred live stock.

The plan of running the American Royal apart from the annual horse show, formerly held during the same week, has succeeded. It avoids unnecessary congestion in the city, and gives to each class of sight-seers exactly what they are seeking. The evening programs are made up of highly entertaining features, including the showing of heavy horses in harness, as well as to the halter, and the exhibition of high-acting coachers and hackneys, as well as parades made up of prize-winning animals. Men who are interested in the heavy-harness horse alone frankly acknowledged that the evening program put on at the American Royal surpassed in interest the very best entertainment that is furnished at any of the so-called horse shows. That the managers of the American Royal

have succeeded in making this record entitles them to much credit.

There is not a single one in the whole list of state fairs, interstate fairs or expositions but could learn important lessons at the American Royal relating to the consideration that is given to the visitor who pays his admission fee and takes his seat quietly beside the judging arena. Complete catalogs were furnished to all. Animals of every description were numbered while in the ring. Every class as it appeared was announced for the benefit of the visitor. The announcement of awards in every class was followed by a parade of the animals in the order of their winnings, thus giving to the visitor the best possible opportunity for instructing himself concerning the merit of the prize-winners. "Everything moves off here without a hitch," said one who had been around the circuit this year with a herd, and coming from the source it did, nothing more complimentary could be said about the management of the show.

The carload lots this year, notably in the feeding classes, were somewhat of a disappointment. Instead of an increase in numbers there was a marked decrease, and while there were feeders of good quality exhibited, on the whole the feeder show could not be called truly representative. Considering the fact that Kansas City is the center of an immense territory designed by nature, as well as planned by man, to be a breeding instead of a feeding ground, the American Royal should bring out more young cattle ready to go from show into corn-belt feed lots. As a fat cattle show, it

The fact that some of the most noted breeders were there with the herds this year would indicate that this department might now be on a substantial basis. So far as could be ascertained, there was no outbreak of disease during the week, and if the herds shown this year are taken away clean and healthy there are no bounds to the American Royal as a swine show. The pains taken this year to disinfect all quarters and to keep breeding hogs away from what might be contaminated ground, is the best proof required by breeders that the seriousness of cholera and swine plague is appreciated by the management of this show. The number of great herds of swine in Missouri and Kansas alone should be sufficient to give the most substantial kind of support to the idea of holding a swine show in connection with the American Royal.

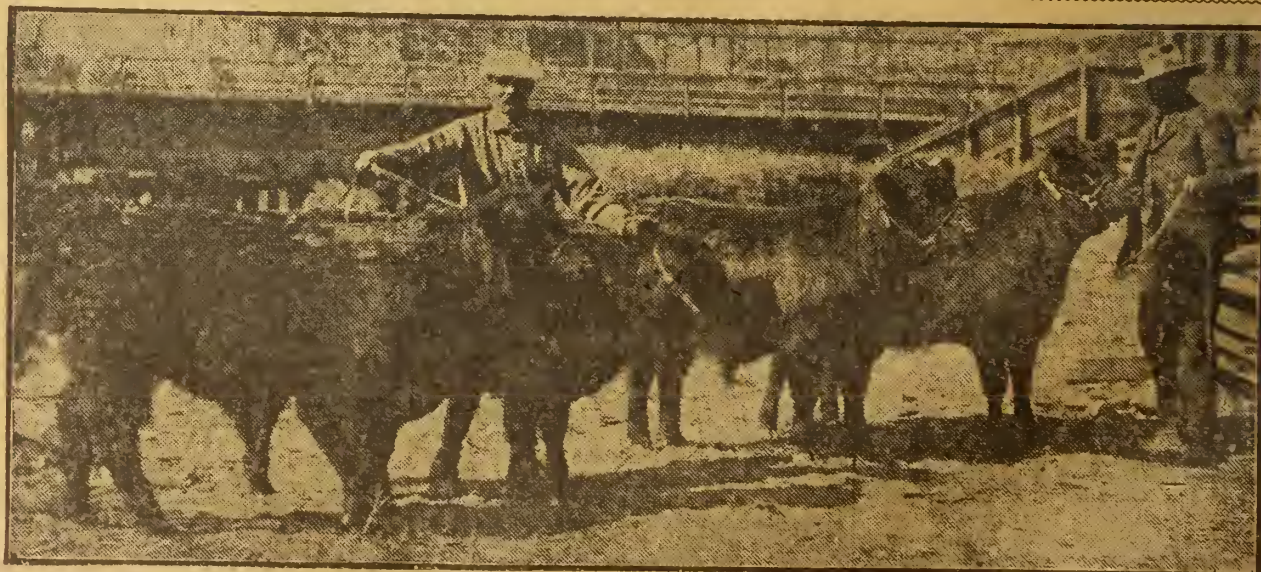

Although men on every hand could be found to make the claim that the American Royal is the most skilfully managed live stock fair in the central West, it must not be inferred from this that the fair is absolutely without a flaw. From the visitor's standpoint, especially the visitor who takes an intelligent interest in the ratings of animals, there is altogether too much side-talk with the judges at the great Kansas City show. The average man believes that it is possible to obtain judges sufficiently competent to pass on a given class of animals without any consultation whatever with outside parties. If among the tens of thousands of breeders of pure-bred stock found in the corn belt there cannot be found three men who are competent to

verdict should be reached. While we do not avow that judges changed their verdict at the American Royal on account of little debates with outsiders, yet the visitor, who is always sharp to see what is going on, believes that it does, and for that reason it should be cut out. On this score the American Royal is a little more off color than any of the fairs held this year. We believe the judges of the American Royal were honest men and were sufficiently competent to tie the ribbons without any outside help. It matters not how large the classes may be, there should be no confusion in finding the winners. To have an outsider step up to the committee and call special attention to an individual that has been overlooked is an act that is received with bad grace by those who are looking on. An incident of this kind tends to create the impression that it is the man and not the animal that wins, and no fair can afford to establish a reputation tinged with such an odium.

BEEF CATTLE.

SHORT-HORNS.

Two hundred and seventy-four Short-horns, the cream of the season's contest, were exhibited at the American Royal last week, the largest exhibit numerically of any of the beef breeds. While the fat cattle were in the minority compared to last year, breeding cattle took a rise that made some of the rings the largest ever, and with the general high quality of all the animals, presented a most perplexing problem for the awarding talent. The difficulty in finding the good ones only made the work more creditable to the committee, composed of Thos. Clark, Beecher, Ill.; T. B. Hart, Edinburg, Ill., and J. M. Hall, Paris, Ky., who worked by twos. Classes were so large that the management added four extra prizes in two classes. Even then there were some good ones left outside the money, some of it will be heard from a year later. In fact, it is but stating it mildly to say that altogether it was a show well in keeping with the prestige of the Royal, and as it was practically a contest for supremacy between the East and the West, it added still more interest. Thursday afternoon was perhaps the most spectacular part of the whole Short-horn exhibit if not of the whole cattle show. Seven magnificent herds sought favor with the awarding talent and the result with one or two exceptions was in harmony with expectations. Following is a list of exhibitors: Geo. Bothwell, Nettleton, Mo. (4 head); Bellows Bros., Maryville, Mo. (9 head); W. A. Betteridge, Pilot Grove, Mo. (2 head); C. E. Clarke, St. Cloud, Minn. (13 head); Creswell & Carpenter, Braymer, Mo. (4 head); Converse & Forbes, Maryville, Mo. (3 head); H. R. Clay, Plattsburg, Mo. (3 head); H. C. Duncan, Osborn, Mo. (3 head); Joseph Duncan, Osborn, Mo. (1 head); Guilford Dudley, Topeka, Kan. (3 head); W. A. Forsythe, Greenwood, Mo. (2 head); N. H. Gentry, Sedalia, Mo. (3 head); A. F. Graves, King City, Mo. (2 head); H. M. Hill, Lafayette, Kan. (7 head); H. J. Hughes, Trenton, Mo. (3 head); F. W. Harding, Waukesha, Wis. (17 head); D. R. Hanna, Ravensna, Ohio. (11 head); Harriman Bros., Pilot Grove, Mo. (2 head); A. F. Huse, Manhattan, Kan. (2 head); C. E. Leonard & Son, Bunceton, Mo. (5 head); O. E. Morse & Sons, Mound City, Kan. (10 head); J. P. Newell, Carthage, Mo. (7 head); Purdy Bros., Harris, Mo. (10 head); Jno. Relger, Whitewater, Kan. (4 head); Abram Renick, Winchester, Ky. (6 head); J. F. Stodder, Burden, Kan. (7 head); Henry Stunkel, Peck, Kan. (3 head); T. K. Tomson & Sons, Dover, Kan. (14 head); Thomas, Jameson & Mitchell, Allen, Kan. (10 head); T. J. Wornall & Son, Liberty, Mo. (14 head); Chas. Wells & Son, Maryville, Mo. (2 head); W. T. Williams, Harrisonville, Mo. (1 head); Dr. H. W. Givens, Fayette, Mo. (1 head); John O'Kane,

Galloway group, get of Worthy 3d, owned by C. E. Clarke, St. Cloud, Minn.

can never hope to compete with the great International, held in Chicago. It is not the time of year when our best cattle are finished, but the exhibit of fat cattle should be more than made up in the feeder classes.

It is too early to get an accurate line on what the swine department of the American Royal promises for the future.

tie the ribbons where they actually belong, then is this a sad commentary on the ability and judgment of our best men.

All side-talk, debate and argument should be confined to the members of the judging committee. They constitute the jury and the animals before them furnish the evidence from which an honest

Wisner, Neb. (1 head); Jos. McConnell, Kearney, Mo. (1 head).

AWARDS.

Aged Bull—First, Harding, on Whitehall Marshall 209776; second, Hanna, on Missle's Diamond 221080; third, Clarke, on Bapton Favorite 23175; fourth, Thomas, Jameson & Mitchell, on Orange Viscount 157352; fifth, Newell, on Master of the Grove 161374; sixth, Nevius, on Prince Pavonia 207316; seventh, Bothwell, on Golden Lavender 222970; eighth, Tomson & Sons, on Silvery Knight 206653. Even the

Royal did not bring the well-known champion of the season a rival, but for second this did not hold and either of the two great bulls which waged the fight for second had just claim to that honor. Missie's Diamond is a heavier-framed bull, a little rougher at the hips and shoulders than the Bapton bull, and with less uniformity in width of top line. This second and third rating could be changed and still satisfy many of the visitors. Orange Viscount out of the noted Lavender Viscount 124765 shows up well for a seven-year-old. He has plenty of flesh, put on smoothly and in the right place. Eight in all made this a strong class throughout.

Bull Two Years Old—First, Bellows Bros., on Good Choice 227852; second, Wornall & Sons, on The Conqueror 216051; third, Thomas, Jameson & Mitchell, on White Goods 234975; fourth, Converse & Forbes, on Dauntless Victor 2d 242645; fifth, Stodder, on Lord Filbert 223307; sixth, Huse, on Lori Butterfly 256435; seventh, Guilford Dudley, on Select Goods 224462. While individuals in this class were strong, there was a general lack of uniformity. A stylish, rich roan, which aside from slight slackness behind the shoulder, shows excellent conformation is this son of the great Choice Goods. For second another Choice Goods calf was chosen. He is a fleshy fellow, but you might fault him behind, especially in the hind legs. A half brother to the two first bulls fell heir to third money.

Senior Yearling—First, Hanna, on Diamond's Mariner 241073; second, Joseph Duncan, on Gwendoline Victor 2d 243304; third, Stunkel, on Valley Victor 244060; fourth, Stodder, on Royal Orange 243113; fifth, Newell, on Fancy Viscount 242273; sixth, Stunkel, on Waterloo Victor 244061.

Junior Yearling—First, Renick, on Signet 248501; second, Wornall & Sons, on Careless Conqueror 241515; third, Purdy Bros., on Lord Champion 254700; fourth, Graves, on Champion of Lyndale 265011; fifth, O'Kane, on American Play 266715; sixth, Tomson & Sons, on Gallant Lavender 244228; seventh, Morse & Sons, on Inaugurate 244625; eighth, Hill, on Robin Adair 266315. It was an easy matter for Signet to take the lead here on his general excellence of character and deep, square build with good top width, especially well and smoothly covered. It was not so easy to account for the placing of second. Some might call him a rather ordinary beast of plain lines. In the minds of many he deserved defeat by the stylish dark red of compact but lighter build put third. Fourth, was much like the one next above him, but had a trifle better finish and a good match for him also.

Senior Bull Calf—First, Harding, on Anoka Sultan 264212; second, Hanna, on Diamond's Crown 253864; third, Gentry, on Choice Abbotshurn 264801; fourth, Clarke, on Choice Knight 253397; fifth, Harriman Bros., on Mayflower Chief 264248; sixth, Bellows Bros., on Hampton's Demonstrator 264534; seventh, Betteridge, on Orange Major 264704; eighth, Gentry, on Sidington Choice 264802. A champion class for size, and it would be difficult matter to find twenty-three duplicates. The second bull is a comer and while good in all points and probably has more spread of rib with thicker padding than his superior, he still must yield to the great type and splendid Short-horn character represented by first selection. The Abbotshurn calf is a smooth, rich red and a tidy fellow a bit undersized. The Choice Goods calf had many claims for third, though it was no small honor to hold fourth in such a class.

Junior Bull Calf—First, Bellows Bros., on Lord Hampton 264849; second, Hanna, on Diamond's Pride 253868; third, Wells & Son, on Rose's Lad 266392; fourth, Clarke, on Knight Commander 263720; fifth, Graves, on Rose's Pride 265355; sixth, Harding, on Sultan Commander 263132; seventh, Harding, on Michael S. 263423; eighth, Stodder, on Standard Lavender 266386.

Aged Cow—First, Clarke, on Welcome of Meadow Lawn 9th; second, Hanna, on Ballachraggan Favorite; third, Harding, on Fanny Lovell 4th; fourth, Harding, on Princess Flora 2d; fifth, Tomson & Sons, on 3d Elder Lawn Victoria; sixth, Wornall & Sons, on Glosterina; seventh, Thomas, Jameson & Mitchell, on Rose Victor; eighth, Newell, on 7th Ravenswood Countess. With one more than the number of moneys of richly-bred and well-prepared matrons, this class was a spectacle of show-yard excellence combined with utility as well, for several spry offsprings enlivened the ring scene, a taunt to the critics who say that show cattle do not breed. Welcome of Meadow Lawn 9th was the generally accepted favorite and combines style, elegance of form with plenty of finish. The Springfield champion was forced to second and of a different type, more rugged and heavier framed, but withal splendidly inlaid with a deep, even covering. Third choice, a cow of most reliable Short-horn type, has not been showing, but made good in her condition of flesh. Princess Flora showed with a calf by her side, likewise the Tomson female.

Two-Year-Old Cow—First, Harding, on Anoka Broadhooks; second, Tomson & Sons, on Cherry Lass; third, Clarke, on Dorothea 2d; fourth, Wornall & Sons, on Bashful Princess 2d; fifth, Newell, on Sweet Briar Rose; sixth, Tomson & Sons, on Thorny Bud; seventh, Clarke, on Duchess of Lancaster 13th; eighth, Thom., Jameson & Mitchell, on Countess Royal. Cherry Lass is an exceptional female outclassed by only one other with the same good qualities in a higher degree of excellence. Both of the cows at the top show great character and make a great

study in Short-horn type. A sweet female not quite equal in finish and proportion to those above was given third, while a much lighter cow was given the place following on her trim, stylish type and good outline. The entries were all well fitted and quite faultless for smoothness throughout.

Senior Yearling—First, Harding, on Clara Belle; second, Purdy Bros., on Viscountess of Fairview; third, Thomas, Jameson & Mitchell, on 21st Duchess of Gloster; fourth, Nowell, on 21st Ravenswood Countess; fifth, Clarke, on Lady Mysio 2d; sixth, Purdy Bros., on Fairview of Orango Blossom; seventh, Tomson & Sons, on Lavina; eighth, Crosswell & Carpenter, on Lucy Jane.

Junior Yearling—First, Harding, on Missio of Browndale; second, Clarke, on Alice of Meadow Lawn; third, Tomson & Sons, on Grace; fourth, Harding, on Fancy Lovell; fifth, Wornall & Sons, on Snow Queen; sixth, Tomson & Sons, on 5th Elder Lawn Victoria; seventh, Purdy Bros., on Fairview Orange Blossom 13th; eighth, Thomas, Jameson & Mitchell, on Lavender Bud 2d.

Senior Heifer Calf—First, Harding, on Anoka Gloster 2d; second, Purdy Bros., on Monarch's Ruby; third, Bellows Bros., on Hampton's Tea Rose; fourth, Purdy Bros., on Monarch's Rose; fifth, Harding, on Broadhooks Sultana; sixth, same, on Claret; seventh, Renick, on Poppy; eighth, Clarke, on Lady Dorothea 3d; ninth, same, on Dorothea 3d; tenth, Wornall & Sons, on Sweet Tone 2d; eleventh, Bellows Bros., on Model Maid; twelfth, Purdy Bros., on Monarch's Ruby; thirteenth, Hanna, on Diamond's Nellie.

Junior Heifer Calf—First, Thomas, Jameson & Mitchell, on Rose O'Day; second, Bellows Bros., on Hampton's Queen Beauty 2d; third, Tomson & Sons, on Rose Archer; fourth, Hanna, on Diamond's Lavender; fifth, Wornall & Sons, on Glad Smile; sixth, Clarke, on Molly 3d; seventh, same, on Lady Dorothea; eighth, Bellows Bros., on Model Rose; ninth, Harding, on Ramsden Flower; tenth, Leonard & Son, on Viscount's Rosamond; eleventh, Hill, on Collynie Mistletoe; twelfth, same, on Martha Dalmeny.

Aged Heifer—First, Harding; second, Clarke; third, Wornall & Sons; fourth, Thomas, Jameson & Mitchell; fifth, Hanna.

Young Heifer—First, Clarke; second, Purdy Bros.; third, Harding; fourth, Wornall & Sons; fifth, Tomson & Sons.

Calf Heifer—First, Bellows Bros.; second, Clarke; third, Purdy Bros.; fourth, Tomson & Sons; fifth, Harding.

Get of Sire—First, Clarke, on get of March Knight 188105; second, Harding, on get of Whitehall Marshall; third, Bellows Bros., on get of Hampton's Best; fourth, Tomson & Sons, on get of Archer; fifth, Hanna, on get of Bapton Diamond.

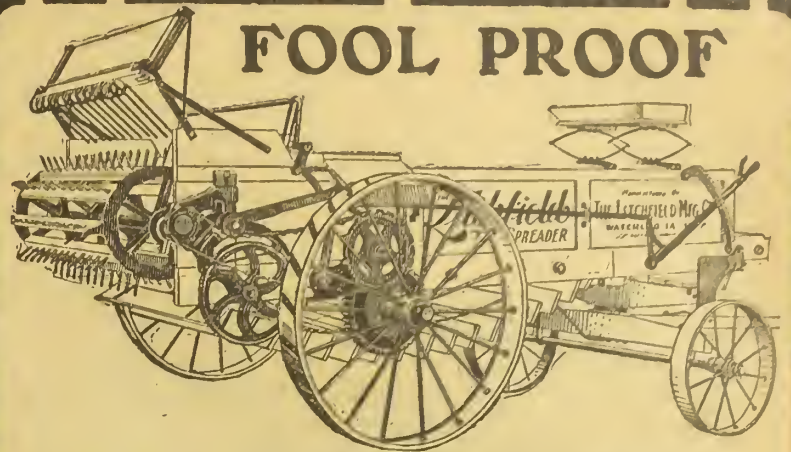

Produce of Dam—First, Clarke, on produce of Dorothea; second, Harding, on produce of Imp. Clara 58th; third, same, on produce of Imp. Shenstone Princess; fourth, Purdy Bros., on produce of Blossom 12th; fifth, Hanna, on produce of Missie C.

Champion Senior Bull—Whitehall Marshall. Champion Junior Bull—Signet. Champion Cow—Welcome of Meadow Lawn 9th.

Champion Heifer—Missie of Browndale 12th. Sweepstakes Bull—Whitehall Marshall. Sweepstakes Cow—Welcome of Meadow Lawn.

HEREFORDS.

Quality, more than quantity, has been the main feature of this breed during the show season of 1906, and it was not generally expected that the Royal would be any exception. From unexpected sources, however, there came a number of herds that broke into the arena for the first time this year. Missouri was most liberal in her representation and supplied the majority of the herds, which, nevertheless, were compelled to yield to the supremacy of Wisconsin and Indiana herds. Between these the rivalry for the best ribbons was most intense. In all classes there were superbly-finished animals, while on the other hand there were some in only breeding condition which tended to lessen the uniformity throughout the classes that is so characteristic of this breed. Nothing developed that would bring about any great speculation over the results of the final in December among those at the top of the lists, though further down there may be some changes made. Those who have been

IS THIS SPREADER FOOL PROOF?

BECAUSE we suppose of the position taken by the Litchfield Spreader so far in advance of most other machines, and because of the guarantee for five years made on this modern farm tool, we imagine that many of our customers may consider it "fool proof," which it is, in a way.

If "fool proof" means that the Litchfield Spreader will stand a cyclone, a fire, a runaway or a railroad wreck, due to carelessness, then there may be some question as to the results.

However, if "fool proof" means simply a machine that will go out into the field in the hands of a careless hired man or boy and come back ready for another load, instead of ready for the repair shop; or, if it means a machine that will stand unreasonable lack of oiling; or, if it means a machine that will stand the sun and rain and still have tires that are tight on the wheels; or, if it means a machine that will always do the right thing at the right time, without any possibility of a careless operator mixing up his levers; or, if it means a Spreader that can be driven everywhere but where it ought to be with a careless driver, and still be ready for business all the time; then we say that the Litchfield Spreader has a perfect right to the title "fool proof."

This modern machine has done away with the complications that cause repairs, the need for detailed, untiring oiling, the care of loose tires, the trouble from many levers, the breakage from light construction, and in doing all this has not only made itself "fool proof," but does the work with more intelligence and better results than any complicated mechanical devices, such as is considered necessary on other Spreaders.

An honest man is not harmed by living under a law that requires a "square deal." A wise man loses nothing by coming in contact with knowledge; and a good, careful, intelligent and thoroughly competent operator certainly is at no disadvantage in handling a "fool proof" Manure Spreader.

We think our readers will understand why we can give a life guarantee such as other Spreader companies cannot, and why such a guarantee on our part is strictly conservative.

Continued next week.

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

following the state fair reports will find much similarity in the awards in comparison with Kansas City results. The work of tying the ribbons fell to the lot of S. W. Anderson, Blaker Mills, W. Va.; W. B. Waddell, Lexington, Mo., and W. N. Rogers, McCook, Neb., whose conscientious work won favor with all exhibitors, whose names are found in the following list: C. A. Baker, Leeton, Mo. (1 head); Cargill & McMillan, LaCrosse, Wis. (18 head); Cornish & Patten, Osborn, Mo. (7 head); Mrs. K. W. Cross, Emporia, Kan. (3 head); T. W. Carmichael, Odessa, Mo. (1 head); Samuel Drybread, Elk City, Kan. (3 head); W. A. Dallmeyer, Jefferson City, Mo. (2 head); J. J. Early, Baring, Mo. (4 head); J. A. Funkhouser Est., Plattsburg, Mo. (14 head); James A. Gibson, Odessa, Mo. (4 head); G. H. Hoxie, Thornton, Ill. (7 head); Dr. J. E. Logan, Kansas City, Mo. (10 head); J. S. Lancaster & Sons, Liberty, Mo. (1 head); Mousel Bros., Cambridge, Neb. (1 head); Norman Ochsen, Madison, Neb. (1 head); Steward & Hutchison, Bolckow, Mo. (2 head); Scott & March, Belton, Mo. (3 head); C. A. Stannard, Emporia, Kan. (1 head); Stanton Breeding Farm Company, Madison, Neb. (1 head); W. S. Van Natta & Son, Fowler, Ind. (14 head); Hugh Whitford, Guilford, Mo. (1 head); R. C. Wilson, Belton, Mo. (1 head); Yates Bros., Agency, Mo. (2 head); C. L. Brown, Laredo, Mo.; C. V. Hull, Platte City,

Mo.; Kansas Agricultural College, Manhattan, Kan.

AWARDS.

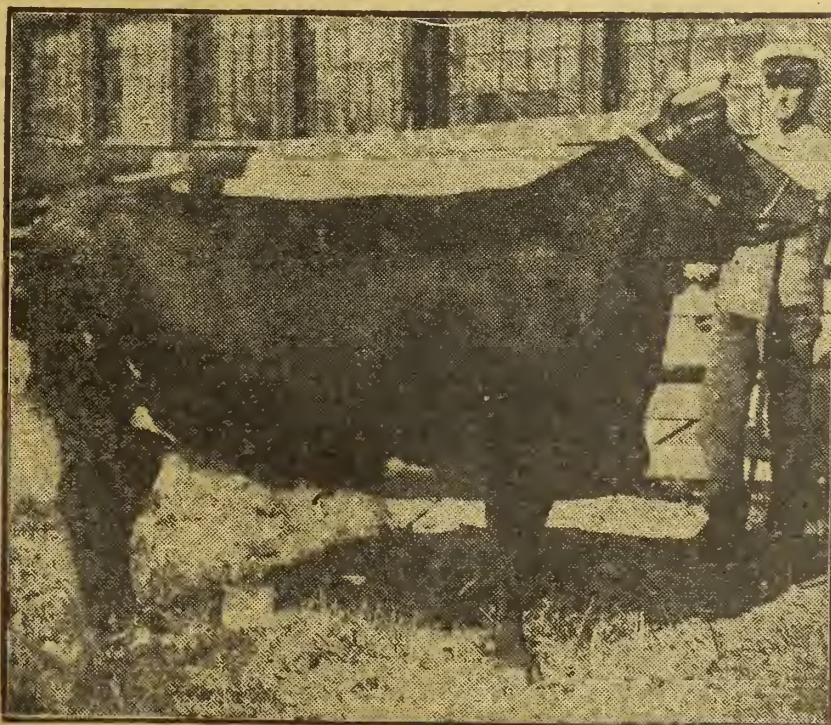

Aged Bull—First, Stannard, on Beau Mystic 179920; second, Gibson, on John Charming 136276; third, Logan, on Saint Grove 3d 141833; fourth, Drybread, on Judge Spencer 97224; fifth, Whitford, on Kenswick 111886; sixth, Yates Bros., on Columbus 49th 125888; seventh, Early, on Sunny South 121189. Out of seven showing, it was generally conceded that Beau Mystic was an outstanding first. He is a stylish fellow with plenty of bone and weight and is a good beef carrier. The other entries were some lacking in his flesh and finish and kept the judges at work for some time.

Bull Two Years Old—First, Cargill & McMillan, on Privateer 2d 182143; second, Van Natta & Son, on Prime Lad 3d 197984; third, Funkhouser Estate, on Onward 31st 187476; fourth, Mousel Bros., on Princes Dictator 185082; fifth, Ochsen & Co., on Dictator 196974; sixth, Cornish & Patten, on Admiral Dewey 184255; seventh, Gibson, on Jake 185104. While for finish there were some in this class that approached that of Privateer, none combined his weight and proportion with that quality which put him at once at the top, followed by a hull lighter by a hundred weight, but of good finish, but lacking the massive and masculine bearing of his superior. Onward 31st is sired by March On 6th 96537 and is a large, blocky fellow, but not of the smooth, filled-out form of those above him. Fourth choice is another good one, but has not made the growth he should, being the same age of the first, but 200 pounds lighter.

Senior Yearling Bull—First, Cargill & McMillan, on Bonnie Brae 3d 203317; second, Van Natta & Son, on Prime Lad 9th 213963; third, Hoxie, on General Manager 2d 205606; fourth, Logan, on Young Beau Brummell 207148; fifth, Cornish & Patten, on Weston Anxiety 242862; sixth, Wilson, on Red Bird 201555; seventh, Cornish & Patten, on General Gomez 49th 242856; eighth, Dallmeyer, on Masterpiece 202642. Bonnie Brae had undisputed claim for his conceded position, representing a high type of the breeders' and feeders' art. Next him came another approaching his finish, but not his weight, being younger also. Last week, in Illinois, he was beaten by General Manager 2d, placed next below him here. The former one has many favorites for the compact, smoothly-covered frame he presents. Somewhat at a disadvantage for age and weight was the fourth, but his depth and well-proportioned frame give promise of plenty of size as he develops.

Junior Yearling Bull—First, Funkhouser Estate, on Onward 46th 209620; second, Steward & Hutchison, on Parsifal 206326; third, Van Natta & Son, on Prairie Lad 16th 213969; fourth, Mousel Bros., on Lloyd's Bully Boy 211167; fifth, Scott & March, on Duke 230674; sixth, Logan, on Sir Sigma 207191; seventh, Scott & March, on Alberta 230657; eighth, Drybread, on Good Luck 214585.

Senior Bull Calf—First, Hoxie, on Peerless Perfection 10th 235454; second, Cargill & McMillan, on Fulfiller 3d 230508; third, Van Natta & Son, on Prime Lad 25th 234346; fourth, Logan, on Sunset King 228551; fifth, Van Natta & Son, on Prime Lad 25th 234343; sixth, Gibson, on Bright Dandy 236885; seventh, Cornish & Patten, on Anxiety Stamp 3d 245125; eighth, Funkhouser Estate, on Progressor 2d 228626. Peerless Perfection has perhaps a more desirable, massive front and better supported shoulder from the crops than his competitors, which counts for much in his placing. His lines are almost faultless

Kemper-Paxon Mercantile Co. 1444 W. 9th St. Kansas City, Mo.

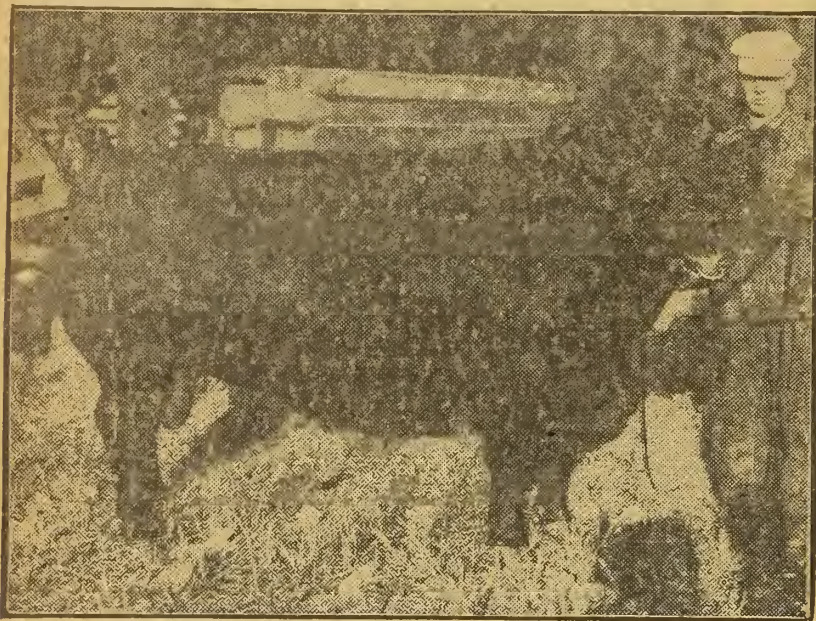

Plenty of high-grade finish, sturdy character and well-rounded forms with the exception of one or two of the harsher handling kind, was characteristic of the individuals of this class, in fact, throughout all the classes.

Junior Bull Calf—First, Funkhouser Estate, on Onward 5th 239178; second, Steward & Hutcheon, on Mapleton Hero 246965; third, Van Natta & Son, on Prime Lad 30th 234348; fourth, Cargill & McMillan, on Fulfiller 7th 230512; fifth, Gibson, on Mariner 24674; sixth, Mousel Bros., on Aito Hesiod 236293; seventh, Cornish & Patten, on Admiral Weston 245124; eighth, same, on Admiral Dewey 2d 245123.

Aged Cow—First, Cargill & McMillan, on Heliotrope 159451; second, same, on Twilight 167464; third, Mousel Bros., on Mary Hei-

Produce of Dam—First, Cargill & McMillan on produce of Belle Donald 20th; second, Mousel Bros., on produce of Eugenia; third, Funkhouser Estate, on produce of Keepsake; fourth, Van Natta & Son, on produce of Lenora; fifth, Cargill & McMillan, on produce of Mystic Pride.

Get of Sire—First, Van Natta & Son, on get of Pride Lad 9th; second, Cargill & McMillan, on get of Fulfiller; third, Funkhouser Estate, on get of March On 6th; fourth, Hoxie, on get of Perfection; fifth, Mousel Bros., on get of Princes 4th. Champion Senior Bull—Privateer. Champion Junior Bull—Bonnie Brae. Champion Cow—Heliotrope. Champion Heifer—Ethel 2d.

Champion Angus bull, Vala's Rosegay, owned by F. L. Sullivan, Afton, Iowa.

mig 180194; fourth, Early, on Hesiod Maiden 139553; fifth, Van Natta & Son, on Rosalind 169015; sixth, Funkhouser Estate, on Martha's Gem 135156; seventh, Scott & March, on Cambria 4th 179396. Heliotrope is a model cow. With the right build to start with she has finished into a show-yard ideal of Hereford femininity. All the members in this group were of high merit and were no easy task to place, but the final rating brought out a very even gradation of the type and condition from the first down to less excellence in these points seen in the last.

Two-Year-Old Cow or Heifer—First, Cargill & McMillan, on Miss Donald 17th 184673; second, same, on Miss Donald 21st 184577; third, Funkhouser Estate, on Regina 178870; fourth, same, on Bendina 178848; fifth, Mousel Bros., on Princess Lassie 185083; sixth, Van Natta & Son, on Princess 197988; seventh, Cargill & McMillan, on Golden Lassie 182126. Comparisons are difficult in a class of such uniform excellence as this and it was a sight for compact, full rounded out females, all of strong feminine character.

Senior Yearling Heifer—First, Cargill & McMillan, on Ethel 2d 203170; second, Funkhouser Estate, on Geneva 201269; third, same, on Mozette 201278; fourth, Cargill & McMillan, on Mignonette 209514; fifth, same, on Crocus 2d 203169; sixth, Logan, on Mercedes 195448; seventh, Hoxie, on Georgiana 208319; eighth, Cross, on Twinkle 203534.

Junior Yearling Heifer—First, Van Natta & Son, on Prairie Queen 213961; second, Cargill & McMillan, on Priscilla 3d 207198; third, Funkhouser Estate, on Byrdella 209616; fourth, Logan, on Lady Trixy 207183; fifth, Hoxie, on Scarlet Rose 208326; sixth, Mousel Bros., on Princess Flossie 207877; seventh, Hoxie, on Miss Perfection 217079; eighth, Mousel Bros., on Claud's Princess 211164.

Senior Heifer Calf—First, Cargill & McMillan, on Miss Filler 2d 230514; second, Van Natta & Son, on Margaret 234336; third, Hoxie, on Belle Perfection 234447; fourth, Cargill & McMillan, on Miss Filler 4th 230516; fifth, Hoxie, on Miss Catherine 235452; sixth, Mousel Bros., on Miss Princess 4th 234587; seventh, Funkhouser Estate, on Gariand 228613; eighth, same, on Athena 228607.

Junior Heifer Calf—First, Cargill & McMillan, on Miss Filler 6th 239659; second, Mousel Bros., on Princess Lady 234597; third, Funkhouser Estate, on Mildred 239176; fourth, Van Natta & Son, on Lassie 234333; fifth, Cargill & McMillan, on Miss Filler 5th 230517; sixth, Logan, on seventh, same, on Mauzanita 231976.

Aged Heifer—First, Cargill & McMillan; second, Van Natta & Son; third, Funkhouser Estate; fourth, Mousel Bros.

Young Heifer—First, Cargill & McMillan; second, Funkhouser Estate; third, Van Natta & Son; fourth, Hoxie.

Calf Heifer—First, Cargill & McMillan; second, Van Natta & Son; third, Funkhouser Estate; fourth, Logan.

A low wagon at a low price. Handy for the farmer. Will carry a load anywhere a horse can travel.

Low Down Wagons

soon earn their cost on any farm.

Steel Wheels

for farm wagons. Straight or staggered spokes. Any size wanted, any width of tire. Hubs to fit any axle. For catalogue and prices, write to

Empire Mfg. Co., Box 103 H Quincy, Ill.

Sweepstakes Bull—Bonnie Brae. Sweepstakes Cow—Heliotrope. The Cargill & McMillan herd won the silver cup donated by the late K. B. Armour, and as this is the second time the cup has been won by this herd it is now the permanent property of the firm. To "Jimmie" Price Mr. Cargill graciously conceded all the honor of this great victory.

GALLOWAYS.

Once again the "shaggy coats" have scored. They came out to the greatest of western stock shows with an increase of nearly 100 per cent in numbers and with a record for quality far surpassing all other 1906 fairs. Every indication presages a bright and glorious career for this aggressive breed in future American show rings, where they are already putting forth strong claims for supremacy for their early-maturing and remarkable fleshing qualities. Every state in the corn belt was represented at the Royal and from Minnesota and Michigan came herds prepared for the fray. But for the loss of Minnesota's champion, incident to crude methods of transportation as yet, the aged bull contest would have been more in keeping with "The Royal" records. The excellence of type and condition of the young stock was the constant subject of favorable comment and while some have still a long road between them and the "top," yet all who exhibited Galloways at the Royal are creeping upward all the time. With the exception of one class which was placed by

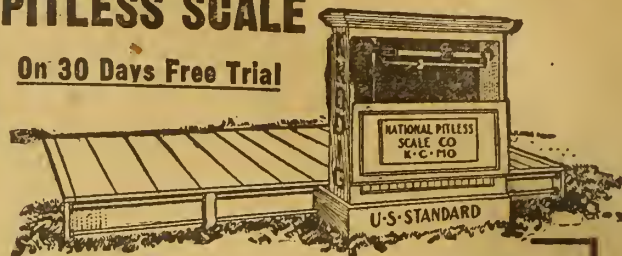

Champion Shire stallion, Lymm Jumbo, owned by Robert Burgess & Son, Wenona, Ill.

LET ME SEND YOU A "KNODIG" PITLESS SCALE

On 30 Days Free Trial

H. C. Gumbel

Is \$30. to \$50. Worth Saving?

If you think it is don't do a thing about getting a scale until you have heard from me.

You positively can't afford to buy a scale until you have seen my big illustrated catalog showing the brand new models A and B "Knodig" Pitless with Protected Bearings.

Ready for instant use when you want them. No ice or snow to cut away from the bearings in winter—no dirt or dust to clean out in milder weather. Nothing to interfere at any time with the absolutely accurate and sensitive weighing feature of the "Knodig" Protected Bearings.

Fully covered by patents. Sold only direct from factory at lowest factory prices.

Costs half the price of a pit scale and has no expensive pit with rotting timbers, rusting parts and big repair bills.

Can be moved anywhere on your land, wherever the work happens to be.

Absolutely accurate, because tested according to U. S. Standard of weights.

My plan saves you all middlemen's profits. Deal direct with me. No Agents, Salesmen,

Jobbers or Dealers between you and factory. Why should you pay from \$30 to \$50 more for the empty privilege of buying through an agent or dealer?

Does it make the scale any better? Does it add one single penny to its value? Then why not save the middleman's profits and keep them in your own pocket?

I am willing to PROVE that the Knodig Pitless is the scale you want.

I will send a set to you, or to any responsible Farmer, Stockman, Elevator Man, or Grain Dealer, on a month's free trial.

You have nothing to pay until you are satisfied,—no deposit,—no notes to sign,—nothing to do but give the Knodig a fair, honest trial at MY risk.

If it doesn't please you, send it back, and I will pay freight BOTH ways. That's fair.

Write to me personally for the new Knodig Pitless Scale Catalogue.

It contains over 40 fine half tone pictures that will interest you, and is chock full of practical scale wisdom from cover to cover. Free. Write for it to-day, sure, to

H. C. GUMBEL, Gen'l. Mgr., National Pitless Scale Company, 2011 Wyandotte St., Kansas City, Mo.

The Knodig Pitless Scale with the Protected Bearings is used by the U. S. Government which Proves its Quality.

Cut Out and Mail To-day.

Please send me your big FREE Knodig Scale Book by first mail.

Name

Address

T. J. Wornail, the Short-horn breeder, and from which Mr. O. H. Swigart had asked to be relieved, the latter gentleman made all awards and by careful and deliberate decisions, pleased showmen with the results. The list of breeders include G. W. Lindsey, Red Cloud, Neb. (10 head); A. F. Craymer, Morris, Ill. (11 head); C. E. Clarke, St. Cloud, Minn. (11 head); J. E. Bales & Son, Stockport, Iowa (12 head); W. M. Brown & Son, Carrolton, Mo. (13 head); E. P. Wild, Cowgill, Mo. (6 head); S. M. Croft & Sons, Bluff City, Kan. (12 head); Michigan Premium Stock Company, Davidsburg, Mich. (10 head); C. Atterbury, O. E. Matson, Burrton, Kan. (3 head); A. M. Thompson, Nashua, Mo. (6 head); F. E. Moore & Sons, Gardner, Kan. (3 head); W. C. Woods, Smithville, Mo. (4 head); W. B. & J. B. Thompson, Smithville, Mo. (1 head).

AWARDS.

Aged Bull—First, Lindsey, on Pat Ryan of Red Cloud 20038; second, Brown & Son, on Chief 2d of Stepford 23513; third, Craymer,

on Scottish Samson 23542; fourth, Croft & Sons, on Randolph 2d of Thorniehill 19302; fifth, Bales & Son, on Wild's McDougall 24673; sixth, Moore & Sons, on Highland Chief 19940. The noted bull of Lindsey's breeding now has a clean record for champion of the season and was supported by some very strong bulls and some not so strong. The second bull is full of character and Galloway type and his width from end to end is even and unbroken. He finishes off behind smoothly and shows a great pair of well-filled rounds. Third choice lacks 100 pounds of second and has hardly the compact build.

Bull Two Years Old—First, Brown & Son, on Pride's Druid 24882; second, Thompson, on Missouri Chief 26056; third, Watson, on Nugget of Tarbreoch; fourth, Michigan Premium Stock Company, on Repeater 24290.

Yearling Bull—First, Clarke, on Prince of Meadow Lawn 26843; second, Brown & Son, on Forbes 26897; third, Lindsey, on Ned of Red Cloud 26253; fourth, Atterbury, on Oosoola; fifth, Thompson, on Thompson's Quality 26055; sixth, Matson, on Folk 27254.

Bull Under One Year—First, Clarke, on Meadow Lawn Medalist 28750; second, Clarke, on Victor of Meadow Lawn 28746; third, Brown & Son, on Fetech 28938; fourth, Croft & Sons, on Randolph C. 2d 28952; fifth, Bales & Son, on Dorothea's Prince 28313; sixth, Craymer, on Grandee of Rivers 28774. A strong class throughout and for blocky, compact, well-covered frames this lot was notable.

Aged Cow—First, Lindsey, on Favorite 16th of Loebenkit 21205; second, Bales & Son, on Graceful 3d of Garlestown 19297; third, Brown & Son, on Acushia 18386; fourth, Michigan Premium Stock Company, on Princess 3d of Troquhain 23510; fifth, Wild, on Lady Grace 3d 21274; sixth, Croft & Sons, on Miss Midget 23802. The first cow is strong in her type and while her middle is not exactly correct, her ends are nicely finished and deep, notably behind, which makes her 1,500 pounds of weight well distributed. The second cow is somewhat of a lighter, more compact, well-rounded type, perhaps a bit too short, but is withal a sweet-looking female showing good breeding. Third choice was the largest cow in the class and showed hardly as much refinement, but had every indication of being a most valuable mother.

Two-Year-Old Cow—First, Brown & Son, on Myrtle of Evandale 24942; second, Lindsey, on Lady Charlotte 24814; third, Clarke, on Saucy of Meadow Lawn 24818; fourth, Croft & Sons, on Randolph's Pride 25013; fifth, Bales & Son, on Annie David's 5th 26977; sixth, Michigan Premium Stock Company, on Ella of Mope 25101.

Senior Yearling Heifer—First, Clarke, on Cora of Meadow Lawn 26833; second, Brown & Son, on Elegantine 26860; third, Bales & Son, on Princess McDougall 27120; fourth, Croft & Sons, on Blackie of Greenbush 27073; fifth, Craymer, on Standard Pet 27190; sixth, Lindsey, on Mollie C. of Red Cloud 26239.

Junior Yearling Heifer—First, Clarke, on Sadie of Meadow Lawn 26834; second, Clarke, on Beauty of Meadow Lawn 26830; third, Bales & Son, on Hawkeye Lady 27121; fourth, Croft & Sons, on Midget of Greenbush 27071; fifth, Brown & Son, on Dainty 3d 26871; sixth, Craymer, on Mischief of Rivers 27191.

Senior Heifer Calf—First, Clarke, on Lady Belle 4th; second, Wild, on Grace 3d of Wildwood; third, Brown & Son, on Fidilla; fourth, Croft & Son, on Viola of Greenbush;

fifth, Croft & Son, on Trixie 2d; sixth, Bales & Son, on Lady Ruth.

Junior Heifer Calf—First, Clarke, on Lady Douglas 3d 28745; second, Bales & Son, on Lady Graceful 28783; third, Clarke, on Floss 2d 28741; fourth, Lindsey, on Lady Elgin 28843; fifth, Brown & Son, on Dainty 4th 28929; sixth, Bales & Son, on Princess Graceful 28781.

Senior Champion Male—Pat Ryan of Red Cloud.

Junior Champion Male—Meadow Lawn Medallist.

Champion Cow—Myrtle of Avondale.

Champion Heifer—Lady Douglas 3d.

Aged Heifer—First, Lindsey; second, Brown & Son; third, Bales & Son; fourth, Croft & Sons; fifth, Craymer.

Young Heifer—First, Clarke; second, Brown & Son; third, Bales & Son; fourth, Croft & Sons; fifth, Lindsey.

Get of Sire—First and second, Clarke, on get of Worthy 3d; third, Croft & Son, on get of Randolph 2d of Thornhill; fourth, Bales, on get of McDougal 4th of Tarrhroch; fifth, Brown, on get of Chief 2d of Steppford.

Produce of Cow—First, Clarke, on Santum of Wavertree and Carmen of Wavertree; third, Croft, on Viola of Wavertree; fourth, Lindsey, on Cherry Lee of Red Cloud; fifth, Bales, on Annie David 2d.

Grand Champion Bull—Pat Ryan of Red Cloud.

Grand Champion Cow—Lady Douglas 3d.

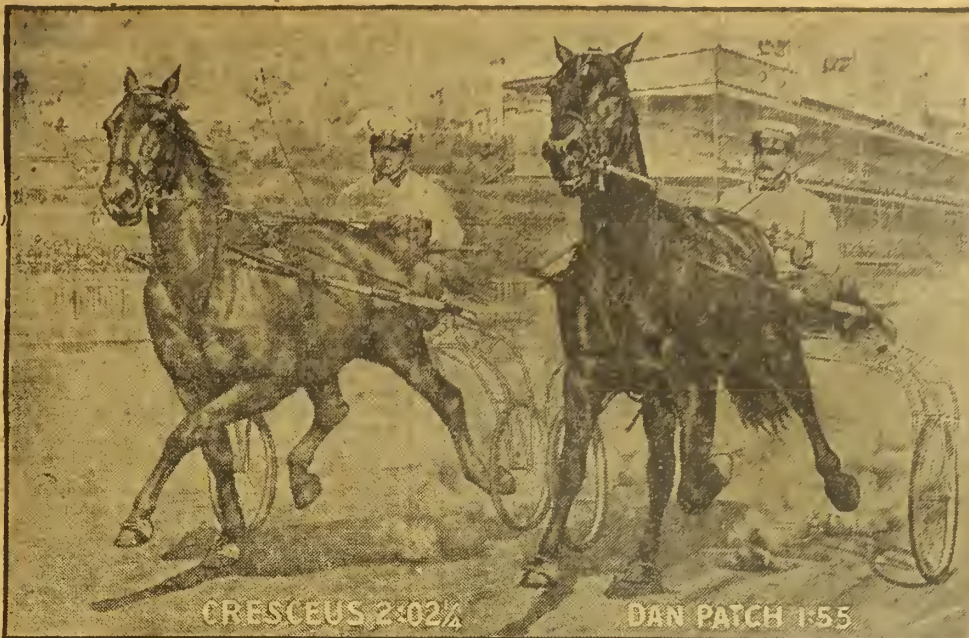

ABERDEEN-ANGUS.

The exhibit of doddies was pronounced one of the great features of the show by those who attended the American Royal. From the time the first class of majestic bulls entered the ring the first day of the week until the closing day of the exhibition, much enthusiasm centered about the splendidly-matched doddie classes. While the superlative excellence of the Iowa herds made the display practically one of Hawkeye distinction, those herds that hailed from other parts included some of the aristocracy of doddie excellence as well, though their moderate fitting placed them at a disadvantage. There was much speculation over the championship awards, notably in the bull classes. For the third time this season Jim Delaney and Vala's Rosegay have waged their rights for victory and there was some suspense before the award was announced in favor of the latter. Both bulls have strong claims for the place and it was generally considered to be as near a draw as is seen in show rings. The male part of the exhibit was somewhat more in evidence for numbers than the female display, though in other respects the display was uniform and carried away a full share of praise from those at the show. Professor Curtiss, of Ames, Iowa, tied the ribbons in a painstaking and creditable manner. Exhibitors' names appear in the following lines: Omer Catterson, Maryville, Mo. (10 head); Berry Lucas, Hamilton, Mo. (3 head); W. A. McHenry, Denison, Iowa (12 head); J. B. Withers, Missouri City, Mo. (11 head); Parrish & Miller, Hudson, Kan. (11 head); F. L. Sullivan, Afton, Iowa (5 head); H. W. Elliott, Estill, Mo. (2 head); A. C. Binnie, Alta, Iowa (11 head); C. D. Hooker & Son, Maryville, Mo. (6 head); W. J. Miller, Newton, Iowa (14 head); Geo. Kitchen, Jr., Gower, Mo. (8 head); P. J. Donohue, Holbrook, Iowa (10 head); Davis Bros., Maryville, Mo. (3 head); Paul M. Culver, Edgerton, Mo. (5 head); McAdam Bros., Holton, Kan. (1 head); T. J. McCreary, Highland, Kan. (2 head); C. J. Off, Peoria, Ill. (4 head); McLachlan Bros. & Johnson, Estill, Mo. (2 head); W. B. Gex, Graham, Mo. (1 head); G. H. Hoxie, Thornton, Ill. (10 head).

AWARDS.

Aged Bull—First, Sullivan, on Vala's Rosegay 63745; second, Binnie, on Jim Delaney 62767; third, McHenry, on Baden Lad 61883; fourth, Withers, on Errol's Rosegay 49769; fifth, Elliott, on Luckiness 62968; sixth, Catterson, on Clansman Chief 2d 73155; seventh, Lucas, on Black Monarch of Illington 2d 62483. This was an interesting class, made almost dramatic by previous contests. Having beaten his opponent, the Rosegay bull, at Sedalia the week previous it looked as if Jim Delaney would have a clean record for the final at Chicago. The Judge, Prof. C. F. Curtiss, changed all this, however. His rival is an extremely low, compact fellow, very uniform in width from end to end, though hardly possessing the width over the loin nor style and impressive front of the Binnie bull. Third choice looked a much heavier bull than the second, but figures did not bear this out. While a masterful bull, his lines and style were not up to the same high standard of the bulls placed ahead of him. Another Rosegay bull in fourth of similar build as the first one in the class, but tipping the beam at 2,125. Much less refinement and style, likewise finish, were his lacking points. And still a heavier one following told of the good scale of the black-coated Aberdonians.

Bull Two Years Old—First, Donohue, on

CRESCEUS 2:02 1/4

DAN PATCH 1:55

Dan Patch 1:55, The Pacing King, Cresceus 2:02 1/4, The Trotting King,

THIS BEAUTIFUL PICTURE
IN 6 BRILLIANT COLORS

MAILED TO YOU FREE.

We have just published a large, colored lithograph of the above Photo-Engraving, which shows our World Famous Stallions, Dan Patch 1:55 and Cresceus 2:02 1/4, in an exciting contest and at extreme speed. The picture is 16 inches by 21 inches and shows both horses in their natural colors and as life-like as if you saw them racing on the track. It is a picture that would sell for \$2.00 if not for a small edition. You can have one of these large and beautiful colored pictures and the two most valuable harness horse stallions and champions of the world, absolutely free and we will prepay the postage. This picture was made from life and every lover of a great horse should have one.

WRITE FOR ABOVE PICTURE AT ONCE.

1st, Name the paper in which you saw this offer. 2nd, State how much live stock you own or care for and then we will mail the picture promptly. Picture will not be mailed unless you give us this information and address.

INTERNATIONAL STOCK FOOD CO., MINNEAPOLIS, MINN., U. S. A.

AFTER EATING "INTERNATIONAL STOCK FOOD" EVERY DAY FOR FOUR YEARS DAN PATCH OPENS THIS SEASON AS FOLLOWS:

First Start, Galesburg, 1:57 1/2.
Second Start, Dubuque, 1:58.

Third Start, Minnesota State Fair, 1:56 1/2.
Fourth Start, Minnesota State Fair, 1:55.

Morning Star 2d 75716; second, Kitchen, on Louis of Meadow Brook 72459; third, Elliott, on Primm 72620; fourth, Hooker & Son, on Blackbird Benton 69611; fifth, Miller, on McDonald's Lad 66952; sixth, Parker, Parrish & Miller, on Key 72172. A very admirable type of a well-balanced form, with good develop-

ment of hind quarter, though a bit of prominence at the shoulder accented the possible slackness of heart girth in the first-prize bull. Second barely held his place, being off a little in the lines and somewhat faulty at the shoulder, though otherwise a good bull.

Senior Yearling—First, Culver, on Questor Lad 83369; second, Kitchen, on Melher 2d 84196; third, Withers, on Bluegrass Ridge Ajax 76732; fourth, Berry Lucas, on Maple Leaf 1 Am 81345; fifth, Davis Bros., on Heather Eraste 85412.

Group of Shetlands owned by C. E. Bunn, Peoria, Ill.

Junior Yearling—First, Donohue, on Glenfoi Thickset 2d 88142; second, Culver, on Royal Hyperion 84120; third, same, on Don of View Point 87199; fourth, McHenry, on Star of Denison 82426; fifth, Binnie, on Elmar Lad 84122; sixth, Withers, on Blue Grass Ridge Dowle 82673; seventh, Miller, on King Donald 80599; eighth, Davis Bros., on Blackbird Mayor 83933. The first bull was a general favorite for his type and male character, though in finish he was equaled by some of his rivals. The second and third bulls were a plainer cast with slight defects in conformation. Some would have given the fourth a higher rating for his width and well-made form, but he possibly stood a little too much up in air for the breed. Elmar Lad was the equal in finish and quality and but for his unevenness in width between his ends might have stood higher.

Senior Bull Calf—First, Off, on Quaint Fellow 94277; second, McHenry, on Prince Pico 93306; third, Sullivan, on Beau Ito 94175; fourth, Catterson, on Maplehurst King 12th 94862; fifth, McLachlan Bros. & Johnson, on Lord Roberts 3d 95565; sixth, Parker, Parrish & Miller, on Envoy 3d; seventh, Kitchen, on Intensified 93993; eighth, Donohue, on Black Dale 87453. Of the twelve shown it was found to be rather difficult to find the best ones. Quaint Fellow has made a rapid improvement since the first of the season and was able to down Prince Pico in a close contest. While his handling is not as mellow as the latter bull, he shows considerable flesh well laid, though many favored the latter bull in this point and considered him good for first. A first-rate type of bull well conditioned found third easily, though his size was against him.

Junior Bull Calf—First, Withers, on Dalgarno 94796; second, McLachlan Bros. & Johnson, on Sweetheart's Pride 2d 95518; third, Binnie, on Even Lad 95008; fourth,

Miller, on Erica Prince M. 94355; fifth, Hooker & Son, on South Oaks Prime Lad; sixth, Gex, on Booker T. 2d; seventh, Kitchen, on Helmet A. 88992.

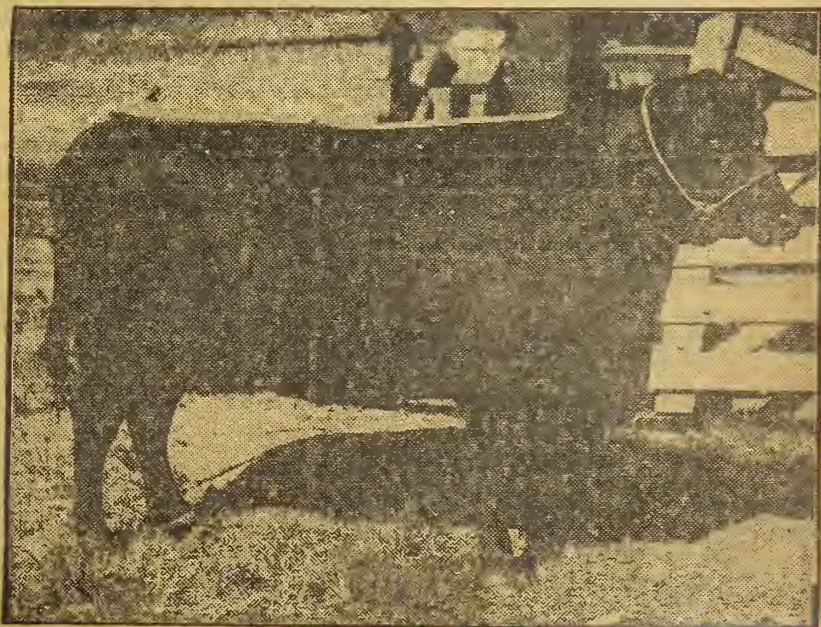

Aged Cow—First, Binnie, on Gussie of Kirkbridge 64008; second, Miller, on Snowflake 2d of Kirkbridge 64016; third, Mc-

of satisfaction. The cow at the head is hardly the best one in conformation throughout, but she is a typical pattern of doddie excellence measured by show yard standards. There was some changing around before she was certain of her place above the second, once her superior in the show ring, a cow considered by some to be better at the rear but plainer in front than the Binnie doddie. Both females are of practically the same weight, but do not look it. A lighter cow by 100 pounds, with a plump but less evenly-finished form, found third, her final place, while in fourth was the most massive one in the bunch.

Cow Two Years Old—First, Donohue, on Eileen Lass 83102; second, Kitchen, on Driftwood Rose 72992; third, Binnie, on Mina of Alta 5th 73111; fourth, McHenry, on Barbara McHenry 18th 17677; fifth, Donohue, on Pride of Clover Leaf 73969; sixth, Withers, on Grapewood Odessa 72590; seventh, Parker, Parrish & Miller, on Sunflower Happy 4th 70008. Another close class, though less so than the former. Type and quality are the long points in favor of first, while a smoother flesh covering gave the second a place over third.

Senior Yearling Heifer—First, McHenry, on Pride McHenry 45th 82421; second, Binnie, on Blackbird Lassie of Alta 83368; third, Binnie, on Coquette Lass of Alta 83367; fourth, Donohue, on Black Martha 82877; fifth, Miller, on Queen of Cherokee 10th 83078; sixth, McHenry, on Abess McHenry 6th 82418; seventh, Kitchen, on Beulah Brown 79012; eighth, Sullivan, on Fay Ito 80350.

Junior Yearling—First, Donohue, on Brookside Pride 4th 93254; second, Sullivan,

Grand Champion Angus, owned by P. J. Donohue, Holbrook, Iowa.

eighth, Parker, Parrish & Miller, on Sunflower Happy 3d 64371. Again the rating has undergone a revision and it was easy to find the best bull, but to arrange them was a task which only as skilled a judge as Professor Curtiss could do with a general degree

on Eolian 90699; third, Off, on Ethel Day 83152; fourth, Catterson, on Queen of Maplehurst 4th 92528; fifth, Withers, on Bluegrass Ridge Dorcas 83095; sixth, Catterson, on Maplehurst Queen 27th 92526; seventh, Parker, Parrish & Miller, on Sunflower Happy

KEEPS THEM ALL HEALTHY

Every good Veterinarian urges frequent use of a coal tar disinfectant. **HYGENO** is the best coal tar disinfectant made—the best it is possible to make—nothing dirty, gummy, weak or watery about it, yet when prepared for use it cost only about one cent per gallon. **HYGENO** kills lice, ticks, mites and all parasites on any animal; cures mange, itch, ring-worm, nettle rash and all other parasitic skin diseases; destroys germs, foul odors, stomach worms, screw worms, grubs, etc.; heals galls, wounds, cuts, scratches, sore mouth and similar injuries and diseases. **HYGENO** is endorsed by leading sheep, hog and cattle breeders, horse owners and poultry and pot stock fanciers. Free booklet tells why. Write today, we will tell you where to buy **Hygeno**. The Hygeno Disinfectant Co., 522-528 E. 12th St., Cleveland, Ohio.

Ito \$3320; eighth, Miller, on Metz Modesty \$5687.

Senior Heifer Calf—First, Binnie, on Enna Lassie 2d \$5002; second, McHenry, on Pride McHenry 53d \$3305; third, Donohue, on Brookside Rose 2d \$3255; fourth, same, on Brookside Pride 5th \$3253; fifth, Binnie, on Coquette Lass of Alta 2d \$5003; sixth, Catterson, on Maplehurst Coquette 4th; seventh,

on Kansas Laddie; fourth, Miller, on Wild Tom.

Yearling—Miller, on Black Prince; second, same, on Black Victor; third, Hooker & Sons, on South Oaks Eber.

Under One Year—First, Miller, on Victor; second, Hooker & Son, on Josie; third, Miller, on Novice.

Best Steer—Black Prince.

Junior Champion Short-horn bull, Signet, owned by Abram Renick, Winchester, Ky.

McHenry, on Ahness McHenry 7th \$3307; eighth, Hooker & Son, on Erica Pride 2d \$3787.

Junior Heifer Calf—First, Binnie, on Queen Lass of Alta 3d \$5007; second, McHenry, on Blackbird McHenry 66th \$3314; third, Catterson, on Queen of Maplehurst 6th \$4866; fourth, Binnie, on Proud Lassie of Alta \$5009; fifth, Miller, on Metz Heather Bloom \$4356; sixth, same, on Snowflake's Queen \$4354; seventh, Catterson, on Maplehurst Queen 30th \$4865; eighth, Hooker & Son, on Queen of South Oaks 2d \$3795.

Aged Heifer—First, Binnie; second, Donohue; third, McHenry; fourth, Withers.

Young Heifer—First, Donohue; second, Binnie; third, McHenry; fourth, Catterson.

Calf Heifer—First, Binnie; second, Catterson; third, McHenry; fourth, Hooker & Son. Get of Sire—First, Binnie, on get of Heather Lad of Emerson 2d; second, Donohue; third, Catterson, on get of Clansman Chief 2d; fourth, Miller, on get of Wabash of Treaty.

Produce of Dam—First, Parker, Parrish & Miller, on produce of Sunflower Happy 3d; second, Hooker & Son, on produce of Blackbird of Denison 43d; third, McHenry, on produce of Abness McHenry 2d; fourth, McHenry, on produce of Privet of Careston.

Champion Senior Bull—Vala's Rosegay. Champion Junior Bull—Glenfoll Thickset. Champion Senior Female—Eileen Lass. Champion Junior Female—Brookside Pride 4th.

Sweepstakes bull—Vala's Rosegay. Sweepstakes Cow—Eileen Lass.

FAT STOCK.

About 100 head of fat cattle were shown at the Royal and leaving out the Galloways were about equally divided between the other three beef breeds. Well-finished forms was the rule in most cases, but the small classes eliminated much rivalry. Although the entries were open to martins or spayed females, only a few were shown. But four grades appeared in the Galloway division and G. W. Lindsey took first in the eighteen months class and in the class under that age F. P. Wild got the blue with Bluster, afterward made the champion, and second went to W. M. Brown & Son. Unlike some other contests where buyers of fat cattle made awards, the judges in the breeding cattle classes placed the ribbons, and as competition was not the keenest, all exhibitors were satisfied. As yet this part of the show has not been as prominent as it might be made.

ABERDEEN ANGUS PURE-BRED STEERS

Two Years and Under Three—First, Miller on Dutch Lad; second, Orr, on Exilio; third, same, on Gold Dust.

Yearling—First, Orr, on Proud Fellow; second, Hooker & Son, on South Oaks Chance; third, Miller, on Metz Prince; fourth, same, on High Ball.

Under One Year—First, Kansas Agricultural College, on Ideal; second, Orr, on Edison; third, Davis Bros., on Valley Home 3d; fourth, Orr, on Dudley.

Best Steer—Dutch Lad.

GRADES.

Steer Two Years and Under Three—First, Miller, on Louie; second, Hoxie, on Exchange; third, Kansas Agricultural College,

Sweepstakes Steer—Black Prince.

PURE-BRED SHORT-HORNS.

Steer Two Years and Under Three—First, Kansas Agricultural College, on Tim; second, Forsythe, on Bapton's Choice; third, Peak & Son, on Sunray.

One Year and Under Two—First, S. C. Hanna, on Captain Primrose; second, Thomas, Jameson & Mitchell, on Coleridge; third, Missouri Agricultural College, on First Attempt.

Under One Year—First, Kansas Agricultural College, on Colonel Harrimon; second, Newell, on Ravenswood Challenger; third, Peak & Son, on Johnny Quinn.

Best Steer Any Age—Tim.

Best Three Steers—Kansas Agricultural College.

GRADES.

Steer Two Years and Under Three—First, Peak & Son, on Buster Brown; second, same, on Spotted Boy.

One Year and Under Two—First, Kansas Agricultural College, on Pride of the Maples; second, Peak & Son, on Duke.

Under One Year—First, Caldwell, on Booster; second, Stodder, on Thomas; third, Peak & Son, on Tommy the Lad.

Best Steer Any Age—Pride of the Maples.

Best Three Steers—Peak & Son.

Best Steer Any Age, Grade or Pure Bred—Tim.

HEREFORD FAT STOCK, PURE BRED.

Steer Two Years and Under Three—First, Cargill & McMillan, on Roundup 18669; second, Funkhouser Estate, on Bert; third, C. L. Browning, on Peble 2d 191203.

Steer One Year and Under Two—First, Cargill & McMillan, on Fair Lad 1st 203171; second, Funkhouser Estate, on Erskine; third, same, on Jay B.; fourth, Kansas Agricultural College, on Merryman 209605.

Under One Year—First, Cargill & McMillan, on Fulfiller 6th; second, Mousel Bros., on Principal 234601; third, Logan, on Royal Grove 219967.

Best Steer Any Age—Roundup.

GRADE HEREFORDS.

Steer Two Years and Under Three—First, C. V. Hull, on Mitchell; second, Yates Bros., on Sunny Jim.

Steer One Year and Under Two—First, Hoxie, on Peach; second, Logan, on Mary Jane; third, Stannard, on Billy.

Under One Year—First, Gibson, on Billie Charming; second, Cargill & McMillan, on Bonnie; third, Gibson, on Don.

Best Steer Any Age—Peach.

Best Grade or Pure Bred—Roundup.

CARLOAD LOTS.

There was a falling off in the number of carload lots entered at the American Royal this year, both in the feeder and fat classes. A good deal of quality was represented in the fat loads of Hereford and Angus steers. Mr. C. Kramback, of Marne, Iowa, who has twice won the grand championship on his carload lots at the International, exhibited the only load of fat doddies last week, and an exceedingly uniform bunch they were. These steers were all sired by the same bull, S. O. Editor, bred by Mr. C. D. Hooker, of Maryville, Mo.

Mr. W. D. Reynolds, of Pattonsburg, Mo., won first on two-year-old feeding steers, also first and second on car lots under one year and the sweepstakes for best carload of Angus steers.

In the fat car lots of Herefords first went to C. W. Hull, of Platte City, Mo.; second to H. H. Drake, Frankfort, Kan., and third to C. A. Baker, of Leeton, Mo. The Stanton Breeding Farm Company, of Madison, Neb., won first on two-year-old feeders, first on yearling feeders and the championship prize for the best car load of Herefords under three years. Messrs. A. Phillips & Son, of Hays, Kan., won first on Hereford calves and second on two-year-olds, while S. S. Seiber, of Grand Junction, Colo., won third on two-year-olds and second on yearlings. Mr. R. T. Alexander, of Canadian, Texas, won third on Hereford calves.

The Galloway classes were filled by Kansas men throughout. Mr. C. H. Jackson, of Moore, Kan., showed the only car load of two-year-olds. In the yearling class of Galloways first went to J. A. Keagy, of Ellis, Kan., and second to J. M. Hill, of Riverton, Kan.; third going to C. H. Jackson. Mr. J.

M. Hill also won first on calves; J. Tinkler, of Gypsum, Kan., second, and B. Funk third. Mr. J. A. Keagy won the sweepstakes premium on car lots any age.

There was but one car load of Short-horns, shown by C. C. Slaughter, of Roswell, N. Mex.

HORSES.

PERCHERONS.

Although the horse exhibit at the Royal was notably strong throughout, the Percherons certainly had the strong end of it. McLaughlin Bros., from their own headquarters in Kansas City, brought out twenty; J. Crouch & Son, of Lafayette, Ind., twelve head; J. W. & J. C. Robison, of Towanda, Kan., sixteen head; Robt. Burgess & Son, of Wenona, Ill., nine head, and C. Spohn, of Wellington, Kan. The Percheron exhibit throughout was remarkable for quality. In the younger classes some of the individuals were not highly fitted, and consequently looked a little plain, though it must be acknowledged that there was scarcely a mean Percheron on the ground. The mare classes were filled by the Robison firm, of Towanda, Kan., and they were filled with good ones. A fair like the Royal needs more competition in the mare classes, as an indication that American breeders are making some progress in the work of producing Percherons on their own farms. The exhibit of American-bred mares and stallions in the Robison stud indicates that good ones can be produced here as well as abroad.

AWARDS.

Stallion Four Years Old—First, McLaughlin Bros., on Etrageant (40553); second, Crouch & Son, on Zola 41477; third, McLaughlin Bros., on Faisan (41292); fourth, Crouch & Son, on Marius 41226. Etrageant should, by the attention he has been given at the fairs this fall, be too well known to need more praise, and while he is not perfect, he combines the essential good points of a Percheron in a most remarkable degree. While at Springfield, Eaupin was considered by the judges to be the best of Crouch's quintet. Zola was the favorite here, which speaks well for the uniformity of that firm's stables. Faisan made good in his place and is somewhat shorter, deeper flanked, but a bit slower under way than second. He, too, has good, clean bone, well placed on durable hoofs like the rest of the class in the money. The fourth horse has many strong points, of a large, strong-boned muscular type, but does not carry the flesh to suit critics.

Stallion Three Years Old—First, McLaughlin Bros., on Valseur (41329); second, McLaughlin Bros., on Minot (41287); third, Crouch & Son, on Champagne 57635; fourth, Crouch & Son, on Tyron 60411. Valseur is a powerful-made fellow with a high grade of timber below and under way shows a clean, long stride. Second choice is a compact, muscular fellow and possibly is a little slow in action. Third horse was more on the stretchy order, but carried himself well together, which with his finish, made him many admirers.

Stallion Two Years Old—First, McLaughlin Bros., on Comique 41299; second, McLaughlin Bros., on Dragon 41341; third, Crouch & Son, on Englantier 41465; fourth, Burgess & Son, on Artiste 45720. Two well-matched horses headed this list, as will be attested by those who were kept waiting for the decision. Comique was favored by some for champion of the show, possessing an unusually high and almost trappy action with a well-put-together top. Some might doubt the staying quality of the type he represents. In second was a horse of this kind and had slightly flatter bone and more of it. Action was not at all lacking in the next choice, which presented a conformation a trifle lacking in width, but otherwise a very correct drafter.

Champion Stallion—Etrageant.

Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars.

THE LAWRENCE-WILLIAMS CO., Cleveland, O.

A. G. Soderberg, of Osco, Ill., two head. Compared with the record in the Shire classes of former years the exhibit this year was a striking improvement from the standpoint of quality. The exhibit of Klug Edward and Lord Rothschild contributed not a little to the interest of the Shire display. Among the king's lot were a few notably good ones, though among American studs on exhibition at the Royal could be found individuals of equal, if not superior merit. The awards in the Shire classes were made by Mr. Edmund Beck, superintendent of the king's exhibit; Edward Hobson, of Tipton, Ill., and Peter Hopley, of Lewis, Iowa.

AWARDS.

Aged Stallion—First, Pioneer Stud Farm, on Holker Colin; second, Burgess & Son, on Bank Nil Desperandum; third, Pioneer Stud Farm, on Lead's Lion; fourth, Burgess & Son, on Blaze of Worsley 3d. This placing reversed the order in which these horses stood at the Springfield fair one week before. For style and action the second premium horse had his superior outdone, but for all round qualities that are looked for in a draft horse Holker Colin is not an easy one to down. One might fault him a little for going wide in front, but for quality of limb, fullness of muscling, strength of back and for drafty qualities in general, the first-prize horse commands a multitude of followers.

Stallion Three Years Old—First, Burgess & Son, on Hemington Prime Minister; second, Trumans' Pioneer Stud Farm, on Heckington Bay Thumper; third, same, on Menominee; fourth, same, on Mydeland's Champion.

Stallion Two Years Old—First, Burgess & Son, on Lymm Jumbo II.; second, Trumans' Pioneer Stud Farm, on Ponder's Bridge; third, same, on Teneham Stroxtan; fourth, same, on Teneham Buscot. Lymm Jumbo II. was afterwards made the champion Shire stallion. He has abundance of weight, with much quality. One might fault him for being a little upstanding, though the judges rated him high as a colt of weight and balance.

Champion Stallion—Lymm Jumbo.
Champion Mare—Deeping Juliet.
Yearling Stallion—First, Burgess & Son, on King's Drayman; second, Soderberg, on Noble King.

Best American-Bred Mare—Soderberg, on Osco Rose.

Best American-Bred Stallion—Soderberg, on Noble King.

Best Imported Mare—Trumans' Pioneer Stud Farm, on Deeping Juliet.

BELGIANS.

There were eight aged Belgian stallions, seven three-year-olds and five two-year-olds, shown at the Royal last week. There was scarcely a cull horse in the bunch. For weight, close ribbing and all round muscularity the Belgians stand at the top, at least this is true if we judge by the exhibit made in Kansas City last week. The exhibitors were H. A. Briggs, Elkhorst, Wis. (5 head); J. Crouch & Son, Lafayette, Ind. (12 head); Robt. Burgess & Son, Wenona, Ill. (7 head), and McLaughlin Bros., Kansas City, Mo. (2 head).

AWARDS.

Aged Stallion—First, Crouch & Son, on Mon Sanhait 1582; second, Briggs, on Mouton de Lelling 27518; third, Crouch & Son, on Cuspidor de Leez 2189; fifth, Burgess & Son, on Garibaldi de Bel Air; fourth, Crouch & Son, on Camot 1421. The first-prize horse, Mon Sauhait, is a hard horse to beat. He is of the Belgian type from the ground up; has plenty of weight; is fairly active for a big horse, and has much quality in his underpinning. You might call him a body-perfect horse. Mon Sauhait was afterward made the grand champion Belgian stallion any age.

Stallion Three Years Old—First, Crouch & Son, on Charon; second, Burgess & Son, on Birmingham 2248; third, Briggs, on Senaphin d'Alvaux; fourth, Burgess & Son, on Bruno Autchard 2075; fifth, Briggs, on Champagne de Bertheim.

Stallion Two Years Old—First, Burgess & Son, on Remi 2323; second, Crouch & Son, on Vampire d'Alvaux; third, Burgess & Son, on Fifi 2319; fourth, Crouch & Son, on Nelson 2274; fifth, Briggs, on Bambacheur de Noichat.

Champion Group Five Stallion—First, Crouch & Son; second, Burgess & Son.

The judges were Peter Hopley, of Lewis, Iowa; Robt. Ogilvie, of Chicago, and Prof. C. F. Curtiss, of Ames.

CLYDESDALES.

There were but two exhibitors of Clydesdale horses at the Royal, namely, Alexander

Galbraith & Son, Janesville, Wis., and A. G. Soderberg, Osco, Ill. It is in no way discreditable to the other draft breeds to say that the very acme of quality is found among the Clydesdales. One could go further and claim first place for the Scottish drafters in point of action. Invariably they go straight, springy and strong. In the aged stallion class the premiums were won by Soderberg horses, as were also the first (on Ethelbert), second and fourth premiums in the three-year-old, the Galbraith firm winning third on Baron Downe. In the two-year-old stallion class Galbraith & Son won on Baron Clifton, while Soderberg won second and third on Black Douglas and Black Acme. For sweepstakes Clydesdale stallion, Ethelbert, the three-year-old, and Baron Clifton, Galbraith's two-year-old, had a close contest. The judges, Mr. Roht. Ogilvie, of Chicago, and Prof. W. J. Kennedy, of the Iowa Agricultural College, split in their opinion on the champion stallion, the latter choosing Soderberg's three-year-old and the former the Galbraith colt. Prof. C. F. Curtiss was called on as referee and decided in favor of Ethelbert. He is a horse of extra quality, good action and considerable weight. One might fault his hocks a trifle, though he is not bad there. Galbraiths exhibited the only Clydesdale mare and consequently won.

LIGHT HORSES.

The showing in this department was made up of Coach and Hackney horses, and though few in numbers, their well-trained manners and flashy action made them a very interesting feature for the lovers of high-acting horses. Trumans' Pioneer Stud Farm had eight Hackneys and Alexander Galbraith two, the grand champion going to the former stable. J. Crouch & Son were the sole exhibitors in German Coach and had fourteen great horses. The French Coach were in the hands of McLaughlin Bros., whose stable was generally crowded with visitors. Prizes were liberal and in all of the above cases awarded as cataloged.

MULES.

The showing in this division was a trim-up for Missouri, and with every appearance of the famous "Missouri canary" came a round of applause that found its greatest vent in the six-mule hitch driven by Blackburn & Jones. This firm also won championship on the best mule, Denny, a handsome three-year-old bay. W. A. Elgin, of Platte City, Mo., managed the mule show and with two score of animals on the ground the display was one of the interesting features of the American Royal.

Of the following prizes for mules, one-half was donated by Kansas City mule dealers as follows: Sparks Bros., \$50; Guyton & Harrington, \$50; Cottingham Bros., \$50; Robertson Bros., \$25.

Mule Four Years and Over—First and second, Blackburn & Jones; third, Chas. B. Newby, Plattsburg, Mo.

Mule Three Years and Under Four—First, Blackburn & Jones; second, Robert Gaynes, Camden Point, Wis.; third, J. G. Arbuthurst, Haworth, Kan.

Mule Two Years and Under Three—First, Newby; second and third, W. B. Emerson, Wellington, Mo.

Mule Colt—First, Lewis Jersey, Smithville, Mo.; second and third, Blackburn & Jones.

IOWA STOCK FOOD CO., JEFFERSON, IOWA

of animals on exhibition did not come up to the records made by the state fairs in the corn belt, yet a number of the good ones that had been the rounds were in the competition at the Royal. Prominent breeders who were there with their herds expressed much confidence concerning the future prospect of the swine department at the Kansas City show. Possibly the only objection that could be raised by owners of high-priced hogs would be that the quarters are a little drafty for October weather. It looks to the visitor as though a little attention might be given to this matter, thereby making the swine quarters more comfortable, not only for the swine, but for the sight seers.

DUROC JERSEYS.

The Duroc Jersey show at the American Royal was remarkable for its uniform character. The very best breeders, not only from Missouri and Kansas, but from other

bertha, Kan.; W. E. Brown & Sons, Cambridge, Kan.; Michael Bros., Houstonia, Mo.; W. G. Unitt, Seward, Neb.; Missouri University, Columbia, Mo.; C. Folgate, Stanberry, Mo.; R. W. Murphy, Dearborn, Mo.; G. V. Bush, Marshall, Mo.; W. L. Addy, Parnell, Mo.; Powell & Rudy, Smithton, Mo.; C. E. Pratt, Frankfort, Kan.; J. W. Reid, Portis, Kan.; J. F. Staadt, Ottawa, Kan.; O. N. Wilson, Silver Lake, Kan.; Watts & Dunlap, Martin City, Mo.; Dr. W. J. Ferguson, Sedalia, Mo.; F. L. Bowman, Hamilton, Mo.; J. W. Carnagey and G. V. Bush.

AWARDS.

Boar and Three Sows Under Twelve Months—First, Wilcox; second, McFarland.

Boar and Three Sows Any Age, Bred by Exhibitor—First, McFarland Bros.; second, Harned.

BERKSHIRES.

A few of the best herds in the United States were entered in the Berkshire classes, and this being true it is not necessary to state that competition was keen. The notable Hood Farm, of Lowell, Mass., by no means carried away all the first ribbons, a fact that reflects most creditably on the competition this firm encountered at the American Royal. The judging was done by Mr. T. A. Harris, of Lamine, Mo., who passed on all the classes except the aged boars. He refused to judge this class, as he had bred one of the animals entered—the very individual that in the hands of another judge captured the blue ribbon. The owner, Mr. Sam Spellman, of Sturgeon, Mo., was the recipient of many compliments over his victory in defeating the great Hood Farm herd boar. The following exhibitors had their herds entered: Etzler & Moses, Decatur, Ind.; I. Everson & Sons, Wellington, Ohio; Hood Farm, Lowell, Mass.; A. D. Gilmore, Asylum, Neb.; E. D. King, Burlington, Kan.; T. F. Guthrie, Saffordville, Kan.; W. R. Holt, Fall Neb.; W. H. Peak, Sibley, Mo.; Jam

First prize aged Shire stallion, Holker Colin, owned by Trumans' Pioneer Stud Farm Bushnell, Ill.

Mule One Year and Under Two—First, W. H. & J. W. Adams, Blue Springs, Mo.; second, James Blair, Plattsburg, Mo.; third, Blackburn & Jones.

Pair Aged Mules—First and second, Blackburn & Jones; third, Newby.

Three-Year-Olds—First, Robert Gaynes; second, Arbuthurst; third, Blackburn & Jones.

Two-Year-Olds—First, Emerson; second, Newby; third, Blackburn & Jones.

Sweepstakes Pair—Blackburn & Jones.

SWINE.

The swine exhibit at the American Royal this year was sufficiently extensive to indicate that men have changed their belief concerning the danger of contracting disease at a stock yards center. Although the number

states of the corn belt, were out with their herds. The competition was keen in practically every class, and the judge, Mr. Geo. W. Prine, the noted Berkshire breeder, of Oskaloosa, Iowa, found some rather tough propositions. Mr. Prine did creditable work, though of course there could be found those among the exhibitors who claimed that he looked too much for Berkshire characteristics. Complaint, however, was not general. Herds were entered by the following exhibitors: McFarland Bros., Sedalia, Mo.; Harry Sneed, Smithton, Mo.; F. L. Bowman, Hamilton, Mo.; Clarence Beavers, Home City, Kan.; L. C. Woollen, Stanberry, Mo.; W. W. Wilcox, Nevada, Mo.; M. W. Greer & Son, Rushville, Ill.; Chas. M. Morris, Harrisonville, Mo.; B. W. Harned, Beaman, Mo.; H. H. Hague, Newton, Kan.; Fagin, Browning, Hess & McCabe, Ripley, Ill.; Geo. Kerr, Sa-

DIRECT FROM MILLS
WE PAY THE FREIGHT

BEACON-ITE
LONG LIFE
ROOFING

No matter whether you have a well equipped hen house or use a shed for this purpose, either requires a good roof. Although the hen may keep a picking when it rains, she is not a water fowl. She needs some dry place to go when she wants to.

To raise chickens successfully a water-tight roof on your hen house is absolutely necessary. You can put Beacon-ite long-life roofing on any of your buildings yourself and it will remain absolutely water-tight for years. It will cost you about one-half the price of tin or shingles and will outlast either. Thousands of farmers are now using it on all of their buildings.

Remember that we only sell direct from the mills to you, thereby saving you dealer's and jobber's profits. We pay all freight charges. Write to-day for our FREE samples.

Champion Boar One Year Old—Lunt; reserve champion, Hammond.

Champion Boar Under Twelve Months—Lentz; reserve champion, Wingate.

The Southwest has had another bumper crop.

It's the usual thing to harvest big crops in the Southwest—the big crops this year are nothing unusual. You may have had a bumper crop yourself—for crops are generally good this year—but think what a bumper crop means in the Southwest. It means that

the Southwestern farmer made from five to ten times as much as you made

for he was able to buy from five to ten times as many acres as you bought for the same money.

If you have had a big crop yourself this year, it is the best time to move to the Southwest, for you may have more to invest and you can probably sell your present farm for a good price.

Don't wait until you've had a poor crop, for the poorer the crop the harder you'll find it to get away. Besides if you wait another year you will have to pay more for your land in the Southwest—as Southwestern farm lands are rapidly increasing in value and making their owners rich.

We publish for FREE distribution illustrated books about Missouri, Kansas, Arkansas, Indian Territory, Oklahoma, Texas and New Mexico. Tell me what particular state or territory you are interested in and I will send you the book pertaining to it—together with any specific information you may ask for. Write to-day while you think of it.

A trip to the Southwest will make you enthusiastic about the country. The trip can be made at very small cost. On the first and third Tuesday of each month, very low rate round trip tickets will be on sale via the Rock Island-Frisco Lines. Write me about it. I can probably suggest a trip that will enable you to see the best of the country at the least cost.

JOHN SEBASTIAN, Passenger Traffic Manager, Rock Island-Frisco Lines

1413 La Salle Street Station, Chicago

or

1413 Frisco Building, St. Louis.

Four Animals Either Sex, Any Age, Produce of One Sow Owned by Exhibitor—First, Hoadley; second, Ishmael; third, Hammond. Boar and Three Sows Over One Year Old—First, Lunt; second, Hammond. Boar and Three Sows Under One Year—First, Hoadley; second, Hammond; third, Lunt. Boar and Three Sows, Any Age, Bred by Exhibitor—First, Hoadley; second, Hammond; third, Lunt.

Boar and Three Sows Over One Year—Kerr.

Boar and Three Sows Under One Year—First and second, Kerr; third, Porter.

Boar and Three Sows Any Age, Bred by Exhibitor—First, Kerr; second, Seckman; third, Porter.

THE AMERICAN ROYAL SALES.

SHORT-HORNS.

The Short-horns selected by Assistant Secretary B. O. Cowan for the American Royal sale were a uniformly good lot throughout. They were a useful bunch of breeding cattle, every one guaranteed by the breeder. The sale was largely attended and bidding was fairly spirited. The following sales were made:

FEMALES.

Collins Maid, John McCoy, Sabetha, Kan.	\$135
Orange Butterfly, J. F. Stodder	125
Nonpareil 4th, R. E. Moffitt, Vintonburg, Mo.	165
Rosewood 5th, W. A. Betteridge, Pilot Grove, Mo.	200
Orange Minna 3d, J. W. Hudiberg, Herndon, Kan.	100
Myra and bull calf, J. W. Ferguson, Harrisonville, Mo.	115
Glosters Rose, Jno. Okane, Winkler, Neb.	300
Little Gem, F. O. Lowden, Oregon, Ill.	110
Sweet Orange, F. O. Lowden	130
Lady Chatter 4th, E. E. Booker, Beloit, Kan.	180
Second Norwood Jennie Lind and heifer calf, same	180
Orange Blossom 34th, J. P. Newell, Carthage, Mo.	300
Thorny Bud, D. R. Hanna, Ravenna, Ohio	325
Lady Gloster, N. F. Shaw, Plainville, Kan.	100
Bull calf from Lady Gloster, E. G. Erskine, Edgerton, Kan.	110
Baroness Viscount, Fry Bros., Falls City, Neb.	150
Mary Challenger 20th, Bellows Bros., Maryville, Mo.	150
Pappy 99th and heifer calf, N. F. Shaw	130
Sweet Rose, Bellows Bros.	110
Orange Beauty, W. A. Betteridge	170
Minnie 3th, J. F. Stodder	130
Substitute, Nellie of Ellerslie, W. T. Williams, Harrisonville, Mo.	150
Meadow Ridge Victoria and heifer calf, A. W. Ferguson	225
Glenfoyle Duchess Gloster, Dr. Givens, Fayette, Mo.	180

First prize Percheron mare group, owned by J. W. and J. C. Robison, Towanda, Kan.

Champion Sow One Year Old—Schmidt & Son; reserve champion, Wingate.

Champion Sow Under One Year—Ishmael; reserve champion, Ishmael.

Grand Champion Boar Any Age—Lunt; reserve grand champion, Lentz.

Grand Champion Sow Any Age—Schmidt & Son; reserve grand champion, Ishmael.

Four Animals, Either Sex, Any Age, Get of Exhibitor—First, Schmidt & Son; second, Hoadley; third, Ishmael.

dence, Mo.; P. K. Corder, Raymore, Mo.; L. L. Frost, Mirabile, Mo., and G. W. Seckman, Mirabile, Mo. The judge, Mr. B. J. Hargan, of Glencoe, Okla., found a few difficult propositions nevertheless. His work on the whole met with the approval of exhibitors and visitors alike.

AWARDS.

Boar Eighteen and Under Twenty-Four Months—First, Porter.

Champion Boar One Year or Over—Porter; reserve champion, Frost.

Champion Boar Under Twelve Months—Kerr; reserve champion, same.

Champion Sow One Year or Over—Kerr; reserve champion, same.

Champion Sow Under Twelve Months—Kerr; reserve champion, same.

Grand Champion Boar—Kerr; reserve grand champion, Porter.

HEREFORDS.

The Hereford sale held during the week of the American Royal terminated most satisfactorily, realizing on the forty-seven animals sold an average of \$192.66. The highest price paid was for Onward 31st, a Funkhouser-bred bull, purchased by Mr. O. Harris, of Harris, Mo., for \$575. Mr. M. B. Packard, of Phoenix, Ariz., paid \$405 for Redbird, bred by Mr. R. C. Wilson, of Belton, Mo. The top price cow was consigned by Messrs. Cargill & McMillan and sold to Mr. E. R. Morgan, of Blue Rapids, Kan., for \$340. The following is a list of the sales:

47 head brought... 9,055; average... 192.66

GALLOWAYS.

The prices on Galloways at the sale held during the week of the American Royal were scarcely up to expectations. The shaggy coats listed in this sale were selected with a good deal of care by the secretary of the Galloway breeders' association, consequently buyers fell heir to many good bargains. Mr. A. N. Thompson, of Nashua, Mo., contributed the animal that topped the sale, his bull Caleb Miller going to G. W. Spicer, of Smithville, Mo., for \$335. Sales made are as follows:

FEMALES.

Substitute, J. T. Fletcher, Boulder, Colo...\$195
Helfer calf from substitute, W. M. Brown & Sons, Carrollton, Mo... 200
Substitute, Croft & Son, Bluff City, Kan... 150

ABERDEEN-ANGUS.

The Aberdeen Angus sale held during the week of the American Royal in the pavilion was not an event characterized by much enthusiasm. Only twenty-one animals were sold, and these averaged \$97.15. Mr. M. A. Judy, of Beecher, Ill., paid the highest price for bulls, \$160, for Black Knight of Highland 6th. Mr. W. J. Miller, of Newton, Iowa, consigned a four-year-old cow that topped the sale at \$200, going to McDonald & Brentley, of Princeton, Mo.

HOW TO BUY AND KEEP TOOLS.

Years ago almost any old tool was good enough for home duty—a hatchet, a hammer and a screw-driver sometimes comprising the entire outfit. Nowadays, however, everyone sees the necessity of having a fairly complete set of tools,

and economy as well as experience has taught us to get good tools.

To meet the demand of the household and to remove the risk of tool buying, the Simmons Hardware Company came to the rescue with their Keen Kutter Tool Cabinets.

These are beautifully finished oak cases fully equipped with every tool necessary or convenient for household use, each one belonging to the famous Keen Kutter brand, each one guaranteed perfect in quality, temper and efficiency. The Simmons guarantee removes all risk. If any flaw develops or any imperfection shows itself the tool will be replaced or money refunded.

This is the only tool cabinet containing a complete set of tools under one name and trademark, each of which is guaranteed. The ideal way to buy and keep tools is in the tool cabinet, and the only safe tool cabinet to buy is the Keen Kutter.

Keen Kutter Tool Cabinets and Boxes come in all sizes, containing large and small outfits, ranging in price from \$7.50 to \$100.00.

In every cabinet are racks and hooks for each tool and drawers for materials and accessories.

Every cabinet contains in different varieties and numbers such tools as Saws, Braces, Bits, Chisels, Gimlets, Awls, Planes, Hammers, Hatchets, Files, Pliers, Screw-drivers, Wrenches, Nail-sets, Reamers, Rules, Squares, and everything that is necessary for ordinary work about the home. Keen Kutter Tool Cabinets are for sale at the leading hardware stores.

The Keen Kutter Tool Cabinet Booklet will be sent free if you drop a post card to Simmons Hardware Company, St. Louis and New York, U. S. A.

ONE WAY SETTLERS' RATES.

To points in Nebraska, eastern Colorado, Kansas, Missouri, Arkansas, Indian Territory, Oklahoma, Texas and Louisiana, etc., the Iowa Central railway will place on sale on the first and third Tuesdays of each month, November to March, inclusive, one way tickets at extremely low rates for benefit of homeseekers and settlers. Through rate will be only two dollars (\$2.00) higher than half fare. Don't fail to call on Iowa Central agents for full particulars as to rates, etc., or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

This is The Moline

THE IRONCLAD WAGON!

Built since 1854 in the largest exclusive Farm Wagon factory in the world, by machinery that does the work with such wonderful precision that each part fits the other with unflinching exactness. This enables us to produce the

Lightest Running Wagon Under Heavy Loads

The Moline has for its foundation the best woodstock that grows—all Hardwood. Selected Hickory for axles, doubletrees and singletrees, and white oak for the rest of the gearing and wheels. Yellow pine boards that are tongued and grooved for

the bottom of box; and we put in the sides the best lumber material obtainable. Now on top of all this we have reinforced every conceivable place on the wagon which is liable to wear with iron and steel protections, not of flimsy size, but with heavy plates.

which are so in evidence on the wagon throughout that The Moline has been called **The Ironclad Wagon.**

THE WONDERFUL BOOK

Pole—Reach—Hind Gear—Front Gear—Box inside and outside, all have special ironing everywhere. Our master mechanic has written a book, "How the Moline Wagon is Made Ironclad." It is FREE. Whether you want to buy or not, get the book! You will learn a whole lot more about wagons than you ever knew before. Write for it today. Address

MOLINE WAGON COMPANY,
MOLINE, ILL.

BRANCHES—Deere & Webber Co., Minneapolis; John Deere Plow Co., Kansas City, St. Louis, Omaha, Dallas, New Orleans and Portland.

CORRECTIONS IN ILLINOIS DUROO AND CHESTER AWARDS.

In our report of the swine department of the Illinois State Fair, the Chester and Duroo awards in some unaccountable manner became mixed, and because of this we herewith append the full correct report of each breed:

DUROO JERSEYS.

The aged boar class brought out some extra good material. Commodore, the winner, is a wonderful hog in many ways. He has great size, weighing 1,080 pounds, and carries it easily on the best of feet. His color, a dark cherry, at his age speaks well for him. Buddy K. 4th stood next to him and had refinement and more quality, with nearly the same scale, weighing 1,035 pounds. This was the champion hog at Springfield last year and he had many friends for the same place this year. King Gold Coin stood third and is a hog that is worthy of close consideration in any company. In senior boars Tokio Paul carried off the honors. He was a showy, mellow fellow and carried his great length well. Junior yearlings was another strong class and the judges spent a good deal of time in picking the winners out of thirteen good ones. Orion King was at last decided upon, although many outsiders differed with the judge in this, as they did in many classes. Ambition stood second. He was a mellow hog, with splendid coat, good head and ear. The under year boars were also a strong class, notable for their uniformity. The winner, Shorty Orion, was an extra good one. He stood on the best of feet. He shows a good, strong bone, deep body and carries his back well. Illinois Chief was very much the same kind of a hog and it would be hard to tell just which should win. He lacked a little in length. Any one of the first three could have been placed first without going far wrong. The judge discriminated against high fitting all the way through. The under six months class brought out thirty—the cream of many herds. Cutler won on a pig that closely resembled the winning Polands. He was good all over and was very hard to fault. This class was so evenly matched that it was largely a matter of style and condition on which a judge could base his decision. In old sows great matrons came out. They were deep and roomy with splendidly-arched back. Foust's Pride was a grand sow, though she was not very far ahead of Bethel. She was very good. She won on her depth, back and coat. The third prize sow would stand a little more fullness behind shoulder. The senior yearlings were also a strong class. King's Lady won on better feet and bone. The first three were very even. Old breeders said they had never seen so much quality in one ring. The sows in the junior yearling class are usually in their prime and make a fine showing. Lottie S. was a tidy young sow, extra good in hams and loin. King's Lady A. was a very deep-bodied individual of good quality. There were eighteen under year sows and all but a few outstanding good ones. The young sows were better on their feet than the older ones, which shows advancement in the breed. The herd classes make a nice showing, perhaps the nicest showing of all. Harris won with his boar, Commodore, at the head, although Jackson had better sows and a class winning boar. The judge probably remembered the old saying that the sire is half the herd. The winning young herd was composed of Jackson's sows shown in other classes. In the show for champion boar Tokio Paul gave Commodore a close rub. He would have been a winner at most any show but in this.

Exhibitors: W. W. Green & Son, Rushville, Ill. (17 head); G. W. Trone, Rushville, Ill. (8 head); Louis Denton, Rochester, Ill. (3 head); A. A. Hill (5 head); C. C. Cramer, Huntville, Ill. (16 head); H. B. Griffith, Bowen, Ill. (18 head); Manlove Bros. & Norris, Bowen, Ill. (18 head); H. L. Comer, Carlinville, Ill. (18 head); L. W. Cross, Mason City, Ill. (9 head); Edw. Aldrich, Rosemont, Ill. (23 head); T. E. Laurie, Jacksonville, Ill. (12 head); Geo. Gilliland, Wrights, Ill. (10 head); Fagan, Browning, Hess & McCabe (23 head); W. F. Allen, Ripley, Ill. (5 head); Nelse Thompson, Rochester, Ill. (9 head); W. T. Gatten, Springfield, Ill. (11 head); Thomas & Ilgott (23 head); E. A. Baxter, Pawnee, Ill. (9 head); J. P. Plummer, Rochester, Ill. (14 head); Fred Kraschell & Son (16 head); J. C. Roach, Grand, Ill. (7 head); N. B. Cutler, Carthage, Ill. (16 head); Real & Richards, Ferris, Ill.

Champion Boar—Harris, on Commodore.

Champion Sow—Fagan, Browning, Hess & McCabe, on Foust's Pride.

CHESTER WHITES.

The Chester Whites were not very strong in numbers, but they had a very strong show in most classes. Humbert & White carried off a majority of the ribbons with a very strong herd. Some Chesters in the show had a serious defect, that of being weak on feet. Some were also inclined to drop in the back. Joker, the first-prize aged boar, later made champion, was a very good one, and very near the Poland China type. The hog that stood next to him was a little lighter in the hams. Neponset Boy, winner in the twelve to eighteen months class, was a strong favorite for champion and would have looked all right as champion. The under a year class brought out some good ones. Meddler was sweepstakes boar at Des Moines, being extra good in feet, a lengthy pig, with a well-sprung rib. The Indiana prize pig was good enough to give the judge a hard one. The under six months class brought out fifteen, but they were uneven in size and the judge was at sea on account of their ages, some being too old for their class and had to be thrown out. He finally selected the Loughbridge pig. Second-prize pig was better in head and ear. Mears brought a very fancy youngster, a late pig, that would have stood higher if his feet had been better. In the aged sow class Springfield Fancy carried off the honors. She showed more style and finish than Sweet Marie, an extra good boar, though a trifle heavy in ear. The sows in this class were very strong and would have compared favorably with the same class in any of the breeds. The sow class was as a rule better than the boars, and showed evidence of having produced pigs, and many were bred. The under one year class brought out a nice, even bunch and the winners were not outstanding. They showed lots of quality and breed character. Champion boar went to Joker. It lay between him and Neponset Boy, but the winner had a better-sprung rib and carried his width a little better. In this champion sow class Springfield Fancy carried off the honors. She is a great sow, of deep body, has a good, strong back, good on feet, especially strong back of shoulders. The exhibitors were: Jno. C. Weddle, Franklin, Ind. (14 head); E. L. Mears, Neponset (25 head); W. L. Dodd (2 head); F. D. Humbert & White, Nashua, Iowa (21 head); McCandless Bros., Barclay (16 head); W. A. Hinkle, Decatur (13 head); F. C. Bow, Ava (4 head); Orr Phillips, Hamlet, Ill. (1 head); J. M. & J. F. Stevenson, Adrian (15 head); Gus Yonka, Olney (15 head); J. A. Loughbridge, Delta, Iowa (15 head). Total, 140 head.

AWARDS.

Boar Two Years and Over (6 in class)—First, Humbert & White, on Joker by Combination, dam Idella; second, Weddle, on hog by Duke of Dugar Plain; third, Humbert & White, on hog by Combination.

Boar Eighteen Months and Under Two Years (3 in class)—First, Humbert & White, on Humbert's Choice by Combination, dam Idella; second, Mears, on Prince O. K. by Jerry S., dam Yum Yum; third, Weddle, on Silver Tip by Leader, dam Model Queen.

Boar Twelve Months and Under Eighteen (6 in class)—First, Humbert & White, on Neponset Boy by Nashua Boy; second, Hinkle, on Joe by White Joe 2d; third, Richards & Stevens, on Teddy All Right by Roosevelt, dam Lady Perfection.

Boar Six Months and Under Twelve (10 in class)—First, Humbert & White, on Moddler by Nashua Boy; second, Mears, on Fisher Medium 3d by Fisher Medium, dam Neponset Belle; third, Bow, on The Winner by Logan, dam Belle of Springfield.

Boar Under Six Months (15 in class)—First, Loughbridge, on pig by Victor, dam Delta Belle; second, Humbert & White, on pig by Nashua Boy; third, Mears, on Neponset Choice by Prince O. K., dam Model Grace 4th.

Sow Two Years and Over (4 in class)—First, Mears, on Springfield Fancy by Neponset King, dam Springfield Belle; second, Humbert & White, on Sweet Marie by Combination; third, Yonka, on Bessie by Perfection Chief, dam Miss Nation.

Sow Eighteen Months and Under Two Years (7 in class)—First, Humbert & White, on Idella 2d by Combination, dam Idella; second, Humbert & White, on sow by Nashua Boy; third, Mears, on Fancy Grace by Neponset King, dam Model Grace.

Sow Twelve Months and Under Eighteen (5 in class)—First, Humbert & White, on sow by Nashua Boy; second, Weddle, on Equality by Louis R., dam Modest 2d; third,

Loughbridge, on sow by Iowa Champion, dam Delta Belle.

Sow Six Months and Under Twelve (15 in class)—First, Humbert & White, on sow by Nashua Boy, dam Astrio; second, Weddle, on Azalia by Louis R., dam Milby; third, Humbert & White, on sow by Nashua Boy.

Sow Under Six Months (13 in class)—First, Weddle, on Rosy B. by Old Coln, dam Russell's Choice; second, McCandless, on Miss Lilac by Col. Barclay, dam Lilac; third, Means, on Neponset Lady by Fisher Medium, dam Iowa 2d.

Boar and Three Sows One Year and Over (4 in class)—First, Humbert & White, herd headed by Neponset Boy, sows Idella 2d, Iowa Star and sow by Nashua Boy; second, Humbert & White, herd headed by Joker, sows, Sweet Marie, Beauty and Judge's Choice; third, Mears, herd headed by Prince O. K., sows, Springfield Fancy, Fancy Grace and Pride of Maple Grove.

Boar and Three Sows One Year and Over Bred by Exhibitor—Same as above.

Boar and Three Sows Under One Year (3 in class)—First, Humbert & White, on herd headed by Moddler; second, Mears, on herd headed by Fisher Medium 3d, sows, Neponset Lola, Neponset Hazel, Neponset Daisy; third, Weddle, on herd headed by Majestic Victor, sows, Azalia, Clarissa and Lady Irene.

Boar and Three Sows Under One Year Bred by Exhibitor—Same as above, except Loughbridge took third.

Four Pigs Under Six Months Produce of Sow (3 in class)—First, Loughbridge, on produce of Lillian; second, McCandless, on produce of Lilac.

Four Swine Get of Same Boar and Bred by Exhibitor (5 in class)—First, Humbert & White, on get of Nashua Boy; second, Humbert & White, on get of Combination; third, Mears, on get of Billy A.

Champion Boar—Humbert & White, on Joker.

Champion Sow—Springfield Fancy.

CHESTER WHITE SPECIALS OFFERED BY AMERICAN CHESTER WHITE RECORD ASSOCIATION.

Boar Under Six Months—Humbert & White.

Sow Under Six Months—McCandless.

Five Pigs Under Six Months—McCandless.

Pair of Pigs Under One Year—Humbert & White.

Boar and Three Sows Any Age—Humbert & White.

THE DES MOINES DAILY NEWS

AGAIN MAKES AN EXCEPTIONAL

OFFER OF 25c FOR THREE

MONTHS TO TRIAL

SUBSCRIBERS.

The News is the only paper published at the Capital City that is not controlled by party politics. All the news is published in a condensed and readable form in an independent and fearless manner. If you would know the facts about all state and national questions, just as they are, you will enjoy reading The News.

Daily market reports, farm news, household hints, sporting gossip, and everything that goes to make a complete metropolitan paper are regular features.

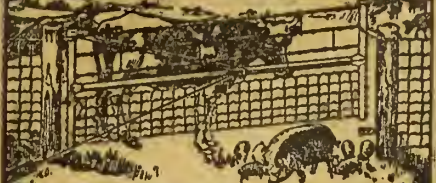

Every reading person in Iowa now has an opportunity to see just how good The News is by sending 25c to the Des Moines Daily News, Des Moines, Iowa, for a three months' trial subscription. The paper will be stopped promptly at the end of the three months unless you decide to renew.

We suppose the article by The Litchfield Manufacturing Company on page 5 is not intended for fools but for wise men.

The Homestead and The Homemaker \$1.25 per year.

The Iowa Gate

- FOR THE FARM -

By sliding this ring back the largest hogs may pass under

AND have the run of two lots. Or raise your gate to drive hogs in or out, then your larger stock cannot get out while you are busy. The IOWA gate works fine this way. Raising the Gate by the sliding ring is simple enough but very handy when your gate swings on uneven ground or when the outer end drags. Rolled Steel Tubing is used in the frame instead of iron or gas pipe. This makes a frame that will not bend and is guaranteed to stand any farm use.

IOWA gates will raise up for winter use—are not bothered by wind, rot, or fire. Are light and easy for women to handle but strong enough for any stock.

Cheaper Than Wooden Gates and will outlast a dozen. Write today for our circular.

IOWA GATE CO. Ninth Street
CEDAR FALLS, IOWA.

BOWSER

(Sold with or without elevator)
CRUSH ear corn (with or without shucks) and GRIND all kinds of small grain. Use Conical Shape Grinders. Different from all others.

LIGHTEST RUNNING.

Handy to Operate. 7 Sizes—2 to 25 h. p. One size for wind-wheel use.

Also make Sweep Grinders; both Geared and Plain.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

WILL—DESCENT IN IOWA.

A Subscriber, Delta, Iowa.—A man drew a note stating that at his death he promised to pay all he is worth, both real and personal, and all to which he will be entitled as an heir, to his wife. He died leaving his wife surviving him. They had no children. (1) Is the note good as a will? (2) Who is entitled to his estate?

Answer.—(1) It is not. A valid will must be attested by two witnesses. (2) His widow is entitled to one-half of it; the other half goes to his parents.

WIDE WAGON TIRE—NEW LAW.

Mr. Geo. A. Pister, Decorah, Iowa.—Is there a law in Iowa allowing a farmer who uses a wide wagon tire \$5 credit on his road tax, and \$2 for using springs on his wagon?

Answer.—A law passed by the last legislature provides that all persons who shall in good faith use wagons on the public roads of the state with tires not less than three inches wide for loads exceeding 800 pounds, shall for the year ending July 1, 1907, and every year thereafter, receive a rebate of one-fourth of their road taxes, not to exceed \$5.00 to any one person in a year. The rebate is paid by the township trustees, upon the presentation of an affidavit stating the facts. There is no law providing for a rebate for the use of springs on a wagon.

WAGON TIRES—ROAD TAX.

Mr. John A. Shultz, Fruitland, Iowa.—Is there a law in Iowa which provides that a person who uses a three-inch wagon tire shall be partially exempt from the payment of road taxes?

Answer.—There is such a law passed by the 31st General Assembly. It provides that all persons who shall in good faith use wagons on the roads, with tires not less than three inches for loads exceeding 800 pounds, shall for the year ending July 1, 1907, and each year thereafter, receive a rebate of one-fourth of their highway taxes, not to exceed \$5 to any one person in a year. The rebate is paid by the township trustees upon the person making an affidavit that he has used a wagon with such tires.

HOLIDAYS—LABOR.

Jack, Wall Lake, Iowa.—I am a hired man, working for wages. When I was employed, there was nothing said about holidays. On the Fourth of July I quit work—left the place in the morning before chores were done, to attend a celebration, and did not return until the night of the 5th of July. I expect to lose my wages for the 5th, but I want my wages for the 4th of July, and my boss refuses to pay for that day. Can I compel him to do so?

Answer.—You can not. The law relating to the Fourth of July and other holidays, applies only to the presentation for payment or acceptance of commercial paper, such as promissory notes, bills, drafts, checks, etc., and the protesting thereof, and to legal proceedings in court, and out of it, but the law has nothing whatever to do with contracts between employer and employee. If a hired man wants his holidays off, he must have that agreed to in the contract.

HUSBAND AND WIFE—NO CHILDREN.

Mrs. Anna Jones, Marshall, Mo.—A married man died leaving a widow, but no children. He owned at the time of his death 240 acres of land in Missouri, and had considerable personal property, consisting in part of live stock on the farm. Under the laws of Missouri what portion of the land, stock and other personal property will the widow get? The estate does not owe any debts.

Answer.—The widow is entitled to have set apart to her what is called the widow's allowance, which is as follows: Family Bible and other books to the value of \$200. Wearing apparel, wheels, looms and other implements of industry, yarns, cloth and clothing made up for use. Provisions necessary for one year. Household and kitchen furniture to the amount of \$500, and other personal property to be chosen by her to the amount of \$400. After this is set apart for her, she is further entitled to: First, all the real and personal property which came to the husband in right of the marriage, and to all the personal property of the husband which came to his possession with the written assent of the wife remaining undisposed of absolutely, not subject to the payment of the husband's debts. Second, to one-half of the real and personal estate belonging to the hus-

EUREKA Harness Oil

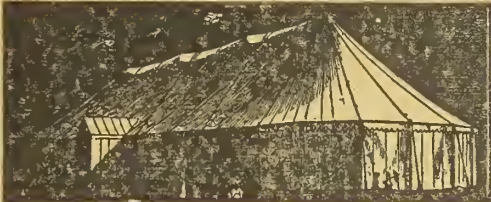

Keeps the Harness Soft and Strong

For preserving the strength and increasing the life of harness
Eureka Harness Oil has no equal. Superior to other brands because free from acid and will not become rancid. Penetrates the leather and makes it weather-proof, sweat-proof, soft, strong and durable. Makes old harness look like new. Prevents rot. Gives a glossy black finish.

Boston Coach Axle Oil makes easy running wheels. Reduces friction to an absolute minimum. Better and more economical than castor oil. Will not gum or corrode. For use on carriages, cabs, buggies.

Sold everywhere.

ECLIPSE HAY PRESS CO.

621 W. 7th St. Kansas City, Mo.

band at the time of his death absolutely, subject to the payment of his debts.

ROAD TAX—BANKRUPTCY.

A Subscriber, Leon, Iowa.—(1) Is it legal for a man to work or pay his road tax (poll tax) in a county other than that in which he resides? (2) State the necessary steps for one to take in going into voluntary bankruptcy, and about what it would cost.

Answer.—(1) It is not. He could be compelled to either work it out or pay it again in the county where he lives. (2) A wage earner, or a person engaged chiefly in farming or the tillage of the soil, cannot become a voluntary bankrupt under the bankruptcy law of 1898. Any other person may go into voluntary bankruptcy if he or she owes debts amounting to \$1,000 or over. Such a person must file a petition in the United States District Court in the district where he lives, with a schedule of his property showing the kind and amount thereof; the location thereof; its money value in detail, and a list of his creditors, showing their residences, the amounts due each of them, the consideration thereof, the security held by them if any, and a claim for such exemptions as he may be entitled to all in triplicate, and submit to an examination concerning his business methods, the cause of his bankruptcy, and all matters affecting the settlements of the matter. It is quite complicated and hardly any person could conduct the proceedings without the assistance of a competent lawyer.

"What does 'fool proof' mean?" is the essence of an article on page 5 by the Litchfield Manufacturing Company this week, which we think should interest our readers. This modern Manure Spreader, which is receiving such diligent attention at their hands, certainly ought to interest the majority of our readers and we think is worth reading.

Save \$25.00 On FUEL this Winter

\$25.00 is the wages of one man for 30 days. It is 5 per cent interest on \$500.00 for one year. You can save this amount this winter, and every winter that your home is heated with a Cole's Hot Blast Stove.

The big expense in heating your house is the fuel, not the first cost of the stove.

You are wasting DOLLARS in high priced hard coal through leaky joints and poor radiating surface. You also waste HALF the Gas Heat, the best heating half of soft coal, by imperfect combustion.

Cole's Hot Blast Stove holds fire over night with any kind of fuel, even corn cobs, chips, rocks and waste material. You always have warm rooms in the morning in which to dress the children and eat breakfast without building a new fire. Our Free Booklet on Scientific Combustion explains fully. Send postal for it today. Tells you all about the nature of soft coal, hard coal and other fuel, and why

Cole's Hot Blast Stove

saves all heat and fuel wasted with other stoves.
Cost of Stove More Than Saved
In Fuel Each Winter

Olives cleanliness and even heat day and night with soft coal you never dreamed possible. Uses less hard coal and gives more heat than any base burner. Your home dealer will set one up in your house on our guarantee backed by his guarantee, at \$10 and Up

GUARANTEE

- 1.—We guarantee a saving of one-third in fuel over any lower draft stove of the same size with soft coal or slack.
- 2.—We guarantee Cole's Hot Blast to use less hard coal for heating a given space than any base burner made with the same size fire pot.
- 3.—We guarantee that the rooms can be heated from one to two hours each morning, with the soft coal or hard coal put in the stove the evening before.
- 4.—We guarantee that the stove will hold fire with soft coal thirty-six hours, without attention.
- 5.—We guarantee a uniform heat day and night, with soft coal, hard coal, or lignite.
- 6.—We guarantee every stove to remain absolutely airtight as long as used.
- 7.—We guarantee the feed door to be smoke and dust proof.

Cole's Original Hot Blast was invented after 12 years' continuous experimenting to find a way to save the enormous waste in fuel through the escape of gas and heat up the chimney in the ordinary stove. Our reputation as manufacturers of the Original Successful Hot Blast goes with every stove; and will not be sacrificed by the use of inferior material or cheap workmanship.

Would You Lose \$50 in Fuel to Save \$1.00 on the cost of Your Stove?

That is what you do when you buy a cheaply constructed, putty jointed, showy made stove.

Like all successful inventions Cole's Original Hot Blast has many inferior imitations, a void them. They lack our patented Hot Blast construction, the patented steel collar connection for the elbow casting to stove body, making an everlasting tight joint which cannot open by action of the fiercest heat; the patented compound hinge for ash door, the guaranteed smoke-proof door, which prevents dust, soot or smoke from escaping when fuel is put into the stove, and other patented features which are essential to the success of our stove. Do not let any dealer persuade you to buy anything but Cole's Original Hot Blast. See the name "COLE'S HOT BLAST from Chicago" on the feed door of each stove. None genuine without it.

The best dealer in every town generally has the agency for Cole's Original Hot Blast Stoves. Write us for name of local agent and for FREE BOOKLET on the scientific combustion of fuel, which also tells about Cole's Hot Blast. In towns where there is no agent, mail order purchasers are protected by the above guarantee.

OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

THE FEEDING OF CALVES.

Prof. Hugh Van Pelt, who has recently taken charge of the dairy herd of Iowa Agricultural College, sometime ago contributed an article on the above subject to the Jersey Bulletin. Among other things he said:

For the first two weeks of the calf's life it is fed five pounds of whole milk direct from the cow twice a day. At the end of this time a small amount of skim milk is substituted for a little portion of new milk, until at the end of the next ten days or two weeks the calf is drinking all skim milk and about twelve pounds of it per day. About this time the youngster is beginning to nibble at a small bunch of clover hay that has been placed in a small rack at the corner of his stall to tempt him, and we surmise that he would eat a bit of grain if he had a chance, so we at once begin to provide the grain. As soon as the milk is run through the separator in the morning the foam is roughly taken off and the milk measured out to each calf. To this is added from a teaspoonful to a tablespoonful of blood flour, which readily goes into solution and is drank along with the milk. Now I consider this blood flour one of the greatest feeds in the world for calves for two reasons: First, because it is almost entirely made up of protein and bone phosphate, the two constituents of a food that go to build up the bone and muscle of the animal, and this is what is wanted in feeding calves; second, when blood flour is used regularly there is never a case of scours.

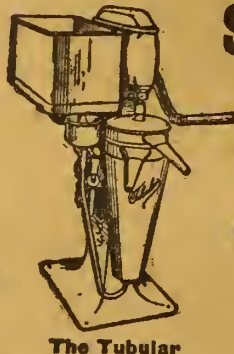

Since last November there have been about forty calves under my care, and I have not in that time seen a case of scours, and I could not have asked that the calves grow better or look finer at this time. Immediately after feeding the milk, grain is placed before the calf in a small box that is always kept sweet and clean. By feeding the grain at this time the calf soon learns to eat instead of sucking others' ears, which practice is very detrimental to proper development of the youngster.

The grain ration is made up of corn (cracked), bran and whole oats in equal proportions by weight. Oil meal is fine to add in limited amounts when not too expensive, but this is not necessary when blood flour is fed, so we have not used it this year.

This same plan of feeding is followed twice each day and good clover hay kept before the calf at all times that he may eat as he chooses. As the calf grows, of course, the grain and skim milk are increased so as to stimulate the best growth, and as the judgment of the feeder directs. When grass comes of course the babies are turned out in the day time in their grass paddocks and kept up at night until the flies get bad, then they have access to a well-ventilated and darkened stall in the day and run through the pasture at night. Their stall is always clean and well bedded and the calf itself kept clean.

The system of calf feeding outlined above approaches the ideal as applied to the feeding of calves on skimmed milk. It is taken for granted in this instance that a separator is at hand and that the milk is fed just as soon as it is skimmed while it still retains the body heat. Those who do not have separators must employ artificial means to heat the skimmed milk. There is always a temp-

A FARMERS' COMMITTEE SAYS TUBULAR IS WORLD'S BEST CREAM SEPARATOR

Low Can
Lightest Bowl
Simplest Bowl
QUICKEST CLEANED

Self Oiling
Ball Bearing
Enclosed Gears
CLEANEST SKIMMER

The Tubular

A community of farmers and dairymen recently united and appointed a committee of six wide awake farmers to thoroughly investigate cream separators and decide which is best.

Why? Simply because they were convinced that cream separators pay, and wanted to know the best before buying. The committee requested all leading separator representatives to meet the committee and show their machines.

Why did they do that? Because the committee wanted to find out positively which separator actually is best. They didn't want to take anybody's word for it, but wanted to see all reliable separators side by side and decide for themselves.

When that committee met, many farmers were present waiting the decision. The committee carefully examined the different separators, and unanimously decided that the Sharple's Tubular Cream Separator is best, excelling all others in fifteen essential points.

The members of the committee backed up their decision by buying for themselves six No. 6 Sharple's Tubular Cream Separators right on the spot—one Tubular for each farmer on the committee.

What did that mean? That this investigation had absolutely satisfied the committee that the Sharple's Tubular is the best cream separator built—the best in every way. If you buy a Sharple's Tubular, you will get the world's best separator.

It is to your advantage to learn all about this committee—its decision—and the world's best separator. Write for our handsome, complete catalog C 121, with leaflet and the committee's sworn statement telling all about it.

THE SHARPLES SEPARATOR CO.,

Chicago, Ill.

tation, however, to feed it cold after the calf is a month or two old, but we believe if there is an ambition to make good calves the labor required and the amount of fuel necessary to heat the milk to a temperature of 90 degrees will be handsomely repaid. Instead of placing the vessel containing the milk directly on the stove, as is generally done for warming purposes, it is much more advisable to place it in a vessel partially filled with water. In that case the milk does not scald and consequently is in much better shape for calves.

CANE FOR DAIRY COWS.

The following communication has been received from one of our subscribers, Mr. J. V. Finley, of Coffey county, Kan.:

I would like to ask the editor of the dairy department if cane fodder has the effect of drying up dairy cows. I sowed some last summer, but have been told since that it has that effect.

Cane is not as rich in milk-making

material as clover hay, indeed it is only about half as rich as timothy hay. Because of this, cows could not be expected to give a very liberal flow of milk if they were furnished cane fodder alone. On the other hand, there is nothing in the theory that cane has the effect of drying up cows, this opinion having gained headway on account of the low percentage of protein, or milk-forming material.

However, we would have no hesitation in advising the use of liberal quantities of cane in the dairy if it is on hand. It is exceedingly palatable and that means that it is more or less easily digested, because palatability is closely associated with digestibility. Where cane is used, however, it should not be fed in connection with much corn when fed to dairy cows, because in that case each food is one-sided in its composition, neither of which contributes very liberally to milk flow. Milk feeds, such as bran or shorts, should be fed in conjunction with cane. Oil meal is still richer in flesh-forming constituents, but it is somewhat high in price and cannot be fed with profit in larger amounts than two or three pounds a day. Ground or soaked oats can be used to excellent advantage in connection with cane fodder, because oats supply the material in which cane is lacking. Any grain that is grown on the farm, aside from corn, may be profitably used for dairy cows in connection with cane.

VARIATIONS IN THE TEST OF SEPARATOR CREAM.

In a bulletin recently published by the Kansas Experiment Station, the above subject is taken up with a considerable degree of thoroughness. According to this bulletin the chief causes of variation and the amount of variation in the butter fat content of cream are as follows:

1. The temperature of milk makes a difference of from one to five per cent in the test of cream at average skimming temperature, greater variation being caused in extreme cases.

2. The amount of flush water used with average skimming temperatures makes a difference of from 1 to 3 per cent, in extreme cases making a difference as great as 10 per cent.

3. The variation in steadiness of the bowl makes a difference of from 2 to 16 per cent, depending on amount of vibration.

4. The variation of the speed of the bowl causes a difference of from 1 to 13 per cent in the test of cream, depending on the variation in speed.

5. The amount of milk allowed to flow through the separator bowl from one-half to full capacity makes a difference of from 1 to 6 per cent, depending

Better than Ever

No matter how you handle your milk,
No matter what separator you may be using,
No matter what separator you may be thinking of buying, for your own convenience sake, and your pocket-book's sake, don't fail to see and examine

The Improved Frictionless EMPIRE Cream Separator

Without doubt or chance of question, it is as far ahead of the old style cream separators as the cream separator itself is ahead of the deep-setting system.

It is the simplest in construction, has the lightest bowl, turns more easily and is more easily cleaned than any other cream separator made.

Its improved bearings make it as nearly absolutely frictionless, as it is possible for a machine of any kind to be built—it almost "runs itself."

Why put up with a machine of the heavy, hard-to-turn type, when you can get the Improved Frictionless EMPIRE?

At any rate why not examine it?

That is all we ask:—You certainly want the best separator you can find; the EMPIRE, always the leader, is now better than ever.

We know, for experience has proven, it is to your advantage to put our claims to the test.

The great present army of Empire users made up their minds that way.

Send for our catalog and our valuable free dairy books. You will be interested in learning how the EMPIRE is made—why it does such good work, and how it will make dollars for you.

EMPIRE CREAM SEPARATOR COMPANY,
Chicago, Illinois,

Bloomfield, N. J.

upon the divergence from full capacity of the machine.

6. The amount of acid in the milk causes an irregular variation in the test of cream, depending upon the amount of acid it contains. Where the acid reaches a high point, .3 to .4 per cent, for instance, and the separator is used continuously for an hour or more, it will eventually clog the same as in the case of cold milk. The cream will then become thicker, until the separator is entirely clogged. The extent of the clogging will depend on the amount of acid in the milk and the size of the machine. The higher the acidity and the smaller the machine the sooner the separator will clog.

Those who are interested in a detailed discussion of this subject should send a request to Director of Experiment Station, Manhattan, Kan., for Bulletin 137. A careful reading of this bulletin may do much to break down suspicions of dishonesty that often exist between creamery patrons and those in charge of the creamery.

Cream Ripening on the Farm.

To the Editor of The Homestead:

As a matter of course, everyone who keeps cows for the purpose of making

good butter is desirous of making an article that will bring the best prices possible, and of making the greatest amount of butter possible out of the milk produced. After milk is delivered to a creamery it is usually manufactured by those who have been well instructed in the art of butter-making, and the result is that, as a rule, a fairly good article is made. Besides this, the creamery is equipped with appliances which enable its butter-maker to obtain very nearly all the butter contained in the milk, and by his knowledge of what the general butter market demands, he is able to produce an article which is readily sold.

But the case is different with those who make butter on farms, where a large percentage of the butter in this country is made. While on many farms excellent work is done and a choice article is made which brings a fancy price, yet, through ignorance of correct methods of management and of the demands of the market, and in many instances through careless and slovenly habits, the great bulk of farm-made butter does not bring the price it should, and that means an enormous loss to farmers.

The utmost cleanliness should be observed in milking and in caring for it afterwards, and the sooner the milk is strained and set in cold water the better. It is evident that if desired to churn the cream at a certain degree of acidity and age, our treatment of the cream must vary according to the system by which it was raised. It stands to reason that cream which has been raised for thirty-six hours in a shallow pan and perhaps not skimmed until the milk was loppered, does not need the same treatment as that taken out of a separator within an hour of milking time. Then again, that raised in ice water needs a modification, just as cream in a separator creamery must be treated differently from that in a gathered cream creamery. A difference must also be made if we churn every day or only every other day, or once a week.

If cream is churned perfectly sweet, it will have a very faint aroma and an insipid taste, and the demand for such butter is very limited; hence the object for ripening is to develop that peculiar aromatic flavor which is characteristic of all fine butter. There is nothing better than a clean, heavily-tinned and smoothly-soldered steel or copper can in which to keep the cream. In this the temperature of the cream may easily be changed by placing the can in a larger one or in a tub with water. The warmer the water the more important it is to stir the cream so as not to overheat part of it. It is safest not to have the water more than 120 or 140 degrees.

When the right temperature is obtained, the can should be placed in a box or barrel large enough to have about six inches of insulating material (hay will do) around the can so that the temperature may be kept from falling much, even if we have to keep the can in a very cold room. When it is desired to cool it, the can is simply placed in a barrel of cold water and kept there, changing the water or adding ice as needed. If churning only twice or three times a week, the object must be to keep the cream as cool as possible up to within twelve or eighteen hours of churning time. The warm separator cream should be cooled before adding it to the previous lot in the can. If shallow-pan cream is used, the cream will be nearly ripe, and, as a rule, will be ready to churn twelve hours after adding the last batch, without raising the temperature. It may be necessary to cool it, so as to secure the right temperature.

Cream of different ages should never be churned together without having been mixed together for at least six, or, what would be better, twelve hours, and it should be well stirred as each batch is added. If cold water or ice deep-setting cream is used, it may be kept in the same cold-water tank until twelve hours before churning, and then the temperature should be raised to sixty or seventy degrees. With separator cream the last batch should be added twenty to twenty-four hours before churning and, as a rule, a little higher temperature should be used, say sixty-five to seventy-five degrees. If we use a "starter," sixty to sixty-five degrees may be enough.

When the cream is ripe, it should have a clean, pleasant acid taste and smell and a smooth, even, sirupy consistency so as to run evenly and smoothly from the stirring paddle and have a peculiar glossy surface.

Howard Co., Neb. Wm. Sorensen.

Do Your Own Thinking

Just because someone tells you that some other Separator is as good as the "IOWA" is no reason why you should believe it. Letting other people do your thinking is too expensive. You cannot afford such luxuries. Investigate for yourself. Use your brains for your own benefit—they were given you for that purpose. If you do this you will discover that there is just one machine which takes out all the cream, and that is the "IOWA." The dairyman is fully entitled to all the profit there is, even to the last cent. He gets it only by using an

PAID FOR ITSELF IN 30 DAYS

"COHOES, N. Y., Sept. 14, 1906.

"About three years ago I was selling my milk at 2 1-2 cents per quart to a creamery, but I thought that I could do better by selling the cream and keeping the skim milk on the farm for feeding pigs and calves. I set the milk in coolers and skimmed with dippers. The best I could do was about 20 quarts of cream per day from 20 cows. I sold the cream for 12 1-2 cents per quart.

I made up my mind to get a No. 6 U. S. Separator and try it.

By keeping an accurate record I found that with the U. S. I was getting about 40 quarts of cream per day from 20 cows, a difference of \$2.50 in favor of the

U. S. CREAM SEPARATOR

making a gain of \$75.00 in 30 days. Then I value the skim milk at 33 1-3 cents per hundred quarts for feeding purposes on the farm, amounting to \$15.00 for 30 days at 150 quarts per day. As the total amount gained by the U. S. paid for it in 30 days, I will say that it is the best investment I ever made.

If those who may read my experience with the U. S. Separator have any questions to ask or want any information other than what I have given, if they will write me, I will answer and do it with pleasure.

R. A. SHUFELT, R. F. D. No. 1."

If you are keeping cows for profit, a United States Separator will help you "do better"—as it has Mr. Shufelt and many thousands of others. He has told you how. Let us tell you why. Mr. Shufelt's experience proves it is at least worth your investigation. A letter, or just a postal card with your address on it, and "Send new illustrated catalogue No. G 81," is sufficient. Will you write us?

VERMONT FARM MACHINE CO.

Bellows Falls, Vermont.

Eighteen distributing warehouses centrally located in the United States and Canada. 449

National Cream Separator

\$9.90

That's what it will save you each month of its use with only six cows. One cent for a postal to us will bring you at once our FREE TRIAL proposition.

You can try the National before you buy. What other Separator Co. makes such an offer? It is our selling plan, one which has proven so successful and so greatly increased our sales that we know the National is the separator that farmers want if they can have a chance to give it a trial.

The old way was to buy and then try, but we like our new plan best and so do our customers—not because it is necessary to try the National first, but because we know it is all we claim for it—does the work perfectly and saves its users so much time and money, that we say to you—"Take it and try it; if you like it, pay for it; if you don't like it, ship it back, Trial will cost you nothing."

Would we dare?—Would we be so willing and eager to make such a proposition if we did not know the National Cream Separator to be absolutely the best, or could we afford to if we thought our machine was only fairly good? No, we could not run the risk if one in ten came back—as a matter of fact, not one in 500 is returned.

If you only have four cows, you need a National Cream Separator—it will pay for itself in a short time—if you have more cows you need it even more.

You need one this fall more than you did last spring because cream is worth more money. You need all the cream there is in your milk and the National Cream Separator will get it all, and quickly, too.

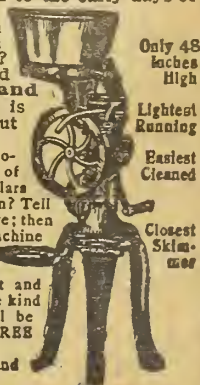

You may have all other kinds of labor-saving farm machines, but your equipment is not complete without a National Cream Separator.

Would you go back to the early days of Hand Hoe, Scythe, Cradle and Flail? Then why be behind times in the care of your milk? Those old-fashioned tools were slow—hand skimming of milk is not only slow but wasteful.

Why don't you write us today—now, while you think of it, and ask for full particulars of our "free trial" plan? Tell us how many cows you have; then we can tell what size machine your work requires.

Our catalogue and Dairy Guide is the handsomest and most complete book of the kind ever published. We will be glad to send you a copy FREE if you will only ask for it. Address: either office and mention Catalogue 98.

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

DIFFICULTIES ABOUT HANDLING TURKEYS.

It is little wonder that turkeys are high in price when Thanksgiving time comes around. They run the gauntlet of so many woes that only an exceedingly small percentage of the poults hatched out ever reach the Thanksgiving dinner table.

But we have in mind at this time that semi-wild characteristic which is evidenced by the tendency on the part of old turkeys to stray away with their brood. We have no hesitation in saying that rural justices have had to deal with turkey cases more frequently than with any other subject. It comes about in this way: One neighbor loses a flock of turkeys. Weeks go by without any knowledge of their whereabouts. Some time during the fall it is learned that a distant neighbor, possibly miles away, has had a sudden addition to his flock of turkeys. You look the matter up and find such to be the case, but as your turkeys and his are the same color, how are you to separate the flocks? He may have fed them several weeks, and if such is the case, on what basis should the settlement be made?

Recently we had our attention called to a case where two old turkeys and twenty young ones strayed away. Two months later they were traced to the farm of another turkey raiser and were there found mixed with his flock. The original owner offered to give half the younger ones in payment for the trouble caused his neighbor, but this proposition was not accepted by the one who had boarded the turkeys. It was afterwards settled by the original breeder taking so much per head for the young turkeys, he being allowed to come into possession of the old ones.

In this instance the man who boarded the turkeys got the best of the proposition. He certainly was entitled to some remuneration for his trouble in caring for and feeding the turkeys, but was unreasonable when he refused to accept half of the young flock. Our opinion is that the man who lost the turkeys should have been willing to make a small cash payment for the board of his flock and been allowed to take all, providing it could be determined how many belonged to him.

On a question of this kind neighbors should be neighborly. You may be the fortunate one this year in having an addition made to your flock from your neighbor's, but next year the tables may be turned and you may be the unlucky one. We are glad to know that in the great majority of cases neighbors do not quibble on a matter of this kind, but return the young flock without asking any remuneration whatever. The ordinary rules that apply to trespassing live stock are hardly applicable in the case of turkeys, for the reason that it is sometimes almost impossible to identify or drive away from the premises the turkey intruders. In these days of telephones, however, it should not be a difficult matter under ordinary circumstances for the original owner to come into possession of his own very shortly after they have strayed away.

CORN AND MOLTING HENS.

The general opinion is that corn is not a good feed for molting hens, and yet some of our best poultrymen have been unable to establish the assumption. When molting is delayed until the nights are cool and possibly the days, it is well to have corn a part of the ration. Where molting has been delayed on farms it is safe to say that hens will get a good deal of corn and we have considered it a matter of doubt whether the kind of grain has much to do with the business, so long as the ration is properly balanced with oil meal, bran and meat. Oil meal should be a part of the ration the whole year round, but it will be found especially valuable at molting time. By the adoption of a mixed ration it will be safe to feed corn at molting time.

CULL THE FLOCK.

Culling is something that pays always. It pays almost any time of the year, but more especially just before poultry is to go into its winter quarters. It would

Chicago Telephone Supply Co., 149 Beardsley Ave., Elkhart, Ind.

be better to keep fifty good hens and pullets than to keep one hundred and fifty passably fair ones. The expense of feeding would be less and the egg production proportionately greater.

One should cull so as to have only the best. No better time can be found than now to select the ones to be kept and others should be fed and pushed for the market. Strike a good market with some good stuff and it will be better than keeping a lot of fowls that will be losing one money all the time. Good flocks are maintained by a good system of culling as well as by a good system of breeding. Keeping only the best leaves one better each time and finally there will be fewer culls. At each culling, the flock will show up better.

Cancerol, a Home Treatment for Cancer.

VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

GOVERNMENT HOG CHOLERA RECIPE.

There is a great deal of hog cholera in this part of the country and if you will kindly give me, through the columns of your paper, the government recipe for preventing hog cholera I will be much obliged.

The formula asked for is as follows: Powdered wood charcoal, one pound; sulphur, two pounds; sodium chlorid, (salt) two pounds; sodium bicarbonate, two pounds; sodium sulphite, two pounds; sodium sulphate, one pound; antimony sulphid, one pound. Mix together and give a tablespoonful for each 200 pounds live weight once or twice a day in slop.

SICK CHICKEN.

When any dog, cow or chicken gets poisoned from strychnin, through how many animals does this poison have fatal effect by eating the poisoned beast or poultry? Three months ago I poisoned gophers and my chickens strayed one-quarter mile away from home and I suppose found a poisoned gopher or mouse and since then they have been dying at times every week, caused by eating the dead chicken that died in the weeds. I bury all that I find dead. I buried six this morning. These chickens when sick go blind and cannot raise their heads up and will live from two to twenty-four hours before they die. Others get weak in the back and walk with legs wide apart. If they are not poisoned what is the nature of the disease and remedy for it?

We see nothing to corroborate your

fancy that the chickens have taken strychnin poison in any way. The disease would appear to be "roup." Burn dead chickens. Clean up, disinfect and whitewash the poultry house and see that the sunlight finds entrance to keep it perfectly dry. Mix five drops of pure carbolic acid in an ounce of camphorated oil and inject a little into the nostrils of affected chicken once daily by means of small oil can. A dead chicken should be opened for examination. If you do so we will be glad to have a description of any abnormal conditions detected.

SORE EYE.

I have a colt that got a hull or piece of chaff in its eye three weeks ago. The eye is inflamed and watery and there is also a white scum over it. It appears to be on center of eye ball. I wish to know what to do for it.

Foreign body must be removed by rendering the eye insensitive by dropping between lids a little of a 5 per cent solution of cocaine until the finger can be rubbed upon eyeball without animal flinching. Lids may then be turned back and chaff got at and removed. A strip of blotting paper run in under the haw will serve to remove anything under it. After removal of chaff simply keep a cold wet compress upon eye for a few days. It is much more likely, however, that the colt is afflicted with periodic ophthalmia regarding which many answers have been given of late in this department. See back numbers of the paper.

SICK STEER.

We had a load of two-year-old steers on feed last winter. They all took on flesh very rapidly until the 1st of January, when one of them showed signs of unthriftiness. He would not come to the feed trough unless driven, lost flesh, and coat was staring. He was somewhat stiff and would lie down almost continually. He was taken out of the feed lot and placed with stockers to be carried over. He moped around and seemed listless until new grass came, when for a few weeks he seemed to pick up. About two months ago we noticed a small swelling just back of the left fore shoulder. It has continued to swell and spread until now it reaches half way to the flank and well around under the brisket. The swelling is perfectly hard, with no apparent signs of pus. He is very thin, but has a good appetite. Can you tell me what is the matter and if anything can be done?

The probability is that the steer is tuberculous although the tumor may be due to a foreign body or to actinomycosis. Under the circumstances we would not consider it worth while to fuss with the case and steer should either be tested with tuberculin or slaughtered under veterinary inspection.

LEUCORRHEA.

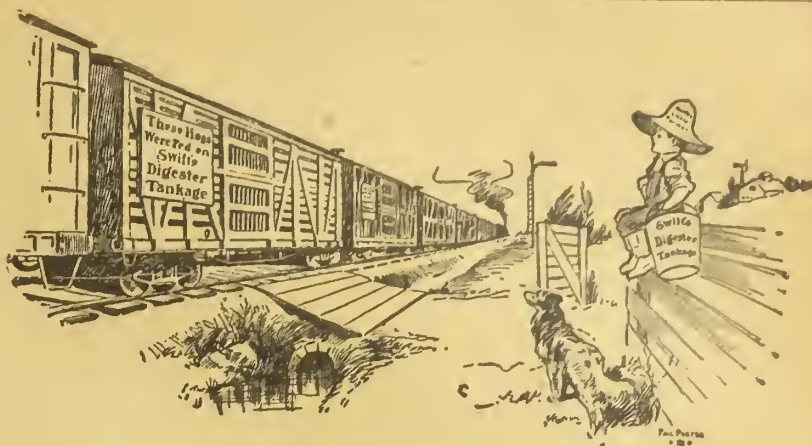

(1) I have some cows that do not get with calf. Some of them eject from the vagina a white substance and some viscid, colorless substances. What should I do for them? (2) What is good to keep proud flesh out of a wire cut on colt five months old?

(1) Once a week inject yeast mixture until the discharge ceases; then open mouth of womb when cow next comes in heat, use the yeast mixture again and have her served when period of heat is about past. The mixture is made by making a paste of a cake of compressed yeast with a little warm water; allowing it to stand in warm room for twelve hours, then stirring in a pint of luke warm freshly boiled water and allowing to stand as before when it will be ready for use and need only be injected into vagina after cleansing that passage by syringing with warm water. Any large syringe will suffice for the work. (2) Keep colt from biting part. So-called "proud flesh" is encouraged by much washing and rubbing of the wound. Simply wet the wound several times daily with a lotion composed of half an ounce of chlorid of zinc; one dram of hydrochloric acid and two ounces of sulphate of zinc in a pint of water. Label the bottle "poison."

EYE DISEASE OF SHEEP.

I have a flock of sheep which have sore eyes. The trouble first appeared about eighteen days ago. One (a ram) appeared to have a film over one eye. In a few days the other eye was affected and in about four days he was totally blind. One eye seems to be getting better, but the other I think is blind. Four or five in the same flock are now in various stages of the trouble. It does not appear to give them much pain or inconvenience, except that they can see but very little or any, depending on the stage of the disease. I have another flock that is all right so far. The diseased sheep are not running about hay or straw and have no chance to get any foreign matter in their eyes that I know of.

The disease is in nature practically the same as that afflicting cattle and so often spoken of here under head of "contagious ophthalmia." Separate the well from affected sheep. Sponge eyes of well sheep several times a week with a 2 per cent solution of boracic acid and daily should any signs of the disease appear. Treat sheep now affected by puffing a little of a mixture of equal parts finely powdered calomel and boracic acid

They ship well

Hogs weak in Bone and Muscle cannot reach market in good condition. They find slow sale. Hogs fed entirely on corn are usually poor shippers. Not so, hogs fed on Swift's Digester Tankage.

Swift's Digester Tankage

Arrive in Prime Condition

Hogs fed Swift's Digester Tankage (Protein 60%, Phosphates 6%) have dense hard bone and firm muscle which enables them to stand a long haul to market and arrive in prime condition. Write for literature, prices and a sample.

LIFELONG CURES BY A TRUE SPECIALIST

J. BOYD, M. D.

Dr. Boyd's Pelvic methods are your greatest hope for a complete cure, if you are afflicted with either BLOOD POISON, SKIN DISEASES, SORES, ULCERS, STRICTURE, VARICOCELE, HYDROCELE, NERVOUS DECLINE, PILES, FISTULA or any affection of the Kidneys, Bladder and Prostate. You are wasting money and endangering your health in treating with ordinary specialists. My systems of treatment have established their reliability by permanently curing cases that had been unsuccessfully treated by dozens of other physicians.

A SAFE CURE is what I will give you beyond doubt if your case is curable; if not, I will not accept your money and promise to do anything for you. The best reference I could give as to professional reliability is the many cured, satisfied patients I classify, and proves that my Pelvic Methods cure when others fail to even benefit.

Guarantee to Refund Money—No Chance to Lose if You Do Not Get Value Received.—My patients receive a written agreement that I shall return what they pay me for services if they do not receive a complete, permanent and satisfactory cure, and my guarantees are secured by a deposit of \$500 in the Century Savings Bank of Des Moines, Iowa. Consultation Free, Confidential and Invited, both at my office and by correspondence. My charges are reasonable, and I make terms that enable my patients to conveniently pay me. Do not treat elsewhere until you have investigated my methods and terms. Office hours during week, 9 a. m. to 8 p. m. Sundays, 10 to 1. Address or call on

J. BOYD, M. D., 505 Locust Street, Marquardt Block, Corner Fifth and Locust Streets, DES MOINES, IOWA

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

FAT AND PARTIALLY FAT SHEEP.

It is altogether probable that many stock men will feed sheep this fall for the first time, and they may not be acquainted with all the conditions leading to the best and most promising situation in feeding lines. The first thing to determine will be what to buy. Will it be thin sheep, or those that carry more flesh? Thin sheep will gain more than fat ones, the general thrift of the two classes being equal. Thin ewes will gain from one-fourth to one-third more than those in good flesh, and this probably explains why the thin, good-mouthed ewes are sought more than those in a better condition. It is a well-known fact among sheep feeders that females finish much more quickly than males, although thin two or three-year-old wethers will make rapid gains.

We have said that thin sheep will take on flesh faster than the sheep that is in good order, and we may say that it will require more time to finish them than those that are partially fat. Young lambs usually require more time to finish than older sheep, because they grow considerably under fattening conditions before they begin to finish. Old western sheep are harder than lambs, and this will hold true in the field as well as in the feed lot. Older sheep are not nearly so liable to gorge themselves on green feed or so liable to over-eat while in the feed lot.

The feeder should make up his mind that when he is feeding thin sheep it will be necessary to feed them a long time. If sheep are to be fed only a short time, they should be partially fat when purchased. Thin ewes can be started by turning them in corn fields, grazing them on good pasture and by feeding fodder.

MISSOURI SHEEP BREEDERS' ASSOCIATION.

In response to a call for a meeting of the sheep breeders of the state to effect an organization, a meeting was held in the live stock pavilion at the fair grounds of Sedalia, Mo., during the fair, which was attended by prominent sheep breeders from many parts of the state. After a full discussion of the possible benefits of organization a motion was unanimously adopted to form the Missouri Sheep Breeders' Association and the following named officers were elected, all for one year, except secretary-treasurer, who was chosen for two years: President, Arch T. Grimes, Greenwood; vice-president, J. W. Boles, Auxvasse; secretary-treasurer, M. V. Carroll, Sedalia; directors: W. W. Waltaire, Raymore; S. C. Haseltine, Springfield; H. R. Brasfield, Unionville; John A. Rankin, Tarkio; W. F. Cooper, Windsor, and L. V. Henser, Deerfield.

The by-laws adopted provide a membership fee of \$1 per year and the officers were instructed to make energetic effort to enlist the active support of the sheep breeders throughout the state and to have the association represented at the annual meeting of the Improved Live Stock Breeders' Association at Columbia in January.

Chandler Bros., of Kellerton, Iowa, and Lewis Bros., of Camp Point, Ill., attended the meeting and were elected honorary members of the association.

DOCTOR CURED OF ECZEMA.

Maryland Physician Cures Himself—Dr. Fisher Says: "Cuticura Remedies Possess True Merit."

"My face was afflicted with eczema in the year 1897. I used the Cuticura Remedies, and was entirely cured. I am a practicing physician, and very often prescribe Cuticura Resolvent and Cuticura Soap in cases of eczema, and they have cured where other formulas have failed. I am not in the habit of endorsing patent medicines, but when I find remedies possessing true merit, such as the Cuticura Remedies do, I am broad-minded enough to proclaim their virtues to the world. I have been practicing medicine for sixteen years, and must say I find your Remedies A No. 1. You are at liberty to publish this letter. G. M. Fisher, M. D., Big Pool, Md., May 24, 1905."

The Reason You Don't Have To Paint Amatite ROOFING

It's all in the top surface. We could show you better if you had a sample in your hands. But the enlarged diagram of Amate shows it pretty well. The mineral surface you see there takes the place of paint and coating. It makes that extra expense unnecessary. It saves both time and money.

Lay Amate and that is the end of your roofing troubles. When you lay the ordinary kinds, your

AMATITE
PITCH COMPOSITION
WOOL FELT
PITCH COMPOSITION
WOOL FELT

ENLARGED SECTIONAL DIAGRAM

roofing troubles begin. You have to paint or coat them every year or so. Their expense soon amounts to as much as the original cost of such roofings.

Amate costs less than the other kinds to buy, and it costs nothing whatever to maintain. Amate is the kind of roofing you want. The kind that is naturally waterproof. Amate does not have to hide under a coat of paint in order to give good service. It is made to take the brunt of any kind of weather under any kind of conditions.

Send for a Sample and examine the mineral surface for yourself. You will see at once that it is the only kind worth having. We will send a Sample free on request. Address nearest office of

BARRETT MANUFACTURING CO., Amate Dept.

B

A Knox Big Grinder

Will Make \$6.00 a Day for You

THERE'S nothing like it for a neighborhood feed grinding proposition.

You know lots and lots of your neighbors grind their feed—rather they take it to the custom mill and have it ground.

If you have a fast grinding mill like the Big Knox you can get nearly all that trade that passes your place.

No trick at all to get it if you go after it, and can take care of it. They pay the town miller 3c to 5c a bushel. You might as well have that.

Mr. B. C. Bennett, Ashawa, Iowa, writes: "I can grind 50 bushels shelled corn per hour with my Knox Big Grinder. Made \$6.00 in 5 hours grinding for my neighbors."

You or anybody else can grind your 50 bushels an hour—easily.

Just figure a little. Suppose you charge the lowest price, 3c a bushel. That's \$1.50 an hour. Grind 4 hours, and you've made your \$6.00.

The neighbors will easily keep you busy that much of the time. And the four hours don't break into your day so very badly either.

Western Harness and Supply Co., Box 53, Waterloo, Iowa.

Make Your Own Stock And Poultry Foods

AT ONE CENT A POUND.

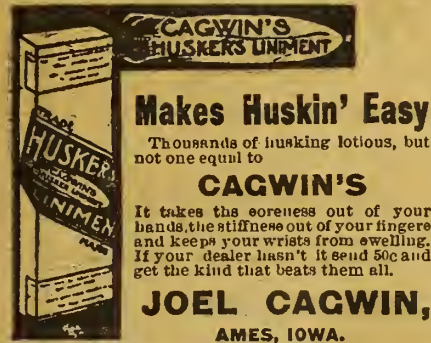

A Subject of Interest to All Feeders.

EXPERIMENT Station Bulletins are unanimous in their claims, based on many careful tests, that a good tonic or Stock Food is both profitable and positively necessary to the feeders of today, but the great objection is "they cost too much." "Should be bought for about one-half of the usual price," Farmer's Bulletin 73 and 144, Dept. Agt., Washington, D. C., show how Stock Foods are usually made, using about 90 per cent cheap "filler."

You have a good "filler" of your own. We give you here a formula proven and guaranteed as **The Best Stock Food Ever Known.**

Formula:
50 lbs. Common Bran, Chop or Meal.
5 lbs. Common Salt. Mix and add a 50 cent package of Arabian Stock Food Tablets. Costs you only 50 cents for 50 lbs.

Arabian Stock Food Tablets are made from the seeds of wild flowers—the most reliable remedies known to medical science—reduced to extract form for economy. Send 50c to The Be-Saw Chemical Co., 835 Schofield Bldg., Cleveland, O., for Trial Order (sent prepaid and guaranteed) including a Co-operative Advertising Certificate good for a free order and other premiums in return for recommending the Tablets, if you like them.

WANTED A COMPETENT MARRIED MAN to work on a stock farm, must be a practical hog raiser and good all around man. Address, T. S. Cartwright, Marshalltown, Iowa.

When writing to advertisers please mention this paper.

DAY BY DAY

Agricola

The weather turned suddenly cold, and overcoats became common. It is fine on the late corn, of which we had a couple of acres.

It will turn out with the April planted, and be just as sound. Corn, we are told, has dropped in price to thirty cents. We shall have none to sell at that price.

The land cost us upwards of \$100 an acre and we would like to make interest on the investment and pay for the labor of growing and harvesting it.

This can be done easily by feeding it to our own stock. Hardly a day passes but that cattle and hogs are shipped from the nearby depot.

Well-ripened corn would hardly heat to hurt as cool as it is. We will gather slowly for a while yet.

Now is the time to lay down and cover with dirt the tender grapes, such as the Agawam, and varieties from California. We have them and find that it pays to be careful with them.

The old saying holds good; that is, if we "take care of the little things, the big things will take care of themselves." Experience proves the saying true.

A good way to keep fowls at home is to feed them generously. None of us like to be overrun by our neighbors' poultry. We do not, at any rate.

It would require the patience of a Job to have a neighbor's chickens foraging at our kitchen door. We think Job himself would have kicked up a row had his "comforters" infested his dooryard with their Plymouth Rocks.

The madam says that the apples which have been gathered are taking the rot. Bad luck to the rot!

These frosty nights are hard on the pumpkins. We shall gather ours and cover them with straw and fodder. Also we will fill two or three boxes in the barn.

The madam boils pumpkin and feeds it to the fowls. It is surprising how much half a hundred hens will make away with. It keeps them thrifty and she says it helps them to molt. This is the time of the year when the bid-dies are attending to that chore.

It is a good idea to have our coal in the coalhouse early and thus give it a chance to dry out. Coal just dug won't burn very well. Agricola is laying in for winter both wood and coal.

In winter we are very anxious to have a quick fire.

Talk about the "golden tints of autumn." It is all bosh. Around us the trees are shedding green leaves, apples, elms, cherry, and mulberry. All seem to be of the same notion; all are shedding green leaves.

The poets have lots to do in such things. They would make nature a fright, did they have their way.

October 12th. The weather is warming, and the change is welcome. Corn which was planted in April is in good shape to gather. We did shuck a load yesterday. By scattering it carefully over the surface of the crib it will keep well. This method we have followed for years.

As we husk we select the extra good ears and hang them up for seed. The Hoosier's wife who advised her husband that while he was buying land "to git a plenty," was a good adviser. This advice would be appropriate in saving seed corn.

A neighbor of ours last year planted his fields twice because of faulty seed. He must have felt cheap while at it the second time. He had forty acres to replant.

While we have been having frosty weather in Iowa they have been having heavy snows in New York and Ohio.

Lots of public functions go on in the autumn besides politics. The women are

Genuine 1900 Washer Now \$5.50

10¹/₂ Cents a Week for 1 Year or 46 Cents a Mo. for 12 Mos.

Guaranteed 4 Years

YOU can now—for the first time—get a genuine 1900 Washer for only \$5.50. This is less than is asked by any other reputable concern for any kind of a washing machine. This low price is now made possible by my new manufacturing process. Other washing machines are only imitations of mine. My 1900 Washers are the original—the only genuine washers. All others are imitations. They can't be anything else, because the "1900" was not merely the first, but for years was the only washer of standing made. I sell more washers than all the other concerns put together. Half of every dozen up-to-date families in this country own a 1900 Washer. With spring motor power and oscillating rotary action, working on roller bearings, my "1900 Home" Washer runs easier and gives better satisfaction than washers made by any other concern. My washers force twice as much water through the clothes—do the work twice as fast—do twice as much work—and in just half the time it takes to wash with other washers. My 1900 Home Washer washes cleaner, better, and with less soap, than any other washer costing anything like this price—which is only \$5.50. I guarantee every part for 4 years. My 1900 Home Washer will not injure the finest lace, and it will wash the heaviest blankets, rugs and carpets. It positively does not wear out your clothes; which alone enables it to save you its cost in a few months. Washing made quick, clean, easy.

MY WEEKLY PAYMENT OFFER

Get this out and mail it to me. Or—on a post card or in a letter, say "Send me Your New 1900 Washer Offer" and you will receive by return mail, FREE, the most liberal washing machine offer you ever heard of or read about. I'll ship my washer to any responsible party on their request, without a penny of cash, and let you pay me for it—so much a week or so much a month—until the washer is paid for. Pay me out of what it saves for you, by doing your washing quicker and easier than any other washer and saving wear and tear on your clothes. Write me now. R. F. Fisher, Manager

1900 WASHER CO. 124 Henry St. BINGHAMTON, N.Y.

having a big one here now. Missouri and Iowa women.

The Graham Short-horn Sale.

The sale of Mr. J. H. Graham, at Spencer, Iowa, on October 11th, brought out a good crowd of breeders and farmers, and the entire offering was disposed of at an average of \$90. There were a lot of good cattle in this sale, and they were presented in nice condition. The top price was \$150 for the two-year-old bull, Scotchman of Meadowdale, and he was purchased by Messrs. Baker Bros., of Britt, Iowa. There never has been a more uniform lot of cattle sold in northern Iowa, and those who attended the sale were well pleased with the character of the cattle sold. Col. F. M. Woods never worked more faithfully than he did in this sale, and he exerted every effort to get the worth of the cattle. Below is a list of those selling for \$100 and over:

COWS.	
Pansy, three years, F. H. Black, Spencer, Iowa.....	\$135
Dora, four years, B. F. Felt, Spencer, Ia.....	135

The Podendorf Sale.

On October 12th Mr. A. J. Podendorf, of Logan, Iowa, sold Poland Chinas at Council Bluffs and a good attendance of breeders were in evidence. Mr. Harvey Johnson sold a yearling boar in the sale which went to Mr. Frank Kauf, Winside, Neb., at \$77. The sale was not characterized by any high prices, yet an average of \$28.51 was made on thirty-six head. A great many sales have been pulled off at this point, and the local buyers had already been supplied. Below is a list of those selling for \$25 and over:

No.	Price.
1 Sow (substitute), Frank Kauf, Winside, Neb.....	\$ 40
2 Sow, A. Nickol, Jr., Bradshaw, Neb.....	55

Erschen's Duroc Sale.

The excellent weather for corn shucking and the Grundy County Fair kept many breeders and farmers from attending the sale of Mr. Frank M. Erschen, of Odell, Ill., which was held on Thursday, October 11th. Those present, however, secured good stock at prices which will permit them to realize good profits. Mr. Fred Schweizer, of Elwood, Ill., topped the sale, securing an extra good sow at \$40. Mr. J. G. Norton, of Elwood, secured a nice gilt at \$36. Mr. C. R. Souers, of Piper City, Ill., also secured a nice gilt at \$36.50 and was a liberal bidder throughout the sale, as were the gentlemen mentioned above. Colonels Reppert and Kell conducted the selling in a satisfactory man-

"Saved 20 Times Its Cost"

"I am writing this," says E. C. Parmelee, Highlands, N. J., "by the light of one of your Angle Lamps. In fact, I would not think of using any other light. They are THE lamps. Every one who has seen mine is impressed with them. Why, I have saved at least 20 times their cost in oil, burners, chimneys, and 'cuss words.'"

The Angle Lamp is not an improvement on the old-style lamp, but an entirely new principle of oil lighting which has made common kerosene (or coal oil) the most satisfactory of all lighting methods. Safer and more reliable than gasoline or acetylene, yet as convenient to operate as gas or electricity.

THE ANGLE LAMP

is lighted and extinguished like gas. May be turned high or low without odor. No smoke, no danger. Filled while lighted and without moving. Requires filling but once or twice a week. It floods a room with its beautiful, soft, mellow light that has no equal. WRITE FOR OUR CATALOG \$3 and our proposition for a

The Broughton & Green Sale.

The Hereford sale of Messrs. Broughton & Green, of Lake View and Early, Iowa, was held on the farm of Mr. Broughton, on October 11th. Mr. Broughton's cattle came up to the owner's expectations in the prices realized, though a little bad luck which Mr. Green experienced some time before the sale cut down his average. A few of his calves were lost during the hot weather, and because of this buyers seemed to be a little backward about taking hold of the cows, the fear being that they were not breeders. This was a mistaken belief, however, and every buyer got full value for his money, as the cattle were all a healthy lot. Prices ranged from \$50 to \$200, the total sale amounting to \$3,408.50. Among the buyers were Messrs. A. Armstrong, Lake View, Iowa; Louis Dettmerman, Carroll, Iowa; B. Broughton, Lake View, Iowa; Hood & Baker, Dunlap, Iowa; L. A. Cleveland, Lake View Iowa; W. H. Leslie, Auburn, Iowa; J. J. Yender, Early, Iowa; Mox Peters, Lake View, Iowa; G. H. Swelter, Lake View, Iowa; J. J. Toop, Auburn, Iowa; Baxter Bros., Galva, Iowa; A. W. Laport, Lake View, Iowa; Wm. Campbell, Gilmore City, Iowa; J. C. Barnes, Storm Lake, Iowa; Jas. Hartigan, Soldier, Iowa; Andrew Johnson, Dayton, Iowa; J. T. Grabner, Breda, Iowa.

NATIONAL DUROC JERSEY ASSOCIATION MEETING.

The annual meeting of the stockholders of the National Duroc Jersey Record Association was held last week at the American Royal. The following officers were chosen for next year: C. E. Pratt, Frankfort, Kan., president; H. C. Sheldon, Peoria, Ill., secretary; L. H. Roberts, Patton, Iowa, treasurer. The following were chosen members of the executive board: T. L. Williams, Dawn, Mo.; H. F. Hoffman, Washta, Iowa; E. Z. Russell, Blair, Neb.; C. W. Seybold, Horace, Ill.; L. A. Larson, Vermilion, S. D., and D. W. Brown, Union City, Ind.

HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

Selecting Seed Potatoes.

To the Editor of The Homestead:

Many of your older readers remember the old Peachblow potato which was in its time the greatest potato grown. It has long since "run out," however, and the younger generation knows it only by its history. The Early Rose of our boyhood days is now almost a thing of the past, and many strains of the Early Ohio, a much younger variety, have grown so poor as to place its name in bad repute.

Everyone understands that a variety of potatoes may be expected to "run out" after a time, and many farmers religiously "buy their seed" every few years to "renew their stock." In fact, this fallacy of buying new seed has been carefully cultivated from some source, though the results from such frequent changes cannot but be disappointing as often as otherwise.

Scientists tell us that a given strain of potatoes will eventually run out the same as any other plant which is grown from cuttings, and that we must then go back to the seed, not new seed potatoes, but to the potato seeds which grow on the plants above the ground for a new supply. But by exercising a little care and judgment any potato grower may not only greatly delay this final senescence of his favorite varieties, but may very materially increase his yield as well. I wish to make plain a few of the principles on which these results depend.

In the first place (and most important), like begets like with few minor variations. If a potato (or an eye) from a weak plant is planted, the result will be a weak growth and a light product. Potatoes do not mix by breeds; hence we may expect a given hill to resemble very closely the characteristics of its only parent, its immediate predecessor. If a potato is planted from a hill which yielded a good number of large potatoes the result will be a similar yield, and this whether the tuber planted was the largest or the smallest in the hill. On the other hand, if the only large potato in a weak or poor hill is planted the product will run small or poor; that is to say, if a hill contains five potatoes weighing a pound each and one weighing four ounces, and another hill contains only one potato weighing eight ounces, the four-ounce potato from the good hill will produce more if used for seed than will the eight-ounce potato from the poor hill.

From this it will be seen that the value of the seed does not depend upon the size, but upon the nature of the hill

from which it has been taken, and that if the seed is chosen from the best hills the yield will be increased and the life of the variety prolonged.

It may seem from what has been said that small potatoes may as safely be chosen for seed as large ones, since strong hills produce some small potatoes and weak hills usually produce some of fair size.

This is not true, however, neither is the reverse. The greatest harm to any variety comes from repeatedly using small potatoes from seed. Every new variety of potatoes comes from the product of a single plant. The eyes of this first hill vary in strength, and soon some begin to fail, marking the fact by the greater number of small potatoes produced. Some are damaged by disease, as scab, etc., and never recover their former vitality. Others are starved for many generations on poor soil until their vitality is injured. All these evidence their weakness, not by yielding all poor potatoes, but by producing an ever increasing percentage of small ones.

In the meantime the offspring of the strong, vigorous eye which has met with no misfortune goes on year after year producing large, healthy tubers similar to those produced by the original mother plant. What is thus taking place in regard to the different branches of the great variety family is taking place year after year in any field of potatoes, though all the seed planted eventually came from the same eye. Even in a given hill there is difference and the eyes on one potato vary to some degree in strength.

Hence it will be seen that in selecting the small potatoes for seed year after year, the chance for selecting the product of weak hills will increase and the chance for selecting the product of strong hills will decrease. Thus in time the chance for a strong potato to be used for seed will become very remote, and the variety will have come to an untimely end through the erroneous method of selecting seed.

We are thus led to what appears to be a difficult task—the selecting of really strong hills for seed. And it might be difficult had not some one hit upon the fortunate experiment of looking for the best potatoes in the hills having large vines with thick stalks. So universally were such hills found to approach the ideal of the variety that the theory was developed that such hills are strongest in productive and reproductive power and in vitality. Experiment has proven that the theory is correct.

It simply remains, then, for the grower to select the strong, healthy-looking vines and save their product for seed. Nor is it altogether necessary to select these seed hills in the growing season. So strongly is this mark of reproductive vigor stamped that when one has learned to look for it he may go into a field at digging time and by selecting

Let Me Quote You a Price on the AMERICAN Manure Spreader

We manufacture and sell the celebrated American Manure Spreader to the consumer direct from our factory—saving all the middle profits made by jobbers and dealers. These profits are left out of consideration in the prices that I want to make you direct from our factory on an American Manure Spreader.

This means that you can buy from our factory at factory prices—be a Wholesale Buyer. And that isn't all! We don't ask you to pay cash in advance.

We sell the American Manure Spreader on Time— liberal time payments—giving our customers easy terms to pay for their Spreaders—letting the Spreader really pay for itself as it earns for you. We are the only concern in the United States manufacturing and selling Manure Spreaders direct to the user on time and on trial at low factory prices.

The American Manure Spreader has 40 per cent more exclusive features than any other Spreader. It is high-class in every respect—made to last a lifetime. There is no question about the American Manure Spreader being the standard Spreader of the world.

30 Days' FREE Trial

To prove all of our claims for the celebrated American Manure Spreader, we allow 30 days' trial on every Spreader we sell.

This permits the customer to use the Spreader on his own farm for a full month to be satisfied that it is just as represented. If not as represented it can be returned to us. We pay all freight both ways—trial being FREE.

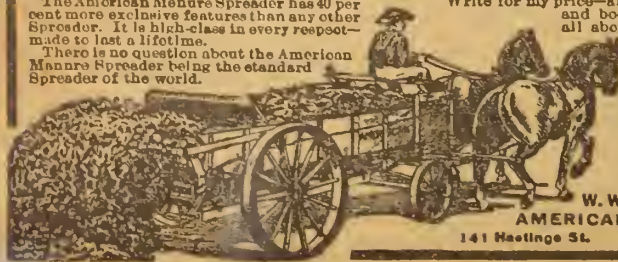

The low price I want to quote you on an American Manure Spreader will be for the Spreader delivered at your station.

We Pay All Freight

This price will be for the Spreader on time—this price will be for the Spreader on trial—and this price will be a price that is lower than dealers are charging for Spreaders that are not nearly so good as the American. When you examine all the exclusive features of the American you will agree with me.

Write for my price—and write for my catalogue and booklet. They will tell you all about the American Manure Spreader and give you a lot of good information on the question of fertilizing—a question that every farmer is interested in and wants to know all about. I will write me today on a postal card. I will see that you get our book and my special price at once.

ter of good faith. All communications intended for
this department should be addressed to Postoffice
Drawer 1127, Kansas City, Mo.

AMONG OURSELVES.

Men have always been made cordially
welcome in this circle, but for some rea-
son until recently it has only been occa-
sionally that the men have taken part
in our meetings. I feel sure that I speak
for the majority of our circle in saying
that we hope the men will keep on com-
ing—keep on speaking. With this little
preamble allow me to introduce "A Bach-
elor."

I am a new reader of the Home Depart-
ment. I am more than pleased with it.
Among Ourselves are some very interesting
letters, such as Mrs. Juanita, Sister Anna
and a number of others. Aunt Ruth has
surely had her share of criticism. Then next
comes Mrs. Ed. Streeter with some questions
for the gentlemen to answer. I am only one,
therefore I can answer for one only. Also I
am only a bachelor, with very short experi-
ence. My answer may not be satisfactory.
I do not have contempt for women just be-
cause they are women. I respect women very
much. I am always pleased when the wives
call with their husbands to make me a visit,
as they sometimes do. There are a number
of reasons men don't like to go to church.
Sometimes I don't like to go because I have
no lady friend to go with me; other times I
have so many chores I can't get off in time.
One reason I might growl if the women want-
ed me to clean the mud off my boots before
going into a clean kitchen is I am not used
to the kitchen being clean. I usually have
a place for my hat, boots, etc. Should I find
it occupied by a bonnet, apron or overshoes,
I would probably drop my hat near by, as
most men know if they put their hat in a
new place it is lost when they want it. If I
should find my harness, tools, and feed basket
scattered over the farm I surely would try
to find out the cause, as I have done before.
Then I would keep them where the pup, cows,
hogs or children could not get them. I have
endeavored to answer Mrs. Streeter's ques-
tions as far as my experience goes. In re-
turn I will ask the lady friends a few ques-
tions. Why do some women think that men
have contempt for women just because they
are women? Why do some women have a
contempt for a man just because he is a
bachelor?

Next week we shall have a further re-
ply to Mrs. Streeter's questions from a
man of a different type.

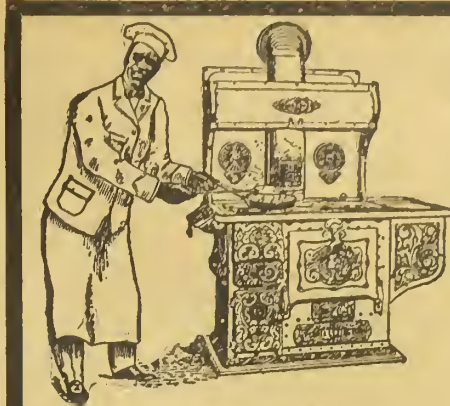

A woman who has seven children
should be wise in many directions and
have many things to tell which are worth
our hearing. It is "A Mother of Seven"
who is our next speaker:

When I read some of the letters in answer
to Aunt Ruth and about large families, I
could not rest until I looked up the papers
and read the others. I am the mother of
seven children, five boys, the eldest twenty-
one, the youngest six, and twin girls,
twelve years old. We, of course, find a lot to
do, but all help where help is needed most.
Aunt Ruth does not seem to think it hurts
a man to help about the house. Neither do I.
My boys can all wash dishes, sweep, make
their own beds, get a meal, and do many other
things about the house. Of course they
don't have it to do all the time. Neither do
the girls feed hogs, milk, feed horses, and
do other outdoor work all the time, but for
three weeks their father and three older
brothers have been thrashing most of the
time, and do any of you honestly believe they
think less of the girls or me to have the
chores done so they can go to bed when they
get home instead of having to work a couple
of hours longer? I have worked in the hay
field, too, and so have the girls, and will
again when we are needed. The girls play
the organ and piano quite well, too. And
they have cut and made every stitch of the
dresses and aprons that they got premiums
on at the county fair for three years. They
have also taken premiums on white bread,
graham bread, apple pie and cake, all made
by themselves. I, like Aunt Ruth, empty the
water pail at meal time. My men think they
are better able to carry water as a rule than
the girls or I. And tomorrow, as it is too
wet to thrash in the forenoon, one of them
will take the cream to the creamery. The
girls and two little boys must start in school
again. So much for one family that can
hardly be called small. They all love their
country home, too. Their father and I made
it a point to join in their sports and we have
great times together with our work and
play. I was an only child with no compan-
ions and not taught to work much, and I say,
teach the children how to work.

How would it be if we were to have
talks from men and women who were
taught to work and from others who
were allowed to grow up without work-
ing? If each would tell us whether
their up-bringing has been a help or a
hindrance the circle should receive some
very valuable "pointers." I hope this
suggestion will be like good seed sown
in fruitful ground, that it will produce
a fruitful harvest.

From a number of letters written by
young women on the subject of girls
working in the field I have chosen for
today that of Miss Winnifred Walden,
who has a level head upon her shoulders
and expresses herself with a vigor that
is refreshing:

Since we have all been so cordially in-
vited to join the circle, I can not resist the
temptation to say a few words on that

Manufactured and Sold by the
BOVEE GRINDER & FURNACE WORKS, WATERLOO, IOWA

speech-provoking subject, "Shall country wo-
men work out of doors?" If general or av-
erage conditions were universal, it might be
easily settled. Obviously, women's work is
house work, and men's work is field work.
But circumstances alter cases. We must con-
sider the number of boys and girls in the
family, the amount of work to be done, and
the physical condition of the different mem-
bers of the family. One of the most efficient
aids in settling this question is that old-
fashioned quality, common sense. All women,
if able to work at all, should work out of
doors part of the time, but assuredly they
should not make a practice of stopping the
hogs nor sawing the wood, nor ought they
always to do all the work about the chickens.
Particular circumstances will help to a de-
cision. It certainly doesn't hurt any girl to
milk, if she is not needed in the house. Any
farmer's daughter should be ashamed not to
know how to do all kinds of work on a farm,
but doing it all the time is another matter.
If father is rushed and hands are scarce, by
all means run the mower a few days, if the
hot sun does not give you a throbbing head-
ache, but don't let the work be arranged with
the understanding that you are to be depend-
ed on as a hand. Also, a girl has no husi-
ness pitching hay or doing heavy work of
that kind. After all each one must decide
from her own circumstances what she should
do. But the ability to harness and drive a
team is not incompatible with piano playing,
and milking cows and does not incapacitate
one for writing poetry, if so inclined. There
is in some quarters a tendency to think that
because a person lives in the country he or
she is just a little inferior to the city person.
I register my eternal protest against place of
residence being made the basis of judgment
with regard to the standing of people, mentally,
morally, or socially. What logical reason is
there for denying the country woman her in-

heritance of culture and refinement? We of-
ten repine at our lack of opportunity to at-
tend concerts, lectures, etc., and neglect the
most important thing of all in that line—
books. There is more educational and cultur-
al power in a few good books than in a doz-
en lectures and concerts.

Miss Walden's "eternal protest" will
be subscribed to by very many Among
Ourselves. I agree with her most heart-
ily. At the same time, I would ask is
there not some connection between the
feeling of superiority alluded to and the
fact that many farm women work so
hard and so long? As has been brought
out in the discussion regarding the work-
ing of women in the fields, a woman can-
not be in the house and out of it and
do the duties of each place thoroughly.
If farm women make mere working ma-
chines of themselves, whether by choice or
necessity, they must expect to be look-
ed upon as inferiors by women who take
time to read, study and cultivate the
graces of life. One phase of this subject
strikes me quite often. It is when I
see some inferior-looking place adver-
tised as a "Farmers' Hotel." Let us talk
along this line at greater length, friends;
it is a many-sided subject which has
bearings of no little practical import-
ance.

The notice at the head of the Home
Department is respectfully commended to

"A Missouri Girl," "Edgar" and several others.

Discussion of the question of American-born girls marrying foreign-born men will be begun next week.

Dressmaking and Millinery—No. 539.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

Among the trimming features to be noted as particularly belonging to the season is the use of plaid and checked silks as a trimming of plain materials. A waist of plain silk is trimmed with pipings or bias bands of plaid

general wear will be more often made with full length sleeves; those of the dressy order will usually be made so that the cuff may be worn or omitted. Then of course when the short sleeves are worn, long gloves will be worn for all except "party" occasions. In cutting this waist from plaid material in order that the lines may match it is well to cut both fronts in the full width, then if desired the extra amount may be cut off the left front and its edge finished straight. If the gauntlet cuffs are to be made removable use the turn-back cuff also, as this will not detract from the beauty of the full length sleeve, and will enable one to conceal the joining of cuff and sleeve. Pippings of plaid and plaid covered buttons may be used with good effect on this design. Pearl and metal buttons are also appropriate and in good taste. Pattern No. 5473 is cut in sizes for a 32, 34, 36, 38, 40 and 42 inch bust measure. Give size when ordering.

The skirt which combines pleated and plain gores in its designs is among the fancies, and I think we will find no prettier model of

[5473 Shirt Waist or Blouse, 32 to 42 Bust.]

In a color to match the material, and the buttons used are covered with the plaid. Other garments show the use of striped material for piping or bands, and for covering the buttons. Black taffeta trimmed with black and white check is especially noticeable and attractive and if buttons of medium size are used covered with the same the effect is enhanced.

The shirt waist having rolling collar has taken a strong hold on feminine fancy, and its use bids fair to become prominent among the fall waist designs. Pattern No. 5473 shows one of the latest models having several of the strictly early fall features, the roll-over collar being one, the double breasted effect being another, while the outward turning pleats far out toward the edge of the shoulder, giving the broad effect gives it still another stamp of up-to-dateness. The sleeves in this design are shown in the elbow and in the full length, and the waist for

[5471 Nine Gored Skirt, 22 to 30 Waist.]

the kind than that shown in Pattern No. 5471. It has nine gores. The front gore is laid in two box pleats that meet at the center front, and also has extensions that are folded in outward turning pleats. The side front gores are cut with extensions that lap well over onto the front and are stitched in place, these being apparently held in place by the use of buttons. This feature may be used or omitted as liked. The side back gores are plain. The back gores are each laid in a box pleat, these meeting at the center back. The girdle is cut in sections that match the tops of the gores, and this may be of the cloth of the skirt or of silk or soft velvet of the same color. Fashion favors the corselet girdle of different material from the skirt, although the girdle like the skirt will be worn to considerable extent. Pattern No. 5471 is cut in sizes for a 22, 24, 26, 28 and 30 inch waist measure. Give size when ordering.

Send eleven cents in money (not stamps), for any pattern wanted, these or others. Give size for ladies', and age for misses' and children's patterns. Be careful to sign name and give address in full, as I have orders that cannot be filled because these little matters were overlooked. Orders properly written and sent are promptly filled.

PLEASANT FIELDS OF HOLY WRIT

Romans. Some slaves were actually men of letters and professions. They had large endowments. Others were skilled artisans. They had medium gifts. Others were day laborers, scarcely more than animated tools. The income, much or little, from these slaves belonged absolutely to their respective masters. But the matter of how and where the income should be produced was often left—not nominally, but really—to the slaves themselves; only they must produce a certain revenue and pay it to their masters, or suffer penalties for not doing so. The separation of master and slave was often complete—one not even seeing the other until such time as had been appointed for the accounting. Absentecism of masters was as common as that of Irish landlords today. And there were no such means of intercommunication as we enjoy—no long-distance telephone, postal dispatch, or special delivery. In the slave owner's upbraiding of the delinquent slave we discover one method of trade then in vogue: "You ought to have thrown my money onto the table of the broker; then I would have had principal and interest." Bible weights and measures are puzzling. Absolute accuracy with reference to them is almost out of the question. It is perhaps enough to say that the least sum mentioned is considerable—anywhere in round numbers from \$1,000 to \$2,000. The hiding of the talent in the ground is another dash of local coloring. It was not the age of banks and safety-deposit boxes; so there were many "fields" in which treasure was "hid." The accounting time was

Chandler & Chandler, Patent Attorneys,
956 F. Street, Washington, D. C.

real and important to master and slave. The revenue for the support of his chateau or palace, the maintenance of his retinue, for all his power and pleasure, were gathered at such time. In proportion as his slaves had been industrious, he could meet bills falling due, and extend his plans for social and political prestige. It was a crucial hour for slave as well. If successful, he could expect to be correspondingly rewarded. If he could show no gains, he well knew his master had power of life and death over him. It was an hour of real joy or fear. The practical present-day bearing on human life of the parable is apparent. It emphasizes individualism as against institutionalism. Each has talents committed to his sole keeping. Each for himself is to increase his store. Each is to give a reckoning. The ordeal will be as searching as fire. Escape, evasion—impossible! Rewards and penalties will be commensurate, and administered by an even-handed equity. There will be degrees of reward, but the smallest degree will be transcendently great. Eye hath not seen, ear hath not heard, anything that will compare. The human mind is incapable of conceiving of the rewards

October 18, 1908.]

of Paradise. How desperate the strait of the unfaithful! What he has shall be taken from him; that is, it shall be revealed to himself and all the intelligences of heaven that the faculty with which he was endowed he has lost by persistent disuse of it. The spiritual visual sense is obliterated. The spiritual auricular nerves are dead. There is no avenue through which the soul can be reached. The state is remediless. The expulsion of such a soul from Paradise is a moral necessity. The taking away of the talent is only the discovering of the fact that it is already gone—"extirpated by disuse." The binding and casting out is only the judicial affirmation of a destiny already self-inflicted. The soul goes to its own place by a moral gravitation that is irresistible. Having taken the divergent line of inveterate neglect of the spiritual faculty, he winds up in a hell which is eternal because the very essence of it is the obliteration of the powers of the soul. On the other hand, the faithful soul, having taken the right line of persistent use and development of the religious faculties, finds himself at length in a blissful state, from which lapse is impossible, and in which there is such a phenomenal development of the soul that he is qualified to perform functions for God, the nature of which is dimly conveyed to us by the terms kingship and priesthood to God, and being over ten cities and five cities.

The Teacher's Lantern.

The Parables of the Virgins, Talents, and Pounds set forth the substance of religious duty, and the opposite destinies of the faithful and unfaithful. They are a hand-book of ethics. Fundamental principles are epitomized in them. At the same time they are powerfully incentive to good, deterrent from evil. Dean Trench discriminatingly says: "Undoubtedly Christ bestowed marvelous and miraculous abilities on the apostles on the Day of Pentecost; but from that day to this he has ever been delivering his goods to each successive generation of his followers. The natural is the ground work upon which the spiritual is superinduced. Grace does not dissolve the groundwork of individual character. The natural gifts are as vessels which may be large or small, but in each case each is filled." How tiresome the show of humility! "So little is committed to me in the way of talent that it makes no odds whether I employ it or not." The laggard has not wasted like the prodigal; isn't ten thousand talents in debt like the unmerciful servant. But here is an irreparable evil. The pound was given to be employed in a given period (probation); the opportunity for its employment gone forever, it cannot be returned. Its value consisted in its employment and increase. "Take from him the pound" is one of the sharpest

points of this bristling parable. This is what Horace Bushnell aptly calls the extirpation of the religious faculty by its non-use. Sully, insolent, and profane appear the excuses of the laggard with his pound; yet not more so than the stock apologies of the average sinner of today: "Religion is too severe;" "Temptations too powerful;" "Evidences of Christianity not sufficiently plain." Such excuses criminate God; tax Him with austerity and reaping where He has not sown. Jesus reveals the truth that man is God's servant. What he has he holds in trust for his Maker. He is not an original, independent proprietor. He holds nothing in fee simple. He is to occupy, use, and increase. But an account of stewardship is ever impending. This accounting-time is the asize of the soul. It is to be kept always in view. One is to be instantly ready for it. Here, however, is no harsh, unreasonable, and purely technical reckoning. Nothing can surpass Jesus' radiant portraiture of Him with whom all souls have their final dealings. Nothing is hid from his omniscience, true, but it is a benevolent knowledge. It is so all-inclusive as to descend to the very hairs of one's head. It bids the child of God take no anxious care. He who sustains the soul in being will provide bodily comforts. He who notes sparrows and lilies will not neglect immortals. The principles of absolute equity will be observed in the final accounting. He will not attempt to reap where he has not sown. A reasonable increase only will be demanded. The ratio between the knowledge and the stripes will be accurate. The use of the probationary life, as related to the life immortal, is finely expressed in the lines:

Since I am coming to that room,
Where with the choir immortal,
I shall make thy music when I come,
I tune the instrument here at the door,
And what I must do there, think here before.

Jesus' faithful servants are to be exalted to highest rank conceivable. The revelator saw thrones for the faithful. They shall be rulers. The wisdom learned in humble spheres shall be useful to the mighty Governor of a universe. His stewards, exalted, shall share with Him in some form of dominance over all intelligences. "Such a promise let no one contemplate except when clothed in the profoundest humility." It admits of question whether the destiny of the kingdom of heaven is not in the hands of the disciples—not relatively, but absolutely—and whether this is not the full meaning of the words: "Delivered his goods and went into a far country." If this be so, it is a mighty incentive to fidelity. A company of tourists amused themselves by calling to the cliffs of Mount Desert Island, "Captain Kidd, where's your money hid?" The laconic answer came back, as if in mockery, "Money's hid!" Men are still burying talents. What splendid pearls of genius have been dissolved in the bowl! How true the German proverb, "The bowl has swallowed more than the sea!" What almost unlimited possibilities of goodness, beauty, and usefulness have come to nothing in mere human animalism! It is hazardous to say we will be rewarded for fidelity, irrespective of whether there is anything to show for it or not. Fidelity ought to show fruit.

Analysis And Key.

I. Parable of the Talents: (1) Its local oriental coloring. (2) Semi-independent status of slaves among Greeks and Romans. (3) Varying gifts of slaves. (4) Separation of master and slaves. (5) Accounting time. (6) Significance of it to master and slave. (7) Rewards and penalties.

II. Present-day bearing of Parable: (1) Individualism vs. Institutionalism. (2) Career of each steward traced. (3) Extirpation by disuse. (4) Phenomenal spiritual development.

Craver's Duroc Sale.

Despite a heavy rain which fell throughout the day, Mr. W. A. Craver's sale on Wednesday, Sept. 26th, was a success. The hogs were offered in first-class breeding condition and were promptly taken at remunerative prices. Colonels Bowers, Sailer and Figg conducted the selling in a satisfactory manner. An average of \$25 was made on sixty-seven head. The following list gives purchases of \$25 or over:

J. H. Munns, Waynetown, Ind.	\$30

None genuine without his name and price stamped on bottom. Fast Color Eyelets used; they will not wear brassy. Write for Illustrated Catalog.

W. L. DOUGLAS, Dept. G, Brockton, Mass.

ADDITIONAL FIELD NOTES.

LAKEWOOD'S FIFTH ANNUAL SALE OF SHORT-HORN CATTLE.

On Wednesday, October 24th, Mr. H. G. McMillan will sell at his Rock Rapids, Iowa, farm, forty-seven head of choice Short-horn cattle, being judicious selections made from his famous Lakewood farm at that place. This farm is situated six miles south of Rock Rapids and four miles north of Doon. The tract comprises 1,020 acres which are devoted exclusively to the production of pure-bred pedigreed live stock, the Short-horns being one of the main features of the farm. Inasmuch as Mr. McMillan has 181 head of Short-horn cattle, he has been enabled in this forty-seven head selected for this draft sale, to offer a character of cattle that will not only be a credit to Lakewood, but will be an offering that should attract the buyers of the Dakotas, Minnesota, Nebraska and northwestern Iowa. The management of these cattle has been in the hands of Mr. James McMillan and Mr. Cash M. Bent. A goodly line of Scotch females are offered, the remainder of the best American families with from three to six Scotch tops. The cows and all heifers of breeding age are bred to the splendid bull, Morning Joy. As these cattle are still running on grass and have not been fed any grain, high prices are not anticipated. If you want good cattle, only in nice, thrifty breeding condition, at prices that the farmer and young breeder can well afford to pay, this offering affords special inducement. Rock Rapids is located on the Sioux Falls division of the Illinois Central Railroad, on the Sioux Falls division of the Rock Island and the Luverne & Doon branch of the Northwestern. Parties from Minnesota and the north coming over the Great Northern should leave the train at Doon. The catalog is now out and is a very neat and artistic piece of work, turned out by the hindery of the Cedar Rapids Republican, and it should be in the hands of every lover of Short-horn cattle. Lots from 1 to 10 are Scotch females of such noted families as the Violet Bud, Evangeline, Orange Blossom, Brawith Bud, Besse, Duchess of Gloster, Victoria and Rose of Autumn. The remainder are richly Scotch-topped American sorts of the most approved lines. Two nicely-bred Cruickshank Orange Blossoms are offered among the young bulls, both sired by Morning Joy. The catalog can be had by addressing either Cash M. Bent, Rock Rapids, Iowa, or H. G. McMillan, Cedar Rapids, Iowa, mentioning The Homestead.

THE MERCER COUNTY ANGUS AUCTION.

Not a cull in the auction, and as many attractions as possible, were the ideas dominant when the cattle were selected for the Mercer County Breeders' Auction at Aledo, Ill., on October 23d. Mr. C. A. Bopes, of Reynolds, Ill., has cataloged the high-class, Blackbird-topped Ballindalloch K. Pride bull, Palamon B., by the double Blackbird hull, Royal Blackcap 2d, believed to be the very best and best-bred hull of this famous family in service today. Also daughters of this hull from dams of the Blackbird, Trojan-Erica, Queen Mother, Shempston Duchess, Wester Fowls Queen and other celebrated families. Mr. G. E. Thornton, of Millersburg, Ill., consigns the Blackbird show heifer, Shadeland Blackbird 3d by Imp. Allick of Theakston, and three other Blackbirds, two of which are by the same sire. Mr. Thornton also includes a yearling heifer from the dam of Imp. Allick of Theakston, and sons and daughters of this hull that is proving a great sire at Shadeland. Daughters of the double Drumlin Lucy hull, Guinea of Taylor Ridge, that represents the undefeated blood of Woodland, are also cataloged by Mr. Thornton. Mr. G. E. Alkins, of Aledo, Ill., consigns the get of the superior sire, the Coquette bull, Countersign, a son of the double Blackbird hull, Woodlawn, and including Inga's Girl, a Noregay heifer that only needs fitting to become prominent as a prize winner. A pair of choice Countersign bulls are also consigned by Mr. Alkins. Mr. J. E. Reed, of Aledo, Ill., catalogs four female representatives of an old Brunhead family. They are choice individuals and from one to four years old, sired by the Blackbird-topped Heather Bloom hull, Teutonic, and Aldine of Woodlawn, an Antelope son of the famous Moon Eclipse. Mr. S. Lee, of Aledo, Ill., catalogs a Westtown Rose heifer by Custodian, a son of the double Blackbird and International prize-winning bull, Woodlawn, and other entries by Custodian are also included by Mr. Lee. He also included a cow of grand scale that was got by Sultan 2d of Greenview, a bull that has attained considerable reputation as a sire of International market-topping, prize-winning steers. Mercer county contains within its borders more registered Angus cattle and more men interested in them than can be found in any other county in any state in the Union, and these breeders invite breeders and cattlemen generally to inspect their offerings and see the Angus in a country where he reigns supreme and flourishes always. Catalogs will be mailed on application to Mr. W. C. McGavock, Sale Manager, Springfield, Ill.

For Sale—Improved Colo. farm, free irrigating water. Jenks, 929 17th St., Denver, Colo.

A WONDERFUL OIL HEATER.

It Solves the Problem of Fall and Spring Heating and Supplements the Regular Heating Apparatus in Mid-Winter.

With the passing of the summer months comes autumn, and with it the chilly nights and mornings which force us to turn our thoughts to the problem of heating our houses, and we begin to look over our stoves and furnaces and get them in repair for the cold winter months.

To start stoves and furnaces in the early autumn brings more or less discomfort for the reason that they furnish too great heat during those portions of the day when the

Carefully Choke bored, insuring superior shooting qualities, positive Automatic Shell Ejector, Case hardened frame, top pump action, rebounding lock, walnut stock, hard rubber butt, reinforced breech, 12 gauge, 28 or 30 inch barrel. Will shoot any shell made Winchester, U.M.C. etc. Splendid.

finished—every detail perfect, all parts interchangeable—can be taken down instantly into two pieces. Weight 6 3/4 pounds.

TESTIMONIALS.—I received my shot gun all right, and it is a daisy. I thank you for your kindness and honesty. Wesley McKeever—Fremont, Ohio. I tried the gun at 10 rods and No. 4 shot and find it a very close and strong shooter.—Carey Fish, South Haven, Mich. Am well satisfied with gun.—Roy L. Beyer, Columbus, O. Received shot gun. It is much better than I expected.—M. G. Baker, Skowhegan, Mich.

How To Get This Gun FREE.

We have bought a number of these guns and are giving them away for a very little work any boy or man can do for us. We guarantee you can earn one in a day easily. Many have earned one in an hour. No cheap pictures or jewelry to sell. Our plan does all the work. Does not interfere with your regular work. Simply say you want a gun and you will be surprised how simple our offer is and how easy it is to get the gun. Don't delay or somebody will get ahead of you. Write today.

SUCCESSFUL FARMING, 600 Tenth Street, Des Moines, Iowa

A BARGAIN—Eighty-acre improved farm, all under cultivation; two and one-half miles from Anoka, 13 miles from Minneapolis, school half mile, fine water, no stone, all fenced. Price, \$2,800; easy terms. Address owner, Chas. McGraw, Anoka, Anoka county, Minnesota, Route 3.

FOR SALE—Blue registered Scotch Collie females, bred or open at snap prices. Address, A. H. Gerot, Riverside, Iowa.

heat of the sun is still considerable. For such times the Perfection Oil Heater, equipped with a device which prevents all possibility of smoking, solves this hitherto perplexing problem.

There are also many times during the cold winter months, while the furnace and stoves are in operation when they may not be equal to the task of warming remote rooms, hallways, etc. This is more apt to be true in the early morning before the full efficiency of the regular heating apparatus is developed. In many houses there are rooms not reached by direct heat. At such times and in such places the Perfection Oil Heater will be found a very valuable auxiliary. It will enable the household to eat its breakfast in comfort instead of shivering with the morning chill.

The Perfection Oil Heater produces a surprising amount of heat immediately after lighting and will heat an ordinary room in a remarkably short time. They are strong and well made in a design pleasing to the eye, and they are light enough to be easily carried from room to room as required.

In these days of numerous devices for illumination, there are still many who have not provided themselves with satisfactory lamps. The Rayo Lamp makes it possible for everyone to have adequate light at a small cost. The Rayo Lamp is the best lamp for all-round household use. It is made of brass and beautifully nicked, and is an ornament to any room whether in palace or cottage.

The Perfection Oil Heater and the Rayo Lamp form a combination that makes home bright and comfortable. Their absolute safety and very moderate price make them a valuable and easy acquisition to any home. Both heater and lamp are warranted.

We suppose the article by The Litchfield Manufacturing Company on page 5 is not intended for fools but for wise men.

If in need of barn door hangers insist on having Prouty No. 77, guaranteed for five years.

Illinois Chief 50059, bred and owned by M. W. Greer & Son, of Rushville, Ill. This boar is a son of the grand champion boar, Tip Top Notcher, and was second prize boar in the six and under twelve months class at the Illinois State Fair, 1906. He has been consigned to the forthcoming sale to be held on Monday, October 22d, at Bushnell, Ill., and someone in search of an extra good herd boar should see this one before buying. Plan to be present at Bushnell, Ill., Monday, October 22d. See announcement on page 42.

LANDS AND HOMES FOR SALE

MISSOURI LAND

IS BETTER at present prices than a gold mine. Come and we will take pleasure in showing you. 600 acres well improved, all kinds of fruit and the best of water, and the low price of \$40 per acre buys it. 220 acres three-fourths of mile to Kirksville. As good prairie land as you will find in Missouri. Fair improvements. This is an ideal lying farm and \$65 per acre buys it. 80 acres, 2 miles from Kirksville, nice improvements, a lovely small home at the slaughter price of \$60 per acre. 82 acres, one-fourth mile to Kirksville, good improvements and as near an ideal home in every respect as can be found, and we are only asking \$80 per acre for it. 132 acres one-half mile to Kirksville, good improvements, all kinds of fruit, no better land in the state, every foot can be farmed with any kind of machinery. This looks good to anybody, but it is better than it looks and we are putting the low price of \$80 on this ideal home. 180 acres, 90 rods to Kirksville, good building, good fence, all kinds of fruit, the best of water and world's of it, cistern in house, in fact everything is right. No better or finer lying land in the state. \$70 per acre will buy this home.

ISAAC A. NOVINGER & SONS, KIRKSVILLE, ADAIR COUNTY, MO.

P. S. WE are not real estate dealers, we own the land herein described and furthermore our home is not for sale. We simply have more than we can handle.

ATTENTION! SHEEP BREEDERS!

Let us tell you something of what it means to be a SHEEP BREEDER or STOCK RAISER IN MICHIGAN. The great Chicago market is near by and freight rates are low. This means something to YOU. We offer 4,000 acres of first-class grazing land at a low price. Are YOU interested? If so, drop us a postal.

MICHIGAN LAND ASSOCIATION

MANISTEE, MICHIGAN.

\$5 to \$16 Per Acre.

FINE LAND In Gove Co., Kansas, which holds the record of yielding the best crops this year of any county in the state. Land selling rapidly. Easy terms and small payments down. Next excursion Nov. 6th. Be sure and go. Write for information.

W. F. SHELTON LAND AGENCY, 215 Shedley Bldg., Kansas City, Mo.

California Lands Thrown Open. RESIDENCE not required. Some improvements necessary. Information free. C. H. E. Association, 144 Chamber of Commerce, Los Angeles, Cal.

FOR RENT GOOD STOCK FARM of 320 acres. Terms \$2.50 per acre. Address, J. F. Lynch, New Hampton, Iowa.

When writing please mention this paper.

FOR SALE A "BUMPER" IOWA FARM

As good a farm as there is in Iowa, containing 300 acres, located in Kennebeck township, Monona Co. It is 5 miles from Onawa (county seat) and 2 miles from Turin, both good railroad towns. I will sell for \$75.00 per acre if taken soon, part cash and balance on time at a reasonable rate of interest. The house is a good frame house of about 6 rooms, brick foundation, cemented cellar, etc. Barn is large with brick foundation, almost new, has lean-to shed 12x32 feet. There are ample cribs, bins, etc., hay scales, good wells and windmill. The farm is well fenced and will divide into two farms nicely. All buildings are well painted and in good condition. About 225 acres was under plow this season, the remainder is splendid hay land with the exception of 15 acres of good timber land along the west line, which is the Little Sioux River. For stock or grain the farm has no superior anywhere. The soil is deep and a very rich dark loam, easily worked, no rocks, no sand. As the Northwestern Mutual Life Insurance Co. of Milwaukee renewed a small loan for five years on the above described land, June 29, 1906, there can be no question as to perfect title. I refer you to any bank or commercial agency in Omaha, Neb., or Council Bluffs, Ia., as to my reliability. The farm to be appreciated must be seen. All inquiries cheerfully answered. All crops reserved. Address,

Z. T. LINDSEY, OMAHA, NEB.

I also own 267 acres of adjoining land, partly cultivated and part hay land, fenced only, on which I will make a very reasonable price.

30 miles from Kansas City

Where the highest prices are paid for all farm products. Where the winters are mild.

550 ACRES fine upland, rolling cattle and grain farm, 200 acres in corn and timothy and 100 acres more of same land. 25 acres alfalfa, 200 acres finest blue grass pasture you ever saw. Running water always. Improvements alone worth \$6,500, including a new \$2,500 barn. All in fine order. This soil is strong black loam, with clay subsoil, the best upland soil to be had any place. Price \$31,000. Only \$56 an acre with improvements; only \$42 an acre bare land.

ALLEN INVESTMENT CO.

Cor. 9th and Wyandotte Sts. Kansas City, Mo.

LANDS AND HOMES FOR SALE

CROPS NEVER FAIL.

CALIFORNIA In the beautiful Sacramento Valley, Sunset Colonies offer best opportunity in California for the farmer, fruit grower and stock raiser. Tracts of 10, 20, 40 acres or more of the richest land, all under irrigation. Abundant water at low rates. New model town now building. Two railroads. Good markets for all products. Dairying and stock raising very profitable. Ten tons alfalfa to the acre. Peaches, pears, grapes, figs, etc., pay well. Good roads, good schools, churches, electric lights, etc. A rich and prosperous farming community. Four thousand acres just subdivided and now offered for sale on easy terms. Just the place for a home. Near Feather River, with fine hunting and fishing. This is the land of the Big Oak Trees. Write for free illustrated pamphlet. Mention this paper. You can make Money in the Southwest

The light shaded portions represent very fertile sections in the Southwest.

Opportunities for making money abound in the Southwest. One of the surest sources of profit lies in the certain increase in land values, within the next five years. Good rich farm land, capable of raising 30 bushels of wheat to the acre, can now be bought in the Southwest for from \$3 to \$10 an acre. The same land 5 years hence will bring \$25 to \$50 an acre. Settlers are going into the Southwest by the thousands and it is only a matter of a few months when the actual demand for this rich land will force the price much nearer to what it is really worth.

Now is Your Opportunity!

You can sell your present farm—pay off the mortgage and have enough left to buy a big farm in the Southwest that will make you independent in a few short years.

The "Coming Country" Free!

The "Coming Country" is a very interesting paper published monthly and devoted to the Southwest. It will post you on conditions in the Southwest better than anything that you could read. I'll be glad to have the publisher place your name on the mailing list and send you a free copy of the paper regularly for one year. Write now to

S. G. LANGSTON, Sec'y., M. K. & T. Land Bureau, 306 Wainwright Bldg., St. Louis, Mo.

TEXAS LANDS IN THE PANHANDLE, CHEAP. Thos. J. Pugh, Omaha, Neb.

UNIMPROVED FARM LANDS

In Osceola County, Michigan.

THIS group of lands was covered at one time with hardwood timber, some hemlock, but no pine. Soil is heavy and rich, clay or gravelly loam, well watered. Crops: Good hay and grain lands; ideal for potatoes; all fruits do well. These lands are guaranteed to be as fine as any in the state, but are still wild and covered with some timber and must be cleared. Markets are plentiful and close and on good railroads. Good schools, churches, roads and telephone lines already built. Terms: Lands sold for cash or one-quarter down, balance in five annual payments, interest 8%. Price, \$12 to \$15 per acre. Write for booklet.

H. W. MARSH, MANISTEE, MICH.

PANHANDLE LAND

WE have the best proposition to offer homeseekers desiring to change location yet presented. We are the owners of—not the agents for—a large tract of land 3 miles from the railroad at Texico and 10 miles from Bovina, Tex., situated in Parmer and Bailey counties, which we are selling at from \$10 to \$15 per acre in lots of from 160 acres up, to rent purchaser, on long time and low rate of interest. We are in the shallow water belt, our greatest depth of water being 100 feet. We have 20,000 acres of land on which it is less than 20 feet to water. This is the finest body of sub-irrigated alfalfa land in the Southwest, soil 3 to 6 feet deep. This whole tract of land is admitted to be the finest body of land lying along the line of the Santa Fe railroad in the Panhandle. For further information and full particulars drop us a postal.

COLDREN LAND COMPANY,
719 N. Y. LIFE BLDG., KANSAS CITY, MO.

WHY BUY LAND AT FANCY PRICES

IN the Canadian northwest, thousands of miles from markets, when you can buy good quality land in the Clover and Tame Grass Belt of Minnesota, near two railroads and less than 100 miles from the Twin Cities or 70 miles from Duluth, at \$8 to \$10 per acre, easy terms? Wholesale tracts at dealers' prices. Agents wanted. For particulars apply to the owners.

FOR real bargains in choice farm lands in the great alfalfa, corn and wheat district of Central Nebraska, address P. H. Marlay, Mason City, Nebraska.

ADVERTISING NOTES.

Mr. McGrath, of St. Louis, Mo., is offering an eighty-acre farm for sale on page 25. Say, Mr. Land Buyer, look up the gold brick bargains offered by Messrs. Isaac A. Novinger & Sons, of Kirksville, Adair county, Mo.

Readers of this paper afflicted with piles will be interested in the advertisement of Dr. O. Broyles, of the Ludlow, Mo., Sanitarium, which appears on page 19 of this issue.

Mr. Chas. McGraw, of Snoka, Minn., is offering his eighty-acre improved farm, all under cultivation, for sale in his advertisement that appears on page 24 of this issue. He will make easy terms.

For bargains in choice farm lands in the great alfalfa, corn and wheat district of Nebraska, we would direct the reader's attention to the advertisement of Mr. P. H. Marlay, found on page 25 of this issue.

Mr. T. E. Davies, of New Haven, Conn., offers a 160-acre farm, located in Logan county, Colo., for sale on easy terms in his advertisement on page 25. Other information can be obtained from this advertisement.

Any reader of this paper who wishes to obtain information as to how to invent, or obtain patents will be interested in the advertisement of Mr. Chester W. Brown, of Washington, D. C., which appears on page 19 of this issue.

We start an advertisement in this issue on page 19 for Dr. D. M. Bye, 316 North Illinois St., Indianapolis, Ind., who is the originator of the combination oil cure for cancers and tumors. Those of our readers afflicted should write for his free book.

Texas lands in the great Panhandle country of Texas are offered for sale by Mr. Thomas J. Pugh, of Omaha, Neb. He has some great bargains to offer in large tracts. This is the coming country and a great place to invest a little money.

Mr. J. C. Garland, of Dubuque, Iowa, has a 330-acre farm in Nebraska, located 100 miles west of Sioux City, which he is offering for sale in his advertisement found on page 25 of this issue. The farm has eighty acres under cultivation and twelve acres in timber.

The editor of a well-known publication recently said: "Rats are an abomination, I must say. They annoyed us almost beyond endurance until we sent for the famous 'Rat Bis-Kit,' but now we are free from the pests." If you wish to try it, send to "The Rat Bis-Kit Company," P. 1, Springfield, Ohio. See advertisement on page 18.

Mr. E. M. Kleron, of Minneapolis, Minn., is offering an unimproved half section corn and stock farm for sale, located in Hettinger county, North Dakota, in his advertisement which appears on page 25 of this issue. Mr. Kleron states that this land can all be plowed and is in one of the best farming districts. If taken at once he will accept a very low price.

Record number 121733. Old Fistula with eleven pipes and large hole through withers; pus running to hoofs; region between shoulder blades diseased; doctor advised shooting the horse; owner cured him with one bottle of Fleming's Fistula and Poll Evil Cure. Write Messrs. Fleming Bros., 210 Union Stock Yards, Chicago, for free copy of Fleming's Vest Pocket Veterinary Adviser.

Messrs. W. A. Willis & Co., of Emporia, Kan., have a 2,800-acre eastern Kansas farm on which they are quoting a very low price per acre in their advertisement which will be found on page 25 of this issue. Five hundred acres of this land are under cultivation, and all but 200 acres of the entire 2,800 is good farm land. More particulars in regard to this farm will be found in the advertisement referred to above.

Messrs. Chambers & Chambers, the leading real estate firm of Osawatomie, Miami county, Kan., are starting an advertisement in this issue on page 25. They inform us that they have the largest list of farms for sale in eastern Kansas averaging from \$25 to \$60 per acre. This year in Miami and adjoining counties we are informed that corn will average about forty bushels to the acre. Just write them that you saw their advertisement in The Homestead and catalog, which contains list and other information, will be forwarded to you at once.

Unimproved Michigan farm lands located in Osceola county are offered for sale by Mr. H. W. Marsh, of Manistee, Mich., in his advertisement which appears on page 25. These lands were at one time covered with hard wood timber, some hemlock, but no pine. The soil is heavy and rich, clay or gravelly loam and well watered. They are good hay and grain lands, ideal for potatoes, and all fruits do well. They are guaranteed to be as fine as any land in the state, but are still wild and covered with some timber and must be cleared. Markets are close and plentiful and on good railroads. For terms and other particulars see advertisement and write Mr. Marsh for booklet.

If there is any reader of The Homestead who is considering the advisability of investing in lands in greater Oklahoma, which includes Oklahoma and Indian Territory, there is an advertisement on page 25 of this issue that will prove of great interest to him. The New State Tribune, which is one of the biggest papers in the new state, tells how, when and where to buy lands in that territory. In view of the fact that new lands are to be opened by the president's proclamation right away, this announcement by the New State Tribune will prove of more than ordinary interest. Some of the best farm lands on earth are said to be in this new greater Oklahoma. For further particulars address the New State Tribune, at Muskogee, I. T.

The present indications are that there will be a bumper corn crop. It goes by common consent that the most good can be obtained from corn when feeding or selling by shelling it, thus making gains in weight and also obtaining the cobs for fuel. Those who will have a large yield will be interested in knowing about the best shellers manufactured. An advertisement of the Sandwich Manufacturing Company, 143 Main St., Sandwich, Ill., appears on page 16, to which your attention is invited. This firm have been making and improving this line of machines for fifty years. It is fair to suppose that the most up-to-date machinery is made by them. Farmers desiring a clean and economical job should insist on having their corn shelled by

the most improved machinery. Send for their big 160-page catalog.

The Interstate School of Correspondence, of Chicago, Ill., offers courses of study under competent direction. There is no reason why young people should not perfect themselves in some branch of education, even if unable to leave their homes to attend school. The fact that the above institution is affiliated with a great university is conclusive evidence of the integrity of its work. See advertisement on this page.

Mr. G. L. Crookham, of Kearney, Neb., in an advertisement found on page 25 of this issue, is offering his ranch north and west of Kearney for sale. This ranch contains 4,590 acres, and is situated on the Loup River. The price is \$10 per acre and Mr. Crookham considers it dirt cheap at that price. The ranch will raise good alfalfa and corn. Mr. Crookham leaves about November 1st for Caldwell, Idaho, where he will engage in the wholesale lumber business with his brother.

The farm feed grinder is an indispensable piece of machinery on an up-to-date farm. There is all the difference in the world between feed grinders. All will grind, but some will grind faster and be easier on a team than others. A farmer wants a grinder that will grind and not mince matters. On page 18 will be found the advertisement of Mr. G. M. Ditto, of Joliet, Ill., who offers to send one of his latest double cut, triple-gear, ball-bearing feed grinders on ten days' trial without any advance of money. This is a rare offer and it will allow a satisfactory trial before buying. Don't miss this offer. Write for information about feed grinders.

Messrs. Isaac A. Novinger & Sons, of Kirksville, Mo., write: "We are getting a great many letters from parties who wish to trade for some of our land. Now we want it distinctly understood that we have no land to trade. We are offering to sell for the simple reason that we have more than we care to look after. This is our sole reason for offering this land for sale. We do not care whether parties purchasing this land pay more than one-third cash down on what they purchase, and they can have all the time they want on the balance provided they keep up the interest. These lands are all good investments and will pay from 10 to 15 per cent on the money we are asking for

them." When writing Messrs. Novinger & Sons, kindly mention this paper. Their advertisement will be found on page 24.

If you are thinking of going to Nebraska and want a good farm write to Mr. W. H. Grassmeyer, of Riverdale, Neb. He has some of the good bargains of the year. Write for his list of farms.

The great rush for cheaper lands is to the great Panhandle country of Texas. If you will write Mr. Thos. J. Pugh, of Omaha, Neb., he can give you some great bargains and now is the time to buy.

Special attention is called to the product, Hygeno, advertised on page 7 of this issue by the Hygeno Disinfecting Company, of Cleveland, Ohio. It is an exceedingly valuable coal tar disinfectant, one that destroys lice, ticks, scab, mites and all parasites that prey on farm animals. In addition, it cures mange, itch, ringworm and all other skin diseases. It may be used on wounds, scratches and cuts with the assurance that it will kill germs and consequently bring about rapid healing. Hygeno is not an experimental product, but one that has been tried by experts and pronounced a most satisfactory product for dipping or spraying. A free booklet will be furnished upon application to the Hygeno Disinfecting Company, Cleveland, Ohio.

With the very first frost of the season, nearly every reader of this paper is reminded of the fact that the most tedious and unpleasant task of the whole year yet remains to be done. We refer to corn picking, when rough hands, sore fingers, stiff joints in neck, wrists, back and legs are experienced by most corn huskers. Hot prickly itching and burning sensation of the skin caused by poisonous smut, increased perspiration and the sun's rays, are troubles met with by nearly all who work at corn husking. These troubles, however, are easily prevented by a liberal use of Cagwin's Husker's Liniment. If your dealer does not have it, send twenty-five cents to Mr. J. Cagwin, of Ames, Iowa, whose advertisement will be found on page 19 of this issue.

PILES A GREAT AFFLICTION.

Thousands of people suffer with piles from year to year and make no effort to have them cured. All of our readers who are in such condition should read Dr. J. C. McLaughlin's advertisement on page 19 of this issue. The

ADIES to work on piecework \$3 per dozen. All materials furnished; no canvassing; steady work. Stamped envelope. Best Mfg. Co., Champlain Bldg., Chicago, Ill.

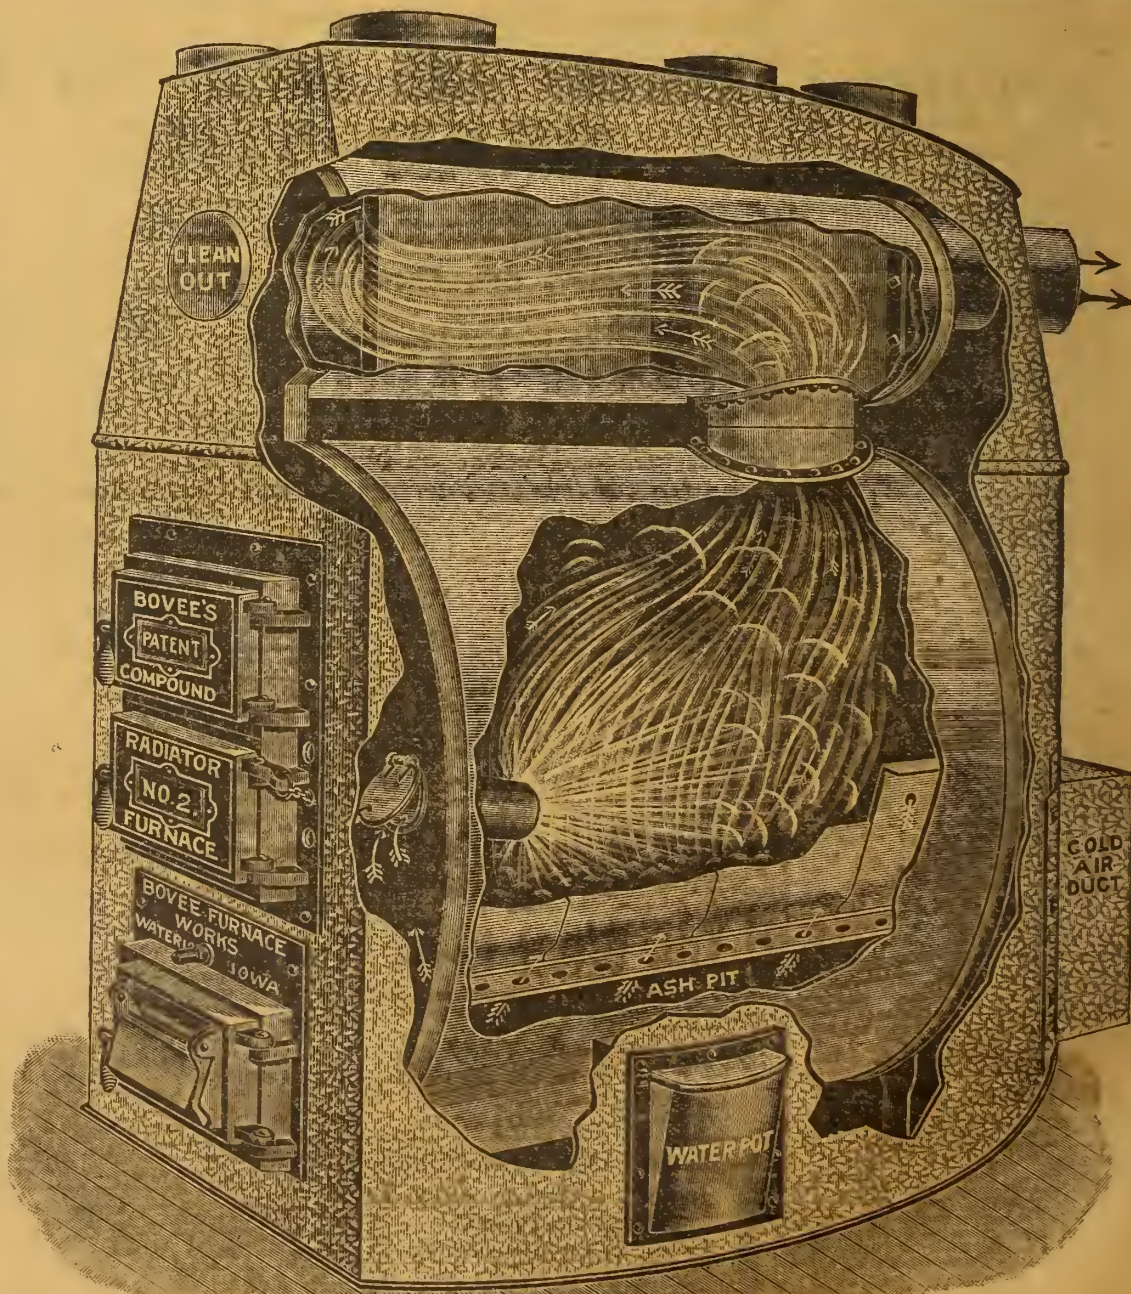

doctor is located at Kansas City, and is reputed to be a success in curing this trouble. He is a reliable man and no one need hesitate to deal with him, as he makes his word good in all dealings.

TEXAS LAND.

Our readers should note the advertisement of the Coldren Land Co., of Kansas City, Mo., on page 25 of this issue. They own a big tract of land in the Panhandle, and are selling it at low prices. Write them and get particulars.

BUY A FARM NEAR KANSAS CITY.

In this issue of The Homestead the Allen Investment Co., of Kansas City, Mo., are offering a splendid farm bargain, 550 acres of good land only thirty miles from Kansas City, one of the greatest markets in the world. This farm is offered at \$56 per acre, and there is \$6,500 worth of improvements on it. The owners of this farm have made money on this place and expect to buy a much larger farm. This shows that anyone buying it would do well. Furthermore, the land so near such a market is worth much more money than is asked for it. Better write at once, as it will not be on the market long

As it is now time to install a heating plant, we give an illustration of the Bovee Hot Blast Ventilating Furnace, manufactured by the Bovee Grinder & Furnace Works, Waterloo, Iowa, which has been on the market for ten years and is well known to be a reliable, economical furnace and the great advantage of its hot blast ventilating system in saving fuel and giving perfect ventilation in the house cannot be over estimated. It is considered by many to be worth the entire price charged for the whole heating plant. The extensive and economical method of manufacturing and selling employed by the Bovee Furnace Works enables them to sell a really high-grade furnace for much less than is usually charged, and we recommend every farmer to send and get their free catalog showing the many styles and sizes of houses and heating plants used, also much other valuable information in regard to heating.

at this figure. Look up advertisement on page 24.

A RELIABLE MAN.

Dr. J. C. McLaughlin, of Kansas City, has an advertisement in this issue calling attention to his great treatment for the cure of cancer, tumor, ulcers, etc. Dr. McLaughlin is a man of good reputation and he has been dealing with the public in this line for years. He makes his statements good, as he is responsible and reliable in all his dealings. If interested, don't fail to read his advertisement on page 20 and write him.

FARMERS HAVING HIDES, FURS,

Pelts, wool, etc., to sell are naturally interested in learning where they should ship their goods in order to obtain the best all-around treatment, both in regard to prices and grading of goods. In this connection we call our readers' attention to the Bernan Bros. advertisement which starts on page 19 of this issue. We believe this firm to be entirely reliable, and the reader should read carefully what they have to say, and if interested make them a trial shipment.

CURING HOG CHOLERA.

Hog cholera is conceded to be a germ disease, and the Cholerae Company, of Kansas City, have a remedy which kills the germs. This is the reason it has been curing hog cholera since 1889. This remedy also cures chicken cholera, which is also caused by germs. Hence, the same remedy serves both purposes. The Cholerae Company is a reliable concern. They sell this remedy at \$1 per box, and they refund the dollar if it isn't satisfactory—certainly a fair offer. It's a pretty low price, but the company is reliable and make their claims good. The remedy not only prevents, but cures. See their advertisement on page 17.

THE WOMAN ON THE FARM.

As a rule the woman on the farm has charge of the poultry. Goodness knows, she has plenty of small troubles in handling the birds to get the most productive results in weight of birds and number of eggs. To keep them well and healthy is the main problem. We have just read a very interesting little book, entitled "Chicken Chat," published by the Zenner Disinfectant Company, 31 Lafayette Ave., Detroit, and we understand that these people, the makers of Zenoleum disinfectant and insecticide, will be glad to send a copy of this booklet, charges prepaid, to any reader of The Homestead who will write for it. We earnestly recommend that every woman reader write at once. The edition is limited, and the first comers will be served quickest. Better sit down and write a postal card now.

MEADOW KING HAY CARRIER.

The J. E. Porter Company, of Ottawa, Ill., refer with pride to the substantial favor which its "Meadow King" hay carrier has met at the hands of the trade. The unique feature of this carrier is that the supporting dogs catch and hold the sheave or wheel of the fork pulley, thereby allowing the greatest range of adjustment with absolutely no friction on the supporting dogs, as the adjustment is obtained by the swinging of the pulley frame on the axle, while the sheave is perfectly motionless when in the carrier. The pulley enters high up in the carrier and enables the farmer to fill his hay mow full to the roof. Any of our subscribers intending to purchase a hay carrier should send for an illustrated catalog, describing their full line of hay tools and barn door hangers, to the J. E. Porter Company, Ottawa, Ill. See advertisement on this page.

A GUARANTEED WASHER.

The 1900 Washer Company, of Binghamton, N. Y., are making an exceedingly liberal offer in their advertisement on page 19 of this issue. They are offering a guaranteed washing machine on the weekly or monthly payment plan, the price of which is \$5.50, which amounts to ten and a half cents per week for a year or forty-six cents a month for twelve months. Every part of the 1900 Washer is guaranteed for a period of four years. It will wash the heaviest blankets, rugs and carpets and does not, like other washers, wear out clothes; indeed, it saves its cost in a few months. A postal card will bring you a pamphlet describing all about the 1900 home washer offer. This washer will be shipped to any responsible party on his request without a penny in cash being paid

in advance. For booklet address 1900 Washer Company, 124 Henry St., Binghamton, N. Y.

A NEW KEROSENE LAMP.

On page 19 of this issue will be found the advertisement of the Angle Manufacturing Company, of 78-80 Murray St., New York. This firm manufactures the Angle Lamp, which utilizes kerosene for lighting purposes, but on an entirely new principle. It is safe, convenient and easy to operate; is lighted and extinguished like gas, and may be turned high or low without odor. It gives a beautiful soft light that cannot be obtained in any other way than through the use of kerosene, used according to the new principle. Catalog No. 33 has a full description of this lamp, together with prices. It may be obtained free upon application to the Angle Manufacturing Company, 78-80 Murray St., New York.

SELECTING TREES AND PLANTS.

By adopting a decidedly novel and vivid trade mark, the Phoenix Nursery Company, 200 Park street, Bloomington, Ill., have made their products known and respected throughout every section of the land. Every plant, tree or shrub shipped from this nursery bears a red tag, hence the name, "Red Tag Trees." This red tag means that that plant is absolutely true to name and has been grown under the best possible conditions. This method of trade marking is a protective measure, the value of which is readily apparent to the purchaser. The Phoenix Nursery Company have been in existence ever since 1852, and at present they have over 600 acres in cultivation, and thirteen mammoth green houses filled with fine, healthy, stocky plants. The Phoenix Nursery catalog shows a wonderful collection of trees, plants and shrubs of every description—a veritable encyclopedia of plant life. It is a book well worth the perusal of everyone interested in trees, shrubs and plants of every kind. A copy may be had by simply requesting one by mail.

A TELEPHONE LIBRARY.

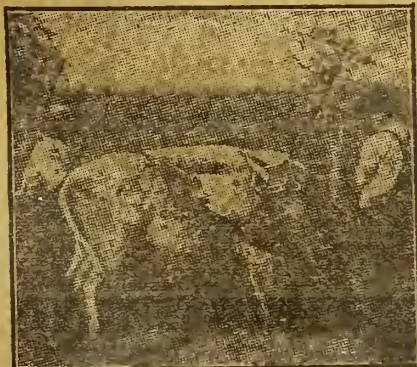

The attention of our readers is called to an advertisement of the Chicago Telephone Supply Company, of Elkhart, Ind., which appears on page 16. This company's offer of free booklets on telephones is really worthy of consideration, and readers who are interested in rural party lines will find it greatly to their advantage to avail themselves of the opportunity to secure one or more copies. These books are of unusual merit. One deals with "Telephone Lines and How to Build Them," another tells "How Telephones are Made," and another deals with "Magnet Telephone." All are handsomely illustrated with full page photographs of the telephone, showing latest improvements. This company undoubtedly have strong claims on the attention of farmers and others interested in rural telephone service, as the Chicago Telephone Supply Company have made a specialty of this branch of the business. Its "Free Lightning Insurance Policy" of its own telephone (copy of which will be sent to anyone on application) and its guarantee bond are remarkable assurances of protection. But the opportunity to add the telephone library to your collection of literature is one not to be overlooked. We advise readers to write early for these books.

MILK CAN BE MADE TO YIELD LARGER PROFITS

But the volume of the profits depends largely on the way your milk is handled. Everybody knows it the cream that makes milk "rich," as we say, yet a large number of milk producers are letting dollars slip through their fingers by continuing the use of old-fashioned methods of skimming cream when a modern cream-saving machine like the United States Separator would make their profits very much larger. The United States has proved to many a dairyman that it is the most profitable machine ever put on a farm. This is strikingly shown in the experiences related by Mr. R. A. Shufelt, on page 15, which may give some "pointers" to dairy-men who still persist in using the old gravity methods of skimming. The United States is a thoroughly standard, reliable cream separator, and made by a concern who have been successfully manufacturing dairy machinery for over thirty-three years. Their new catalog is very interesting reading, and contains many illustrations from photographs of the different parts of the machine, so that its construction and operation is made perfectly plain. They will be very glad to send one if you will just write to "Send new catalog No. 81."

HORNS POSITIVELY DANGEROUS.

Every cow in your herd may look very docile and kind-tempered. But cows cannot be depended on. They may suddenly injure you, your hired man, worry the herd and even cause their death or disablement. It's safer for all to dehorn every cow, steer and bull. Whether dairyman or stock raiser, this argument applies with equal force. Dehorned steers put on two to three hundred more pounds of flesh when compared with

those having horns, because they rest more quietly. Dairy-men need not fear to dehorn. The excitement lasts but a few hours and the little loss of milk (usually less than 2 per cent) is more than compensated by the greatly increased flow caused by the greater quietness of the entire herd. The humane instrument to use, manufactured by M. T. Phillips, Pomeroy, Pa., is the Keystone Dehorner. It is made in two designs—improved and regular style. Both are standard, the

Double Volume of Sound.

THE Duplex is the first and the only phonograph to collect the vibrations and get all the sound from both sides of the record. Because the reproducer or sound box of the Duplex has two vibrating diaphragms and two horns (as you see) to amplify the sound from both sides of both diaphragms. The Duplex, therefore, gives you all the music produced—with any other you lose one-half. Compare the volume of sound produced by it with the volume of any other—no matter what its price—and judge for yourself.

Purer, Sweeter Tone.

BUT that is not all, by any means. For the Duplex Phonograph not only produces more music—a greater volume—but the tone is clearer, sweeter, purer and more nearly like the original than is produced by any other mechanical means. By using two diaphragms in the Duplex we are able to dispense entirely with all springs in the reproducer.

The tension spring used in the old style reproducers to jerk the diaphragm back into position each time it vibrates, by its jerking pull roughens the fine wave groove in the record, and that causes the squeaking, squawking, harsh, metallic sound that sets your teeth on edge when you hear the old style phonograph. In the Duplex the wave grooves of the record remain perfectly smooth—there is nothing to roughen them—and the result is an exact reproduction of the original sound.

Direct From Our Factory.

WE ask the privilege of proving to you that the Duplex gives a double volume of music, of purer, sweeter tone than any other phonograph made. We want to prove it at our expense. We ask you to let us send you one at our expense—under an arrangement mutually satisfactory—for use in your home one week.

Invite your neighbors and musical friends to hear it and if they do not pronounce it better—in volume

Write today for catalog and full particulars of our FREE trial offer.
You'll never regret it. Please address

The Duplex Phonograph Co., 179 Patterson Street, Kalamazoo, Mich.

SAVE ALL
the DEALERS'
70% PROFIT

ORDER EARLY.

Each horn is 18 inches long with a 17 inch bell.

An Entirely New Principle in Phonographs

- Two vibrating diaphragms to reproduce the sound.
- Two horns to amplify and multiply all the sound from both sides of both diaphragms.
- No tension spring and no swing arm to cause harsh, discordant mechanical sounds.
- Consequently, the Duplex produces a sweeter tone and greater volume of music than any other phonograph and is absolutely free from all metallic sounds.

Size of cabinet, 18 inches by 14 by 10 inches high.

and in tone—than the best old style phonograph, return it at once at our expense. That's a fair offer but it isn't all.

We save you in the price exactly \$70.15—because we save you all the jobbers', middlemen's and dealers' profits. We are actual manufacturers—not jobbers—and sell direct to you at factory prices.

Sold through dealers the Duplex would cost you at least \$100—and it would be a bargain at that. Bought direct from our factory it costs you (one profit added) only

\$29.85

And you get a seven days' trial in your own home—and under no obligation to keep it if you are not satisfied. You run no risk, for this advertisement could not appear in this paper if we did not carry out our promises.

Music In Your Home.

WITH the Duplex Phonograph you can enjoy a delightful selection of songs, poems, piano, banjo, guitar, or violin music, short stories, anecdotes or dialect pieces, all reproduced by the marvelous two horned Duplex with the faultless fidelity of an instantaneous photograph.

You can bring to your family and friends, in all their original beauty, the priceless gems of musical art, the classic performances of famous artists like Paderewski, D'Albert, Raoul Pugno, and Jau Kubelik.

Or, you can listen, entranced, to the magic notes of melody fresh from the throat of a Patti, Melba, or Calve, and the great dramatic tenors, Caruso and Tamagno.

And best of all, you can hear once more, the voice of dear old Joe Jefferson as, with matchless pathos he delivers the lines of Rip Van Winkle so familiar to a former generation.

With every Duplex we send free
three 10 inch records.

former being lighter in weight and of greater cutting power. It is built on the same principle as the regular Keystone. The Keystone sovers the horn "in a jiffy," with little pain. It leaves a clean, smooth stump that readily heals with scarcely any discomfort to the animal. All over in a minute. No sawing, torn flesh, crushing or mangling of head. The cutting blades are of the finest steel specially tempered—keen and strong. The Keystone is very popular at experiment stations. Mr. Phillips sends free a handsome book in orange and black that discusses the subject thoroughly.

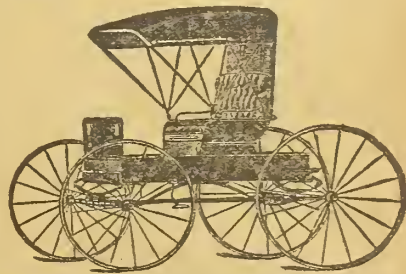

THE MODERN METHOD OF SELLING FARMS BY MAIL.

A new note has been introduced into selling real estate by the Glenn Realty Company, whose advertisement appears on page 25 of this issue, located in Kansas City, Mo. This concern have been eminently successful during their long business life in disposing of desirable farm property regardless of location. They employ a unique combination plan, which depends upon scientific advertising of the properties in publications that reach large numbers of real estate buyers, home-seekers and investors, and by personal solicitation among the buyers who visit Kansas City. Kansas City enjoys peculiar advantages in the matter of location, being the geographical center of the United States and having unsurpassed railroad facilities. This results in bringing more real estate buyers to that city, perhaps, than to any other city in the country. The Glenn Realty Company have excellent facilities for meeting and interesting these people, and the number of sales of farm property to their credit is almost beyond belief. This paper takes great pleasure in commending the Glenn Realty Company to prospective buyers or sellers of farm property. The concern are reliable, and their system is marvelously efficient in securing quick sales, satisfactory prices and perfect results in every way. The concern are located in the Kansas City Life Building, Kansas City, Mo.

HOG CHOLERA AND OTHER TROUBLES.

It is a long time since the corn belt states have been bothered so much with cholera and other troubles in hogs as at the present. And just now, while hogs are worth good money, is the time relief is most desired. It seems strange that the owners of good hogs will allow their herds to continue in bad health, full of worms and not getting the full benefit of their food. It is just as easy to keep hogs in good shape and growing nicely as to allow them to be unhealthy and subject to disease. Many of the best-known breeders and most extensive farmers in the country say there is sure relief for the hogs in the Snoddy system of treatment. Such men as Messrs. O. S. Sweet, Paulina, Iowa; P. W. Peterson, Vermillion, S. D.; J. C. Gaebel, Louisville, Neb.; Dave Rankin, Tarkio, Mo.; Geo. Seckman, Ripley, Ill., and hundreds of oth-

ers who have used this treatment for years very highly recommended it. These men are too well known to need introduction, and what they say counts for something. In their endorsements of this treatment these men say it is a great worm exterminator, a fine health and thrift producer and that it actually cures and prevents cholera, swine plague and like diseases. Write to Snoddy Remedy Company, Box 852, Des Moines, Iowa, for circulars showing the pictures and endorsements of the men above named, and hundreds of others. They will also send you a book of valuable information on the hog and his troubles. Investigate this at once and learn how to grow hogs with a profit to yourself.

NOW IS JUST THE TIME TO BUY THAT NEW BUGGY

In the Fall of the year, after the hard Summer's work is over, the weather settled, and the roads are usually good, it's a fine time to have a new buggy.

The Ohio Carriage Manufacturing Company of Cincinnati, Ohio, manufacturers of the celebrated Split Hickory vehicles, say that you will be surprised to know what a splendid Fall business they have on their made-to-order Split Hickory vehicles.

They say that a few years ago they did not receive many Fall orders, but that now people have commenced to realize that the Fall of the year is a fine time to get in their new buggy, on account of the good roads, and the fact that people seem to use buggies later in the season than they used to.

The Ohio Carriage Manufacturing Company is one of the largest manufacturers of high-grade vehicles in the country, and they sell the product of their entire factories direct to users by mail. They issue a fine catalogue, and their prices on vehicles, quality considered, are very low.

If you think you would like to have a nice new buggy this Fall, why not write to the Ohio Carriage Manufacturing Company now, and get their free catalogue at once? If you have never seen it, you will be surprised to know what a fine buggy book this concern issues, how reasonable their prices are, and how liberal their methods of doing business. Their address is the OHIO CARRIAGE MFG. COMPANY, Station 31 Cincinnati, O.

Porter's "Meadow King" Hay Carrier

Has wide open mouth, with swinging fork pulley. With this Carrier you can fill the mow closer to the roof of barn than with any other Hay Carrier. The throat of the Carrier has a very large opening, which permits the pulley to approach with a swinging load, and the load can swing in either direction when loaded in the Carrier.

FIELD NOTES.

Mr. W. C. Frazier, of Atlantic, Iowa, offers Shropshire rams and ewes for sale.

Mr. Humbert's twenty-seventh annual importation of Percheron horses are now safely quartered in their barns at Corning, Iowa. They have eighty head of stallions and mares

and it will pay anyone who wants a horse to go and see them.

Mr. S. S. Stolt, of Kiron, Iowa, has some good Oxford Down rams for sale.

Augora goats are offered for sale by Mr. S. S. McKibbin, of Desoto, Iowa.

Cotswold rams are offered for sale by Mr. A. Latimer Wilson, of Creston, Iowa.

Dr. H. Pritchard, of Wisner, Neb., offers some great big Poland China boars for sale.

Big-boned, growthy Poland China boars can be had of Mr. John Schneider, of Remsen, Iowa.

Some good young Short-horn bulls are offered for sale by Mr. W. E. Cutler, of Corydon, Iowa.

Registered Shropshire rams and ewes are offered for sale by Mr. Willard Miller, of Anita, Iowa.

Thirty very choice Chester White boars are offered for sale by Mr. A. A. Rogers, of Inwood, Iowa.

Some very choice Sunshine boars are offered for sale by Messrs. William Uhe & Son, of South Omaha, Neb.

Fifty Hereford bulls and 100 choice females are offered for sale by Mr. Will Wheeler, of Harlan, Iowa.

A good stock farm of 320 acres is offered for rent by Mr. J. F. Lynch, of New Hampton, Iowa, on page 24 of this issue.

Twenty-five good males are offered for sale or exchange for land or draft stallion by Mr. L. Sheets, of Carson, Iowa.

Mr. Charles W. Dows, of Harlan, Iowa, has some good young Short-horn bulls and some well-bred Poland China boars for sale.

Messrs. Reubel Bros., of Rockwell City, Iowa, are offering thirty good Poland China boars for sale, and these have size, quality and finish combined.

Mr. Austin Renshaw, of Blair, Neb., is offering some good Duroc Jersey spring boars for sale sired by the noted Iowa State Fair winner, Junior Jim.

Remember the Duroc Jersey sale of Mr. J. E. Wehr, at Portsmouth, Iowa, on October 20th. He will sell a lot of good boars and sows on that occasion.

Mr. Henry Dorr, of Remsen, Iowa, has an excellent lot of Poland China boars for sale, and his stock always gives satisfaction, and his prices are always right.

Large, improved, English Yorkshires are for sale by Mr. F. Rabeller, of Leigh, Neb. This is one of the best herds in America. Write them for prices.

Mr. W. D. Pittman, of Lake City, Iowa, offers boars for sale by the World's Fair winner, Ohio Chief. If you want a Duroc Jersey herd header write him.

Mr. A. H. Gerot, of Riverside, Iowa, is offering Scotch Collie female dogs for sale at what he terms "snap prices" in his advertisement on page 35 of this issue.

Good Chester White boars and sows are offered for sale by Mr. G. W. Lawse, of Harlan, Iowa. Read his list of winnings in his advertisement in this issue of The Homestead.

Remember the Duroc Jersey sale of Mr. J. E. Wehr, at Portsmouth, Iowa, on October 20th. He is selling the tops of this year's raising, among which are a splendid lot of boars.

The Short-horn and Poland China sale of Mr. T. A. Baldwin, of Emmetsburg, Iowa, has been postponed from October 30th to some time in December, date to be announced later.

A better bunch of Poland Chinas is not offered for sale in the West than those that Mr. J. C. Hoag, of Manson, Iowa, is now offering for sale. Read his advertisement and write him for prices.

Choice registered Shropshire ewes and pure-bred unregistered ewes are offered for sale by Messrs. Daniel Leonard & Sons, of Corning, Iowa. They also have choice rams suitable for flock headers.

Mr. Minton L. Challberg, of Ogden, Iowa, has a few Chester White boars of April farrow for sale on which he will quote right prices. He guarantees their quality. See advertisement on page 35.

Mr. W. F. Kilpatrick, of Harlan, Iowa, can furnish the readers of The Homestead with White Wyandotte cockerels scoring from 94 to 96 points. Write him for prices as per advertisement on page 35 of this issue.

A grand lot of Poland China boars are offered for sale by Messrs. Henry Bros., of Le Mars, Iowa. These are mostly sired by Matchless Perfection Jr., the two times sweepstakes boar at the Interstate Fair.

Mr. A. C. Lanham, of Battle Creek, Iowa, offers a few good boars for sale sired by L's Sunshine, winner of second prize at the Interstate Fair. He is one of the largest and smoothest yearlings in the Northwest.

Mr. C. H. Drake, of Stockport, Iowa, has some large, early, heavy-boned Poland China boars of the very best blood lines, which he is offering to sell cheap to quick buyers. See his advertisement, which appears on page 35 of this issue.

Mr. Charles M. Hulbert, of Oakland, Neb., has some cracking good Poland China boars for sale sired by his noted prize-winning boar, Oakland's Prospect. To those who are looking for size, bone and finish we would call their attention to the Hulbert herd.

Mr. E. F. Escher, of Manning, Iowa, writes: "Just say to The Homestead readers that I never had such a uniform lot of boars as I am now offering for sale. These are mostly sired by my 1,000-pound boar, Gay Monarch. Special prices for next thirty days."

Mr. J. L. Barber, of Harlan, Iowa, offers some grand good Chester White boars and sows for sale, every one of which is either sired by a prize-winning boar or else is out of a prize-winning sow. He has some good ones and we can recommend them to Homestead reader.

Chester White breeders should order their boars from Messrs. Humbert & White, of Nashua and New Hampton, Iowa, proprietors of the champion herds of Chester Whites. This firm have won more ribbons this year at the leading fairs than any other herd. Write them for particulars and prices, kind-

Home of Evergreen Stock Farm herd of Poland Chinas, owned by the well-known breeder, Mr. Henry Dorr, of Remsen, Iowa.

ly mentioning The Homestead as per advertisement on page 41.

Mr. Bulus H. Flanagan, of Pleasantville, Iowa, makes the statement in his advertisement on page 35 of this issue that he has forty choice white Plymouth Rock cockerels and sixty good pullets for sale at low prices. They are of March and April hatch, pure white and of Pishel and Root strains.

Mr. M. M. Blimendorf, breeder of Duroc Jersey swine, of Lacona, Iowa, writes that he has purchased a son of Tip Top Notcher, and since he is pretty well stocked with the blood of Duke of Ohio 29529 he is now offering the latter-named boar for sale. Mr. Blimendorf's advertisement appears on page 47.

An auction sale of seventy registered Aberdeen Angus cattle is announced to take place in the sale pavilion, at Waterloo, Iowa, on October 23d, by Mr. H. J. Starkey, of that place. These cattle are said to be extra well bred and in fine condition. See advertisement which appears on page 43 of this issue.

Mr. Frank Kean, of Mt. Pleasant, Iowa, has some growthy Duroc Jerseys of the best of breeding which he is offering for sale on page 35 of this issue of The Homestead. Mr. Kean writes: "My bogs are not fat, but in good growing condition and are of good color, with extra heavy bone. I can furnish pigs not akin."

Mr. J. E. Stephenson, of Alburnett, Iowa, has six good Short-horn bulls ranging in age from six to eighteen months old which he is offering for sale to Homestead readers in his advertisement that appears on page 35 of this issue. They are Scotch topped and are considered by Mr. Stephenson to be good ones. He also has Poland China hogs for sale.

Mr. E. O. Wolcott, of Gilmore City, Iowa, has a choice lot of Poland China boars which he wishes to sell as per his advertisement on page 46. He writes as follows in regard to his stock: "The Poland China boar pigs that I am offering for sale are of the large, smooth kind, with plenty of bone and the best of breeding. The two-year-old boar is of the very best breeding and his pigs all have fine bone. I think this stock will please."

Mr. G. W. Sharp, of Marble Rock, Iowa, proprietor of the Shady Lane herd of Red Polled cattle, is offering choice stock for sale at low prices in his advertisement on page 45 of this issue. Mr. Sharp writes: "The four choice young bulls are gone and I am offering my herd bull, Chicago Boy, a splendid fellow, and a bargain if taken soon, as I cannot use him any more in my herd. I have had a splendid trade in Poland China boars, having only four left for sale."

The Michigan Land Association, of Manistee, Mich., is desirous of getting in communication with sheep breeders and stock raisers for the purpose of advising them what it means to follow these vocations in the state of Michigan. They have over 4,000 acres of first-class grass land which they will sell at low prices. If the reader of this notice is interested, drop them a postal, after reading the advertisement which appears on page 24 of this issue.

Mr. W. J. Hartung, of Maxwell, Iowa, breeder of Duroc Jersey swine, in sending in change of copy for his advertisement found on page 46 of this issue, writes: "My pigs are doing fine. I still have on hand some choice males that will make fine herd leaders for the farmers that will be priced within the reach of all to close them out at once, and everything that leaves Oak Park Farm leaves it with a guarantee that it is as described or money refunded. I have two pigs that are good enough for me to use in my herd; one sired by Manley Orion and is the top pig sired by Manley Orion this year; the other is by Keep On 2d, be by Iowa Banker, dam Nellie Banker by Reed's Banker. These are extra good pigs, good bone and color. I could spare one of them and will price him worth the money to anyone that can use a good pig. The rest of my males are sired by

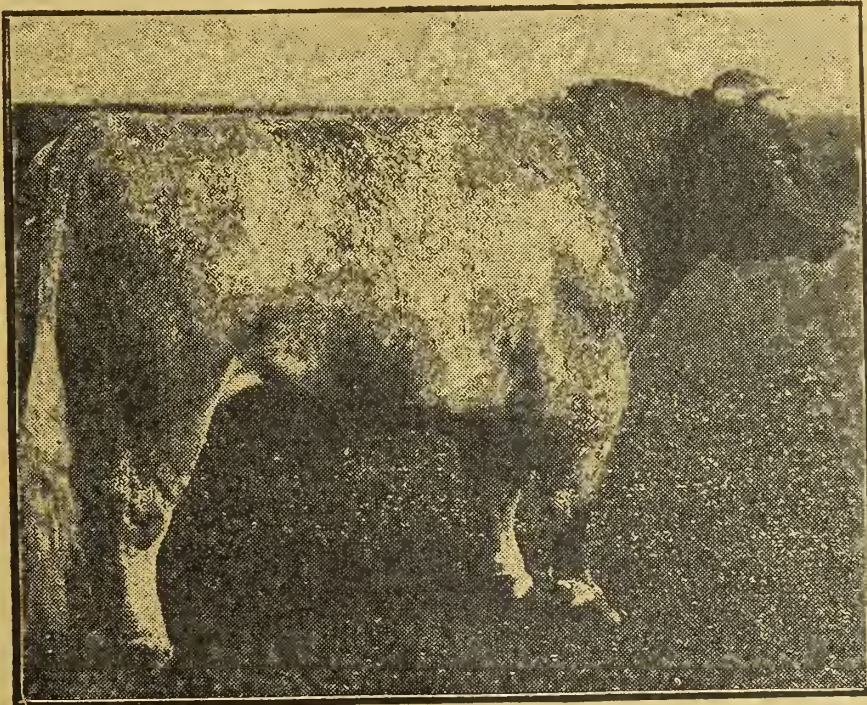

Malcom's Model 11, and Gold Standard. All gilts are reserved for my brood sow sale, February 9, 1907. This offering will be better than any offering I have ever made."

Messrs. Rood Bros., of Lake Park, Iowa, are offering some good male Duroc Jersey pigs for sale at farmers' prices, guaranteed to be all O. K., in their advertisement that appears on page 35 of this issue. They also have a few matured sows which they will sell, including Lady Bell 2d 49942, first-prize sow at the Minnesota State Fair in the one and under two year class. She is a wonderfully good sow and will do somebody a world of good. Anyone wanting a first-class sow and great breeding sow will do well to write them in regard to her.

Mr. W. C. Frazier, breeder of registered Shropshire sheep, of Atlantic, Iowa, writes: "I have prepared a list of registered Shropshire ewes for fall sales, giving the age, weight of fleece and price of each ewe. Among these ewes are some of my very best breeders, that always have twins and raise them, and whose lambs are of the best quality. There can be no complaint on the demand for sheep, nor in the way they are purchased. If you have what the people want and put a fair price on it, it is sold." See advertisement on page 18.

Mr. J. G. Truman, manager of Trumans' Pioneer Stud Farm, of Busberrill, Ill., writes: "I wish to say that our horses have arrived home from the Kansas City Royal in first-class condition. I am pleased to say that out of a possible four championships we won three. We also won practically everything in the Hackney stallion and mare classes and a good share of the Shire classes. We were never in a better position to supply our customers than at the present time. Notwithstanding our increased facilities, every stall is full and has a first-class stallion in it. I am advised by our Mr. J. H. Truman that he has another importation of Shire and Hackney stallions ready to leave England as soon as we have a little room for them here. While we are not advertising any low prices as a decoy to catch prospective buyers, I will say to your readers that we will sell them either a Shire or Hackney stallion for less money than any other importer can. The facts are, if we

in England and have been champions at the leading fairs since being in America. Two weeks ago at the Missouri State Fair our sheep won all the championships over strong competition from all over the United States and the champions from Canada. Our ewes with their high quality and being bred to such rams, nearly places them in a class by themselves and the lambs

British Glory 180304, Owned by C. F. Curtiss & Ogle, of Ames, Ia.; Head of Rookwood Herd.

wish we can sell them for about the same price as other importers pay for them in England, as owing to our buying facilities we can get them at a much lower price. We are offering every one of our prize winners for sale and we have twenty of them that have won prizes this fall at the different state fairs and horse shows. We shall be pleased to bear from any of our readers contemplating buying a stallion of either breed this fall."

Mr. U. G. Davidson, of Manson, Iowa, breeder of Duroc Jersey swine, in sending in new advertisement writes: "I have a few show hogs by Crimson Wonder I Am and Iowa Wonder that are now ready to go out. If these get into good hands they will be heard from later. I also have one of the best sons of Orion for sale. I am taking sows for service to Crimson Wonder I Am at \$100 service fee. None but sows of reputation and known quality will be accepted. Come and visit the herd or write and mention The Homestead." See advertisement on page 35.

Messrs. Chandler Bros., of Kellerton, Iowa, breeders and importers of registered sheep, write: "We have sold over 300 English and American-bred yearling rams this season to the best breeders throughout the United States and have no more to offer. Have a number of the biggest and best ram and ewe lambs that we have seen on one farm. They show great type and, no doubt, will mature to be wonderfully good sires. Ram lambs can be used on several ewes this season and will be worth more next year than they cost now. Ewe lambs can be purchased at a low figure and we will make special prices to those wanting a few. We are also offering 150 beautiful yearling ewes that have good size and mutton form, heavy fleeces and are first class in every particular. Seeing them will do anyone good that likes good Shropshires. They show the results of years of careful breeding from the best sires and dams that can be found in England. They are being bred to the Royal winning rams that we imported this year. These rams were first-prize winners

Rex Flintkote ROOFING

LOOK FOR THE BOY
MADE IN U.S.A.
REX FLINTKOTE

A Time-Tested Roofing

Rex Flintkote Roofing is not something that you need try at a risk. It is made by a firm that has been in business since 1837. It has been tested for its waterproof and fire-resisting qualities, for its durability and for its economy. We are in constant receipt of letters like the following:

"The Rex Flintkote Roofing that we put on our sheds in 1902 and 1903 is in good condition to-day, and after a new coating of paint this summer we think they will be as good as new. We have one roof of another brand that has always leaked and given us trouble, and we are going to replace it with Rex Flintkote."

Yours truly, Haynes Brothers, Cadillac, Mich."

Beware of imitations. The "Look for the Boy" trade mark is the sure guide. If you do not know of a dealer who has the genuine, write us for the name of one near you who does.

Sample of the roofing and booklet of roofing points sent free. We make a red paint for an artistic Rex Flintkote roof, where looks count.

FARM BUILDINGS.

feet. The pigs in this herd are worthy ones and if you want something extra good, get in correspondence with Messrs. Sandquist Bros. at once and be sure to get the best of the bunch.

Mr. James Spear, of Stanwood, Iowa, in his advertisement on page 35 of this issue is offering for sale some choice Aberdeen Angus bulls and heifers, also some Duroc Jersey swine of Orion and Advance blood. He writes that he will sell them very low, as he has more than he can winter well.

The "Wild Rose" herd of Poland Chinas, owned by that old reliable breeder, Mr. W. N. Booth, of Danbury, Iowa, was never in a better condition to furnish choice spring and fall boars than right now. No better breeding can be had than is to be found in the Booth herd and his prices are right.

The Old Reliable herd of Berkshires are once more occupying advertising space in The Homestead. Those of our readers who visited the state fair will remember the good exhibit made by Messrs. Houghton & Braman, of Marshalltown, Iowa. They have the good, useful bog, not overdone with feed, but in good breeding shape. They report that they have only had one non-breeder in the last five years. They write: "We advertise these bogs to sell and think we can suit most people from those looking for a showy herd boar to one for half the money for cross breeding purposes. Our litters run large and our sows are good mothers. We can sell groups very low for starting a herd." See advertisement on page 35 of this issue.

A public sale of Duroc Jersey swine is announced to take place on February 26th at Lake City, Iowa, the property of Mr. W. D. Pittman, at which time he will have for sale some of the best blood ever offered at public auction. Mr. Pittman says: "I will offer granddaughters of Nebraska Belle, also daughters of Zoov Orion, half sister to the \$1,275 hog, sold in Manley's sale last spring, and Ohio Chief gilts. Am going to use such males as Crimson Wonder Jr., Ohio Chief, Zoov Orion and Tip Top Notcher, out of Nebraska Belle II. Of the sows that I will offer for sale at that time, I have two Ohio Chief, two Zoov Orion, three Tip Top Notcher, two Leather Stockings, also Orion, but they are going almost every day. My males are fine ones and I can suit anyone at reasonable prices."

Mr. Fred Ebendorf, breeder of Poland China swine, Strawberry Point, Iowa, whose advertisement appears on page 46, writes: "Correct I know Jr. weighs 300 pounds in working order, is a large, showy bog from end to end, and is a great breeder. My fall males are a fancy lot with lots of size, quality and bone and weigh from 300 to 400 pounds. They are sired by L.'s Tecumseh 2d 70627 and are of October farrow out of Perfection and Tecumseh sows. All go at bargain prices. I also have some strictly choice spring males by L.'s Tecumseh 2d; several males that will make herd leaders by a son of Corrector, and a litter by Correct I Know Jr. These last will just suit parties wanting size. I also have several choice males by Hustle On that are developing nicely and which are just the type that all are looking for." Mr. Ebendorf also has a stock farm for sale which is well fitted for the handling of bogs. Full particulars can be had by writing him at the above address.

Messrs. J. L. Miller & Sons, breeders of Poland China swine, of Brooklyn, Iowa, writing in regard to the stock that will go into their public sale at that place on the 24th of this month, say: "We are offering a draft of Poland Chinas that for breeding and quality are as good as any that will go through a sale ring this season. We have sold no pigs this season, reserving them all for this sale. They are of the large, growthy type, with extra good bone and length of body, and are the very best of feeders. They are just the kind of hog that the breeders and farmers are looking for. Lady Wilkes 26358 has five September, 1905, boars in this offering that are good ones. No. 1 in the catalog is in this litter, and he will make a show hog with the right kind of care. Bess Chief 268024 has two fancy pigs of September, 1906, farrow that are corks and good enough to go in any company. They have fine heads and ears, and extra good backs, and are sired by J. L. Perfection 105711. Bess Chief also has four March, 1906, hogs in this sale that are sired by Willow Lawn Chief 105709. All that are good, lengthy, strong fellows. All the sires and dams of the hogs in this offering are recorded, and there will be no trouble in getting pedigrees. Homestead readers can rest assured that they will not

INVEST \$1 AND PROVIDE An Income for Life

Strange as it may appear, we actually pay a regular income on every dollar invested in our guaranteed Preferred Shares (with coupons attached like government bonds). Absolutely safe and profits sure—no risk. Own and control money-making enterprises, mining claims, real estate and a big \$50,000 modern business block; have been firmly established 16 to 20 years. Doing a big business and rapidly increasing.

Eight Dividends Paid!

With the December disbursements of profits we will have paid our stockholders eight dividends within two years, aggregating double the profits guaranteed. Invest now and get your share of the next big dividend. Every day you delay you are losing actual cash.

Free! To each person sending us \$1 to invest in our Guaranteed Preferred Shares we will promptly issue and send you certificate with income coupons attached, also prospectus fully describing our company, the property we own, and explaining in detail how to profitably invest larger sums. We will also send you free for a full year a beautifully illustrated Western Magazine, the only publication of the kind in existence; tells all about the West, and will keep you posted on the progress made by the company. We make this unheard-of offer to prove our honesty and good intentions.

Send Us \$1 and your income actually commences the very day your money reaches Denver. This is no scheme or humbug—if you are not delighted with the investment we will promptly refund your dollar and no questions asked. A few honest agents wanted. Remit by money order, registered letter or enclose a dollar bill (no more) in your letter and address at once.

ROCKY MOUNTAIN INVESTMENT CO.,
Sole Official Brokers,
129 Tremont Building, Denver, Colo.

be disappointed in attending this sale. It has been truly said that the boar is more than one-half the herd, and a few extra dollars invested in just the type of hog you want is money well invested. All are cordially invited to attend this sale. Note the advertisement on page 39 of this issue, and write Messrs. Miller & Sons, at the above address for catalog, mentioning The Homestead.

Mr. S. J. Miller, of Kirksville, Mo., whose advertisement offering fox terriers for sale, appears on page 16, writes as follows in regard to them: "The puppies that I am offering for sale are all well marked with black and tan hoods and plenty of body marking. The two aged females are snappers for some one. They are well marked and exceptionally well bred. Two better watch dogs cannot be found anywhere, and rats simply cannot live in the neighborhood where they are."

Messrs. Watt & Foust, of Cedarville and Xenia, Ohio, write: "We have just returned from the Ohio, New York and Kentucky State Fair circuit, where we won seventy-nine ribbons out of a total of ninety-two. We also won fourteen champion and sweepstakes prizes, our herd being all of our own breeding and fitting but one. Golden Rule 14101 is certainly proving to be a great sire of show material. We sold the yearling boar, King's Pal, to Mr. Thos. Johnson, of Columbus, Ohio, at a very satisfactory price—the largest amount ever paid for a yearling. The two-year-old sow, yearling sow, fall sow and sow pig at New York and Kentucky were by Kan't Be Beat out of Rubertha 25756. We won second on aged sow at Ohio and New York and first at Kentucky. On yearling sow we won first at Ohio and first at New York, as well as champion. Also won grand champion at Kentucky and first in class under six months at New York and Kentucky. Rubertha was first in produce at Ohio, New York and Kentucky. We have many winners for sale and expect to breed this material for our February offering. We have a choice lot of Kan't Be Beat and Golden Rule gilts for sale." See advertisement on page 35.

On October 22d, at Prescott, Iowa, Mr. L. C. Reece will sell a draft of twenty-three head of Short-horn cattle, forty head of prize-winning Chester White hogs, and fifteen head of Shropshire sheep, and it promises to be one of the good sales to be held this year in southern Iowa. There will be fifteen cows and heifers, and eight bulls in the sale. Most of the offering will be sired by Vermouth, a straight Scotch Victoria bull that formerly headed his herd. Nearly all the females that are old enough will have calf at foot, and a great many of these will be bred again to his present Cruickshank bull, Sarcasm's Count. The latter bull is one of the most richly-bred Cruickshank bulls in the state. His sire is Imp. Count Violet and he is out of a daughter of Pride of the Realm, running down through Gravesend, Cumberland, Roan Gauntlet and Pride of the Isles. Many of the cows and heifers will be in calf to this bull. Of the families mostly represented in the Reece offering we find Victorias, Ianthes, Rose of Shrons, Pineapples, Josephines and other good families, and one thing that is particularly noticeable is that every female that goes into the sale is a breeder and carries the proof right with her. The cattle have been on grass all summer, and while not fat, are in nice condition. There are some good young bulls in this sale and one that we desire to make special mention of is My Choice. This young bull is sired by Vermouth, and his dam is Imp. Carnation, a cow that cost Mr. Reece over \$700, and she is one of the best cows today in the state. This youngster was a year old in July, is red in color, good in lines, and quite a stylish fellow. Some man who is looking for a bull to head his herd should go after this animal. Another good young bull is called Exception, and he is also a son of old Vermouth; is a roan in color and is a Scotch-topped Ianthe. The offering as a whole is made up of some very good and useful Short-horn cattle, and the man that buys in this sale will know that he is buying cattle that will make him money. He will sell forty head of Chester Whites, composed of spring hogs and gilts, and some yearlings and older will also be included in this sale. The Reece herd of Chester Whites stands second to none in this country. Mr. Reece has shown at all the leading state fairs and he never failed to land his share of the ribbons. Everything that goes into this sale will either be a winner or else will be sired by a winner and many by sweepstakes winners, viz.: Luverne, Right Stamp and Prescott Boy. The latter boar stands at the head of the Reece herd and has been one of the most consistent sweepstakes winners that has ever been shown at the Iowa State Fair. All of this year's show herd goes into the sale and those who saw them at the fairs this fall will realize that there are going to be some good things in this offering. He will sell his entire flock of Shropshire sheep, about fifteen head in all. These are all eligible to registry, and he has used an imported buck at the head. There will also be an imported ewe in the bunch and several of her descendants. When Mr. Reece bought he selected the best that money could buy, but he has now concluded he would close out his flock, so everything goes into this sale. Remember the date, Monday, October 22d, at Prescott, Iowa.

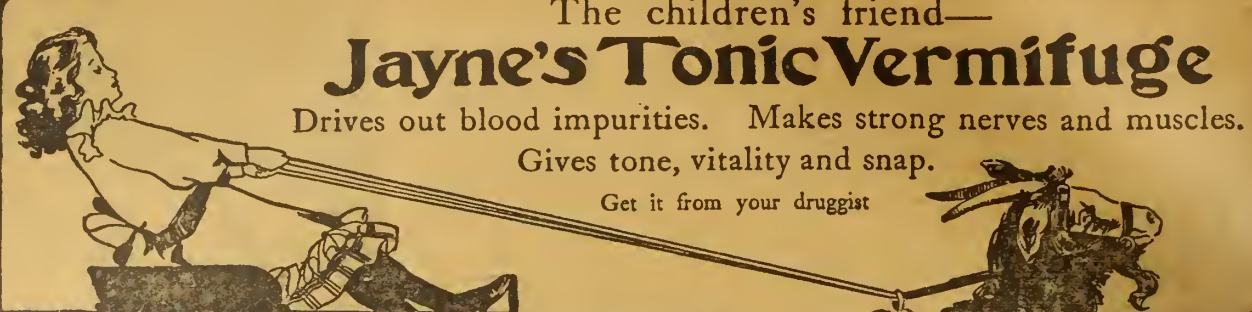

The "DEAN" Ear Corn Slicer

Any Farmer or Cattle Raiser should appreciate the advantage of slicing or chopping ear corn for stock. The health of all animals requires it. Feeders today know that grain should be mixed with "roughage." The cob is the best mixture for calves and steers. "The Dean" Ear Slicer soon saves its price in cob feed alone. Also saves time. Chops ears in 1/2 to 2 1/2 inch slices and cuts from 30 to 40 bushels an hour. Calfes thrive on the small slicing. It's so easily geared that even a boy can run it or any power can be attached. Elevator attachment to bin or wagon. Prices and terms very reasonable. Write today, for your stock's sake.

Messrs. L. M. Monsees & Sons, of Smith-ton, Mo., claim March 5th for their annual sale of jacks and jennets.

Mr. S. J. Miller, of Kirksville, Mo., breeder of Percheron and French Coach horses, writes: "My horses are doing fine. The two-year-olds of my last importation weigh now from 1,800 to 1,850 pounds. A man wanting a horse when he sees these, cannot help but buy, as they are an extra lot and it is simply a pleasure to me to show such horses."

Mr. Geo. C. Mosher, owner of Hillcrest Farm, at Greenwood, Mo., who has a new advertisement in the Duroc Jersey department on page 46 of this issue, writes: "Having decided to sell our hogs at private instead of public sale, we will put a price on them that will move them out rapidly. Inquiries will be filled in the order they are received and everybody will be given a square deal. We have a number of sows with pig and a few bred for late fall farrow. Our two-year-old boars are of the finest breeding and have been getting great pigs." For prices write the Hillcrest Farm, Greenwood, Mo.

Mr. John Schmelder, of Remsen, Iowa, one of the pioneer Poland China breeders in the state, writes as follows: "I have 125 spring pigs and two grand fall yearling boars. They are heavy-boned fellows, very large and good all over. I also have thirty spring boars that are the best I have ever raised. I won first at Sioux City Interstate Fair this year on pig under six months and picked him out of a pen of forty, so you see he was not stuffed to death on a milk diet. I have a lot of pigs left that are just as good as this fellow and I will ship them to buyers and know that they will please. Six of my sows farrowed sixty-five pigs and raised fifty-eight, and therefore those who buy of me will secure stock out of large litters, which always denotes good breeders, and they will also get good, growthy pigs. The most of these are sired by Winning Perfection (105015), a winner of two prizes at the Iowa State Fair and the Interstate Fair." We urge all those who

CARVING SETS FOR FARMERS' NAMES

THE FARM MAGAZINE wants names and addresses of farmers. The publishers want to interest them in their splendid, big farm journal, which well-known farmers say is one of the very best farm papers. The subscription price is 50c a year, but the publishers offer to send our readers a full year's subscription and a genuine "American Cutlery Co." Carving Set in return for the names of only five farmers and 20 cents. This carving set will last a lifetime and give perfect satisfaction. Ebony-black wood handles, 8-inch ground steel cimeter blade, 2-time fork with patented safety guard. Each set warranted. Taylor Woolsey, restaurant proprietor, Council Bluffs, Ia., writes: "I used your carving sets in my kitchen 3 years and they give excellent service yet." Send and get one while they last. Address
THE FARM MAGAZINE CO., FLOOR WORLD-HERALD BLDG., OMAHA, NEB.

lion is fit to head any herd. The home-bred stallions are a grand lot, from one to five years old, all dark colors, sound, with plenty of size and bone and a bunch of so many sound young horses would be hard to find. We also have the finest herd of Percheron mares in the West and are offering several for sale. These are from one to seven years old, among which are several match teams. We breed and raise our horses on our farm three miles south of Fairfield, Iowa, and can make as low a price on stock, quality and breeding considered as anyone. Those wanting Percherons should write the above firm or go and see their stock.

HAMPSHIRE HOGS.

Mr. Hughes Atkinson, of Mt. Sterling, Ky., breeder of Hampshire swine, has an announcement on page 45 of this issue which should interest readers of The Homestead. The Hampshire swine or Thin Rind, as they are called, are exceedingly growthy and prolific. Throughout the corn belt hundreds of boars of this breed have been used with much success. The champion barrow at the International last year was a Hampshire. Mr. Atkinson is offering thirty spring boars for sale at reasonable prices, mostly sired by Stone's Duke, first in class at Illinois State Fair this year. He is also offering thirty bred gilts for sale ready to ship December 1st. Orders booked now. Look up the advertisement on page 45 and write for

ing stock arrange to be on hand. The advertisement will be found on page 40.

RABELLER'S LARGE YORKSHIRES.

One of the largest and one of the best herds of Large Yorkshires in this country is owned by Mr. F. Rabeller, of Leigh, Neb. The foundation of this herd came direct from Canada and England, and consequently was the best that money could buy. Expense was not spared in procuring the best boars and sows for the Rabeller herd. Three imported boars now head the herd and they are good ones. He now has a grand lot of spring boars and gilts, all out of imported stock, and they are now ready to ship. If any of our readers want the Large Yorkshires they certainly get the very best from the above firm.

DUROC JERSEY BOARS AT CLOSING OUT PRICES.

On page 35 of this week's issue will be found the Duroc Jersey advertisement of Mr. J. F. Lentz, of Earlham, Iowa, who is making special prices on boars in order to close them out. These prices remain good for the next thirty days. He has sold his farm and must give possession, and, therefore, these boars must be sold. They are sired by Lentz Red 16903, Addy's Top Notcher and Gold Bug 43791, and are out of his best sows. Those who want a good boar at a reasonable price can get one of Mr. Lentz if they send him an order and do it at once.

TWO SCOTCH BULLS FOR SALE.

On page 35 will be found the announcement of Mr. Joe Steward, of Ames, Iowa, a well-known breeder of Short-horn cattle and Poland China hogs. Mr. Steward is offering for sale two splendid yearling Scotch bulls. One of them was one year old last May and was sired by Revenue and out of a Canadian-bred Scotch cow. The other belongs to the Scotch Vain Duchess tribe. He was sired by Golden Diamond and he by Imp. Golden Drop Victor. Both of these bulls are offered at farmers' prices, \$75 each. Mr. Steward has recently added to his herd two good cows bred to the Walnut Hill bull, Imp. Lovat Champion. For particulars see advertisement.

PERCHERONS AND BELGIANS ARRIVE.

Mr. A. L. Sullivan, president of the Lincoln Horse Importing Company, of Lincoln, Neb., who spent two months among the breeders of France and Belgium in picking out his latest importation, arrived home recently from his trip. A copy of a Lincoln paper says that Mr. Sullivan thinks this importation of Percheron and Belgian stallions "a little the best he ever brought over and he ought to be a good judge, for he has been importing fine horses for twenty years. The work of loading the big animals, looking after them during the voyage, unloading from the ship to the train and landing in Lincoln was performed and without a single mishap and the horses are now housed in the company's palatial barns in fine condition, though a little tired. When led out, however, they prick up their ears, step off freely and manifest a lively interest in their new surroundings. Mr. Sullivan long ago learned that the only way to secure the best horses in France, Belgium and Germany is to go among the breeders and buy directly from them, and for many years he has done this. This care in selection was justly rewarded at the recent state fair where the Lincoln Importing Horse Company carried off more prizes in these classes than all the other exhibitors combined. The competition this year was unusually strong, but this company won five firsts, four seconds, three thirds and three sweepstakes. Taking into consideration the number of horses required to win all these prizes and the present large importation, it can readily be seen that the company has on hand for this year's business a string of horses that can be equalled by but few im-

want a good pig and a square deal to place an order with Mr. Schmelder, and we know they will get what they pay for.

Messrs. William Ray & Son, of Defiance, Iowa, well-known breeders of Poland Chinas, write as follows: "We have had a nice trade on boars this season, but we have a few good ones left which we are pricing very reasonable, just to make room. If any of The Homestead readers want a good pig at a living price, just tell them to write us. We have not had a complaint so far from any of our customers and everyone seems pleased with our boars. Some of the best pigs we have raised this year are still with us, and we are now ready to let go. We have retained some of these in order that they would get their growth. We recently purchased of Messrs. Lock & Wellington a sou of the great boar, L. & W. Perfection, to head our herd. His dam is Lady Sunshine by Chief Perfection 2d. We also purchased a boar by Perfection I Know. We wish to say to Homestead readers that we are making some low-down prices for boars for the next sixty days, and we will be pleased to hear from anyone that wants a good pig." Read the advertisement of Messrs. Ray & Son on page 46 and write them for prices at once.

The well-known firm of Messrs. Maasdam & Wheeler, of Fairfield, Iowa, in furnishing copy for their new advertisement offering imported and home-bred stallions and mares for sale, found on page 35 of this issue, write: "We have just received an importation of Percheron stallions which arrived at our place in fine condition on October 10th. They are a first-class lot in every respect. Among them is one of the best-bred stallions imported this year. He is very dark gray, sired by the noted horse, Besique. He is large and has very heavy bone, and having such conformation he will surely be an impressive sire. Another horse of special mention is a black four-year-old that will make a 2,100-pound horse when matured. He has fine style, heavy bone and his breeding is of the best, being sired by Theudis. Such a stal-

lion is fit to head any herd. The home-bred stallions are a grand lot, from one to five years old, all dark colors, sound, with plenty of size and bone and a bunch of so many sound young horses would be hard to find. We also have the finest herd of Percheron mares in the West and are offering several for sale. These are from one to seven years old, among which are several match teams. We breed and raise our horses on our farm three miles south of Fairfield, Iowa, and can make as low a price on stock, quality and breeding considered as anyone. Those wanting Percherons should write the above firm or go and see their stock.

ILLINOIS Duroc AND CHESTER AWARDS.

In our regular report of the Illinois State Fair a somewhat serious error crept into the report of the Durocs and Chesters. Part of the Duroc awards appeared under the Chester title and vice versa. The complete and corrected awards appear elsewhere in this issue.

WALKER'S DUROCS.

Messrs. O. Walker & Son, of Palestine, Ill., breeders of Duroc Jersey hogs, are offering a few very select spring boars for sale sired by some as good boars as can be found. Two of them are sired by Our Chief 32479, he by Ohio Chief; two by Highland Chief by High Chief by Ohio Chief; two by Pilot Wonder 42707, a grandson of Pilot Wonder 9017 and I Am Perfection. These boars are the tops of seventy-eight head of spring boars and will please discriminating buyers. If you are in the market for a herd boar write at once as per the advertisement on page 46, kindly mentioning The Homestead.

KERR'S SHORT-HORNS IN THE MCGAVOCK SALE.

In the sale of Short-horns to be held at Kansas City, Mo., on November 2d, will be twelve head from the herd of Short-horns owned by Mr. O. L. Kerr, of Independence, Mo. Mr. Kerr when founding his herd of Short-horns used the same tactics as when founding his great herd of O. I. C. hogs. For this sale he sends eleven cows and heifers and one bull. The bull is a red Victoria and a desirable youngster, a sure breeder and a Scotchby fellow. Among the cows is a daughter of the champion Lavender Viscount; another is a Leonard-bred heifer, now two years old. She comes near being a show heifer; is one of those thick, meaty animals, evenly balanced and should go to some good herd. In following issues more will be said of Mr. Kerr's Short-horns that go in the McGavock sale and of other consignments. In the meantime write for a catalog and if wanting some desirable breed-

porters in the country. The three mammoth barns at the Sullivan farm are crowded to the limit. A cordial invitation is extended to everybody interested in fine horses to come and see those magnificent animals. The farm, as has been stated, is located just south of the state farm and is reached by the inter-urban cars and by the traction lines."

LAST CALL FOR W. E. MARRS' SALE OF DUROCS.

The last announcement of Mr. W. E. Marrs' sale of Durocs to be held at Albany, Mo., on Tuesday, October 23d, will be found on page 34. Breeders as well as farmers will find much stuff of merit in this sale, as Mr. Marrs bought the best breeding to be had when making purchases of foundation stock. He has grown his stuff well and for good backs, good feet and good colors few herds can show better. Mr. Marrs has not been in the business long enough to gain the prominence his herd deserves and for this reason anyone who wants a number of sows or a good, useful boar will find this a desirable place to buy. See page 34 for advertisement and send today for a catalog.

BERKSHIRE BOARS.

Mr. L. F. Boyle, of Hennepin, Ill., a well-known breeder of Berkshire hogs, has an announcement on page 45 of this issue which should interest readers of The Homestead. Mr. Boyle is offering three yearling boars for sale sired by Royal Combination II., a grandson of Lord Premier, a boar which has done much toward improving the breed and a prize winner at many leading fairs. Fifty spring boars of April and May farrow by Royal Combination II. and a good son of Masterpiece are also offered for sale. Readers of The Homestead wanting a Berkshire boar should write to Mr. Boyle at once for descriptions and prices. Mr. Boyle also breeds Shire and Percerson horses and has a number of very good stallions for sale. Write for prices and descriptions as per the announcement on page 45 of this issue, kindly mentioning The Homestead.

THE LAST CALL FOR THE TOWNSEND SHORT-HORN SALE.

The closing out sale of Mr. C. E. Townsend, at Anita, Iowa, on October 25th, promises to bring together some of the best Short-horn breeders in the West. He is selling fifty head in this sale and thirty of these are Scotch cattle, of the Miss Ramsden, Victoria, Mysie, Nonpareil and Autumn Queen families. All of his foundation Scotch cows go in and there are some extra good ones among the number. As breeders they are hard to beat, each one having several representatives in the sale. There will be ten Scotch bulls in the offering, including the herd bull, Sovereign Cupbearer. He is five years old and is a son of Imp. Sovereign and is out of a daughter of Imp. Cupbearer, the hero of many a hard-fought battle in the best show rings of this country. He has been a good breeder in the Townsend herd, but will be now goes with all the rest. There will be a lot of good Scotch heifers in the sale. Some of these will be bred to the young Scotch bull, Crimson Count (also sold in the sale) and some will be sold open. There are some good Scotch-topped cows and heifers in the bunch and it will be a splendid opportunity to secure a lot of good cattle. Mr. Townsend is leaving the state and is entering another line of business, hence the dispersion of this herd. He says that he has never had a business that has paid better than this herd of cattle, but they must now

be disposed of. Every breeder of Short-horns should have a copy of his catalog and then he will be sure to attend the sale, especially if he wants some good Short-horns. Write for it and please mention The Homestead.

ASA TURNER'S DUROC JERSEYS.

Attention is again called to the fine bunch of young Duroc Jersey boars that are being offered by Mr. Asa Turner, of Farrar, Iowa. These are sired by King Perfection 16235 by Banker Boy 2d out of Fancy Perfection. Some of the young boars are also sired by Advance Lad. Some of the sows were notable prize winners. Among the sows are Princess 26064 by Elite 6553 out of Countess 19750. Prospect 79792 by Shakespeare 6393 was a winner at the Iowa State Fair, as was Maxwell Belle 33480 by Ohio Prince. Miss Luther 33502 by Luther's Chief Jr. is another prize-winning sow at the Iowa State Fair. All of Mr. Turner's young boars are out of these sows and are sired by the boars mentioned above. They are fancy in color, of good length of body, have good, strong bone and are throughout a uniform, high-class lot. For further information address Mr. Asa Turner, Farrar, Iowa.

AN IMPORTANT SHORT-HORN SALE.

Breeders of Short-horn cattle should not miss the dispersion sale of Riverdale herd of Short-horns, which will be held on Monday, November 5th, at the Illinois State Fair grounds, Springfield, Ill. This herd, the property of S. E. Prather Company, is one of the best to be found in America. For nearly thirty years this herd has been producing cattle which have found ready market. The best of Scotch bulls have been used and the females represent the choicest breeding to be found in any herd. Thirty-two cows and heifers and ten bulls have been listed, including the herd bull, Imp. Highland Champion. This noted bull is one of the best pions. This noted bull is now at the head of Walnut Hill herd of Short-horns, owned by Flynn Farm Company, of Des Moines, Iowa. Highland Champion is a bull of great substance, thick fleshed, solid red, very blocky and a splendid breeder. A younger herd bull, Pride of Riverdale, calved in March, 1905, is also included. He is one of the richest-bred Cruickshank bulls in America. His sire was the Duthie-bred bull, Imp. Pride of the Realm, and his dam was Sibil by Imp. Banker, a bull used with much success by Mr. C. C. Norton. There are a choice lot of young bulls in the sale. In our next issue we will have more to say regarding this good herd and would advise our readers to write at once for catalog, kindly mentioning The Homestead.

SHORT-HORNS IN THE MCGAVOCK KANSAS CITY AUCTION.

In the advertisement in this issue appears a full list of the consignors to the Short-horn sale at Kansas City, November 2d, under the management of Mr. W. C. McGavock, Missouri and Illinois breeders furnish the cattle, and there are included many animals that should prove exceedingly attractive. Several prominent breeders at Edinburg, Ill., are sending some good ones to this Kansas City sale. Col. T. B. Hart includes five head, four of which are by Imp. Sovereign. The yearling bull, Claret's Sovereign, from the Clara cow, Imp. Clara 2d, which was pronounced by Mr. I. M. Forbes to be the best yearling heifer of his 1901 importation, is a bull of grand scale and quality, and certainly there is no better-bred one. Rarely are three such heifers consigned to a combination sale as the three by Imp. Sovereign that Colonel Hart includes on this occasion. He also is sending a herd header in Barondale, a Nonpareil youngster bred by Mr. J. W. Prather and sired by Imp. Bapton Sovereign. Mr. J. K. Alexander includes in Scottish Crown one of the best yearlings that he has ever bred. He is a Scotch bull, descending maternally from Imp. Eliza, sired by the prize-winning Scottish Stamp and having seven Cruickshank crosses in his pedigree, as it appears without tabulation. Mr. I. W. Baughman, for whom Mr. McGavock recently sold the stock bull, Bapton Gloster, includes some high-class sons of this bull and some cows in calf to him. In the consignments of Messrs. W. L. Wright, of Vandalia, Mo., and F. M. Branstetter, of Mt. Carmel, Mo., there are several imported Scotch cows, one of which has a heifer calf at foot by Imp. Lavender Viscount, and all of which are just the kind that are commanding prices in the auctions in this country or any other in which they are offered. The various offerings will be commented upon in the next

issue, but from the few facts we have given with reference to the character of the auction, it will be seen that it should interest Short-horn breeders and cattle men generally. Seventeen bulls and forty-three cows and heifers are cataloged and the event promises to be one of the most interesting to be held at Kansas City this season. Manager McGavock will take pleasure in mailing catalogs to all applicants. See page 40 for advertisement.

THE LAST CALL FOR THE TOWNSEND SALE.

The closing-out Short-horn sale of Mr. C. E. Townsend will be held at Anita, Iowa, on October 25th, when the entire herd, composed of about thirty head of Scotch cattle, will be sold. Included in this sale will be some richly-bred Victorias, Miss Ramsdens, Orange Blossoms and Nonpareils, and his well-known Scotch herd bull, Sovereign Cupbearer, goes with the rest. He is a five-year-old son of Imp. Sovereign and out of a daughter of Imp. Cupbearer. This red bull has been used with much success in the Townsend herd and he has a choice lot of young bulls and heifers in the sale to testify to his breeding qualities. There will also be ten young bulls in the sale, all Scotch, and out of his best cows. The breeding cows, an especially attractive lot, rich in pedigree and splendid individuals, furnish an attraction that our best breeders cannot afford to overlook. They are cows of decided feminine character, and they are breeders of exceptional merit. Besides these, is a nice line of Scotch heifers, mostly sired by Sovereign Cupbearer and out of these same cows. We might make mention of each individual in the sale, but there are so many good ones that we will leave it to the catalog to tell the story. We want to say, however, that breeders will find in the sale a great many things that will do to put into their herds for foundation material. Mr. Townsend has issued one of the most comprehensive catalogs of the season, well illustrated and complete in its every detail. Write for one at once and be kind enough to mention The Homestead.

THE LAST CALL FOR HECTOR COWAN'S GREAT SHORT-HORN SALE.

On October 23d, at Paulina, Iowa, Mr. Hector Cowan, unquestionably one of the most noted breeders in northwestern Iowa and the state, will make his fourteenth annual sale. It is certainly within bounds of reason when we say that never before has he sold a more representative lot of well-bred and useful Short-horns. About half of the offering will be Scotch cattle, among which will be fifteen females and eight bulls. Among the Scotch cattle offered in this sale will be the two great cows, Imp. Miss Law and Imp. Patience 31st. The latter is one of the most typically Scotch, low-down, wide-out cows that will be sold this year. She is a beautiful red, symmetrical in all her lines, with a back on her that is as wide as a wagon. She has a beautiful head and horn, set on a short, thick neck, a well-sprung rib, and fullness of quarters, and depth of middle that make her one of the great attractions of the year. She is put into this sale as an attraction and some enterprising breeder who is looking around for a show cow for next year will find in her one of the exceptionally good things of the breed. Imp. Miss Law is a large roan cow, a daughter of Jubilee Star 166497, and out of a granddaughter of the great Scottish Archer. She is one of those richly-bred Undines, an excellent individual and a good breeder. Among the other Scotch tribes are Miss Ramsdens, Brawith Buds, Secrets, Mysies, Golden Drops, Crimson Flowers, Sunies, Blinks, and other good tribes. Lakewood Victoria is a five-year-old Brawith Bud cow, a daughter of Cracidian Boy and out of a daughter of the Cookson-bred bull, Victor Chunk. She is one of his best breeders and is safe in calf to Imp. Nonpareil. Mr. Cowan is putting about ten daughters of Imp. Nonpareil in this sale and there are some great prospects among this number. One of these is called Sweet Zephyr, a two-year-old roan heifer by Imp. Nonpareil and safe in calf to Gladstone, a son of the great Whitehall Sultan. Another good two-year-old is Miss Walpole by Ury Prince and out of Bonny Belle Lancaster 2d by Lancaster Comet. She is a Miss Ramsden and is bred to the great show-yard winner, Cumberland's Last. Golden Lass is a three-year-old daughter of Golden Lord and out of Imp. Sunny Blink 6th. She is a very neat heifer, of decided quality and substance and is due to calve to Imp. Nonpareil. There are other good heifers in this

We use scrupulous care in choosing glasses to aid our eyesight. Why not use scrupulous care in selecting lamp-chimneys?

MACBETH is the only maker of lamp-chimneys who is proud to put his name on them.

Let me send you my Index to chimneys—it's free.

Address, MACBETH, Pittsburgh.

sale, just as good as these we have made mention of, and they must be seen to be appreciated. Ten of the cows will have calves at foot and others will be bred and safe in calf. Most of the cows will be bred to Imp. Nonpareil, while a great many of the heifers will be bred to Anoka Archer, a full brother to the great Ceremonious Archer. There will be nine bulls in the sale sired by Imp. Nonpareil, one by Aberdeen Prince and one by Fame 220065. These bulls range in age from eleven to eighteen months, are all red in color and there are several very good ones in the bunch. These cattle are in nice condition, notwithstanding they have been on grass all summer. It is a decidedly high-class offering and one that should attract our very best breeders. Write Mr. Cowan at once for catalog and kindly mention The Homestead.

MARTS' DUROC JERSEY SALE.

The final announcement for the Duroc Jersey sale to be held by Mr. B. C. Marts, at Polk City, Iowa, on October 26th, appears on page 44 of this issue. Mr. Marts is furnishing notes in regard to the stock to be sold, writes: "There will be twenty boars and twelve gilts. These boars are of March and April farrow, not stuffed, but grown for future good; never were shut up a day, but always on pasture. There will be two hogs sired by Keep On, the first-prize boar at the Iowa State Fair, 1905, which also headed the first-prize young herd. One of these pigs is out of an Iowa Jumbo dam, he by the great Jumbo Red, and the other is from a Promoter dam. These pigs are good. Then there are two out of Col. Perfection and from an I. J. Chief sow. He was first-prize aged boar at the Indiana State Fair in 1905. These pigs are right, good length, with strong backs and extra good legs, feet, head and ears, with finish to spare. They will make great boars. There are three by Proud Advance and from a Matchless Chief sow, one by Golden Rule and from a Kan't Be Beat sow, grandam junior sow World's Fair. This pig ought to be looked after by some good breeder. There are two good ones by Model Jim, he by Malcom's Model by Top Notcher, dam Miss Nell by Top Notcher Chief, junior champion at St. Louis, he by Top Notcher Again, the old sweepstakes boar of the East. There are also several by Joe Patten that are good. The gilts are all sired by Park Lad, he one of the latest sons of Promoter and out of Chalenger dams. These gilts are good, with lots of finish. Sale will be held at the farm, with free conveyance to and from Ankeny, where all parties who attend sale are requested to come." Catalogs are now ready. If interested write Mr. Marts for one, mentioning The Homestead.

A TWO DAYS' DISPERSION SALE OF HEREFORDS.

On Tuesday and Wednesday, October 30th and 31st, at the Grass Hills Stock Farm, three and one-half miles east of Bolckow, Mo., and two and one-half miles west of Cawood, Mo., Mr. L. W. Craig, of Bolckow, Mo., and Mr. John Foulz, of Rea, Mo., will disperse their respective herds of Hereford cattle. Both these gentlemen own good herds that are well bred and that are classed as working herds. The writer has never seen more cows with calves at foot listed for one sale and as these gentlemen are making absolute dispersions, buyers will have a chance at all their best breeding stock. Mr. Foulz has been breeding Herefords for a number of years and the herd owned by Mr. Craig was founded some five years ago. When buying his foundation stock Mr. Craig bought liberally of the best to be had, paying particular attention to scale and quality. As a result few herds can show breeding stock that has more scale and stock that shows that Mr. Craig knew his business. From the herd of Mr. H. A. Naber, of Wallaula, Kan., Mr. Craig bought several daughters of Anxiety Grove 2d; from his neighbor, Mr. Jno. Foulz, several head tracing close up to Statesman and Don Carlos were bought. These have been well cared for, bred to good bulls and as a result Mr. Craig will offer a nice lot of well-bred Herefords. The only bull in Mr. Craig's offering, aside from bull calves that sell with dams, will be the present herd bull, Kermit 188503, now two years old. He was got by Imp. Kensington that stood second at the recent Iowa State Fair and the Interstate show at St. Joe. On dam's side Kermit is a great-grandson of Hesiod 14th and sweepstakes both great bulls of their day. As an individual Kermit ranks well up. His head and horns are about right, he shows the desired spring of rib, the loose, mellow hide and is an evenly-balanced bull built plenty close to the ground. As a sire he has made good in Mr. Craig's herd. The young things are all by him and all cows are rebred to him. Mr. Foulz sells his herd bull, Norman, a grandson of old Java and a bull that is rich in the blood of Anxiety. Five sons of Norman are listed and all are good, strong, sappy fellows ready for active service. In the female section of the sale are many cows that should appeal to those who like the kind that are easy keepers and regular producers. Of the forty-five lots to be sold, fully one-half are cows that will weigh from 1,500 to 1,800 pounds each, and this on grass

PARKE, DAVIS & CO.

Home Offices and Laboratories,
DETROIT, MICHIGAN.

CRIMSON WONDER No 26355
W. KIRKPATRICK LINCOLN NEBR.

The above illustration is of one of the great boars of the Duroc breed. His get have made a record as sires as well as show boars. The boar was recognized as one of the coming boars of the breed. His death ended all chances of more glory. His get are keeping up his record.

alone and suckling big, strong calves. They are the low-down, evenly-built kind that please the man who goes after the beefy sort. Eighty-six lots are cataloged and as only ten bulls are listed, buyers of she stuff will find this one of the opportunities of the year. Catalogs are ready and will be mailed to all who make request for same. See page 28 for advertisement and write either Mr. Craig or Mr. Foulitz, mentioning The Homestead.

HUMBERT & THOMAS DUROC SALE.

On November 3d Messrs. Humbert & Thomas will make a public sale of Duroc Jersey boars, sows and spring gilts at Corning, Iowa. They have selected twenty-five boars and twenty-five sows for the occasion, and propose to show the breeders that they are selling one of the best bunches of Duroc this season. The boars are nearly all sired by Tip Top Notcher Gold Dust (a son of the World's Fair sweepstakes boar, Tip Top Notcher), and these are out of their best brood sows. There will be a number of fall boars in the sale, the rest will be of spring farrow. The gilts are all sired by the same boar and they are selling a choice lot, many of which could be bought by breeders and put into a brood sow sale and double their money. They are selling a few brood sows with litters by their great boar, Gold Dust Jim 2d, a son of the well-known sweepstakes boar, Gold Dust Jim. One of these is a Hoosier Banner sow, and a most excellent breeder. Among this offering will be a very choice lot of boars and gilts, and both farmers and breeders can help themselves materially by securing some of the good things to be sold on this occasion. A bid sent to Messrs. Piper Bros. will be properly attended to. Their catalog is now out of press and will be mailed on application. Kindly mention The Homestead when writing.

A. O. STANLEY'S ANNUAL SALE OF POLAND CHINAS.

On next Monday, October 22d, at the Valley View Farm, four miles southeast of Sheridan, Mo., Mr. A. O. Stanley, of Sheridan, Mo., will hold his eighth annual sale of Poland Chinas. Mr. Stanley is one of the men who stay with the big kind that have quality and in this, his eighth annual sale, he thinks he is offering the best lot of hogs he has ever put through a sale ring. In addition to those mentioned last week we wish to call attention to lot numbers 8, 9 and 10. No. 8 is a show sow in any company. No. 9 is a show sow in any company. No. 10, her litter brother, will be found desirable as a herd boar. They were farrowed in July, 1905, and got by Joe Profit and out of My Hanna Lady. A spring litter of this breeding is cataloged as Lots 39 to 43, inclusive. They, too, are desirable, and Lot 43, the boar of the litter, is a herd header. Lots 2, 3 and 4 will be found big, heavy-boned boars and safe ones to buy. Lots 5, 6 and 7 are sows from the same litter. No. 5 is probably the best, as she has great length, a good back with well-sprung ribs and is a well-finished sow. A number of matured sows are listed, all being sows that are profitable as breeders. Lots 11 to 15, inclusive, are granddaughters of Mr. Fred L. Rood's great brood sow, Giantess. Their dam is a large sow and comes from big ancestors. She is listed as Lot 16. Mr. Stanley has been in the pure-bred hog business all his life and for his annual sales lists his best stuff. Those from a distance will find free livery from either Sheridan on the Great Western or Grant City on the C., B. & Q. railroads. See page 45 for Mr. Stanley's advertising and remember that the sale is next Monday.

GRIFFITHS' DUROC SALE.

One of the good offerings of Duroc Jerseys to be disposed of at public auction this season is that of Mr. H. B. Griffiths, of Bowen, Ill., which will be offered at public appraisal on Friday, October 26th. Mr. Griffiths has selected for this sale two yearlings, ten fall yearlings, eight spring boars, five sows, five fall gilts and ten spring gilts. They represent the get of such noted breeding and show boars as Hanley, Tip Top Notcher, Big I Am, Ambition and Golden Echo. We wish this week to call especial attention to some of the attractions of the offering. Tip Top Nick is a March yearling boar by Sec's Kan't Be Beat by Kan't Be Beat, and Uneeda Top Notcher by Tip Top Notcher. He has been used and proven himself a good breeder. Lad's Top Notcher and My Top Notcher are two good fall boars by Tip Top Notcher and are out of an unusually good sow, My Lad's Goldie by Sec's Kan't Be Beat. Some breeder wanting an extra good Tip Top Notcher boar should not overlook these which Mr. Griffiths has cataloged. Buddy Top Notcher is a fall yearling by Big I Am and out of Uneeda Top Notcher. Big I Am fall boars are scarce and especially the good ones, and this one should not be overlooked. Eight fall boars by Griff's Banner, he by Suburban Chief by The Lad For Me, are strong, vigorous fellows and will suit breeders who are in the market for herd headers. Big I Bill is a spring boar of unusual merit by Ambition and out of Good Enough by Buddy K. IV. Two spring boars that are sure to please are sired by Big I Am and out of Anna Duroc, she by Rival Prince. Two Hanley boars are cataloged. Their dam is My Lad's Goldie by Sec's Kan't Be Beat. They are sure to please discriminating buyers. Two boars by Golden Echo, the top boar in the Kraschel fall sale of 1905, and out of Helen Blazes V.,

litter sister to Helen Blazes III., the \$1,000 sow sold to Mr. J. Coy Roach, combine richness of breeding and individuality such as are seldom seen. Uneeda Banner and Plover Lady are two spring gilts by Griff's Banner and out of Uneeda Top Notcher. They are of strictly show-yard type and will please discriminating buyers. A spring gilt by Ambition and out of Good Enough by Buddy K. IV., is a richly-bred gilt of the highest type. She will do to top some brood sow sale of the winter season, or will prove a valuable addition to some good herd. Any breeder or farmer in search of good breeding stock should not overlook this sale. Bids sent to Mr. D. M. Pierce, representing this paper, will be properly cared for. Write for catalog at once, kindly mentioning The Homestead, and plan to be present sale day.

LAURIE'S DUROC SALE.

One of the good Duroc Jersey breeders to be found in this country is Mr. T. E. Laurie, of Jacksonville, Ill. He has for a number of years past been engaged in this business and enjoys the confidence of everyone who knows him. His forthcoming sale, while will be held on Tuesday, October 23d, contains some of the best breeding to be found anywhere. The spring pigs are smooth, growthy, have plenty of bone and stand on the best of feet. The yearlings in the offering, of which there are a number of good ones, weigh from 300 to 400 pounds in good breeding condition. A number of the spring pigs are sired by Buddy K. 20855. This boar is a litter brother to Buddy K. IV., the first-prize aged boar and sweepstakes boar at Illinois State Fair in 1905, and the second-prize aged boar at same fair this year. Buddy K. is a large, smooth hog; has plenty of bone, and combines smoothness and quality to a marked degree. His get resemble him a great deal in this respect. The other herd boar used by Mr. Laurie is He's Our Pride. The sire of this boar was I Am Perfection, he by Kan't Be Beat, the boar which now heads the herd of Messrs. Morrison & Son at Lincoln, Neb. The dam of He's Our Pride is by old Top Notcher, a boar which produced some of the best hogs of the breed. The sire

Buddy K. IV., property of Mr. Ed A. Baxter, of Pawnee, Ill. FIRST PRIZE AGED BOAR AND CHAMPION ILLINOIS STATE FAIR, 1905; SECOND PRIZE AGED BOAR ILLINOIS STATE FAIR, 1906. In our issue of last week a mistake was made in reporting aged boar class. Buddy K. IV. won second in that show in competition with three as good boars as the season's shows have brought forward. He was not fat, but in good breeding condition, and weighed 1,035 pounds. About twenty of the get of this noted boar, consisting of aged sows, fall boars and gilts and spring pigs of both sexes are included in the forthcoming sale to be held at Pawnee Thursday, November 1st. The breeder or farmer looking for a herd header or for a valuable female to add to his herd should write to Mr. Baxter at once as per the advertisement on page 41 of this issue, kindly mentioning The Homestead.

of some of the spring pigs is Buddy's Perfection. He is a strong, growthy yearling and was sired by Dutchman, he by Sensation, and his dam, Buddy's Beauty, is a full sister to Buddy K. IV. The get of this hog are extra fine and can easily be found in the best of company. A yearling boar consigned to the sale is called Duplex. His sire was Kraschel's Wonder, the boar now at the head of the good herds of Messrs. Hurlbutt & Rasmussen, of Taylorville, Ill., and his dam was Louise W. by None Such, the sire of Hanley, the good boar which now heads the herd of Messrs. McNeill Bros., of Bowen, Ill. Someone in search of a good herd boar should see this one before making a purchase. A litter by Mayor Jr., first-prize yearling boar at Illinois State Fair last year, out of a sow by Buddy T., the sire of Buddy K. IV., the champion hog at head of Mr. Ed A. Baxter's good herd, should prove attractive. Another litter by Gold Cloud, first and champion boar Illinois State Fair, 1905, and out of a sow by Mayor Jr., furnish a combination of breeding and individuality that is hard to beat. Parties attending the M. W. Greer sale at Bushnell the day before can easily attend Mr. Laurie's. After the sale, trains leave for Mt.

PILES NO MONEY TILL CURED.

Sterling, a special train running from Bluffa to Mt. Sterling making connection with train from Jacksonville, so that breeders can arrange their plans to attend the whole circuit. Bids sent to Mr. D. M. Pierce, representing this paper, in care of Mr. Laurie will be properly handled. See announcement on page 42 and write for catalog at once, mentioning The Homestead.

FAGAN, BROWNING, HESS & McCABE'S DUROC SALE.

It is with a feeling of satisfaction that we call attention to the forthcoming Duroc Jersey sale of Messrs. Fagan, Browning, Hess & McCabe, which will be held on Wednesday, October 31st, at Hersman, Ill. This noted breeding firm have selected forty head from the tops of their respective herds and are sure that breeders and farmers will not be disappointed in the offering. The blood of such noted boars as Tip Top Notcher (of which they own one-half interest), Proud Advance, Keep On, A Top Notcher, Red Express, Kan't Be Beat, Ohio Chief, Oom Paul, Nash's Model, Mayor Jr., Gold Cloud, Buddy K. IV., Hanley and others of note is found in this offering. The gentlemen composing this firm have been liberal buyers from many of the best herds, and

Mr. Steward and his breeding operations for some twenty years and cheerfully recommends him to Homestead readers. His three-inch card will be found on page 35.

CUTLER, REIL & COOPER DUROC SALE.

Saturday, October 27th, will be the day on which Messrs. Cutler, Reil & Cooper, of Carthage and Ferris, Ill., will offer for sale at public auction forty head of choicely-bred Durocs. The gentlemen are the proprietors of three herds of richly-bred Duroc and the combined herds number over 250 head. The sale consignment represents the tops from the three herds. Mr. Cutler was one of the successful exhibitors at the recent Illinois State Fair. He won the following prizes in one of the greatest Duroc shows of the year: First on boar in twelve and under eighteen months class; first on boar in under six months class; third on sow twelve months and under eighteen; third on boar and three sows one year old and over, bred by exhibitor; second on boar and three sows under one year; second on boar and three sows under one year bred by exhibitor; first on four pigs under six months produce of same sow. Such a record as this is an enviable one. Messrs. Reil and Cooper were likewise successful at the Iowa and Minnesota State Fairs. The blood of Top Notcher King, Pilot Boy, Illinois Chief, Hanley, Double Track and other boars of note is found in the offering. The catalogs are now ready and will be furnished to all who write for them as per the advertisement on page 42 of this issue. Bids sent to Mr. D. M. Pierce, representing this paper, will be properly handled. Mention The Homestead when writing.

BAXTER'S DUROC SALE.

Through an error in reporting the Duroc show at the Illinois State Fair last week, Mr. Ed A. Baxter, of Pawnee, Ill., did not receive the credit he deserves in having at the head of his herd Buddy K. IV. This hog was not placed right in the columns of this paper. He won second prize in aged boar class this year and first and champion at the Illinois State Fair in 1905. We regret having made this mistake and feel sure that the breeders will make note of this correction. Buddy K. IV. was shown this year in one of the strongest aged boar classes of the season's shows. Many breeders tried to persuade Mr. Baxter not to show this hog this year, telling him that Buddy K. IV. had won all the honors he would ever win. But Mr. Baxter knew the kind of a hog he had and would not own a hog of such wonderful individuality and not show him at such a fair as that held in Springfield. Several of those present favored Buddy K. IV. for first in his class, but the judge could hardly have made any mistake which way he tied the ribbon, as between Commodore and Buddy K. IV. There are in this sale several of the get of this noted boar that are fit to go into any company. Mr. Baxter may well feel proud of the offering which he has selected for this occasion. All told there are six choice boars, eight fall sows, two aged sows and ten gilts in the sale by Buddy K. IV. Others are by Proud Advance, Gold Cloud, Golden Echo, Red Express, Mayor Jr., Kruger Again, Double Track, Dumont and others of note. A special attraction is offered in Red Carnation, the top of the Deal winter sale, as she will be sold with litter of pigs by Buddy K. IV. Breeders should plan to be present sale day. Bids sent to Mr. D. M. Pierce, representing this paper, will be properly handled. Write for catalogs at once as per the advertisement on page 41 of this issue.

THOMAS & HOGSETT'S DUROC SALE.

No firm of Duroc Jersey breeders deserves more credit for the general prosperity of the breed than does that of Messrs. Thomas & Hogsett, of Golden, Ill. During the past year they have purchased from the best herds breeding stock that has proven the right kind. They were among the company which forced Mr. J. Coy Roach to pay \$1,000 for the sow, Helen Blazes III. They are one-half owners of the grand champion boar, Tip Top Notcher, and have at the head of their herd to assist him, one of the best yearling boars to be found anywhere. Ambition. This hog stood second at the recent Illinois State Fair in the twelve and under eighteen months class, but the majority of the breeders present favored Ambition for first place. His get are extra good and the number to be found in this sale make this one of the strongest offerings of the year. A gilt sired by Ambition and out of Beattie Belle won first in the under six months class at Illinois State Fair, while a gilt by him and out of Golden B. was second in same class. Messrs. Thomas & Hogsett have had good boars at the head of their herd. Big I Am did service of more than ordinary merit. He was first in the under six months class at the Illinois State Fair in 1904. His sire, Buddy K. IV., now heads the good herd of Mr. Ed A. Baxter, of Pawnee, Ill., and was first and champion at Illinois State Fair in 1905, and second-prize aged boar this year in one of the strongest aged boar classes ever seen by the writer, representing this paper. Big I Am was sold to Messrs. Manlove Bros., of Bowen, Ill., in whose herd he further proved himself a wonderful breeder. Much of his get is to be found in this sale offering. A yearling boar, Red Jacket, by Tip Top Notcher, and out of a Perfection Wonder sow, is included in the sale. He has not been overfitted with corn, but is in primo shape for breeding purposes. Someone looking for a herd boar should not overlook this one.

they deserve their support and all others in this, their initial fall sale. A special attraction is found in a litter of six boars by Tip Top Notcher and out of Helen Blazes (the dam of the \$1,000 sow and her litter sisters which sold with her at the record-breaking price of \$1,910). They are choice specimens of the breed and will please anyone in search of a herd boar. In our issue of next week we will give full particulars regarding this offering and would advise our readers to write at once for catalogs and make arrangements to attend this noted sale. Bids sent to Mr. D. M. Pierce will be properly handled. See announcement on page 41 and write at once for catalog, mentioning The Homestead.

JOE STEWARD AND HIS POLAND CHINAS.

Parties in quest of big, strong, thrifty Poland China boars will do well to correspond with Mr. Joe Steward, of Ames, Iowa. He has fourteen good March boars for sale, twelve being sired by Gay Perfection 2d, one by Independence and one by another boar. Mr. Steward prices these very reasonably. All but one are priced at \$25 each. This one was the sweepstakes boar at a number of fairs, and is held some little higher. This pig was raised by Mr. Steward from a sow purchased at the Hanna sale last February at \$107.50. She is a very large, smooth sow and was sired by a son of Perfect E. L., second dam by Winning Sunshine, he by Ideal Sunshine; third dam Lady Knox by T. A. Perfect, a full brother to C. P. 2d. Mr. Steward also has twenty-five nice gilts by Gay Perfection 2d to breed for the winter trade. They will be bred to a son of Thick-set, called Sultan. Sultan was farrowed October, 1905, out of Ruth Perfection by C. P. 2d. Her dam one of Chief's Last by Chief Tecumseh 2d. Sultan won third in his class at the Ohio State Fair, headed the young herd that won first, headed the young herd that won first bred by exhibitor and should be an ideal boar to cross well with Mr. Steward's sows. He is the best boar they have ever had anything to do with and is owned by Mr. Steward and the Iowa Agricultural College. No better strains of Poland China blood can be found anywhere, neither can a more honorable breeder with more experience be found with which to do business. The writer has been personally acquainted with

APPLETON MFG. CO.,

39 Fargo Street Batavia, Ill., U. S. A.

Write to-day for Free Catalogue.

Litter mates to the first and second-prize gilts at the Illinois State Fair are found in Lots 26, 27, 28, 29 and 30. They are strictly showyard type and will do to head the best of herds. Breeders who are in the market for top stuff should plan to be present sale day. We take pleasure in recommending this offering to our readers and urge them to be present. Bids sent to Mr. D. M. Pierce, representing this paper, in care of Messrs. Thomas & Hoggset, will be properly handled. Look up the announcement on page 42 of this issue and plan to be present sale day. Mention The Homestead when writing for catalog, which should be in the hands of every breeder and farmer interested in Duroc Jerseys.

KRASCHER'S DUROC SALE.

The Duroc Jersey sale of Messrs. Fred Krasher & Son should attract the attention of every breeder of Duroc Jerseys. Forty-five head have been cataloged, twenty-five boars, and twenty sows. They are sired by such noted boars as Gold Cloud (first and champion boar, 1904, Illinois State Fair), Mayor Jr. (first prize yearling boar at Illinois State Fair, 1905), Tip Top Notcher, Top Notcher Chief, Golden Echo, Gold Standard, Buddy T's Best, Double Track and other noted boars. From the herd of Messrs. Krasher came Buddy K. IV. (first prize and champion boar, 1905, Illinois State Fair, and second-prize aged boar, 1906, Illinois State Fair). This is a sample of the kind of hogs that breed, as Mr. Baxter selected his grand good herd boar from this herd. Messrs. Krasher have been good buyers of the best stock. They have spared no expense in selecting their foundation stock. Good boars have always been used and the stock purchased from them has always made money for those who secured it. A breeder in Illinois purchased four gilts last fall in Messrs. Krasher's sale for \$187 and sold two in his brood sow sale for \$251, leaving him two best sows at no cost, and realizing a nice profit on his investment. What this breeder has done anyone can do. In the offering are some boar pigs fit to head herds. Three of them are by Red Express and out of Helen Blazes 4th (litter sister to the \$1,000 sow, Helen Blazes 111.). Two good pigs are out of the dam of the second-prize boar at the 1905 Illinois State Fair. The offering throughout is one of unusual merit, and will prove an attraction for breeders who are looking for good stock. Full particulars will be found in these columns next week. Write for catalog at once as per the announcement on page 41. Bids sent to Mr. D. M. Pierce, representing this paper, will be properly handled. Mention The Homestead when writing for catalog.

THE SALE WHERE GOOD ONES SELL.

One of the good, strong offerings of Poland to be sold in the state of Nebraska will be the lot offered by the well-known breeders, Messrs. W. L. McNutt and J. C. Meese, of Ord and Comstock, Neb. Both gentlemen have the choice blood of the Poland China breed and have used very near the same sires in the herds. They own the herd boars together and consequently the same blood lines will be represented. The sale will be held at Grand Island, Neb., on account of better railroad facilities. The sale is one that will not be a disappointment to the many breeders seeking good timber for their herds. The class of boars to be sold have made a rapid growth in the right line and they should prove good, strong boars and sows in the best of company. The get of the great King Look by Bright Look has made a strong showing all over Nebraska and we believe this to be one of the greatest breeders of choice Poland that you will find anywhere. At the Nebraska State Fair the get of King Look was the main talk of the breeders who saw it. They not only sold the winning yearling at a good price, but had many opportunities to sell many more. They decided to reserve all of the winners for the sale and it is now up to the breeders to watch for the choice ones as they run through the ring. King Look is a boar of good size, with plenty of stretch and is a very well balanced boar. He gets good size and transmits plenty of quality in all of his offspring. Parties looking for the large, rough type of Poland need not spend their money for car fare, as you will not find that kind. You will find as strong a lot as you ever saw and they will have plenty of size and finish. The get of Our Chief is very much the type of King Look and the cross on King Look sows should be a very good one. Our Chief is a very large yearling, with plenty of stretch, good side lines, good lot of bone, good head and ear and a boar that could be made to weigh 1,000 pounds. He is the kind that carries as much quality as the little fellows and transmits the same amount of quality into his get. Grand Look has a few in the sale that are real good ones. These gentlemen have made a very strong guarantee to those unable to attend the sale. They will stand back of every animal purchased on a mail bid and will see that every buyer is treated right. You need not worry about sending your bids, as you will not be disappointed in the least. The forty head are the tops from two herds and these are the same that have made the great showing at the Nebraska State Fair. The sows in the herds are all very good, with the best of breeding and plenty of quality. Mr. Meese won many ribbons on the sows

in his herd, while Mr. McNutt came in for his glory at the same time, as he was part owner of the sire of these sows. Both herds are the very best in breeding and individuality. We could point out several choice ones in the offering, but would not know where to start, as all of them are what we call one of many opportunities. If you are not able to attend this sale please send your bids to Auctioneer T. C. Callahan or G. W. Segrist, representing this paper, Mr. H. L. McKelvie, of Fairfield, Neb., sells a strong lot of Poland on October 26th. Both sales can be reached easily. Look up display advertisement on page 39 and write for sale catalog.

KERR'S PRIZE-WINNING O. I. C.'S AT AUCTION.

Now that the American Royal is over, O. I. C. breeders of America will undoubtedly turn their attention to the sale to be held by Mr. O. L. Kerr, of Independence, Mo., on Friday, November 2d. That the breeders will find at this, Mr. Kerr's second fall sale, the greatest lot of O. I. C. hogs ever gotten together, is not disputed by those who saw his winners at the Missouri State Fair and the American Royal. At the latter show hogs listed for the sale were winners in the following classes: The champion boar, the reserve champion, the second-prize boar pig, the first and second-prize gilts, the litter that won as produce of sow, as get of sire and in the first-prize young herd. Practically all of these were winners at the Missouri State Fair the week before. The champion boar was got by Kerr Shelton out of Luella, a daughter of the champion World's Fair sow, Big Mary. The reserve champion was got by the great sire and show boar, Kerr Dick, and out of Kerr Pan. The second-prize boar pig and litter brother were got by Rex and out of Silver, a half sister to Kerr Dick. Then there will be five boars by Kerr Dick and out of Maud. These have always been the great sellers and buyers should look to them sale day. In sows Mr. Kerr sells the first and second-prize gilts at both the Missouri State Fair and the American Royal and all the sows shown as produce of sow, get of sire and in young herd. Where has there ever been such an offering as Mr. Kerr is making. The only string tied to any of these is the privilege of sending ten sows to the champion boar to be bred and of sending five to be bred to the reserve champion. Mr. Kerr thinks much of these boars. He feels that they are destined to be great breeding boars and they should not leave the herd, but all the good boars cannot be retained, hence they will go with the reserved right to breed the few sows mentioned above. Throughout Mr. Kerr's offering there will be found material fit to head any herd. When picking the show herd some

NO-TAR ROOF

ROOFING MADE WITHOUT TAR, AS I MAKE MINE, WILL RESIST FIRE. LET ME TELL YOU WHY

I INVENTED many of the good asphalt roofs that are sold.

Five years ago I invented one of my own that resists fire and is better than any of the others.

Send me your name and address on a post card, and I will tell you all about this roof and how it secures lower insurance rates. I will also send you a sample of it to test, and a copy of my FREE book on how to lay roofing with no tools but a

sharp knife and a hammer. My book also tells why my "No-Tar" Roofing is the only roofing that is weather, water, acid and almost wear proof, as well as Fire Proof. "No-Tar" won't crack in cold weather, won't melt in warm weather, and lasts as long as the building.

You ought to send for my book at once, if you have any roofs that need attention. Write me a post card today. Do it before the matter has a chance to slip your mind.

O. A. Hoppes, Secretary, THE HOPPES CO., 2401 Fillmore St., Chicago.

cows and heifers and five bulls, including the stock bull Wellington, a four-year-old by Hesiod 29th, and out of a dam by Don Juan, a son of Anxiety 4th. Several daughters of Hesiod 29th are cataloged, and the females are mainly in calf and have calves at foot by Wellington, and the bulls cataloged are sired by him. Mr. Little includes the tops of his herd at this time, as on account of his age he is retiring from the cattle-breeding business. There are numerous attractions in the sale to take Hereford breeders and admirers to Kansas City. November 1st Manager McGavock will be glad to mail catalogs to all who ask for them.

LAST CALL FOR THE MCKELVIE POLAND SALE.

The royally-bred offering to be sold by Mr. H. L. McKelvie at his farm near Fair, field, Neb., promises to be one of the best sales of the season. The McKelvie herd has been treated for the best results possible and the stock will be found in good breeding condition. Mr. Homer McKelvie is one of the best hogmen of this day. He is well posted on pedigree, as well as being familiar with the type that crosses well on the hog where good results can be expected. His herd has been recognized as one of the best of the breed and we believe that they will impress you as such on sale day. The real bargains of the sale will be found in the number of aged boars going in the sale. Mr. McKelvie has several strong boars that are certainly worth any breeder's time, and if you are looking for a herd boar we would tell you that you have the good ones to select from when you attend this sale. This offering will be sold on October 26th, and at that time you will find as many choice spring

herd of Illinois—a record never equaled by any breeder in America. Two herd boars, Ohio Chief 2d, a son of the noted World's Fair boar, Ohio Chief, and Silkworm, a son of Oom Paul 2d and out of Dotie, the grand champion sow at the World's Fair, should interest all breeders in search of herd boars of show-yard type and individuality. In our next issue we will have more to say regarding this noted sale. If you are not on Mr. Seckman's mailing list, write at once for catalog and plan to be present at this, the most noted Duroc dispersion sale of recent years. A special train, after the sale of Mr. T. E. Laurie on Tuesday, at Jacksonville, Ill., will give breeders an opportunity to get to Mt. Sterling the evening before the sale. Bids sent to Mr. D. M. Pierce, representing this paper, will be properly handled if breeders find it impossible to attend in person. Get catalog at once. It tells the story. Mention this paper when writing.

GREER'S DUROC SALE—LAST CALL.

The forthcoming Duroc sale to be held at Bushnell, Ill., on Monday, October 22d, by Messrs. M. W. Greer & Son, of Rushville, Ill., is one of the most important of the year. The offering is made up of practically fall stuff with the exception of ten or twelve spring pigs of either sex. At the Illinois State Fair held two weeks ago Messrs. Greer won second on Illinois Chief, a good illustration of which appears on another page of this issue, in the six and under twelve months boar class; first on sow in twelve and under eighteen months class, third on boar and three sows under one year, third on boar and three sows under one year bred by exhibitor and second on four swine get of boar bred by exhibitor. There were many breeders present who thought that Messrs. Greer

Suburban Stock Farm.

Suburban Stock Farm, home of Suburban herd of Duroc Jerseys, owned by Mr. H. B. Griffiths, of Bowen, Ill. A select draft from this herd is offered at public auction on Friday, October 26th. See page 42.

that were the equal of the winners were left at home. Others that are perhaps better were not shown on account of their ages not being right. These will be found desirable things to buy for breeding stock. In picking the sale stuff, which has been carefully done, the hogs show that breeding from champions produces new champions and that Mr. Kerr understands the mating of hogs. Mr. Kerr's advertisement will be found on page 38. Write him today for a catalog and kindly mention this paper.

HEREFORDS IN THE KANSAS CITY AUCTION, NOVEMBER 1ST.

Mr. R. T. Thornton, of Kansas City, Mo., is producing Herefords of splendid type, that will compare favorably with those of the best herds of the country. In the McGavock sale held at Kansas City April 4th and 5th of this year, his consignment averaged just \$250, and were sired by Pathfinder, a son of Imp. Improver. This was likely the best average made by any consignor to this auction and Mr. Thornton is sending to the McGavock auction at Kansas City, on November 1st, ten head of representative animals from his herd. Five of these are sired by Pathfinder, and are two and three-year-old heifers, some of which have calves at foot and their lives of usefulness before them. These young cows are in calf to Hero, an intensely-bred Beau Brummel bull. The get of Hero are also cataloged by Mr. Thornton, as are also sons of another Anxiety 4th, Ablution, whose sire was a son of Wild Tom, and whose dam was by a son of Anxiety 4th. The Thornton consignment will stand the most critical inspection. Several herd-heading bulls are included and the females are attractive to investors at the prices they are commanding. D. B. Rogers, Brookfield, Mo., consigns in Sir Arlington one of the best bulls of the auction. He was got by Drusus, a son of St. Louis, and William Cummings, manager of the great Armour herd, says that he has seen recently. Another good one consigned by Mr. Rogers is Chief Lamplighter 3d, whose sire was by the famous Lamplighter, and whose dam was by Dandy Rex, the celebrated champion and son of Lamplighter. No better-hred Anxiety bull could be found. These bulls have been shown by Mr. Rogers at local fairs and are undefeated. One of the largest consignors to the auction is G. B. Little, Olathe, Kan. He catalogs twelve

pigs as will be found anywhere. The young animals are showing up as well as you could expect and they have not been hurt with fat. They are the type that show as much quality as well as size and vitality. The gilts are the kind that grow into the large, roomy sows which produce the large, even litters and raise them. Then, we find the herd one that has passed through cholera and the pigs have been treated with the Ridgway process. This process has been found very good in Clay county, where several other herds have been treated. If you have not received one of the McKelvie catalogs write him at once and get one before sale day. If unable to attend sale, send your bids to Mr. G. W. Segrist, of this paper. The McNutt & Meese sale follows on October 27th and can be reached from the McKelvie farm. Messrs. S. & O. McKelvie sell October 25th. Try and attend all sales at one cost.

SECKMAN'S CLOSING OUT SALE OF DUROC JERSEYS.

One of the most important Duroc Jersey sales of the year is that of Mr. Geo. W. Seckman, of Ripley, Ill., which will be held on Wednesday, October 24th. The reputation made by this herd is too well known to comment upon. Everything goes, as Mr. Seckman has determined to close out his entire herd. This gives to breeders of the central West an unequalled opportunity to secure the best this famous herd affords. It is only in dispersion sales that breeders are given the opportunity to secure the brood sows and herd boars which have produced the kind of stock which have made this breed famous. Mr. Seckman refused tempting offers for some of his brood sows, but solely because he had determined that once he advertised a closing out sale he would not sell his best sows and offer breeders the culs. Mr. Seckman says the following of his herd in making announcement of this sale: "The Gold Dust herd has shown through our great State and World's Fairs for the past twelve years, and made a record that will stand as a towering monument for it. At the great St. Louis World's Fair in the best show ever seen of the breed, where I met all the best herds in America and in open competition with those herds, I won on eight head of bogs twelve prizes, including champion boar and grand champion on Tip Top Notcher, that recently sold for \$5,000, and champion

should have been awarded first on Illinois Chief in the six and under twelve months class and that the females, full sisters to him should have been further up in the list. This litter of eight have probably attracted more attention throughout the Duroc fraternity this year than have any one litter. They are included in the offering and should prove attractive to breeders throughout the central West who are in the market for first-class breeding stock. This litter consists of four boars and four gilts and was farrowed on October 7, 1905. Their sire, Tip Top Notcher, is too well known to need any comment. Their dam was Daisy Improver, one of the best sows of the breed. She has farrowed three litters, all good ones, inside the last eleven months, the last litter farrowed on October 8th. A yearling boar, of which there are a number of good ones in the sale, that will attract attention is by Gold Dust 46725 and out of Elsie, she by Tip Top Notcher. A litter brother and sister are also consigned and will please buyers. A September 13, 1905, boar by S. A. Douglas, he by Ohio King 12719 and out of Sallie Seckman 127234 by Tip Top Notcher, is a very good boar fit to head some good herd. Two September boars by Oom Paul and out of Fancy Ella by Roosevelt 7599, he by Prince Marti, are good enough to head any herd. Two boars and two sows of December farrow are especially attractive. Their sire was S. A. Douglas and their dam was sired by Gold Finish. A litter by S. A. Douglas and out of Lottie S., the first-prize gilt under six months in 1905 at Illinois State Fair and first in class of fifteen in the twelve and under eighteen months class this year at the same fair, should appeal to the breeder who wants something good. A boar and two sows make up the offering from this sow. Two boars and two sows by Toko Paul, first prize in eighteen and under twenty-four months class at 1906 Illinois State Fair and out of Daisy Improver, the dam of the "Invincible Eight," come as near as possible to filling the bill to the breeder who wants spring stock. An April gilt by Buddy K. IV., first and champion boar at Illinois State Fair 1905 and second prize aged boar at same fair this year, is good enough and bred richly enough to go into any herd. There are twenty-five fall and yearling sows that will do well to go into brood sow sales this winter and make a nice profit to the breeder who secures them, or will prove valuable additions to any

herd. This offering is one of the strongest of the year and is the first sale of the Grand Champion Sale Circuit. Bushnell can be easily reached from any direction and the sale will be over in time for breeders to get to Jacksonville for Mr. Laurie's sale the next day. Bids sent to Mr. D. M. Pierce in care of Messrs. Greer, at Bushnell, will be honorably handled. See announcement on page 42 of this issue.

FAST CALL FOR THE MORNING SUN COMBINATION ANGUS SALE.

At Morning Sun, Louisa county, Iowa, on Thursday, October 25th, at 1 o'clock p. m., Messrs. McElhinney & Cuhit and S. E. Edgar will offer a select draft of thirty-nine head from the Honey Creek and Cedar Row herds, consisting of nineteen grand, thick-fleshed cows from three to eight years old, belonging to such families as Baroness, Brucehill Violet, Chloe, Drumin Lucy, Lady Ann, Miss Morrison and Rothelmay Georgian. They possess plenty of scale; have broad backs and heavy quarters. In fact, they are representative Angus females, and are in first-class working condition, each cow bringing a calf every year. Several of them have calves at foot and all are bred to either the Trojan-Erica-topped Blackbird bull, "Bigger," a grandson of the great Equestrian, or to Prince of Highlington 3d, a Pride bull by the renowned Black Monarch of Emerson, who won first on get of sire at the St. Louis Exposition. The fifteen yearling and two-year-old heifers are as fine a lot as one would wish to see. Several of them are sired by the bull, Licitor of Dalmacy, bred by Lord Roseberry, and was sired by the K. Pride bull, Klon dyke of the Burn; others by the Ruth bull, Jadin, an animal very strongly bred in the Trojan-Erica blood. Others by Leon Artist, a son of Artist Knight, a bull that Mr. L. McWhorter, of Aledo, Ill., used so successfully a few years ago, and out of Lucie Estill, that sold at the Estill dispersion sale for \$2,800. Some of these heifers have three Estill tops; they are Georgianas, Miss Morrisons, Wester Fowils, Drumin Lucys, and Zaras. The bull offering consists of five head from ten to twenty months old and are a good lot, just the kind to sire the market toppers. Arrange to attend the sale where you can see a representative lot of Angus cattle that have been kept under farm conditions, cattle that will no doubt pay big returns on the money invested in them. For catalog giving full particulars write to Mr. W. K. Henss, Wayland, Iowa, mentioning The Homestead.

H. S. CHAPMAN SELLS THE LARGE TYPE.

The above named gentleman located a short distance from DuBois and Pawnee City, Neb., will sell one of the good, strong offerings of the season. Mr. Chapman has a herd of Polands that please the hogmen in general, and we believe he will offer as many choice things in his sale as will be found anywhere. His hogs are of the large, roomy sort with enough quality to make them wanted by the best of breeders and farmers. We have inspected herds where they have been spoken of very much more than the Chapman herd, but will say that we can't find any better hogs than will go through his sale on October 23d. He has an offering that is pleasing to look at. They are strong in bone, good head and ears, good, strong backs and the very best of feet. Mr. Chapman has never crowded his pigs off their feet, but has fed them for the best results to the purchaser. The offering will be fifty strong, being equally divided in sex. The great breeding hoar, King Do Do, has made good as a breeder and we believe his name could be classed among the top with the rest of the choice hoars. King Do Do was sired by Expansion and out of Me Over Queen by Chief Me Over. This hoar has the blood lines that have made the breed strong. King Do Do is a hog of good size and well balanced. He sires large, even litters and his get are the type that please all good hogmen. Mr. Chapman has as strong a lot of sows as will be found anywhere and these have mated well with the above-named hoar and Longfellow and Brilliant Chief. Longfellow was rightly named, owing to his great length and size. He was sired by Johnson's Chief and out of that great brood sow, Susie M.'s Best. His get are very much of his type and are such as will grow out into animals weighing from 500 to 900 pounds. Brilliant Chief by Black Chief is also in the herd and his get will show for him on sale day. The sows in the herd represent the blood of such hoars as Blain's Tecumseh 2d, Highland Chief 2d, King Do Do, Major Blain, Butler Chief and Corwin Medium. The hoars have mated very well and we feel confident

that you will be well pleased with the offering on sale day. Mr. Chapman has never tried to over estimate his herd and we will say here that this herd is one of the best of the breed and deserves the patronage of the best of breeders. His hogs show as much quality and vitality as can be found in the state of Nebraska. Mr. G. W. Segrist will represent this paper and any bids entrusted to him will be honorably handled. Look up display advertisement on page 35.

SCOTCH SHORT-HORNS AT AUCTION AT KANSAS CITY.

Entries are full and quality runs high in the auction of Short-horns to be held under the management of Mr. W. C. McGavock at Kansas City, Mo., on Friday, November 2d. Branstetter Bros., Vandalia, Mo., and W. L. Wright, of the same place, are consigning twelve head, eight of which are Scotch and include Imp. Fairy Maid 3d, a grand Scotch cow bred by George Shepherd of Tarves, sired by the Gordon-bred bull Miraheau, a son of the famous Star of Morning. This cow, one of the best to be offered at auction this season, will be sold with a beautiful red heifer calf at foot by the celebrated champion Lavender Viscount. Imp. Rosie 17th, another young cow, calved April 6, 1901, and also bred by Mr. Shepherd, was got by Scottish Victor that was bred by Mr. Duthie from a Victoria dam and was sired by the famous Scottish Archer. She is a splendid roan of grand conformation and will be sold with a hull calf at foot, and a daughter, Rosie 19th, is also cataloged. This heifer is just a year old, being calved September 3, 1905, a good age for the shows, and was sired by Standard Bearer, a son of Godoy, and the cow Flora Glamis, a daughter of Imp. Flora 17th by Perfection. A daughter of the celebrated Godoy is also cataloged in Almeda of Idle Wild 2d. She was out of Almeda by Valley Champion, and her second and third dams are by Scotchmen and Lord Glamis respectively, while her fourth dam is Imp. Arhus by Roan Gauntlet. A red three-year-old heifer of the Cruickshank Orange Blossom family and also descending maternally from a dam by the renowned Roan Gauntlet, is Princess 10th. She is of the same branch of this tribe as Messrs. Bellows' stock hull, Master of the Grove, the International Champion, and was got by Christopher, a Bothwell-bred bull by Grand Lavender, and out of the Scotch cow, Coleen. Two young cows bred by Mr. Bothwell, of Missouri, and descending from Imp. Columbia by Lord Lancaster, are cataloged. They were sired respectively by Nonpareil Victor and Grand Victor and are bred right and of the type that suits the best purchasers of Scotch cattle. A hull of this same family, Nonpareil Tuck by Friar Tuck, completes the list of Scotch cattle in the offering from Vandalia. There are fifteen consignors to the auction, and the most famous sires and strains of the breed are represented. The catalog should be in the hands of all friends and admirers of the breed and can be had by addressing Mr. McGavock.

SECKMAN'S DUROC DISPERSION.

It is only in dispersion sales that the buyer has the opportunity to bid on stock which at private sale would not be priced under any consideration. The dispersion of the Gold Dust herd of Duroc Jerseys owned by Mr. Geo. W. Seckman, of Ripley, Ill., gives to the Duroc fraternity of the entire country such an opportunity. Grand brood sows which have furnished the stock that made this herd famous are included in the offering, a number of them selling with litters at side by Tip Top Notcher. Of this boar it seems hardly necessary to again repeat the facts concerning him. He was shown with grand success at the different shows throughout the entire country and ended up at the World's Fair where he was grand champion hoar of the breed. Much of his get are to be found in this sale and a number of litters to be sold with the sows are sired by him. A strong attraction in the hoar line is found in Ohio Chief II. 41607. He was sired by the noted breeding hoar, Ohio Chief, and his dam was Chic's Belle by the World's Fair winner, Orion II. Individually Ohio Chief II. resembles his noted sire, has the bone, length, quality and finish which are so greatly in demand at the present time. The breeder who is in search of a herd boar should not be absent sale day. Silkworm by Oom Paul II. by Oom Paul, the winner of more firsts and sweepstakes than any Duroc boar living or dead, and out of Dotie, the grand champion sow at the World's Fair, is a hoar of exceptional merit that will fit into the position of herd boar in any company. Much of the breeding of these hoars is found in the sale offering and offers the best evidence of their breeding qualities. Lack of space forbids our going into detail regarding this noted offering. We wish to call attention, however, to some of the main features of the sale. Tried brood sows which under no other circumstances would be priced are offered at auction. Each and every one has been a good producer, else she would not be found in this herd. The sows which sell with litters will be cared for until such time as it will be safe to ship them. Of the 100 head cataloged, all but about fifteen are females. The boars have been selling so rapidly and at such good figures that it was with difficulty that Mr. Seckman was able to reserve the number which are cataloged. Mr. Seckman has kept some of the best spring boars he raised this year, as he knew from former experience that there are always those present at fall sales who want good boars. This sale offers the opportunity to the beginner to secure a good herd boar and a few well-bred brood sows of the richest breeding and individuality at his own figures from one of the most noted herds of the breed. The opportunity presented in this sale comes but once in the history of any breed and breeders and farmers should not be slow to grasp it. The sale of Mr. T. E. Laurie, of Jacksonville, Ill., comes the day before and Mr. Seckman will run a special train from Bluffs the evening before, which will connect with the train from Jacksonville. Breeders may in this way attend both previous sales and be on hand early at Mr. Seckman's. The sale starts promptly at 10 in the morning and breeders should arrange their plans to be present at that time. Catalogs are now ready and will be mailed to all who write for them as per the announcement on page 42. Mr. Seckman will consider it a favor if those writing would mention this paper. Bids sent to Mr. D. M. Pierce, rep-

..COMBINATION SALE..

OF

ANGUS CATTLE

TO BE SOLD AT MT. PLEASANT, IA.,
WEDNESDAY, OCTOBER 24, 1906,
..... AT 1 O'CLOCK P. M.

This offering consists of thirty-one cows and heifers and ten bulls of the following families: Erica, Blackbird, Coquette, Brucehill Violet, Drumin Lucy, Pride, Queen Mother and other good families. This is a strictly high class offering where the Bluest Blood and the highest standard of excellence are combined in the animals offered. This stock is consigned by W. B. Seeley, J. D. Beaber, J. T. Cline and W. K. Henss, among the first breeders of Angus cattle in Southeastern Iowa. For catalog, Address

W. E. MARRS' SALE OF Duroc Jerseys

At Albany, Mo., Tuesday, October 23.

25 BOARS.

25 SOWS.

These are largely the get of Pilot J. 26311, he by Pilot 12075. His dam, Dora, was got by Elmo 7175. Pilot J. was formerly used in R. J. Harding's great herd. The dams are daughters of the great show boar, Improver II., Cole's Duroc, Masterpiece and Golden Duke. The Improver and Cole's Duroc sows were bought at the great Bowman & Fitch dispersion. I think I have hogs to please you. Send for catalog, mentioning this paper.

W. E. MARRS, ALBANY, MO.

representing The Homestead, in care of Mr. Seckman, will be properly handled. Get catalog at once and plan to be present sale day and during the entire week of the Grand Champion Sale Circuit.

MT. PLEASANT "OPPORTUNITY" HEREFORD SALE, OCTOBER 30TH.

As per the advertisement on page 36 of The Homestead, catalogs are now ready for the "Opportunity Sale" of Herefords and Short-horns to be held at Mt. Pleasant, Iowa, by Mr. D. R. Mills, sale manager, Des Moines, Iowa. The sale of Herefords will be held on Tuesday, October 30th, in the fair grounds sale pavilion at 1 p. m., and will include about sixty head of breeding cattle from the herds of Messrs. A. E. Church, W. T. Wright, J. H. Wallbank & Sons and John Burke, of Mt. Pleasant, Iowa; W. A. Tade & Sons, Hillsboro, Iowa; J. V. Brook, Bentonsport, Iowa; J. L. Jones, Roscoe, Iowa; John Saar, Jr., Cantril, Iowa; G. B. Robinson, Marble Rock, Iowa; John Shepherd, Danville, Iowa. Forty-five splendid cows and heifers and fifteen bulls have been cataloged for this sale and they are of such lines of breeding as to represent the very best show strains of recent years. Quite a large proportion of the females will possess added value because of the fact that they sell with calf at foot. Mr. J. L. Jones consigns a particular hull whose lines of breeding are so prominent and so closely connected with the progress of the Hereford breed that we must warn those who are looking for herd headers to look him up. This is the three-year-old, Perfection's Percy 15923. This animal was bred by Mr. Hoxie and is a son of the \$5,000 Perfection, he by the great \$10,000 Dale and from there on combining such a list of great sires as can be boasted by no

other Hereford individual of which we have any knowledge. It is Columbus, Earl of Shadeland 41st, Garfield and so on back to the fountain head of Hereford perfection. On the other side of his dam we find the names of The Grove 3d, Lord Wilton, Regulus and still others that have helped to make history. Two of the Jones cows will sell with calves at foot by this bull and this fact will enable those who attend the sale not only to judge of his individual merit, but of his quality as a sire. A yearling heifer of his get has been cataloged, also other females in Mr. Jones' consignment, all nicely bred. Mr. A. E. Church, of Mt. Pleasant, Iowa, sends forward among his seven bulls the handsomely-bred herd bull, Carlyle 178641. He is a low-hull, broad-backed, smooth and mellow-fleshed fellow and in addition to these desirable qualities he is a tried sire of high merit. He is a grandson of Eureka, the grandsire of the champion cow, Lorna Doone, and on the side of both sire and dam there is a strong proportion of the blood of that noted animal, The Grove 3d. Three of the other young bulls in the Church consignment are the get of Carlyle, as are also some of the fourteen head of females in the consignment. The cows of other lines of breeding are bred to him and have calves by him so that his blood is pretty well sprinkled throughout the entire lot. Mr. W. T. Wright sends forward three cows showing strong Lord Wilton and Anxlety crosses, possessing high quality and individual merit. Mr. J. V. Brook consigns one cow and three bulls, all of which are the get of Columbus 51st and if there is any pedigree having more blue blood in its top lines than this the hogs do not show it. The dams are also nicely bred. Mr. John Saar, Jr., has a very nice lot, both male and

MODERN \$3.99 Front Door 3=

REGULAR PRICE \$8.50

This beautiful art door is 2-8x8-1/2 in. thick, made of first quality soft pine, suitable for oil finish or paint. The side rails are wide giving plenty of room for locks and trimmings. GORDON VAN TINE & CO., Station 121 Davenport, Iowa

female, one of which is a granddaughter of Princeps, whose get have proven so remarkably successful at the state fairs this fall—one a granddaughter of the noted Corroctor and others that claim public attention. One bull and two cows are consigned by Messrs. W. A. Tade & Son, of Hillsboro, Iowa, all of which are but one or two removes from Earl of Shadcland 41st. Messrs. J. H. Wallbank and John Burko send forward two cows, one of which is a daughter of Nero, he by Eureka, and the other a granddaughter of Anxiety 4th. Mr. G. B. Robinson lists some excellent granddaughters of old St. Louis, whose blood is of pure gold and getting scarce, also some fine granddaughters of Lord Wilton. All of his females have lusty calves at foot. Mr. Robinson also includes some splendid young herd bull prospects of royal breeding. Other promising bulls are cataloged by Mr. John Shepherd, of Danville, Iowa, same being sons of Alto Beau 8th by the prize-winning Masquerader, and Wilton Alamo 6th by Wilton Grove, grandson of Lord Wilton and The Grove 3d. Catalogs are ready and will be cheerfully forwarded upon application to Mr. D. R. Mills, sale manager, Des Moines, Iowa, who also writes those contemplating entries for his Kansas City, St. Paul and Omaha sales to forward same at once.

THE HEATHERTON ANGUS BULL.

An important Angus sale will be held at Naperville, Ill., a point twenty-eight miles west of Chicago on the main line of the Burlington road, on Wednesday, October 31st. At that time Mr. John S. Goodwin, of Chicago and Naperville, Ill., will offer as fine a bunch from his herd of doddies as have passed under the hammer in recent years. Notable among this offering is the yearling bull, Heather Monk. He is by Black Monarch of Emerson and is a great-grandson of Black Knight, the sire of the first and third prize cows at the Columbian Exposition. This bull as a yearling weighed over 1,600 pounds, and has been tested and found to be a sure breeder. A pair of twins will be offered sixteen months old by Zaire 12th, the bull now at the head of Mr. L. H. Kerrick's herd. Prince of Elches 3d is a fifteen-months-old Erica and Jilt-bred bull that is good enough to go at the head of any herd. His dam will be sold with a fine heifer calf at foot. There will be three Zaires in the sale and four Blackbirds among the bulls. In all there are seventeen young bulls. Some of them are a little young, but they are a good lot throughout and are in good condition, in just good shape to winter through and be ready for service in the spring. Of the forty head of cows cataloged, about one-third have calves at foot and half the number have offspring in the sale. Fourteen of the cows are Blackbirds. The bunch includes Blackbird Lassie 7th by the \$3,100 Black Woodlawn. She has a fine heifer calf at foot. Her first calf is now at the head of Messrs. Palmer & Palmer's herd. Blackbird 19th will be in the sale, the last calf of Blackbird 8th, she having a heifer calf at foot. Her last year's calf by Black Monarch of Emerson is being kept at the head of the herd. Trojan Ericas in considerable number are included in the offering. The Jilts in the sale are eye openers. Jilt 21st is smooth and round as an egg; Jilt 25th a little strong in the back, but a regular Prince It; Jilt 34th and heifer calf and Jilt 28th, all by the champion Blackbird King, excepting 34th, will make an array of extra good ones. The advertisement will be found on page 39 of this issue. Send to Mr. Jno. S. Goodwin, 184 LaSalle St., Chicago, Ill., for Heatherton Herd History and sale catalog, both of which are now ready.

WHEELER'S MASTODON POLAND CHINAS.

One of the coming Poland China herds of the West, of the very large, big-boned kind, a herd that is destined to become known wherever the big hog is in demand, is the "Mastodon" herd owned by Mr. W. W. Wheeler, Harlan, Iowa. Believing that the big hog is what the people want, he has laid a foundation that will furnish them as big as they want, and he now has boars and sows on the farm that are as big as box cars. But leaving aside the size, he has a choice lot of spring and fall gilts that have about as much quality as will generally be found with hogs of this size. He has a nice bunch of spring boars that he is now selling as fast as the orders come in, and they have the size and the bone that the boys are after. These are sired by Surprise Wonder 5th, dam Miss Longfellow by Chief Price, a boar that descends in all his crosses to the big ones, and his get resemble him in every way. Mr. Wheeler recently purchased of Mr. John Miller the 800-pound boar Columbia Chief 2d by Columbia Chief, dam Royal Princess by Chief Price, and he now heads the herd, assisted by Longfellow B. 88959, and both of these boars can be easily made to weigh 1,000 pounds. Columbia Chief emasures seventy-two inches from center of ear to root of tail; heart, seventy-seven; flank, seventy-seven, and bone ten and one-half inches, and he was winner of third prize at Sioux City Interstate Fair this year in one of the best Poland China shows of the season. Longfellow B.'s measurements are about the same, and he has an eleven-inch bone. Another of Mr. Wheeler's recent purchases is the 800-pound sow Molly Surprise by Chief Price, dam Molly Jones by Mollie King Jr. Here is one of the largest and one of the best big sows in the West. Every breeder that sees her wants Mr. Wheeler to price her, but she is not for sale at any price. Among his other big sows is Orange Maid 6th and Orange Maid D. by Chief Price, Lady Wonder 6th by Wonder, Miss Wonder 2d by Wonder 2d, Lady Wonder 5th by Surprise Wonder 4th, Extra Length 8th by Sunshine Chief, and several others that are all descendants from the big strains and are all as big as express cars themselves. Poland China breeders who want size and bone should keep their eyes on the Wheeler herd in the future. It is destined to become one of the best "big herds" that will be found in the West, and Mr. Wheeler will be able to sell the boys just what they want. Just now he has a bunch of spring boars and one good fall boar for sale, and he will make a brood sow sale in the early part of the year. Write Mr. Wheeler at once if you want a boar pig, before they are all gone, and mention this paper when doing so.

MT. PLEASANT ANGUS SALE.

Parties looking for high-class Angus cattle

TOO LATE TO CLASSIFY.

WHITE Wyandotte cockerels for sale from birds scoring 94 and 96. These birds are farm raised. Write for prices. W. F. Kilpatrick, Harlan, Ia., R. 5.

should send at once for the combination sale catalog listing the animals to be sold at Mt. Pleasant, Iowa, on October 24th. There will be drafts from the herds of Messrs. W. B. Seeley, of Mt. Pleasant, Iowa; J. B. Beaber, of Rome, Iowa; W. K. Henss, of Wayland, Iowa, and T. J. Cline, of Escapa, Blackbirds, Coquettes, Prides and Queen Mothers. The blood of Blackbird Ito, senior yearling champion at St. Louis, is much in evidence in this offering, as is also the blood of Black Woodlawn, Gay Lad and Moon Eclipse. The offering includes thirty-one females and ten bulls, and it will be many a day before a similar opportunity to get something good in the doddle line will present itself. Among Mr. Cline's offering is a Brucehill Violet cow, Glasgow Waneta Bell 59411. She is by Admiral Dewey of La Crew 25645 out of Waneta Bell 20764. She is bred to John Hay 2d and will calve about time of sale. She is a good individual and bred just right. Mr. Cline's offering also includes Rural Black C. 87164, a Drumlucy bull by John Hay 2d. He is just one year old and weighs 945 pounds, and is an extra good, smooth individual. Mr. Henss is offering a twelve-months-old Pride bull, Bolide Duke 90219, out of imported sire and dam. He is a calf of good scale and should make some man a great herd bull. Mr. Henss is also offering a Baroness cow, Woodside Beatrice 4th 74001 by Questo 38978. She is safe in calf to the Trojan-Erica topped Blackbird bull, Blackcap Engle. Mr. Beaber is offering a Brucehill Violet cow, Frances of Rome 48211, by Admiral Dewey of La Crew and a granddaughter of 2d Mayor of Estill. She is now suckling a good heifer calf by Glenfoyle Blackbird and rebred to him. Another good one from the Beaber herd is Fame 2d of Rome 81028 by Merceter 41067. She is safe in calf to Glenfoyle Blackbird and is good enough to please anyone. Mr. Seeley is offering a two-year-old heifer, Blackcapdale 76269, a son of the \$2,100 Blackbird calf, Black Knight of Estill 9th, he by Imp. Entwistle. This heifer will be bred about sale time to the champion Blackbird Ito. Her breeding and individuality should command the attention of those looking for something good. Mr. Seeley is offering a twelve-months-old calf, Ericadale 85513, by Blackbird Ito 64116 out of Evadale 65875. On the dam's side this bull is a grandson of the \$3,050 Gay Lad. The individuals referred to here somewhat in detail are chosen promiscuously from the list, and they therefore show the general character of this offering. The date of the sale is October 24th, the place Mt. Pleasant, Iowa. Catalogs are now ready and will be furnished upon application to W. B. Seeley, Mt. Pleasant, Iowa. See the advertisement on page 34.

JNO. TRIGGS SELLS THE TYPE THAT RETURNS PROFIT.

The writer has inspected the Triggs herd of Poland Chinas, located at Dawson, Neb., and will say that they are good in all respects. Mr. Triggs' offering on October 24th promises to be strong in both boars and sows. The large, roomy type that has been reared on this farm for the last few years has made the owner a reputation worth considerable to the hog business. He has always believed in the hog that has growth enough to be attractive to the farmer, as well as nine-tenths of the up-to-date breeders of the Poland hog. His offering will consist of about fifty head, of which about twenty-five will be young boars of spring farrow and the balance gilts. The breeder looking for a good, growthy pig should try and arrange to attend this sale, as he will find them in the best of condition to bring results. The large, mammoth boar, Major M. by Blain Tec., is responsible for the most of the offering and this hog is recognized as one of the greatest sires of the breed. He is what we call a 1,000-pound hog and with this enormous size we find a hog with considerable quality. He is very strong as a sire and his get show his strong features in way of good bone, strong back, growth and plenty of quality. The hogs from the Triggs herd have proved very useful ones and the sire, Major M., has always made good crosses wherever tried. This hog is one that has caused considerable talk and the owner has refused several good offers for him. He was strong enough to be shown at the Nebraska State Fair and should have made a great show had the owner only given him the chance that he so rightfully deserved. He comes from the Blain herd and is probably as good a hog as Mr. Blain ever bred. His get are such as will please the breeders in general and the man not able to attend the sale can feel safe in sending a mail bid on this grand hog's get. He has mated well with such families as Sir Gaspar, Curtis Chief, King Do Do, Proud Perfection and many more that we mentioned in our last week's issue. The writer can truthfully say that the offering is one of merit and the men from a distance can expect to see hogs with size and finish. Many of the boars are such as would bring the high market were they shown. Good strong gilts that have all prospects of future marked on them are going to be offered. You will not only be pleased with the offering as individuals, but will like the strong line of breeding represented. If unable to attend this sale send your bids to Mr. G. W. Seagrist. Remember that the sale will be held at the Page sale barn, in Dawson, Neb. Dawson is on main line of B. & M. railroad. Look up display advertisement on page 43.

CITY TICKET OFFICE, 512 WALNUT ST.

When you think about traveling call at City Ticket Office of the Minneapolis & St. Louis R. R. (in with the Wabash), at 512 Walnut St., where you will secure the best and latest information. KEAN'S Growthy Durocs—All ages, the best of breeding, extra large bone. Also one yearling and aged male. Frank Kean, Mt. Pleasant, Iowa

The Steward & Hutcheon Sale of Herefords

The sale of Hereford cattle to be held at Bolckow, Mo., on Wednesday, November 7th by Messrs. Steward & Hutcheon is brought about in order to settle the estate of the late John Steward. Our readers no doubt are aware of the fact that the late John Steward had no superiors and few equals as a judge of this, his favorite breed; that he was a past master at the breeding business and that when he and Mr. William Hutcheon formed a partnership some twelve years ago they made a team such as has not yet been surpassed in the breeding business. Both gentlemen knew their breed, knew its good qualities and its weaknesses, and their one object during the time they were associated in business was to see how good they could make their cattle. That they succeeded in climbing to, or near, the top round has been proven in the many hard-fought show-ring battles, in which many of their animals have carried off first honors; others have pressed the winners hard, standing close seconds and thirds, and this in the best shows in America. Just as their herd had reached a place in the Hereford world where it was the source of much profit and pleasure to both members of the firm, death stepped in to claim Mr. John Steward and a firm that had become known from ocean to ocean and in every country where Herefords are raised, was dissolved, and in order to settle Mr. Steward's estate a public sale was made necessary. In this sale there will be some fifty head, the only reservations being the old herd bull, Beaumont, and some old cows. With these Mr. Hutcheon will continue in the breeding business. The 1905 show herd with the exception of the yearling bull that headed same will go in the sale. Then there will be several daughters of Fowler Queen, the greatest show and breeding cow ever got by Messrs. Van Natta & Son's great bull, Fowler. A short sketch of what Fowler Queen has done should prove interesting. She is now fifteen years old, was dropped the property of Mr. John Steward and as a yearling won second place in class at the Chicago World's Fair and has produced a calf every year since she commenced breeding. The last nine calves have been dropped in October of each year. None have ever stood lower than third place where shown and Fowler Queen for the first time in ten years will miss calving in October, she not being due until the middle of November. Twenty of her descendants are in the herd, and like their dam they are easy keepers, symmetrical in form and desirable things to have in a herd. Fowler Queen today carries an evenness of flesh that is seldom seen, and few who see her realize that she is a cow of such an advanced age. Those who want breeding cows to add to their herds will do well to look to this family. Ten heifers are daughters of Beaumont 134751, the most successful and satisfactory breeding bull ever used by Messrs. Steward & Hutcheon. In the show ring Beaumont always stood second and third and could have been placed higher in many instances without causing dissatisfaction among the ring-side talent. His sons and daughters have done the winning for Messrs. Steward & Hutcheon's herd and cows bred to him or with calves at foot by him should be in demand. As the demand for bulls from Messrs. Steward & Hutcheon's herd has been far in excess of the supply there will be but three to go in the sale from this herd and in order to make the bull end of the sale attractive Messrs. Van Natta & Son, of Fowler, Ind., were asked to contribute seven head. They have selected seven sons of their great breeding bull, Prime Lad, and from their best cows. These, with Parsifal 206826, the second-prize junior yearling shown by Messrs. Steward & Hutcheon at the recent American Royal, and a double Beau Brummel yearling will make a grand lot of young bulls from which to select herd-bull material. In future issues more will be said of the various individuals that go in the sale. In the meantime we wish to urge all our readers who are interested in the white face to write for a catalog. The sale is to be held at the farm near Bolckow. Parties from a distance should go to either Bolckow on the Burlington or Guilford on the Great Western, as all trains stop at both these towns and the farm is about midway between. See page 37 for advertisement and address Messrs. Steward & Hutcheon, Bolckow, Mo., mentioning The Homestead when doing so.

John Rasmess' Short-horn Sale.

The fifth annual sale of Mr. John Rasmess, one of Iowa's best-known Short-horn men, will be held at the farm near Lake City, Iowa, on Thursday, November 1st. He has cataloged forty-six head, and has drawn on some of his very best cattle for this sale. There will be nine Scotch cows and heifers and five Scotch bulls, of the Victoria, Miss Ramsden, Mrs. Chioness, Matchless, Lavender and other Scotch tribes. Fifteen cows will have calves at foot by Red Knight, a bull well and favorably known to every good breeder in the West, a half brother to the Saunders bull, Cumberland's Last, and now chief stock bull in the Rasmess herd. Other cows will have calf by Lord Craibstone and Keystone 253187, a son of Lord Craibstone. This two-year-old was the bull that topped the W. J. Henry sale last year. He belongs to the Matchless family and he will also be sold in the sale. This trio of Scotch bulls will be the sires of all the calves that will be sold with dams in the sale, and many of these same cows will be safe in calf again. Among the richly-bred females that will be sold is Imp. Dalmeny Princess 9th, a six-year-old daughter of Royal Sailor. She is decidedly one of the great attractions of the year. As a breeder she has few equals in the state. She has five calves to her credit, has a lusty bull calf at foot, and is safe in calf again to Red Knight. This cow was a winner of second prize in Scotland when a two-year-old. She is a good individual and will not go begging on sale day. Imp. Gladys of Dalmeny is a richly-bred roan cow, also a daughter of Scottish Sailor and out of Imp. Gladys 47th by Prime of Fashion. She will also have a good bull calf at foot by Red Knight and will be rebred to the same bull. Another splendid six-year-old cow is Lavender Pearl. She is a daughter of the

Dutble-bred bull, Imp. Collure Archer, and is out of Miss Laveu by the Earl of March. She is a straight Lavender and one of the best things in the sale. She is a grand breeder, will have a good bull calf in the sale and is due to calve again to Red Knight. One of the best bulls in his last year's sale was out of this cow. One of the good bidders that will be sold is Bonnie Belle Mahone by the old bull, Champion, and out of Bonule Belle 2d by old Craven Knight. Her granddam is Imp. Bonnie Belle by Albion 95912. She is safe in calf to Red Knight. There will be eight or nine daughters of his old bull, Fitz Eustace, in the sale, and four daughters of the old Crawford bull, Champion. He is selling the well-known cow, Barrington's Gem, a Bates cow of considerable reputation as a breeder. She is the dam of the International sweepstakes steer, Princess of Quality, also dam of the two white steers that won first in their class at the same show a year later. The bull offering will be very attractive, and will be one of the best Mr. Rasmess has ever made. One of these is Lavender Fitz 253984 by Fitz Eustace and out of Lavender Pearl by Collure Archer. Then comes in unbroken lines such well-known bulls as the Earl of March, Red Emperor, Cumberland and Pride of the Isles. He is a straight Lavender and a very toppy fellow. Another corking good youngster and the making of a splendid herd bull is Prince Victor by Earl Victor and out of a daughter of Fitz Eustace. His second dam is Imp. Dalmeny Princess by Scottish Sailor. He is a low-down, thickly-made fellow and as toppy as you find them. He also sells the bull, Keystone, referred to above. He is a son of Lord Craibstone and out of a Matchless cow. This bull topped the W. J. Henry sale, and his dam is the mother of a couple of good herd bulls now at the head of other herds. Another very excellent young bull is Royal Victor, a Victoria-bred bull bred by the well-known breeder, Ernest Fuuke. Here we have one of the growthiest bulls in the sale, splendid in color and a nice individual, and he is a bull that the buyers are going to like when they see him. Red Knight's Model is another good youngster, a son of old Red Knight and out of a daughter of Fitz Eustace. The offering is a good one from beginning to end and breeders and farmers will find some very choice cattle in this sale. Write for catalog at once and kindly mention The Homestead.

Peter Hopley & Son's Imported Stallions & Mares.

On page 39 of this week's paper will be found the advertisement of that old and reliable firm of horse importers, Messrs. Peter Hopley & Son, of Lewis, Iowa. Of all the importing firms that have done business in the West none have done a straighter or a better business than this firm. The elder Mr. Hopley is considered one of the very best judges in America and he personally selects his own horses in France, Belgium and England. He is therefore enabled to give the buyer the benefit of his knowledge and also to save him an interpreter's fees and middlemen's profits. They sell their own horses and now have about thirty very choice stallions in their barns at Lewis, Iowa. These consist of Shires, Percherons, Belgian Suffolks and a few very choice German cobblers. In their importation this year they have brought over as grand a lot of black and gray two-year-old Percherons as has ever crossed the water. They will weigh from 1,750 to 1,850 pounds and they say that they never have had in their barns at one time so many good ones as they have in this importation. They also have some extra good big, heavy-boned Shires, two and three-year-olds, and some very low-down, drafty Belgians. They say about these: "Our Suffolks are the best that we have ever owned. We have three-year-old colts that will weigh now from 1,950 to 2,100, and only just landed. They are the kind that make draft colts that top the market and make a man's horses the pride of his farm." We personally know the men who are behind this firm and it is a pleasure on our part to recommend them to any of our readers who may want draft stallions or mares. They also have a nice bunch of Suffolk fillies on hand and they are pricing these at such a figure that any farmer can well afford to own a pair. Write them for prices on anything in their stables or go and see them personally. We will simply say this to intending purchasers, that they can get as good or better bargains here as they can get anywhere in this country. Write them at once and be kind enough to mention this paper.

McNeil Bros.' Duroc Sale.

A Duroc sale of more than ordinary importance will be held at Bowen, Ill., on Tuesday, October 30th, by Messrs. McNeil Bros. These gentlemen have won their way to the top ladder of Duroc breeding by careful selection of boars and the proper mating with extra good females. The best herds have been drawn upon for their breeding stock. At the head of their herd stands Hanley, the first-prize boar at the Ohio and Indiana State fairs in 1905. He has proven himself an exceptional sire and his get are appreciated by breeders who were fortunate enough to be present at the winter sale held by Messrs. McNeil Bros., in which forty sows of their own raising averaged \$48.01, up to that time the highest average ever made on Durocs in the state of Illinois. Their offering is made up of twenty fall sows, twelve spring boars, two tried brood sows, one yearling boar and fifteen winter and spring boars. They are the get of such noted boars as Hanley, Keep On Ill., Tip Top Notcher, Big I Am, Ambition, Cantina Boy, Buddy K. IV., The Great Conqueror, Queen's Pride, Chief No. 1, Msnley Orion and others. The offering is in good breeding condition and breeders may be assured of future profit when making selections from this good herd. In our issue of next week we will give full particulars in regard to this good offering, one of the best of the year. Catalogs are now ready and will be mailed to all who write as per the announcement on page 41 of this issue. Bids sent to Mr. D. M. Pierce, representing The Homestead, will be properly handled. Plan to be present sale day.

old heifers, and young calves in-
cluded, about 60 head of females70
HEAD

Owing to my removal from the state and entering other lines of business, I am compelled to part with my entire herd of Short-horns.

IT IS with greatest regret that I am parting with my herd of cattle. I laid the foundation of this herd by purchasing ten head of Scotch females and I have always used the best of Scotch bulls. My herd has been one of the best paying herds in the state. The Scotch-topped tribes are representative Young Marys, Amelias, White Roses, Belinas, Miss Severs, Carolines and Metlidas. There will be nine HEAD OF YOUNG SCOTCH BULLS in the sale, besides my well-known Scotch herd bull, Sovereign Cupbearer.

Watch for pedigrees next week. There never was a better time nor a better place to lay a foundation for a herd. Send for a catalog, mentioning The Homestead. Address,

C. E. TOWNSEND, ANITA, IOWA.

October 18, 1906.]

Last Call for the Combination Angus Sale of McElhinney, Cubit & Edgar.

In the last issue of The Homestead, considerable space was taken to enlarge upon the character of the good Angus bulls that had been used on the Messrs. McElhinney, Cubit & S. E. Edgar herds of Angus cattle, from which this select draft to be sold at Morning Sun, Iowa, October 25th, was drawn. There are thirty-nine head in this offering and only five bulls; thirty-four head being females of the most useful type and character. No old or worn-out cows are offered, as the oldest cow is only eight years old. There are nineteen cows in the offering, ranging from three years up to eight. The fifteen yearling and two-year-old heifers present a splendid aspect. They are in the bloom of youth and have all their future business life ahead of them. When it is considered that the Angus cow lives and produces for a quarter of a century, a pencil and paper would be required to figure out the hundreds of head of cattle that could be produced from a single female of this very prolific breed by commencing to breed them at two years old and figuring heifer calves half the time. One cow and her produce in ten years will produce seventy-one head; from this on the multiplication is much more rapid. One breeder in our acquaintance from the use of a single cow and her offspring did produce, and his herd books show the produce of, 237 head in seventeen years. The first five animals cataloged belong to the Baroness family; the next three are Brucehill Violets. These are followed by twelve Mayflowers, Lady Anns Elsie, Jeanettes, and Georgiana's, all the property of Messrs. McElhinney & Cubit. Mr. S. E. Edgar's offering commences with Lot 21 of the catalog and is a nicely bred Drumlin Lucy cow called Lucy Royal 4th, or rather she is a yearling heifer. Some splendid bulls have been used in her pedigree, one of which is Royal Eric by His Highness 6th. The last named bull is fresh in the mind of the writer as some eighteen years ago he had occasion to write this bull up along with his stable companion, Black Judge, at the time that the Hon. W. M. D. Lee, of Kansas, dispersed his then the most prominent Aberdeen Angus herd in America at Des Moines, Iowa. It was at this sale that Mr. Wallace Estill purchased His Highness 6th and Mr. J. Evans, Jr., purchased Black Judge. In their day these were considered the very best Angus bulls on this side the water. Lot 22 and 23 are of this same family and bred much in the same manner. The Drumlin Lucy's are always legal tender and a staple family in the Aberdeen Angus breed. Lot 24 is a Zara, sired by Leon Artist and he by Artist Knight, while his dam was the great show cow and producer of show cattle, Lucia Estill, a daughter of Heather Lad 2d, she being out of Lucia Windsor by the great bull Ermine Bearer. This beautiful Zara cow has a double cross of the great Heather Lad 2d in her pedigree. Lot 25 is a Rothiemay Georgiana, sired by the beautiful bred Pride bull McHenry's Pride 12th. This is a good useful cow that produces a calf every year and being a heavy milker produces exceptionally good calves. She is rich in Trojan Erica as well as Pride blood. Lots 26 and 27 are Westerfowles Lovelies. Lot 26 is a granddaughter of Imp. Entwistle and Heather Lad 3d of Estill. In the second list of sires in this pedigree will be found such bulls as Prince Inca, Rugby, and Guinea. These and the remainder of the offering are the property of Mr. S. E. Edgar. We presume that this catalog has been received by at least a goodly number of lovers of Angus cattle, but there is still sufficient time for any and all who wish to attend this sale to receive one and carefully peruse its pages, which are full of interesting matter to lovers of the black skins. No high prices are expected for this offering. These gentlemen have bred these cattle and they have not cost them any large sums of money, and while they have made their breeders and present owners plenty of money, they have a surplus and now invite their friends to come and help themselves at whatever price they may see fit to pay for these useful, prolific, market-topping cattle. A catalog can be secured by addressing a postal card to Mr. W. K. Henss, Mgr., Wayland, Iowa, or to Messrs. McElhinney & Cubit, or S. E. Edgar at Morning Sun, Iowa. Morning Sun is easily reached on the Peoria & Marshalltown line of the Iowa Central railroad, also on the north and south line of the C. R. I. & P. railway.

Last Call for the Combination Aberdeen Angus Sale at Mt. Pleasant, Iowa.

This is our last opportunity to direct the attention of our readers to the combination sale of Aberdeen Angus cattle to be sold at Mt. Pleasant, Iowa, on Wednesday, October 24th. The offering is consigned by such well-known breeders in southeastern Iowa as Messrs. W. B. Seeley, of Mt. Pleasant; W. K. Henss, of Wayland; T. J. Cline, of Salem, and J. D. Beaber, of Rome. These gentlemen have associated themselves together in this combination sale for the purpose of establishing themselves before the farmers of eastern Iowa and western Illinois as breeders of first-class Aberdeen Angus cattle. They desire to make these annual sales at the new pavilion in Mt. Pleasant and thus show the world that there is a center at which the breeder and farmer can congregate once a year where Aberdeen Angus cattle of the highest character can be bought at auction. Their location is ideal for the business. Each of these breeders has been in the business long enough so that their herds have grown to such proportions that a small draft can be spared annually. Mr. Seeley contributes four bulls to this offering, Pride's Bearer, Barondale 2d, Pride's Ito and Eridale. The last two are a Pride and an Erica, as their names indicate. Pride's Bearer is also a Pride bull and Barondale 2d is a Baroness. They are all sired by that most excellent Blackbird bull, Blackbird Ito. Mr. Seeley sells three Baroness cows, three Blackbirds, one Erica, two Easter Tulloch Jeans, two Prides, three Queen Mothers and two West-ertown Roses. All these of breeding age are

bred to Blackbird Ito. Mr. Cline sells six head, three Brucehill Violet cows, two Drumlin Lucy bulls and a half interest in the great Blackbird bull, Black Jam Dale. This bull is owned jointly by Mr. Cline and Mr. Seeley. He is by Black Knight of Estill 9th and out of that phenomenal cow, Blackcap's Beauty, she being a daughter of Rugby. This is one of the best bred Blackbirds bulls living. On his sire's side we find Imp. Entwistle by Prince Inca, he by Iliad and he by Etolian. On the dam side is Rugby, Young Hero and Young Viscount, as well as the great and invincible Knight of St. Patrick. Blackcap's Beauty has for her dam Blackcap of Kellor Lodge, a full sister to the greatest Angus bull that America has yet seen; we refer to Black Knight. Black Knight was by Knight of St. Patrick and out of Blackcap. She was imported by Messrs. Gudgeon & Simpson, of Independence, Mo., and Governor Simpson said to the writer that Imp. Blackcap was the best cow of any of the beef breeds that he had ever seen on either side of the water. Mr. Beaber sells ten head. They are of the Baroness, Brucehill Violet, Cairnballoch families. Most of Mr. Beaber's offering are sired by Mercerite, a grandson of Mr. McWhorter's great show bull, Duke of Marlborough, and he by the great Black Abbott. Mr. Henss sells four head, two bulls and two cows. One cow is a Queen Mother, sired by 2d Lad of Emerson and out of Queen McHenry 4th. She belongs to the same family that produced the \$2,800 cow, Lucia Estill, and the \$3,050 bull, Gay Lad. Mr. Henss also sells Woodside Chloe 7th, a daughter of Black Monarch of Homedale. She has in her pedigree such good bulls as Jim Jams, Wellington, Rugby, Black Monk and Blackbird Jim, as well as the Blackbird bull, Allblack. The bull, Cracker Jack, the sire of her dam, is from the same dam, Antelope 3d of Crediton, as was Advanced, which sold for \$1.50 per pound after winning the grand championship steer prize at the International. Mr. Henss sells a good Pride bull in Eolide Duke. This bull was sired by Eolide and out of Pride 24th of Braevall. His sire was champion over all breeds at Strathspy in 1900. His dam was by a grandson of the Highland champion, Equestrian, while his second dam was by the K. Pride bull, Kininvie, a brother to Kidnapper. The other bull offered by Mr. Henss is Woodside Chancellor 3d. This is a Coquette bull, sired by Black Monarch of Homedale. This is a family that has furnished Mr. W. A. McHenry many of his celebrated prize winners, in fact, the Coquettes and Barbaras have been the two most distinguished families in Mr. McHenry's herd in producing his champions. The sale catalog is now ready for distribution and can be had by addressing any one of the consignors.

Mt. Pleasant "Opportunity" Short-horn Sale, November 1st.

Sale Manager D. R. Mills, of Des Moines, Iowa, announces on page 36 a sale of Short-horn cattle to take place in the fair grounds sale pavilion at Mt. Pleasant, Iowa, on Thursday, November 1st, at 1 p. m. Mr. Mills calls this his "Opportunity Sale" and it promises really to be an opportunity to purchase most desirable Short-horn cattle at prices well worth the money. Consignments have been cataloged from the herds of Messrs. Philip J. Schoene, of Summerfield, Ill.; Grimes Bros., of Montrose, Iowa; W. G. Burkhardt, of Fairfield, Iowa; E. D. Seamans, of Salem, Iowa; E. J. Augspurger, of Pulaske, Iowa, and others who desire to join. The first lot in the catalog is the straight Scotch herd bull, Gold Stream 177214, consigned by Messrs. Grimes Bros., on Montrose, Iowa. This is a Nonpareil Princess whose sire was Invincible, a bull bred in Scotland by Mr. A. Crombie. The dam was a daughter of Imp. Spartan Hero, bred by Mr. Cruickshank and well known throughout Iowa; second dam by Vice Consul, also bred by Mr. Cruickshank, and the third dam the imported cow by the Campbell-bred Golden Prince. As a matter of pedigree this animal presents argument that is good to every Short-horn breeder who knows history. As a practical proposition for the breeder who wants a straight Scotch-herd header he will certainly bear the closest inspection, as his individuality is in keeping with his superb breeding. Mr. Burkhardt's offering is somewhat out of the usual order from the fact that it presents some straight Bates breeding such as is not frequently driven into a sale ring. One of his entries is the two-year-old bull, Waterloo Scotchman, whose dam was a Waterloo cow of the purest Bates strain. He is described as a growthy animal of good quality, one that has never been pampered or spoiled and that has been proven a breeder. The two Bates cows that Mr. Burkhardt sends forward are both daughters of Wild Eyes Duke 5th, a son of Royal Waterloo, and his dam, Wild Eyes 46th, was also the dam of the great Elbert & Fall bull, Peculated Wild Eyes. One of these cows belongs to the Waterloo Duchess family and the other traces to Imp. Water Girl. The Schoene consignment is one of a good deal of merit. It includes five choice young bulls and fifteen fine young females of the Young Mary, White Rose, Harriet and Lady Elizabeth families, all of which have at least two or more excellent Scotch top crosses. We find among them daughters of the pure Cruickshank Lavender bull, Ladron (a Harris-bred bull by Galahad), Orange Chief, Dick Taylor, son of the Cruickshank-bred Violet, Imp. Harvester, Grand Viscount (a Cruickshank Bravith Bud), Orange Top (a Cruickshank Orange Blossom), Pride Perfection, a son of the noted Duthie-bred Cruickshank Mysie bull, Imp. Scottish Pride, Kirklevington Duke, etc. We find in this lot representatives of those families upon which have been built the success of the Short-horn breed in America, and should be looked after by prospective buyers. They are good breeding cattle of deep milking strains and some of the cows will go into the sale with calf at foot. A few additional Short-horns will be accepted for this sale if pedigrees are forwarded at once. Catalogs giving full information are now ready and will be cheerfully forwarded. Address Mr. D. R. Mills, sale manager, Des Moines, Iowa. Manager Mills would also urge those who contemplate making entries for the Kansas City, St. Paul and Omaha auctions to forward entries without delay.

At the Home Farm near town

Lake City, Ia., Thursday, Nov. 1, 1906

Imported, Straight Scotch & Scotch Topped Cattle.

HERE will be nine Scotch cows and heifers and five Scotch bulls in the sale of Miss Ramsden, Matchless, Victoria, Marchioness, Lavender, and other Scotch tribes. I am also selling two splendid imported cows, Imp. Dalmeny Princess 9th and Imp. Gladys of Dalmeny, both with good bull calves at foot by Red Knight, and rebred again to same bull. The rest will be well Scotch-topped, having five and six of the very best crosses. I am selling a very high class lot of bulls, among which are several sons of Fitz Eustace, a son of Lord Craibstone, Prince Missie and Earl Victor. Every female in the sale that is old enough will either have calf at foot or will be right at calving. Catalog now ready. Write for it, mentioning Iowa Homestead.

HEREFORDS

AT AUCTION, WEDNESDAY, NOVEMBER 7, 1906.

At the Farm near Bolckow, Mo.

THE GET OF BEAUMONT 134751

50 HEAD 40 FEMALES, 10 BULLS 50 HEAD

Among the cows and heifers are several daughters and granddaughters of Fowler Queen, the greatest show and breeding cow ever got by Van Natta & Son's great breeding bull, Fowler. The females of the 1905 show herd are included. Ten heifers are by Beaumont. Others by such sires as Beau Brummel, Lamplighter and Paladin. Among the bulls is Parsifal, the second prize junior yearling at the American Royal. A double Beau Brummel just a year old. Seven sons of the famous Prime Lad. These are consigned by W. S. Van Natta & Son, of Fowler, Ind.

This sale is brought about to settle the estate of the late Jno. Steward and the only things reserved are a few old cows and the herd bull, Beaumont. These are reserved by Mr. Hutcheon as a nucleus for a herd. All trains stop at Bolckow on the Burlington, and Guilford on the Great Western.

Send for catalog, mentioning The Homestead.

STEWART & HUTCHISON,

BOLCKOW, MO.

Last Call for the Wright County Short-horn Breeders' Sale.

As has been previously stated in The Homestead from week to week, Messrs. T. A. Davenport, of Belmont, Iowa; G. J. Mack and Rice & Lindsey, of Clarion, Iowa, will hold a three days' sale of Short-horn cattle at their respective farms in Wright county, Iowa, as follows: Mr. T. A. Davenport holds his sixth annual sale Tuesday, October 23d, G. J. Mack disperses the Lilac Hill herd October 24th and Messrs. Rice & Lindsey, for the purpose of dissolution of partnership, disperse their herd of Short-horns on October 25th. Mr. T. A. Davenport's Pike Timber herd is one of the oldest established herds in Wright county and has been built up through the use of the best Short-horn blood obtainable. Perhaps no bull did more to establish the Pike Timber herd upon a sure and firm footing than did the use of the splendid bull, Imp. Charmer. He is a Miss Ramsden, sired by Evening's Pride. He was a son of Village Pride, bred at Collynie and sired by Knight of St. George; dam Village Maid 17th by Master of the Ceremonies out of a daughter by Prince of Orange. It will be thus seen that the breeding of Imp. Charmer was such that great results from the use of this bull might reasonably be expected. Following this bull was Baron Gloster 8th, a splendidly-bred Duchess of Gloster sired by Golden Lord. This bull was assisted and is now supplanted by that royally-bred Imported Scotch bull, Kinellar Stamp. A worthy son of a great sire is he, his sire being the Duthie-bred bull, Count Joyful, he by Count Arthur and he by the celebrated Count Lavender out of Victoria 85th by Gondolier. Kinellar Stamp's dam was Imp. Winning Witch by the Marr-bred bull, Marshfield, and he by the greatest bull used at Upper Mill in recent years, the celebrated William of Orange, out of Missie 96th by Athabasca; she out of Missie 55th, the dam of Imp. Missie 153d that sold at auction in Chicago at the phenomenal price of \$6,000 to Mr. W. C. Edwards, of Canada, \$5,900 being bid on this cow by Mr. N. A. Lind, of Rolfe, Iowa. This bull comes of some of the best blood ever bred by Messrs. Duthie, Marr, Campbell or Cruickshank. The second sire in his pedigree on the dam's side is Mediator, a Miss Ramsden got by Gravesend and out of Mary 5th by Vermont. We might go down through the full list of sires for at least ten in number and equally as good breeding will be revealed as in the ones given above. We speak at length on these bulls for the reason that the bulk of Mr. Davenport's offering is either sired by or bred to the above described bulls. His offering embraces forty-five head of as useful cattle as he has ever sold. However, aside from the bull contingent he is not endeavoring to offer Scotch cattle. There are thirteen bulls listed for sale, the remaining thirty-two being females. A large per cent are the Rose of Sharon, Young Mary, Josephine and other standard families equally as well bred. Several Scotch bulls are listed by Mr. Davenport. One that we are pleased to mention is Ruddington Charmer. This bull is just ten months old at time of sale and is a full brother to the great Philo Hay that was used with such marked success by Mr. G. J. Mack. Ruddington Charmer, as his name implies, was sired by Imp. Charmer, while his dam was Imp. Ruddington Daisy, a daughter of the Duthie bull, Lordly Archer, she out of Imp. Daisy 21st by Melapus, he by the Cruickshank Clipper bull, High Commissioner. Following this are two crosses in his pedigree of the celebrated William of Orange. This bull is certainly a fine prospect from the standpoint of aristocratic breeding for a choice herd bull for some sagacious breeder. Another good Scotch bull is Ezra, an aged bull bred by Messrs. Cookson Bros., sired by Ahiquil. He belongs to the celebrated Cruickshank Rose Mary family. Ahiquil was sired by Imp. Aberdeen and out of the imported cow, Crow Quill by Cumberland; second dam Colt's Foot by Dunblane. This is a red bull, calved June 1, 1899. He has been used and is sold for no fault whatever. Baron's Pride is a nice eleven-month-old red bull got by Baron Gloster 8th and belongs to the same family, Rose Mary. Baron's Pride has for his dam Rosy Charm by Imp. Charmer. Thus it will be seen that he is well topped out above the imported cow. Below Imp. Charmer appears such bulls as Commodore, Imp. Pro Consul, Imp. Spartan Hero, Village Boy, Breadalbane and Lord Raglan. Lot 36 of the catalog is Bell's Baron, a yearling red bull interspersed with a little white, sired by Baron Gloster 8th out of Charming Bell, she by Imp. Charmer, her dam being Imp. Lady Bell 7th. He belongs to Mr. Cruickshank's noted Jessie or Jealousy family, sometimes called Jessamines. This bull is rich in fresh Scotch blood other than Cruickshank. Through such bulls as the Bruce bull, Life Line, Duke of Richmond through Master of the Ring, and Mr. A. Crombe's through the bull, Denmark, founded on the cow, Jealousy, by Baron Warlahy, bred by Mr. Richard Booth. Thus it will be seen that some of the best Scotch blood of fresh lines is found in this bull's pedigree. An unusually large number of cows with calves at foot are offered in this contingent, it being the aim of Mr. Davenport to give his buyers all that he possibly can in value for the money they pay him. Ample accommodations will be furnished for the comfort of his guests at both Belmont and Clarion. Free conveyance from either place to the farm. See advertisement on page 40.

G. J. Mack's Consignment.

It is with regret that Mr. G. J. Mack, of Clarion, Iowa, is forced by circumstances beyond his control to disperse the Lilac Hill herd of Short-horns. This dispersion sale will occur October 24th, the day following Mr. T. A. Davenport's sale at Belmont, Iowa. We trust that most of The Homestead family interested in Short-horns have already asked Mr. Mack for his sale catalog, which shows the pedigrees of fifty-six head, including a goodly number of straight Scotch cattle. As we entered into detail in last week's Homestead concerning these Scotch females, we will attempt at this time to do nothing more than to generalize on the whole offering. Being a dispersion sale it naturally follows that all of the older matrons of the herd will be included. Among these are cows that have lost their bloom, but are the producers of the "cream of the sale." To the young beginner who has but little money to

invest, we would say by all means be present and keep an eye out for some of these old tried and never-failing business cows, as they are likely to be sold for less than their worth, by virtue of the reasons already given. By way of comparison, so far as comeliness is concerned and general beauty, they compare as the old lady of sixty to her daughter of seventeen. We might state that the best bulls have been constantly in use at Lilac Hill, so that the breeding in all of the top crosses has been in line with the splendid bulls that were used in framing the foundation for the Lilac Hill herd. We trust that Mr. Mack's offering will be appreciated, because of the fact that he has been a very enthusiastic breeder of Short-horns, never losing an opportunity to speak a good word or do a kind turn that would bring credit and renown to the old reliable breed, the reds, whites and roans. His catalog has been ready for distribution for some time and doubtless many of our readers have already perused its pages and ascertained the rich character of breeding that will be offered in this dispersion sale. However, if such is not the case and the catalogs have not been received, one will be sent by return mail on application to Mr. G. J. Mack, of Clarion, Iowa. See advertisement on page 40.

Rice & Lindsey's Dispersion Sale of Short-horns.

On Thursday, October 25th, at their farm between Clarion and Belmont, Iowa, will occur the dispersion sale of the Meadow Dale herd of Short-horn cattle, owned by Messrs. Rice & Lindsey, embracing fifty-one head of useful business Short-horns. These cattle will be presented fresh from the pasture and not having on their "ball-room" clothes, are expected to sell at bargain prices. Some of them have scarcely been stabled long enough to become halter broken. One of the notable features of this sale is that all females of breeding age have been bred to Victor Prince 195385, one of the best Scotch bulls in northern Iowa. This bull will be on exhibition and will be sold to the highest bidder on sale day. In our last issue we entered into detail concerning the breeding of this bull, whose pedigree appears as Lot 43 of the sale catalog. The catalog states that this bull is a dark roan. He may be more properly called a dark red, as there is but a slight trace of any roan hairs in his coat. Some of the very best Scotch bulls and most noted prize winners will be found in this bull's pedigree. He is a massive, thick-fleshed fellow that individually would command attention at the American Royal or International stock shows. He is not yet five years old and should be sought after by some one in quest of a strictly first-class Scotch herd bull. He is out of an imported sire and an imported dam. The cows offered by Messrs. Rice & Lindsey are Young Phyllis, Rosabella, Young Mary, Lady Elizabeth, Zelie or Fashion and Crocus families. In this offering are a number of most valuable cows and heavy milkers. The milk record of some of the cows in this sale, as told the writer by Mr. Rice, is really surprising. We would impress at this time upon the minds of those who contemplate buying a number of cattle, that at this three days' sale there will be given a splendid opportunity for Minnesota, Dakotas and Nebraska buyers (who usually procure a car load) to be obtained at this sale just what they are looking after. The one expenditure of time and money will enable them to take in the three days' sale, as they are all within a few miles of each other. Ample arrangement has been made by the parties making this sale for free entertainment and conveyance from one sale to the other. Messrs. Rice & Lindsey will be pleased to mail their catalog and give a personal description of their herd bull to anyone interested sufficiently to write for the same.

Sale of Pure Scotch and Scotch-topped Short-horns.

The sale which Mr. E. J. Hayes will hold at his farm near Hampton, Neb., on October 31st promises to be one of the best of the season. His herd of royally-bred Short-horns stands high in the estimation of the best of judges and we believe this sale to be one of the best to be offered in Nebraska this year. The cattle are bred in the purple, and this, combined with that strong individuality, makes them choice. The bulls used in the herd have made great records as sires, and the calves will show that they have mated well with the high-class herd of cows in service. The offering will consist of twenty-six royally-bred cows and bulls. The cows will be safe in calf or will have calf at foot, while part of them have been rebred. No. 1 in the catalog is Starlight Oderic, got by Imp. Prince Oderic, tracing to Imp. Ducal on sire, and Imp. Victoria 71st on dam's side. This animal was calved in 1902, is red, and a strong individual. Star Queen was got by Starlight and traces to Imp. Julius on sire's side and Imp. Eliza on dam's. This cow is a little old, but not so much so as to keep her from doing the buyer very much good. The entire offering is roan and red. Anna Orange 2d was got by Prince Ideal and out of an Imp. Orange Blossom 18th. She has a bull calf at foot and is again safe in calf to the good bull, Barmpton Gloster. This is a bargain. Second Seraphina of Hebron was got by Crimison Scott and out of an Imp. Seraphina Carrissima 3d dam. She has a very nice heifer calf at foot and is rebred to Starlight. Braith Bud 2d, got by Royal Fame, he tracing to Ducal Crown and out of an Imp. Foxglove dam, has a bull calf at foot by Choice Goods O. K., a son of the great \$5,000 Choice Goods. You get the best in this lot. Glendale Rose, got by Crown Prince and out of Imp. Rose of Sharon dam, has a red bull calf at foot got by Starlight. The cow is rebred to Barmpton Gloster. This Barmpton Gloster had several head at the American Royal this season and the former owner tells us that they are choice animals. Mr. Hayes purchased this royally-bred bull at the McGavock sale at Geneva, Neb., this summer and has been using him on his choice cows. Starlight Oderic has several good calves in the offering. The entire sale affords ample opportunities to select good bulls and some very choice cows for foundation of a royally good herd. Mr. Hayes will sell at his farm. Write for his sale catalog. See advertisement on page 39.

Mercer County Breeders' Auction of Highly Bred and Meritorious

ABERDEEN ANGUS CATTLE

AT THE FAIR GROUNDS, ALEDO, ILL., TUESDAY, OCT. 23, 1906

SIX bulls and thirty-seven cows and heifers are cataloged, including the double Blackbird-topped S. Ballindalloch K. Pride bull Palamon B., a yearling of beautiful symmetry and grand scale; the Trojan-Erica heifer Emma of Hamlet 5th; the double Blackbird heifer Blackbird of Hamlet 8th; the Blackbird show heifer Shadeland Blackbird 3d; and other good ones the get of such sires as Royal Blackcap 2d 49527, Black Knight of Estlin 8th 29493, Imp. Allick of Theakston 61676, Guinea of Taylor Ridge 28854, Duke of Marlborough 22827, Hector of Lakeside 25647, Countersign 52492, Britton 52876, Rotanta 10364, Jasper M. 52870, Teutonic 52489, Aidine of Woodwyn 24231, Custodian 52498, Kenovet 52448, Sultan 2d of Greenville 22772. The most fashionable families are represented. The offering is absolutely free from culls, and for shortlegged, thick-fleshed animals of grand quality and scale that will advance and maintain the best type of breed, it is rarely equaled. Mercer county has within its borders more registered Aberdeen Angus cattle and more men interested in them than can be found in any other county in any other state in the union. We are proud of the cattle we shall submit for public veneration on this occasion, and we invite, not only our friends, fellow-breeders and farmers of Mercer county, but also those of other counties and other states to attend this auction and see the Angus where he reigns supreme. Consignors: C. A. Bopes, Reynolds, Ill.; G. E. Thornton, Millersburg, Ill.; G. E. Aikins, Aledo, Ill.; J. E. Reed, Aledo, Ill., and S. Lee, Aledo, Ill. Parties attending sale will be met at Reynolds, on the Rock Island railroad, and Seaton, on the Iowa Central railroad. For catalog address,

"Black and All Black: the Angus 'Doddle' and No Surrender!"

ABERDEEN ANGUS AT AUCTION.**AT HEATHERTON FARM, NAPERVILLE, ILL., OCT. 31, 1906, 1 P. M.****57--HEAD****Prime in All Respects****HEAD--57****40 Females-----17 Bulls.**

Come and see if a fair selection has been made from the cattle in the Heather-ton herd. You will probably meet more Angus breeders than have assembled at a sale in recent years. Thirteen cows with calves at foot, cows in calf, heifers and young herd headers. An inspection of the Heather-ton herd in its twenty-fourth year and in its new home will interest breeders. Beginners may buy with confidence that later knowledge will not cause them to discard the blood lines chosen from this herd. The offering consists of thirteen Blackbirds, twelve Prides, eight Jilts, six Trojan Ericas, six Rosebuds, five Zaras, four Heather Blooms, etc.

Naperville is twenty-eight miles west of Chicago on the main line Burlington road and through trains and suburban service. Send for Heather-ton Herd History, second edition, and also sale catalog at once, mentioning this paper.

HAMPTON, NEB.**POLAND CHINA BOAR SALE****ON WEDNESDAY, OCT. 24, 1906**

.....From the Willow Lawn herd of Messrs J. L. Miller & Sons, of Brooklyn, Iowa.....

ON the above date we will sell at public auction forty Poland China boars, twenty of which are of March farrow, the balance last fall's pigs. The fall boars are sired by J. L. Perfection 105711, a great grandson of Chief Perfection 32199. The dam of J. L. Perfection is Dickens 192278, by Gobel 61315. The spring boars are sired by W. L. Chief 105709 by Longview Chief 71057. The dam of W. L. Chief is Jilt's Favorite 215300 by Longfellow Tecumseh 63529. The boars are extra long, good full backs, and not a bad footed individual on the place. We have bought our breeding stock from the leading Poland China breeders of the state and have been in the business twenty years. The dams of some of the spring boars are Best Chief 28824 sired by black U. S. 8455, her dam being May Chief 227428, of Chief Tecumseh strain. Longstar 283362 farrowed ten-five boars and five sows, she sired by Black U. S. 8455, her dam Starlight 24 186938. Pedigrees will be furnished on day of sale. There will be free conveyance from Chelsea, Hartwick and Brooklyn.

..COMBINATION SALE...

OF ANGUS CATTLE

TO BE HELD IN THE SALE PAVILION AT
MORNING SUN, LOUISA CO., IA.,
ON THURSDAY, OCTOBER 25, 1906.

This is a select draft of thirty-nine head from the herds of McElhinny & Cubit and S. E. Edgar, of Morning Sun, Iowa, and consists of nineteen cows from three to eight years old, fifteen yearling and two-year-old heifers, and five young bulls. This is no "housecleaning" sale, but a bunch of high-class cattle. Here the buyer can find cows in their prime with calf at foot and rebred, or young heifers, with all their usefulness before them, or bulls to sire the "market-topper." The families represented are: Baroness, Chloe, Brucehill Violet, Drumin Lucy, Georgiana, Jennet, Miss Morrison and Zara. Arrange to attend this sale, where you can see representative animals of "the breed that beats the record." For catalog, address

HORSES.

NOTICE ... Shire, Percheron, Belgian and Hackney ... STALLIONS

GOOD AMERICAN BRED STALLIONS, \$800 TO \$1,000. FIRST CLASS IMPORTED
.....STALLIONS, \$1,200 TO \$1,600. CHOICEST STALLIONS, A LITTLE HIGHER.....

HAVING concluded to make a change in placing stallions before the public, on account of the unsatisfactory business methods and transactions done in the stallion trade to the buyers as well as to the sellers by the stallion salesmen, we have concluded to sell our stallions from the Harms. Our aim is to give our customers the entire benefit of the profits which have been going to the salesmen and to the helper assisting in placing the stallion, who usually is one of your own neighbors, (the most influential man of the neighborhood), and the great expense of placing the stallion. The long time notes, from three to five years, have to be discounted heavily or carried by the seller, making the cost of the stallion to the buyers or the companies from two thousand five hundred to four thousand dollars. The quality of our stallions, and the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. We know that we can save you at least 50%. If it is necessary to organize a company in your neighborhood in order to have a stallion, form your own company and come to the barn and be convinced that you can save from \$1,000 to \$1,500. We ask all intending purchasers to visit our stables, where we have over 300 head of stallions to select from. Shire, Percheron, Belgian and Hackney Stallions. Come to the barn and deal with Bob Burgess, who has been in the business over thirty-two years, longer than any one man in the stallion trade. Get your guarantees and insurance direct from headquarters. We guarantee to make every deal satisfactory to you. Visit our barns, see our exhibits at the different State fairs and see the class of horses we are selling for the money. The reason that we ask the above of you is that we are the oldest importers, the largest importers and we have the quality of stock that will suit the people; are perfectly good for our guarantees and will sell you more good horse quality for less money than any one. Come to the barn and get the most reasonable terms that can be offered.

ROBERT BURGESS & SON,
WENONA, ILLINOIS. WICHITA, KANSAS.

CHARLES R. KIRK,

PERCHERON IMPORTING
COMPANY, CHARITON, IOWA.

YOU want an imported stallion of pure breeding. With a short back, upheaded, gentle and handsome. We have them. We pay the freight and return fare. We guarantee and insure every horse we sell. We give you a square deal at a low price. OUIS ARE THE BEST NEW IMPORTATION IN AUGUST. Blacks and dark grays. On main line and branches of Burlington Route.

CHARITON, IOWA.

VOL. LI. NO. 43.

DES MOINES, IOWA, OCTOBER 25, 1906.

WHOLE NO. 2571

FALL PLOWING FOR CORN PAYS.

There is not a man in the corn belt but what realizes that fall plowing of land will increase the yield of corn the following year a very considerable percentage. It is not so in the case of small grain, for the reason that corn-belt soils if plowed in the fall cannot be made sufficiently firm to insure a good crop of grain without making it liable to lodge. A soft seed bed is not a good seed bed for small grain in the corn belt; hence the seemingly somewhat careless practice of disking a corn stubble, sowing the grain and disking it again is after all the ideal plan.

In the case of corn we have a different proposition entirely. It is a heavier feeder; the root system is very different from that of small grain; it grows much later in the season, and therefore gives the soil ample time to settle during the growing period, while it scarcely ever lodges on account of the soil on the surface being too loose.

In this connection it may be said that farmers of the corn belt meet a different situation. How can one, for example, husk out his corn crop and afterwards fall plow his land in preparation for a crop the following year? We have known very few instances where this has been done. One reason for not plowing is that the fodder is of some value for winter pasturage, though we very much doubt if the value of the pasture amounts to more than a small fraction of what would be the increased value of the next crop on fall as compared with spring plowing.

Of course corn stalks are not easily broken in the fall; that is, just after husking time, and no man who has ever had experience with big corn stalks that have been plowed under wants it a second time. We often wonder if a good

sharp stalk cutter would not come very nearly doing the work, so that the stalks could afterwards be raked up and burned. To waste fodder in this way might seem like going to the extreme, but it looks as though the end might justify the means.

If any of our readers have had experience along this line we shall be pleased to hear from them. Of course we realize that it is not good farming to plant corn after corn many years in succession, and yet as a matter of fact many of us are obliged to do it against our own best judgment. We have the land and can get more money out of it by growing corn than in any other way, so we simply grow crop after crop. Until the time comes when rotations are established on every farm in the corn belt, so that corn is never grown more than two years in succession on the same land, the difficulty of getting the land plowed in the fall will be hard to overcome. In the meantime, what are we to do? Must we utilize the value of the fodder, which is about fifty cents per acre, and let plowing wait until spring, or lose the fodder and plan some way to do the plowing in the fall?

EVADING HOG CHOLERA.

The following communication has been received from a subscriber, Mr. C. Notebook, of Sioux county, Iowa:

Having read much in your columns concerning hog cholera, I thought that I would write and tell you how I managed to evade it with my herd of 1,000 head.

The easiest way and probably the only way to evade cholera is to begin six months or a year before you expect the disease. Begin in two ways: First, to clean up the yards and premises; second, to prepare a hog which can stand the disease should he come in contact with it.

If the farm is kept clean, all manure hauled out of the yards once or twice a year at least, and disinfected thoroughly oc-

asionally there is not much show for the disease to originate on the place. Stagnant water is also a bad thing and should never be where hogs can get to it. In spite of all precautions there are places about all farms that cannot ordinarily be reached, but these can nearly always be remedied by a little disinfectant of some kind.

If hogs are kept in good growing condition there is not much danger of their getting the disease in the many ways in which it is said to be carried from farm to farm. It is the overfed, unhealthy, stuffed herds that die like rats. A healthy man will not take a contagious disease nearly as soon as a half-sick one, however well the half-sick one may look. It is the same way with hogs, as well as other animals. Give them a good run, fresh, clean water, good, clean food and the danger is minimized.

I will not say that they will never die, for they may, but I am safe in saying that they will seldom die, and will never die at as great a rate; that is, the disease is much easier checked. Another valuable precaution is in providing a dry, warm bed at all times, especially early in the fall, when they are unused to the cold.

If every man in the corn belt would handle his herd of hogs according to the directions laid down by this subscriber, we venture to say that hog cholera would soon be a thing of the past. In every county of the central West may be found men who have been raising hogs ten, fifteen, twenty, or possibly thirty years without ever having lost a hog with cholera, while hogs on surrounding farms have been swept away more than once during the same time.

We are always afraid of the young pig or hog that isn't growing, one that isn't making gains. If the feed is such that an animal should be increasing in weight, you may depend upon it that there is something wrong inside if a hog doesn't gain. It may be worms or it may be an impaired digestive system. In any case, that is the hog that invariably starts the trouble. It is a good plan, therefore, to keep the small unthrifty ones away from the rest, where

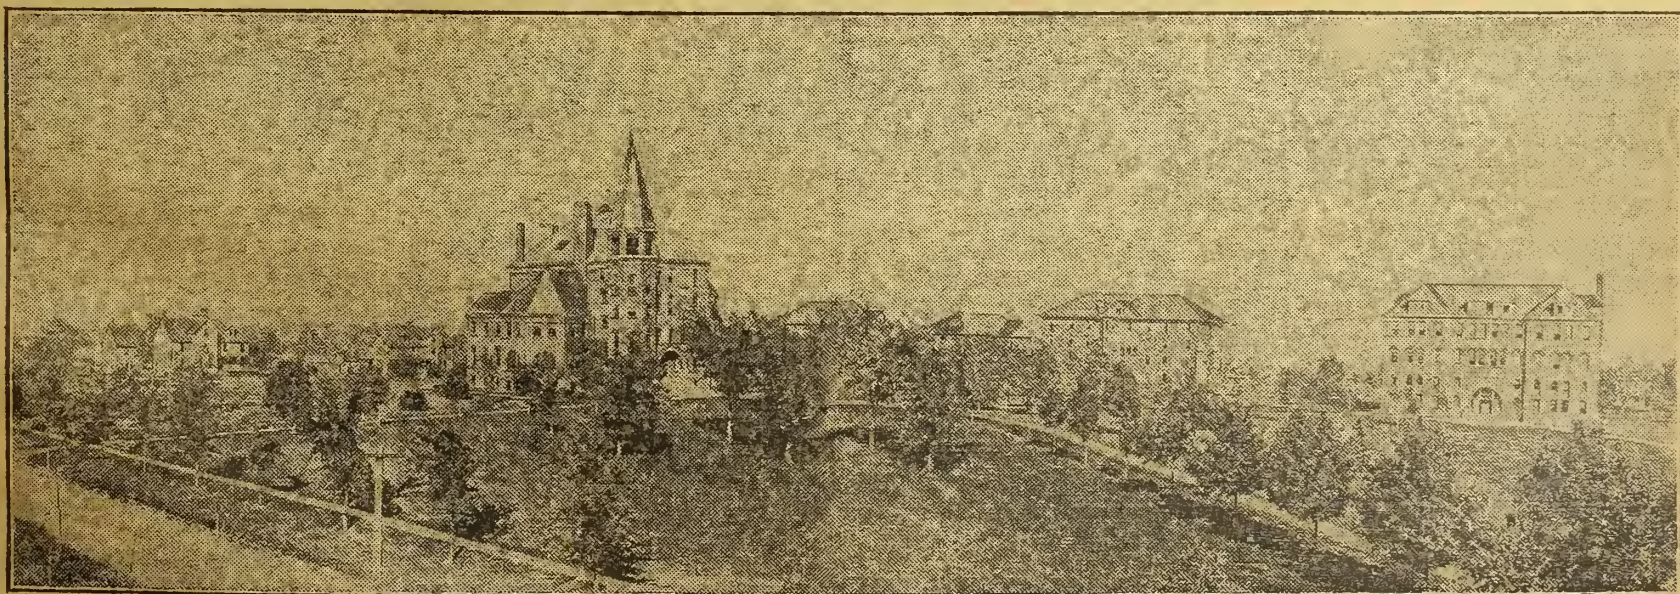

they can be given a little extra feed until they are brought into condition. No matter how big one's bunch is, one must look after them individually. See that they all come up to every feed and that they are all hearty. If one is a little droopy put him into a little lot by himself for a few days and in most cases he will soon come around. The small amount of extra labor that it takes to look after a bunch in this way will invariably be the most profitable labor that one will do on his farm in a whole year.

SHOCKING SORGHUM.

Mr. L. C. Todd, of Wexford county, Mich., sends the following communication relating to the matter of curing sorghum:

Apropos your article on "Curing Sorghum Fodder," which appeared in a recent issue of this paper, kindly let me suggest that when the sorghum is in the windrow and well cured, take a pair of good horses and a go-devil (sweep rake), drive into the end of the windrow the same as in picking up hay, and go just as far as the team can push the load. Then back out, go around and strike the windrow and come up from the other way with a go-devil load, being careful to not take more than the team can push up to the shock. In this way a very little hand labor with a fork will make a nice shock, and unless there is a great deal of rain the fodder will keep well. The plan I follow is to push up, as I said, as far as the team can go, then back out and strike in the windrow again as far from the first shock as we think will do, and go the whole length of the windrow, making half a shock, and then turn around and come back, finishing up the shock. The gain in this is that it saves turning around so many times, as when you finish a shock before leaving same.

This answers the purpose of saving labor exceedingly well, and where fall rains do not prevail, fodder will keep if handled in this shape fairly well. One might go a little further and spend some time with the fork after the fodder is bunched. If the fodder is packed down

HIGHLAND PARK COLLEGE, DES MOINES, IOWA.

(From a recent photograph of the main college buildings and grounds.)

Highland Park College is recognized everywhere as one of the leading educational institutions of the West. Last school year there were 2,143 different students enrolled and 307 were graduated from the various departments of the school. The new school year has opened with a very much larger attendance in all departments than has ever been present before at the opening of a school year and there is every evidence that the attendance this year will reach at least 2,500 students. We have frequently taken occasion to call the attention of our patrons to this excellent educational institution. The publisher of this paper has had every opportunity to know that the work done at this school is first class in every particular. He also can assure the patrons of the paper that the school is thoroughly equipped in every department and that it maintains a splendid faculty.

Although Highland Park College maintains the regular standard Classical, Scientific and Philosophical courses, yet in addition to this it makes a specialty also of a great deal of the work usually found in schools of technology. Those wishing to prepare for teaching in our public schools or in primary work, and those wishing a thorough course in Pharmacy, or Engineering, including Civil, Electrical, Mechanical, Steam, Telephone, Telegraph, and a machinist's course, can find no better equipped school anywhere than at Highland Park College. Besides, Highland Park College maintains one of the largest and most completely equipped colleges of music and oratory in the country. It also has the most completely equipped business college to be found in the West.

We take pleasure in presenting to our readers the above picture of the main college buildings and grounds, and hope that the patrons will write to Pres. O. E. Longwell for any information they may wish with regard to the work the institution offers.

and the top rounded off, rains will be shed to a remarkable degree.

THE FARMER AND THE COMING ELECTION.

The general election now near at hand will give the farmers of the United States their first opportunity since the election of 1904 to express their approval or disapproval of the public policies with which the name of President Roosevelt has become prominently identified. Inasmuch, too, as the president during his first term was under an express pledge to carry out the policies inaugurated by his predecessor and evidently made an effort in good faith so to do, so that his present term was his first appearance on the stage of public affairs in his own person, this election will be the first opportunity the public will have had to pass judgment upon the policies which have so notably changed the whole aspect of our public life. Summarized in a few words, these policies embody the president's conviction that the government must be recognized as supreme and its laws obeyed by rich and poor, weak and strong alike.

Evidently believing that the people of the country recognize his sincerity and are in accord with his policies, the president several months ago in a letter intended to make public his wishes expressed the hope that the election would result in the return of a house of representatives which should have a majority of members of his own political party; which result he said he would regard as both a proof that the public was in sympathy with his administration and as the best assurance of further legislation along similar lines.

The Homestead is both non-partisan and non-political in its attitude toward public affairs; and it would be manifestly improper for us to take a position as favoring one party or another as regards their fitness to rule the country or the applicability of their principles to its institutions. We may, however, with entire propriety express the hope that whatever may be the result of the election in a partisan sense, the president may still have the support of both the senate and house of representatives in his effort to expose the lawless methods of great corporations and compel them to obey the laws of the land as implicitly as must be done by the poorest and humblest.

Nor is it out of keeping with the impartial character of an agricultural paper to declare itself in favor of the continuance in office of all senators and representatives, of whatever party, who have co-operated with the president and other patriotic men in securing the legislation desired by the great body of citizens of all parties. To give a single example, out of a multitude of possible instances, we believe that such men as Senator Dolliver of Iowa, who early identified himself with the cause of railway rate legislation and contributed by vote, speech and influence to the enactment of such a law as the president desired, should not be forgotten when the voters are electing legislatures whose members or a portion of them will have a voice in electing their successors. This belief need not, of course, be interpreted in a partisan sense; for men of both parties showed a willingness to assist the president in his great work, and unfortunately there were also men of both parties aligned in opposition thereto.

WHEN TO SHRED CORN FODDER.

The following communication has been received from one of our subscribers, Mr. A. A. Kallmeyer, of New Florence, Mo.:

I expect to shred some corn fodder this fall, and would like to know how long the fodder should dry before it is shredded. In this case it was cut about September 20th. The stalks are not very large and the crop will possibly yield forty bushels per acre. I have a mow 23x48 feet and eight feet deep, boarded with tight boards, with strips over the joints. If the shredded fodder is stored here, would there be any danger of spontaneous combustion? I would like to shred as early as possible.

Under average circumstances corn fodder may be shredded with almost an absolute degree of safety five or six weeks after it is cut and shocked. Of course something depends upon the stage of ripeness of the corn when it is cut. If the cutting is done while very green, it might be necessary to leave it until the sap that remains in the stem freezes, though ordinarily this is not necessary.

We would not like to say that there is no danger whatever of spontaneous combustion when shredded fodder is stored in a mow similar to the one described,

but we do give it as our opinion that if there is no external moisture on the fodder from rain the danger from fire is exceedingly slight.

It is an excellent plan to tramp shredded fodder while it is being stored in the mow, and for this purpose an old unshod horse may be effectively used. Take him into the mow in the beginning and keep him busy most of the time. By piling a little fodder on the floor there

will be slight difficulty connected with getting the horse out of the mow when the work is done, as there is no danger from injury by sliding him off backwards onto a pile of shredded fodder.

By tramping the fodder well you simply exclude the air, and consequently lessen the danger of fodder heating to the combustion point, or even to a point lower than this that might reduce its feeding value.

PLAN OF RENTING LAND.

BY CHARLES RHINEHART, DALLAS CO., IOWA.

The owner of a 640-acre grain and stock farm is obliged to leave it for a term of years and does not want to sell it. Has it well stocked with brood mares, cattle, hogs and farm machinery. What are some of the most advantageous plans for disposing of the farm and stock for the time? Suggest important points to be observed and possible errors to be avoided.

The data is not sufficient to give a very definite idea of just how to dispose of this farm. The subscriber does not state number of horses or what breed, neither the number of cattle, whether they are dairy or beef, pure-bred or grade. Conditions also vary a great deal in different localities. However, we will attempt to suggest a plan for which the subscriber may be able to rent his farm and return to it after a term of years without having suffered any material loss, commonly associated with rented farms.

In the first place, the owner of the property is entitled to, and should be contented with, a reasonable rate of interest upon his investment, and if the tenant enjoys the confidence of the landlord to the extent that he will entrust the supervision of his entire farm, including horses, cattle, hogs, machinery, etc., to him for a term of years, there should be no difficulty in insuring to the landlord a reasonable rate of interest for his investment and at the same time pay the tenant well for his labors.

There are many plans that have been used for renting stock farms, each one probably peculiarly fitted for local circumstances and conditions. The partnership plan is probably most satisfactory, when it can be made to apply. In this case I would suggest that a partnership be formed with some man whose capital is limited, but who has the ability and aptitude to conduct a farm of this size, and let him share in the profits of the entire farm in exchange for the labor in conducting it.

Take an inventory of all the horses, fix the price for each individual animal of those you expect to keep on the farm indefinitely; the cattle in the same manner; the hogs and farm machinery, including wagons, harness, tools, etc.; also take an inventory of all grain on the farm, hay and straw, including all feeds to be used or fed on the farm, and fix the value in each instance. This inventory will represent the amount of investment of the landlord other than the land. Fix the rental value of the pasture land at what it is worth in your locality. Then there should be a thorough understanding of how the business is to be conducted, whether you expect to feed steers, milk cows, raise hogs or horses, about what you expect to do in the rotation of crops, kind of crops, etc.; in fact, a general understanding of the intention of the partnership.

The tenant should either own or pay interest upon one-half of the investment in the way of stock, grain, feed and tools, and should pay half of the rental value of the pasture. The tenant should perform all labor in connection with con-

ducting such farm, keep buildings and fences in repair, material to be furnished by landlord, and then all the increase from original investment should be divided equally with landlord and tenant. That is, if any grain is sold off the farm, it is divided equally; if milk, butter or eggs are sold, the proceeds are divided in the same way; in fact, all increase is divided that may be disposed of during term of partnership or at expiration of same. If any of the original investment is disposed of, the amount of the original investment of the same shall be tendered to the landlord before any profit shall be divided. Then, in case stock, grain or tools are bought, each party should pay half, or in case landlord pays all, the tenant should pay interest on half. At any time any of the original investment is disposed of in the way of stock, feed or tools, the interest on that amount should stop.

This, in a general way, I think explains the idea of the partnership arrangement. It amounts to just this much: that the landlord furnishes the farm and half the stock, the tenant performs all the labor and furnishes half the stock, then the profits are divided equally. In order to increase the responsibility of the tenant it would be well for him to have some money of his own invested.

We assume that a man who owns 640 acres of land and has it stocked with horses, cattle, hogs, machinery, etc., is a successful business man, and should have the management of the business under his supervision; and I would suggest that lease or partnership be limited to one year, with the understanding that it can be continued if it is satisfactory to both parties.

This sort of an arrangement should be satisfactory to the tenant, as he has stock, horses and tools to begin work with and has a chance to share the profits of a successful business man and also has a chance to invest his earnings in the business as fast as he makes them, thereby stopping interest and actually owning a share. On the other hand, the landlord has his farm conducted the way he wants it, can keep it in a high state of cultivation, and can retain his stock so that in case he wishes to return to the farm will have everything as in the beginning, excepting for natural wear.

This is but a general plan, based on the supposition that the tenant has no resources other than his capability and aptitude to conduct a farm of this size. Should he have money to invest, stock or tools, this arrangement may be altered to suit conditions.

I would emphasize the importance of the landlord assuming entire control of the business management in case of difficulty arising from difference of opinion, and I would avoid entering an agreement for a longer term than one year, the term to be extended if satisfactory to both parties.

CANADA THISTLE.

There is scarcely a week during the growing season of the year when readers do not seek advice concerning the best means to bring about the destruction of Canada thistle. We have said before, and repeat it again, that there is no royal road to its destruction. It is a perennial and consequently reproduces itself from its root as well as from the seed. Mr. Elling Ellingson, of Mitchell county, Iowa, submits the following inquiry:

I wish you would give me some advice about how to destroy Canada thistle. I have some in my fields and as I know it to be a serious pest, I do not like the idea of its spreading.

If we knew just what was growing in this field possibly we could come more directly to the point. If it is meadow and the thistles are not very plenti-

ful, a comparatively small amount of work with a hand hoe may bring about their destruction. In that case we would advise cutting them off just below the surface this fall and also a few times next year. The thing to keep in mind is to prevent the leaves from making any considerable growth and thus choke the plant out, because the roots cannot live unless leaves are produced through which the elements of the atmosphere are taken in. It may require several cuttings to keep down the pests, but, as said before, if the thistles are not plentiful and it is not desirable to break up the sod this plan may be used effectively.

If the thistles are plentiful and scattered over a considerable area one must go after them with heroic measures. We would advise fall plowing and thorough cultivation in the spring until late corn

EDUCATE YOURSELF AT HOME

Forty courses of study in Normal, Academic, Commercial and Pharmacy Departments. No other school can offer advantages of affiliation with a great university, courses of such strength that they receive university entrance credits, annual scholarships in the university for best work in correspondence courses. planting time, or even later. Corn is naturally a dirty crop, but if it is planted late and the cultivators run through the field four or five times thistles can practically be kept down where the cultivators run. A few stray plants may make their appearance in the vicinity of the corn hills, but these will have to be removed by hoe or by hand.

We would prefer sowing in the place of corn some such crop as millet, cane, buckwheat, or rape. If these are seeded some time in June, and if the soil has been kept clean on the surface until that time, the chances are that the thistles will be practically choked out. We have seen this tried in a number of instances and know that it will do the work. Bear in mind, however, that the soil before seeding may require several diskings or harrowings so as to keep the plants down.

We realize that the crops we have recommended do not ordinarily take their place in the rotation on the average farm. However, small grain, such as wheat, oats or barley, do not offer much opposition to thistles. In the first place, they are seeded too early and before the crops are removed the thistles make a very satisfactory growth. Indeed, in the case of wheat or late oats they will often head out before the crop is harvested. Because of this we repeat that the late seeding of some of the crops mentioned above is much more effective than any other plan save, possibly, the summer fallow, which, though effective, is scarcely practicable in the corn belt as one loses the use of his land during the year.

Attractive Features of Wyoming.

Wyoming is a much-neglected state, considered from the traveling public's standpoint. Not in a similar area elsewhere in this country or in any other country can so many scenic features be found as in Wyoming. As a game state it has no equal. Although known to the world on account of the location of Yellowstone Park within its boundaries, it will some day be famous for its wonderful scenery outside the park.

The climatic conditions of Wyoming are such that it makes an ideal winter resort and a most desirable place to spend a vacation.

The Union Pacific railway has recently issued a booklet entitled "Wyoming and Its Attractions." Its pages are made up of matter accurately descriptive of the various features of this great state, and it is profusely illustrated from cover to cover. It will be sent free upon application to Mr. E. L. Lomax, Gen. Pass. Agt., U. P. R. R., Omaha, Neb., mentioning this paper.

Cancerol has the Confidence of the People

A record of successful cures of people from every part of the Union and in every situation about the body contained in a valuable free book, which will be sent to those interested. Write to-day. Address Dr. L. T. Leach, Drawer 88, Indianapolis, Ind.

A HUSKER'S EXPERIENCE.

"I've husked many a bushel of corn; had my wrists and hands nearly paralyzed from strain. I've used lots of different kinds of huskers. Some were better than others, but I haven't struck anything that fills the bill better than that Akin Husker, made by Smith & Davis, Ames, Iowa. It's easy on the hand and relieves the wrist because there's a piano-wire spring at the butt of

the peg. When you jab your hand with the husker on it into a tough husk, the spring takes up the shock and gives your hand and wrist a lot of comfort. You can work fast and often beat the fellow in the next row. It fits snug, too, and holds the fingers together so my hands don't get blistered as easily as they used to. I got my Akin Husker by sending a quarter by mail to Smith & Davis. I guess in most places the stores keep them."—One Who's Had Experience.

Farm Furrows

Turned by a Practical Farmer.

The best safety deposit arrangement is—farm land.

Nothing seems to be freer than air unless it be hot air.

If there were more square deals in the world there would be more square meals.

"Look pleasant, please," is applied to the home as well as to the photograph gallery.

The best, safest, cleanest, cheapest and most convenient fire starter is a basket of dry corn cobs.

The present price of pork covers up and eliminates a great deal of the bad odor coming from the hog lot.

Farm animals constitute an effective and profitable fertilizer factory on the farm with the capital paying good dividends all the time.

Some politicians believe in rotation of power among political officials. Rotation is a good thing for the farmer and why not for the politician?

Plowing and harrowing soil early in the fall puts a stop to the loss of moisture, and for that reason early plowing liberates fertility by natural agencies.

There is a bad weed extant that needs eradicating. I refer to "sharpers' games." Starve them to death is my plan. I have no use for a gold brick.

There'd be more happy homes if every man could be as patient about home as he is when he goes fishing. Some men will growl if dinner is two minutes late and then they'll stay a whole day in a boat and never get a bite.

Far too many men conduct themselves on the "Is it against the law" plan rather than the law of right. When men ask themselves "Is it right?" then we will have made a great improvement. Most men know what is right.

Whenever one sees an old stable leaning over as if it would fall, with a manure pile against it holding it in place, he feels glad that the manure pile is there. The problem is whether to move the manure pile or to move the stable.

A hog breeder at one of the state fairs told me that he had not shown any hogs for a number of years but that he felt that he would have to get in the ring again. He claims that it is best to keep his hogs as well as his advertisement before the people.

J. Frost now assures us that he was not after the corn at all, but he would like to get after the bumper mosquito crop and incidentally he would take a nip at the flies and bugs. Jack made the heart of many a farmer glad by staying away late this year.

Sometimes there is a petulance engendered among children in the home. A good way to cure this is to let some members get away from the home for a season. Little undesirable habits are often broken up in this way and better ones formed in their places.

Sam says a daughter of a city merchant recently visited her grandfather in the country. The grandfather did not believe much in improvement and had a great many old-fashioned devices on his farm. Among other things he had an open well with a windlass for drawing the water. The girl was heard to remark when she saw her grandfather drawing

Make More Money Keep Your Stock Thrifty

Here's the Whole Truth of the Matter.

STANDARD STOCK FOOD is not a medicine, a drug, or a "dope."

It is a condimental food; a "seasoning" which takes the same place in the animal's ration that salt and pepper and mustard and sage and flavors and sauces take in *your* diet.

The animal needs this condiment just as you need condiments.

Because, first, it flavors and seasons the ration and makes it taste better.

So that the animal eats with a keener appetite and a greater relish.

That means a greater flow of saliva in the animal's mouth, a greater flow of all the juices and fluids in the digestive organs.

Hence the animal digests its feed more *easily*, more *quickly* and more *thoroughly*.

It gets more good from every pound of grain and hay it eats, and less of the ration is wasted by passing through the animal undigested

* * *

But that is not all. The *tonic* properties of Standard Stock Food quicken the circulation, aid in assimilation, tone up the entire digestive system, and produce that healthy, vigorous condition which means greater thrift in animals and bigger profits for you.

* * *

Honestly now, don't you believe, don't you *know*, that a stock food which will do this, will make money for you?

Standard Stock Food *will* do it. There is no "theory" about it. More than 400,000 of the best farmers, feeders, and breeders in the world use Standard Stock Food—and have proved that it does make stock thrive.

As to Quality.

Standard Stock Food is good all the way through—every particle in it has honest stock food value.

If you will just compare it with any other stock food made,—look at it, smell it, taste it—you can see and smell and taste its superiority.

STANDARD STOCK FOOD
"IT MAKES STOCK THRIVE"

It is stronger, purer, more concentrated.

That's why it goes so much farther than other stock foods.

That's why *it costs you less* to use Standard Stock Food than to use any other.

A dollar's worth of it contains more feeds than a dollar's worth of any other.

Simply compare the feeding directions on packages of various makes and you can see this for yourself.

It costs you less per animal, per month, than any other.

* * *

We want you to try Standard Stock Food, not because we want to make a single sale to you, but because we know that if you give it a fair test you will become an enthusiastic, permanent customer.

More than 400,000 farmers and feeders have *proved* that "It Makes Stock Thrive."

We will sell it to you on a square deal, money-back guaranty—your money back if it does not do all we claim it will do.

You run no risk in trying it, and its use means bigger profits to you.

GO TO YOUR DEALER

and ask him to supply you. If he cannot, do not take a substitute but send to us direct.

We will ship immediately and protect you with our square-deal, money-back guaranty.

FREE TO YOU.

Our big stock book, "The Standard Feeder," 160 pages, 200 illustrations, 12 chapters on the feeding, care and handling of all kinds of live stock. Regular price 50 cents, and you could not buy its equal at several times the price. But free to you if you give us the name of your dealer and tell us how much stock you keep.

Standard Stock Food Co., 1516 Howard St., Omaha, Neb.

water: "I have often heard that things go on like clockwork on grandpa's farm, but I didn't suppose they had to wind the well up to make it go."

Information comes from a reliable authority that the unsecured notes of cotton planters for the first time is now good at banks and their land is safe security and salable. The crop lien has just now disappeared.

Plowing under a clover sod is making a deposit better than that in a bank, for it pays good interest, cannot be subjected to irregularities of a cashier and speculations of bank officers will have no effect on it.

There is a true, but doleful story in a twisted, ragged, crushed and shapeless shock of grain. It tells a story of wasted energy and misapplied skill. I am glad that a good shock is something a poor man can have though it is something that a poor farmer seldom has.

After many promises and alarms the fences on the cattle range are actually coming down. Hundreds of miles of fences that once enclosed thousands of acres of good land have been torn from the posts, carefully rolled up by cowboys and sold as junk. Land agents in many localities are superintending the work of demolition. For twenty years off and on agents have ordered fences torn down and they have withstood all

threats. The rancher felt that the settler was a usurper and treated him coolly.

It is a step in the right direction to have the boiler of the steam thrasher tested, but it is not enough; the engineer should have a touch of the same test. Inefficient engineers are sometimes at their posts when bad accidents occur.

I have no war with automobiles at all; it is with the manner that some of them are run. No blame ought to attach to an inanimate thing like an automobile. There will come a day, however, when only sane men will be allowed to run automobiles in public places.

Apples are selling at eighty cents per barrel in some parts of the fruit district in Missouri. In southern Iowa peaches are being fed to stock while in Des Moines, one hundred miles away, they are selling at \$2 per bushel. Something is wrong when this condition exists.

In the last year book issued by the government is found the information that in addition to certain soils being adapted to the production of corn it is found that the plant does not do well below an altitude of 100 or above 1,500 feet above the level of the sea. That certain black loams suitable to the production of corn in the central states will not prove desirable for corn in the north-eastern and eastern tide-water states,

owing to a greater elevation and a consequent shorter season.

There is such a thing as a fruitgrower failing to see worm holes in his own fruit when he is packing. There is also a possibility that he will not have a good eye for grading the fruit. The man who can't do that had better hire a man to do his grading and packing.

In the production of corn we no longer ask "What will the harvest be?" for we can easily determine about what it will be. The thing that most concerns the corn grower now is "What will the price be?" When it comes to figuring what the price will be many will find their guesses up in the air.

A friend of mine says he bought a poor cockle bur farm paying \$34 per acre for it about a dozen or more years ago. He has the entire farm now to grass and the cockleburs have gone and it will now sell for \$125 per acre. The farm supports one of the best herds of Short-horns and the buildings are up-to-date.

CHEAP RATES TO PACIFIC COAST.

Commencing September 15th and continuing until October 31st, the Iowa Central will have on sale reduced rate one-way tickets to California, Oregon, Washington, British Columbia, Utah, Montana and Idaho. Rates \$15 below regular fare. Call on Agents for particulars or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

THE HOMESTEAD

A Practical Journal for the Farmer,
Stockman, Fruit Grower, Poultryman,
Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

SUBSCRIPTION RATES—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to get up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$5; five years in advance, \$8; ten years in advance, \$12. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

THE HOMESTEAD COMPANY,
Des Moines, Iowa.

THE LATE FALL PIG.

The following communication has been received from one of our subscribers at New London, Iowa:

I would like the advice of some of your older hog raisers on the following proposition: I have five good sows and they each have good litters of pigs about one week old. Now, I should like to have these sows bring spring litters, too. In that case, when, or how old should the present litter be when they are weaned? What mixture of grains in either slop or mash, should they be fed? Also, how should the sows be fed to build up again sufficient to carry a spring litter?

It is not a simple matter to winter pigs that are farrowed as late as October 10th. Unless one is exceedingly well fixed in the way of winter quarters for the young pigs, there will not be much profit in handling them. However, the pigs in this case have arrived and they must be cared for.

By the time they are old enough to eat, the nights will be getting rather cold and it will pay, in our opinion, to warm their feed. They should receive something besides corn. Shorts and corn meal, half and half, with oil meal or tankage added in quantities to amount to about one-tenth or one-twelfth of the ration, will make an excellent mixture if it is fed warm during the late fall and through the winter. If they are given about all they will eat up clean twice a day and if, in addition, the sows are well fed while the pigs are still suckling, they ought to thrive so far as feed

is concerned. However, they must have comfortable quarters to sleep in. This does not mean a close, unventilated building, but, rather, a reasonably warm, dry, location. Ordinarily the straw in their bed should be changed once or even twice a week, or whenever it seems to be at all damp.

Reverting again to the feeding of these young pigs, it may be said that if they are fed slop twice a day it will do no harm to let them have access to about all the dry corn they will eat. They need this for heating purposes, and if it is fed dry they are compelled to masticate it properly so that there is not much danger of throwing their digestive system out of order.

If it is not the intention to breed these sows for early farrow next spring we would let the pigs suck at least ten weeks, though of course this cannot be done if the sows are to be bred early. Invariably, however, it will stunt a late fall pig to wean him before he is that old.

Regarding the feeding of sows, it may be said that unless they are very fat now they should be given just about all the slop and corn they will eat until the pigs are weaned. It will pay from the standpoint of the litters to do this, while the sows themselves will then be in good condition when they are bred. It is always a bad policy to have sows run down in flesh at the time they are bred, because the chances are that it will reduce the size of their litters and also the stamina of the little pigs.

A syndicate of grain men have purchased 50,000 acres of Texas land for the raising of macaroni wheat.

The W. H. Jones Angus Sale.

That good Angus cattle are bringing good prices was never more evident than at the sale of Mr. W. H. Jones, at Quimby, Iowa, last week when the first ten head made an average of \$240. Blackbird of Cherokee 12th, a three-year-old Blackbird cow, topped the sale at \$525 and she was purchased by Mr. L. H. Cantine, of Quimby, Iowa. Mr. Jones put up one of the best bunches of Angus bulls seen in any sale this season, but there did not seem to be a demand for bulls, and he therefore did not offer all those cataloged for sale. Thirty-five head averaged \$131. The cattle were fitted by Mr. Arthur Jones, the young herdsman, just seventeen years of age, and a son of Mr. Jones, and they were in splendid condition. The bulls were particularly attractive, and he had not only one of the best bull offerings of the season, but they were the best-fitted bunch. Colonel Igo said in opening the sale that they were the best-fitted bunch of cattle he had the pleasure of selling this season. Below we list those selling for \$100 and over:

Blackbird of Cherokee 11th, three years, James Williams, Marcus, Iowa	\$350
Blackbird of Cherokee 12th, three years, L. H. Cantine, Quimby, Iowa	525
Blackbird of Cherokee 24th, one year, James Williams	210
Imp. Pride of Lovat 8th, seven years, same	275
Imp. Pride of Craighead, seven years, same	255
Pride of Heatherton 3d, nine years, Len Lamar, Storm Lake, Iowa	200
Pride 4th of Maple G., Geo. Isenbarger, Quimby, Iowa	125
Heather Mabel 2d, seven years, James Williams	180
Hilda Cantine, three years, Isenbarger Bros., Battle Creek, Iowa	130
Eva Essex, two years, L. H. Cantine	150
Eleonor of Maple G., one year, White Bros., Perry, Iowa	105
Stately of Hennessy, six years, W. H. Smith, Quimby, Iowa	150
Belle of Lakeside 2d, eight years, A. F. Bollin, Quimby, Iowa	100
Belle of Rock Glenn, three years, L. H. Cantine	145

THE WONDERFUL DAVIS FAMILY.

We are showing herewith a photographic reproduction of Mr. B. J. Davis and his nine sons. This is the largest family of

boys that has ever been brought to our attention, both in weight and height. The Davis family weighs 2,070 pounds, a trifle over a ton, and are nearly all "six footers." The father is still living and is now ninety-five years of age. It is a strange coincidence that the Davis brothers have all settled on the same line of business. The nine brothers are the owners of the Davis Cream Separator Company, of Chicago, Ill., whose advertisement appears in this paper. This company has been in the separator business nearly twenty years and has grown from a small beginning to a \$300,000 corporation. The Davis brothers have adopted a novel method of selling their cream separators direct from their large factory. As their catalog states, there is "no one between you

\$2⁵⁰ A Month
Buys a
Genuine

KIMBALL ORGAN

Play it 30 Days FREE. If You Don't Find it All We Claim, Send it Back at Our Expense and Pay Nothing. This is the KIMBALL SYSTEM of SELLING.

You can now get a Genuine Kimball Organ direct from the great Kimball Factory at the LOWEST MANUFACTURERS' PRICES on payments as low as \$2.50 a month until your instrument is paid for.

Your simple request brings you by return mail, postpaid, Free, our Money-Saving Plan and Organ Catalog.

This tells all about the new Kimball System of Selling and the whole of this remarkable Organ Story.

It tells how you get a Genuine Kimball Organ for a month's FREE Trial. Upon receipt of your order, we send the organ right along to you, with fine Piano Stool and Music Book.

You play on it a month in your own home. Try all the rare combinations of its numerous stops. Listen to its wonderfully sympathetic tones. Use it as if it were your own.

If you don't find it all we claim, send it back at our expense. The trial does not cost you a penny, for the first small payment you may have sent us will be cheerfully refunded if the organ is not satisfactory.

If you like the organ and find it just as we have represented (we know you will) send us at the end of the thirty days' FREE trial \$2.50. And the same amount every month until your organ is paid for. Thus we make it easy for you.

You or your children can learn to play while paying for the organ. Could we make you a more generous offer?

But we do not stop even here. We do not say to you that we guarantee Kimball Organs for five years or twenty or a hundred. But what we do say is—by dealing direct with us you know where to find us. We are right here always. If anything goes wrong with a Kimball Organ through fault of ours, anywhere, at any time, we stand ready to satisfy you.

The Great Kimball Organ Works are the Largest in the World. Here are built the famous Kimball Organs, the most wonderful organs made anywhere.

We have been building and selling them for fifty years—since 1857. And every year sees in the Kimball Organs some little improvement—in the reeds—the action—the stops—or the cases.

This year they are just a little finer than last. And we are making more of them than ever before—three times as many as any other concern in the world. We buy lumber and supplies in tremendous quantities. We pay cash. This means we get the very best at the very lowest prices.

Our factory is equipped with every most modern labor-saving device. All our machinery is up-to-date. And all our workmen are experienced hands. They know exactly how a fine organ should be put together. They do their work rapidly and well. And this means the very finest kind of organ-building at the very lowest cost.

It means that for every dollar you pay us you get your full one hundred cents' worth of fine organ. Kimball Organs are far and away the best—not at the price, but at any price.

Is there any advantage in dealing direct with the largest concern in the world—a concern with an established reputation to treasure—a concern that stakes its honor on the organs it makes?

By dealing direct with us you can be right in touch with the makers always. Thus we get to know each other and become friends. This is the way we want it. We want our friends to know what Kimball Organs really are. We don't ask them to take "hearsay evidence" or anybody's "say-so"—not even our own. So we let you try a Kimball Organ right in your own home a full month at our expense.

Could we afford to make such an offer if we were afraid to compare our organs with any built? Would we take such a risk if we did not know you will find the Kimball Organ the best made?

Let your children learn to play the organ. Keep them at home evenings. Give them wholesome, healthful, uplifting enjoyment. Sing the old familiar tunes—the grand old hymns—and feel their sweet influence in your home.

Write for our new Organ Book immediately. It is FREE. It shows all the styles we make and tells the complete story of this wonderful New Kimball System of Selling. Send to-day—now, before you forget.

W. W. KIMBALL CO.,

108 KIMBALL HALL, CHICAGO.

I CURE CANCER

MY MILD COMBINATION TREATMENT IS NOT A NEW REMEDY.

It has the experience of years back of it and has cured hundreds of cases where the hand of death seemed to forever have closed upon them. Endorsed by physicians, ministers, bankers, business men and others.

Treatment Not Painful

There is no necessity for the patient enduring the intense pain caused by applications of caustics, burning plasters, tery poultices, etc. Scores of the most advanced cases of Cancer have been cured by my Mild Combination Treatment entirely without pain.

BEWARE OF THE KNIFE

No case of Cancer was ever cured by a knife operation. The patient suffers untold agony and shortly finds himself in worse condition than ever. I cure cancer by a combination treatment. Local treatment destroys the deadly cancerous growth; constitutional treatment drives the disease out of the system, thus preventing its return.

Names of a Few of the Many I Have Cured
Mrs. Anna E. Guffy, Arcadia, Kans., Cancer of Breast.
Mrs. Frances Downey, Sildell, La., Cancer of Jaw for 14 years.
Mrs. A. E. Foyt, Rosebud, Texas, Cancer of the Womb after operation failed.
Mrs. D. E. Stone, Harper, S. C., Cancer of Lip after operation failed.
Mrs. J. W. Groshong, Wright City, Mo., Large Cancer in the Forehead.

FREE BOOK—CANCER AND ITS CURE

I send this large book to sufferers free of charge. Tells how and why my treatment cures. If you cannot come to my office for treatment I can cure you at home. No matter how serious your case may be—no matter how many operations you have had—no matter what treatments you have tried—do not give up hope but write at once.

DR. O. A. JOHNSON,
1233 Grand Ave.,
Suite 327, KANSAS CITY, MO.

1856—Sandwich—1906

Corn Shellers

The standard the world over for 50 years. Now in use in every corn growing section of this country. The Sandwich is the result of improved facilities of manufacture, latest and best design, the best procurable material, superior workmanship, and ripest experience.

The result is that well known superiority which has made the Sandwich so justly famous. We make them in all sizes and styles and capacities—mounted and down, belted and geared.

Farmers should insist on having their corn shelled with the Sandwich because it shells fast, saves time and the board of the "gang."

They shell clean and they clean the corn they shell clean.

SANDWICH MANUFACTURING COMPANY, 143 Main Street, Sandwich, Ill.

BRANCHES: Council Bluffs, Ia. Kansas City, Mo. Peoria, Ill. Cedar Rapids, Ia.

and them," consequently they save separator buyers 20 to 50 per cent on the price of a high-grade cream separator. There is one thing the Davis brothers will not do: they will not cut down the quality of the goods they manufacture. They stand back of every machine they send out with their iron-clad guarantee, which is backed by their entire capital stock. This assures anyone doing business that they will get the high-

est grade at lowest prices. This wonderful money-saving proposition of theirs as well as a large photograph of the Davis family is more fully covered and shown in their catalog No. 118, a copy of which will be gladly sent to any reader upon receipt of a postal request if he will kindly mention this paper. Just address Davis Cream Separator Company, 54L North Clinton St., Chicago, Ill.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

SALE OF A COW.

A Subscriber, Shenandoah, Iowa.—A bought a cow from B for the purpose of putting it into a beef club. When the cow was killed it was found that her intestines were diseased. Can A compel B to hear the loss?

Answer.—Upon the facts stated, the loss will, according to law, fall upon A. It does not appear that there were any false representations, or fraudulent concealment, or warranty made by B, and in such a case the buyer purchases at his own risk.

SLANDER AND LIBEL.

A Kansas Subscriber.—A and B are sisters-in-law. B has told a lot of falsehoods about A reflecting on her character. Can A have B arrested and prosecuted therefor, and if so, what would be the outcome?

Answer.—B has merely slandered A. This is not a criminal offense, therefore A cannot have B arrested and prosecuted. If B had told the falsehoods in writing or by pictures it would be libel and B could be arrested and prosecuted. There is no remedy for slander but a civil suit for damages; but libel is a criminal offense. The difference is this: Slander consists of injurious falsehoods spoken by one person concerning another person. Libel is merely slander written, or represented by pictures.

NEWSPAPER SUBSCRIPTION.

A Subscriber, Burlington, Iowa.—Some four years ago I put an advertisement in a certain newspaper, and the editor mailed the paper to me, as is the custom. In March, 1904, the paper changed hands and the new proprietor continued to send me the paper. I never subscribed for it. Many papers come to my box through the mail which I never open or read, and this is one of them. It comes on a rural free delivery and the children often get the mail, and take all that is in the box. The proprietor of the paper never demanded pay from me, but has sent his bill of \$2.25 to a collection agency in Chicago for collection, and it sends me dunning letters. Am I liable for this bill? Please give me the law and where to find it.

Answer.—The law upon the subject amounts to this: If a person receives a newspaper through the mail without objection, he is liable for the subscription price of it, upon an implied contract, although he did not actually subscribe for it. This doctrine is recognized in Iowa by the supreme court in the case of Shoemaker vs. Roberts, 103 Iowa Rep., p. 681.

DELAYED PASSENGER.

Mr. J. T. Morrow, Durant, Iowa.—I had a ticket issued by the Rock Island R. R. Company which read, "Good for one continuous first-class passage—Denver to Durant, Iowa." I got on the train in Denver and when I got to West Liberty, twenty miles west of Durant, the conductor told me I would have to get off there and wait for the local, as my train did not stop at Durant. I got off there, and in consequence arrived at home twelve hours later than the time the through train

on which I started, arrived. Was the company not under lawful obligations to stop the through train at Durant and let me off?

Answer.—We know of no legal method by which you could have compelled the railway company to stop its through train at Durant. If you were damaged by the delay of twelve hours, you might possibly recover against the company, but we doubt it. It does not strike us as a strong case.

DESTRUCTION OF LEASED PREMISES.

Mr. M. D. G. Tyndahl, So. Dak.—About two years ago I leased a tract of land on the Missouri river bottom for pasture and meadow, for the term of five years, from a non-resident owner. This summer the river cut away the only road that leads to the land, and also cut away the very best part of the land. I have no way now of getting to the land. The lease provided that in case of a sale of the land, my lease should expire. I have notified the owner that I cannot use the land and cannot afford to pay the rent. What can he do about it?

Answer.—According to the common law where a party has agreed to pay rent, the destruction of the leased premises by fire, or flood, or tempest, does not relieve the tenant from his obligation, unless there was a clause in the agreement to that effect. The statute law of South Dakota provides that the destruction of leased premises has the effect of ending the lease, but does not make any provision in case of the partial destruction of premises. By analogy, however, we suppose the court would hold in such a case, that the rent should be reduced in proportion to the partial destruction of the premises. Try to compromise with the owner, as he can probably hold you liable for a portion of the rent anyway, and possibly all of it.

SEVERAL REMEDIES.

A Subscriber, Britt, Iowa.—A prepared a note and mortgage in B's name, the mortgage being upon certain land which was not owned by B at all, and indeed B owned no land whatever. A persuaded B to sign the note and mortgage and then took them and raised money on them. Has B any legal remedy?

Answer.—He can recover from A whatever he has been obliged to pay on account of the note and mortgage. He can probably have A prosecuted criminally for false pretenses. He can also probably have a guardian appointed for himself. The same correspondent in another letter dated one day later says that a certain person owes a debt which he is unable to pay at present on account of poor crops during the last four years, and that he has received threatening letters from a collection agency about it, threatening him with public exposure, and accusing him of dishonesty and wilfully refusing to pay his debt, and wants to know what the debtor should do about it. We would advise the debtor to waste no labor upon a controversy about the letters, but to give his strength and attention to his fifth crop, and try to make it pay the debt.

ACCOMMODATION ROAD.

A Subscriber, Markesan, Wis.—There is a road down through the middle of my farm, leading to a farm hack of mine. There is a gate each end of the road. It is not an open road, has never been fenced; is only a track for the people at the other farm to travel over, as an accommodation. It has been there for a good many years. The farm has changed hands several times, and has just recently passed into the hands

To Handle and Operate

WE never advocate the Litchfield Spreader as being a lazy man's machine. We do not believe in a lazy man, and therefore do not believe in lazy men's machines. However, there is no need for seeking a hard way to do a job when an easy way is readily at hand.

Will our reader kindly tell us why all this waste of "gray matter" in trying to conceive some sort of a complicated device for automatically returning the conveyer on a manure spreader; why all this litigation in the courts and strenuous controversy over little details of mechanical devices for accomplishing something that ought never to be necessary? The answer we can give if you want it. The Litchfield Spreader controls the only successful endless conveyer, and as others must make spreaders, they necessarily must use the next best thing that they can get, and this is why the return conveyer is made by other manufacturers.

The Litchfield Spreader goes right to the meat of the question every time; uses no round-about means of accomplishing results. It has but one single lever, which with one single motion performs what a half dozen different levers are used for on other spreaders. When it comes to improvements, this spreader "hits the nail on the head," and the improvements are straightforward, simple mechanical principles that do the business. These improvements avoid religiously all sensational freaks that on other machines are designed to tickle the curiosity and befuddle the judgment of the intelligent American citizen.

Most boys (and girls, too) on the farm are able to drive the horses at an early age. Wouldn't you like to have a machine that you could put your ten-year-old boy or girl in charge of and let them go to the field, feeling confident that as long as they know how to drive they know how to handle the Litchfield Spreader? To operate the Litchfield Spreader is a pleasure and there are thousands of them today being driven by ten and twelve-year-old children successfully and with just as good results as a man could accomplish. Another reason why we are able to guarantee the Litchfield for five years. Don't skip next week.

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

of a new owner. Can I lawfully shut up the road?

Answer.—We think you can lawfully shut up the road. In order to prevent you from doing this the other parties would have to prove that this track or road had been continuously used for twenty years, under a claim of right, and as against your right. The circumstances you state indicate that all the time the track or road was used by your permission, as a matter of accommodation, and not as a matter of right. If this be so then you cannot be prevented from shutting up the road.

The Isaac Duroc Jersey Sale.

At the Duroc Jersey hog sale held by Mr. T. H. Isaac, on Wednesday, October 17th, at Red Oak, Iowa, there was a large attendance. The offering, including in all, sixty head, brought the handsome sum of \$1,654.50, an average of a trifle over \$27.50 per head. The following is a list of the purchasers and the prices paid:

HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

A Fremont county farmer has found a new use for the wheels of an old corn planter. He writes: "I have a new device for lifting a wagon box or hay ladder that may interest your many readers. I take a pair of old corn planter wheels and have the blacksmith bolt them to an iron rod so that the rod must turn with the wheel. This rod I run through a couple of the cross beams of the barn as shown in the drawing. On the part of the rod between the beams

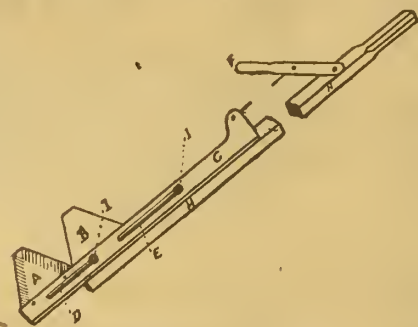

WAGON BOX LIFTER.

I make a cylinder or windlass by attaching a round piece of timber. These two cylinders are shown as AA in the drawing. Around these cylinders a rope is wound at either end and hangs down long enough to go under the end of the wagon box or ladder. As the planter wheels are turned these ropes wind up on the cylinder and the box is lifted. Around the tire of each wheel a three-eighth-inch rope is wound a number of times and then run down to a windlass, B. By turning the crank of this windlass the planter wheels are turned, by the rope around them unwinding, and this winds up the rope on the cylinder and the box is lifted. The windlass, B, can be held in place by inserting a bolt, C, which will hold the box or ladder at any height desired. I have used one of these devices for five years and find it the handiest thing about the farm.

A Polk county, Iowa, farmer sends the following description of a device he has made for pruning fruit and shade trees: "I inclose a drawing of a home-made pruner, which I have found better and more durable than those you buy. The two blades, A and B, are old binder sickle sections. A is attached to a movable iron piece, C, while B is attached

to the wood handle, H, which may be any length desired. The one I have is twelve feet long so that I can reach the tallest apple trees. The sections, A and B, are set so the bottoms are together and they should fit as closely as a pair

HOME-MADE PRUNER.

of shears. The iron piece, C, has two openings, D and E, so that when the handle, H, is pulled back the section A will slide over B like a pair of shears. You know that a binder sickle section has a 'feather' edge so that the limb or twig will not slip up but will be cut off as smoothly as you please. C is attached to H by two bolts the heads of which are shown as II."

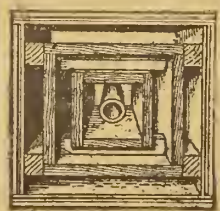

The following from the Orange Judd Farmer illustrates a very good way to protect pipes in winter: "Nothing is so good a protector from frost or heat as

FROST BOX AND WATER PIPE

dead air in insulated compartments. Where water pipes must be placed in the ground above the frost line, or above the ground and fully exposed, properly constructed frost boxes are vastly superior to felt, cork or other coverings. These packing materials are usually worse than worthless, because they are sure to become soaked from condensation on the pipe and thus to invite instead of repel frost. This is especially true where the pipes lead to the elevated tanks from wells of cold water, because in any weather when the temperature is above that of the water, condensation is likely to occur. The simplest construction of an effective protecting box is constructed

with three dead air spaces well sealed and extending from below the frost line up to the point of delivery at the tank or at the house. After the pipe is in place a box tube of one-half or three-fourths-inch stuff and six inches inside diameter is built with the pipe in the center. It

CROSS SECTION OF FROST BOX.

is then sealed outside with tar paper. Trimmers are then placed around the box to build another box upon, a two-inch air space being left between the two boxes. In like manner this box is sealed and supplied with trimmers for an outside box of ship lap or matched boards to surround a second two-inch air space. Frost boxes so constructed will be found effective in any climate and are fully as satisfactory as more elaborately constructed ones."

A Lyon county reader has an improvement in stanchions. He explains in the following language: "You have, no doubt, found it a little trouble to go through the stanchions and close every one after the cows or calves have been turned into the barn. I have a device that does away with this trouble. I call it my self-closing stanchion. The cut I inclose describes it without going into detail. All there is in addition to any stanchion is an attachment, A. This is bolted to the lower board of the stanchion at B and an iron rod runs from the upper end of it to the movable board. When the stanchion is open one end of A sticks up in the opening, as

VALUABLE HINTS ABOUT ROOFING.

You do not have to paint Ruberoid Roofing when applying. At the end of two years give it a good coat of Ruberine Paint and it will not need another coat for five years. A similar coat of Ruberine every five years will keep the roof in perfect condition as long as the building lasts. Do you know of any other roofing which can be kept in condition indefinitely at such slight trouble and expense?

Ruberine contains practically the same ingredients which are used in the manufacture of the roofing. When applied to Ruberoid it soaks in and becomes part of it.

Ruberoid Roofing was the first and is today the only prepared roofing made which will outlast metal, shingles, and many grades of slate. Absolutely waterproof and fire resisting. Because it is positively waterproof it is used for lining water tanks, cisterns, etc.

You can apply it yourself. Nails, tin caps and cement furnished free with every roll. Avoid imposition by looking for the registered trade mark "Ruberoid" which is stamped on the underside of every sheet. Ruberoid Roofing is sold under our guarantee only by our authorized agents.

SELF-CLOSING STANCHION.

which closes the stanchion without the attention of an attendant. I have used one of these for some time and the occasions are rare where they fail to work."

A Howell county, Mo., reader describes his device for making a fruit ladder as follows: "Take a couple of old cultivator

FRUIT LADDER.

wheels and make an axle out of hard wood. Then use two 2x4's ten or twelve feet long, as desired, for upright supports. These should be bolted to the axle as near to the wheels as possible. At right angles with these two supports, bolt two other 2x4's, five feet long. These are for supports to run from the axle to the ground. From the lower end of these five-foot 2x4's to the top of the upright supports, place a fifteen-foot ladder securely bolting it at both ends. It can be moved from one part of the orchard to another very easily and stand any place without having to depend upon a limb for support."

CITY TICKET OFFICE, 512 WALNUT ST.

When you think about traveling call at City Ticket Office of the Minneapolis & St. Louis R. R. (in with the Wabash), at 512 Walnut St., where you will secure the best and latest information. Don't forget the M. & St. L. sells through tickets via St. Paul, over the Northern Pacific, Great Northern,

VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT. RICKETS.

I have a seven-months-old boar pig that cannot use his hind pastern joints to any advantage. He has been in this condition for a month. He eats well and seems all right in other ways. Have never done anything for him.

We presume that he has broken down in the pastern joints so that he walks on his "dew claws" in which case the cause is rickets and it comes as a rule from overfeeding, especially on corn, and too little exercise. The predisposition to the trouble is hereditary. Feed slop of middlings, flaxseed meal and tankage or dried blood meal and give lime water freely once daily. Allow plenty of exercise on grass.

WART.

I have a black mare six years old that has a growth on the upper part of her eye lid. It made its first appearance about one year ago. When first noticed it was a hard lump and was not sore, but grew larger and became red and bloody. It is now about the size of a hen egg. I had it treated by a veterinarian and he burned it out with what I supposed was caustic, but it grew out in about a week. Please tell me how to remove it.

As the growth reappeared after removal it seems that it is cancerous (malignant) in which case it will prove incurable. If it has a narrow neck put a couple of small rubber bands tightly around it and they will cause it to drop off. If it is a wart it may be cured by saturating once daily with glacial acetic acid applied drop by drop. If it is cancerous the knife followed by cauterization should again be resorted to.

LUNG WORMS.

I recently lost two spring lambs and have just cut one open and find it in fine order, no worms, and all I could see was that its lungs were swollen and black. They run in good sheep pasture; are thoroughbred Shropshires. They have a fine growth for their age and have done fine until a week ago. The second one died yesterday and one more is coughing and seems sick. If you could advise me what to do or could throw any light on the matter it would be greatly appreciated.

More careful examination doubtless would show that fine thread-like worms are present in the air passages of the lungs and causing the cough and pneumonia. At once give a change of pasture and commence feeding well on oats, bran and ground oilcake. If a post mortem examination discovers the worms in the lungs the best treatment will be to inject a medical solution, for their destruction, by way of the windpipe. The following is advised: Iodin, half dram; iodid of potash, two and one-half drams; distilled water, three ounces. Rub these together then add two ounces of turpentine and six ounces of olive oil, shaking well while adding. One to two drams is the dose injected through rings of windpipe by means of a hollow needle and hypodermic syringe. Injection may be

OLD STREET, PEORIA, ILL.

repeated in three or four days, the number of injections depending upon the severity of the disease.

LAMENESS.

I have a gray mare nine years old that has been lame since last spring. On her left hind leg I think she has her tendons sprained. There are soft puffs around, or a little above the fetlock. I have used liniments, but they failed to do any good. Would it be advisable to blister these puffs? If so, what with and how often?

It is highly improbable that the wind puffs referred to are the cause of lameness. They might cause it when starting but as the mare is nine years old the puffs doubtless have been there for some years. If you are sure, however, that the part involved by puffs is the true seat of the lameness it certainly would be good practice to remove the hair and apply a blister.

CAPPED HOCKS.

(1) What remedy would you recommend for capped hocks? I have a colt with some. (2) Also have a mare colt with an enlarged navel. The sack seems to have a tube in it, but it can be pushed up into the abdominal wall, but will come back again. It is not sore. (3) I have a horse that is lame in one hind leg. No ailment can be seen, but he seems to flinch when the hand is rubbed along the inside of the leg high up. (4) I have a sheep that is now very poor and soon will die. Some time ago I noticed a lump just above the nostril nearly as large as a pigeon egg, and on opening it I found it to be full of thick matter. The upper lip was flat and very hard. The lip is better, but she has had several of those lumps since on different parts of the head. I never saw anything of this kind before.

(1) When of long standing they cannot be removed. Remove hair and rub in iodine ointment each other day. Horse should occupy a box stall. (2) Have the local veterinarian treat the case by applying wooden clamps in usual way. (3) We are unable to prescribe treatment for lameness the location of which is unknown. Such cases require expert examination by qualified veterinarian. (4) Sheep occasionally are afflicted with ac-

tinomycosis (lumpy jaw) and this may be a case of that sort. It is not worth treating and you will not likely have a similar case to deal with.

BLOODY MILK.

We have a red cow ten years old, fresh in April. For a month past she has had one bloody teat. The milk is red and full of large clots of blood. So far, I have been able to strip it out clean. What can I do for her? Would you advise drying her up? Milk from other teats seems to be all right.

A small blood vessel has ruptured in affected quarter and the cow may be otherwise perfectly healthy. It would not be well to dry her off before treatment has been given for cure of abnormal condition. Physic her with a pound of epsom salts, one ounce of powdered ginger root and one ounce of powdered salt-peter in three pints of warm water. Follow with two drams of dilute sulphuric acid in drinking water twice daily. Bathe udder twice daily with cold water then with a lotion composed of two drams each of powdered alum and dilute sulphuric acid in a pint of cold water. Mixing one dram of dried sulphate of iron and three drams of common salt in the feed every night for about eight days sometimes has a fine effect in remedying this condition.

OUR DAIRY DEPARTMENT

ALL communication relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

PREPARING FOR THE FALL CALF.

During the remaining weeks of the year many cows will freshen. It is a most unfavorable time for their offspring to begin careers, when the raw weather at this season keeps their little forms humped up and shivering through the whole day, unless a thoughtful owner has provided for them rightly and they can find comfort a few hours each day in a sunny location.

Nothing will pay better than to have calves properly housed for the winter, and by this we mean well-bedded quarters with a south front and a small yard to themselves where, perhaps, they can bask on the warm side of a straw stack. Under such conditions they will possibly escape many of the troubles incident to calfhood. Drafts in the stalls are to be avoided, and a pen separated from the other stalls by a tight partition only five feet high allows of plenty of air without drafts.

On the point of feeding, we would simply encourage a little extra effort on the part of the owner to keep the racks regularly filled with the best hay and fodder he can find. The stomach of the young calf is peculiarly sensitive, as many men have learned to their sorrow, and a little extra trouble in keeping clean, sweet-cured forage before the calves will make better yearlings of them. If scouring could be avoided in the calf lot, there would be more yearlings nearer the nine-hundred than the six-hundred-pound mark. And how may this evil be avoided? By regular feeding, in uniform amounts, of whatever is fed, grain or skim milk. The loss from bloating and derangement of digestive apparatus, through indifferent methods of feeding, especially with skim milk, accounts largely for the complaint we hear about the small profits in the cattle-feeding business for the man who raises his own steers.

There is nothing that will add so much to the pleasure of raising calves as an arrangement of stanchions, one for each. They are easily made, allowing two feet for width and three and a half feet for height. Inch stuff will do, and the two uprights are of four-inch boards hinged at the bottom with a spike, and hooked

We Guarantee to Save You \$20 to \$50 on the High Grade DAVIS Cream Separator.

We are the nine Davis Brothers—the cream separator makers you have heard so much about.

We were brought up on a Wisconsin farm where we learned the dairy business practically—from A to Z, every fact and detail of work and care. That was under the old system, the hard, slow, extravagant way.

About 20 years ago we began manufacturing cream separators. We saw the need of better methods and we set ourselves diligently to work to perfect them.

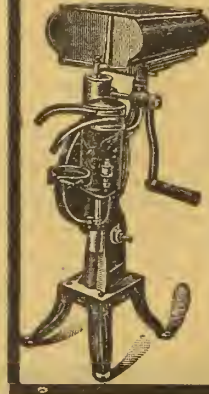

We have made thousands of separators ourselves, and we have examined and tested practically every other good separator made. We have seen our machines at work, some five years, some ten, some fifteen years. Of course we have learned some lessons.

The 1907 Davis results from our twenty years of experiment, our united efforts, our observations—all based on our intimate, practical knowledge of dairy needs and requirements.

Our 1907 model is a beauty. It's an easy runner. You know what that means. Your hired man or son will want to turn it.

It's easy to clean. And it's guaranteed to produce high testing cream so you are sure to get the highest price. Within the last year creamery companies began paying higher prices for cream testing 30% and higher. You are sure to get that with the Davis.

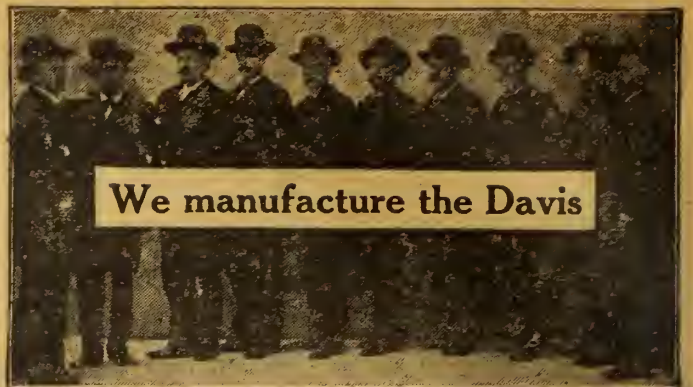

We are able to sell the 1907 Davis under one of the strongest guarantees ever made. Read it in our latest catalog.

Buy from Factory at Factory Prices.

One of the most remarkable things about the Davis is the low price at which it is sold.

DAVIS CREAM SEPARATOR CO., 54-L North Clinton St., Chicago, U.S.A.

We manufacture the Davis

B. J. DAVIS AND HIS NINE SONS

We said we would save you \$20 to \$50. Of course we had reference to high grade separators, machines of a capacity to do your work properly, machines that are made of the best materials, by expert mechanics and built on right principles—machines that claim to be in a class with the 1907 Davis—on such machines we can and do guarantee to save you \$20 to \$50 on the price.

Why? Because we sell you direct from the factory at factory prices.

Because there are no wholesalers', jobbers' or state agents' commissions and no travelling men's expenses to pay.

Because we are the actual manufacturers, have our own factory, use our own capital and superintend personally the making of every machine.

Because we are satisfied with a reasonable manufacturer's profit.

You have only to compare prices of the 1907 Davis with other standard separators to prove for yourself the saving we claim.

Is this saving worth while?

Paying the higher price to get a separator through jobbers, etc. does not make the separator better. You might as well have that money yourself. You can get no better separator than the new 1907 Davis at any price.

We are ready to talk separators to you. We want to help you decide the question. Our money saving catalog will aid you. Merely send letter or postal saying, "Send me your Money Saving Catalog No. 118 free of charge." It will go to you by return mail. Address,

at the top with a block. With all new boards, the cost for ten stanchions will be about \$5. With five pails, the milk can be measured out and fed in equal portions. Under such conditions a small boy can do the work properly where a man finds his hands full in a loose bunch of hungry calves. Nothing will so effectually prevent and overcome the sucking nuisance. It may take the calves a few days to learn their places, but they will soon catch on. A little bran and ground grain placed before them following the milk gives the youngest one an equal chance for his portion, and a half hour later when the stanchions are loosened there will be little or no desire to suck.

Dairy Helps.

To the Editor of The Homestead:

All of us who live in the blue-grass country of Kentucky think there is nothing equal to our milk, cream and butter, yet I can truly say that I have seen butter made in our far-famed, much-loved state that was not first-class butter. The parties who sold the product were painstaking, conscientious people, but made the mistake of keeping the rich cream too long and let it get old before churning. This is a very serious mistake; hence the great necessity of warding it off.

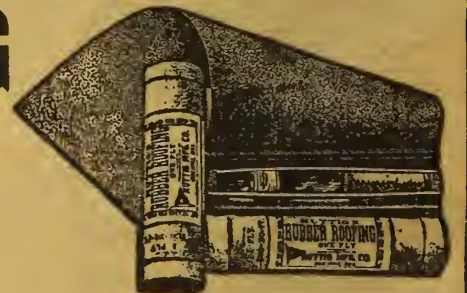

Milk and butter take on impurities quicker than any other product. You should wash your butter-bowl and churn out in a warm suds of rain water and gold-dust, and it will keep them sweet and clean and pure. Sun and air are the best disinfectants. One friend who kept her engagement in St. Louis for years said she washed her butter-bowl thus, also churn and dairy vessels. She also said that she wrapped her balls of yellow butter in a clean white cloth, first dipped in a weak solution of borax water, so if handled or touched it could take on no impurities. My friend got fifty cents a pound for her butter the year round. Kentuckian.

The Heifer & Her First Calf.

To the Editor of The Homestead:

Pregnancy marks a critical period in the life of the dairy animal. The cow that has once passed through the experience safely will generally have no trouble afterward if given reasonable care. With the young "touchy" heifer for the first time about to come fresh it is different, and a little effort on the part of the owner in making her conditions favorable for a safe delivery of the offspring will be about the best thing that can be done to insure some degree of usefulness from her in the future. The treatment that the young heifer receives the two weeks before and the same time after her first calving will greatly influ-

ROOFING THAT WILL LAST.

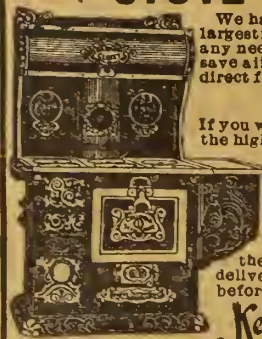

What the farmer wants for roofing is something that will keep out the water and wind and can be put on easily by himself. After making a series of tests covering a period of several years we have prepared Huttig's Ready Roofing, which we know to be the best quality of roofing ever offered for sale. Our reasons for this are that our roofing is made from the best quality of felt thoroughly saturated with Trinidad asphalt. The treating of this felt with asphalt is what makes the Superior brand of our roofing. Another thing in its favor is that it can be used for the sides of the building as well as the roof, as it keeps out the cold of winter and the heat of summer. When you use Huttig's Rubber Roofing you do not have to repair it every year as is the case with many roofings. There is no wear out to the Huttig brand; it will last for years. Those who have used it find that it is much cheaper than shingles in every way and so easily put on that anyone who can drive a nail can lay his own roof. We have sold great quantities of our roofing to farmers and stock breeders and in many instances they have come back for a second order. We want every reader of this paper to know what Huttig's Rubber Roofing is like and you can find this out by inquiring of your dealer. If he does not carry our roofing just drop us a line and we will send you sample and at the same time tell you all about its different uses. Write to.

Huttig Manufacturing Co., Muscatine, Iowa.

MILK CANS ROB YOU

Look through a microscope at milk set to cream in pans or cans and you'll see how they rob you. You'll see the caseine—the cheese part—forming a spidery web all through the milk. You'll see this web growing thicker and thicker until it forms solid curd. How can you expect all the cream to rise through that? It can't. This

caseine web catches a third to half the cream. You stand that loss just as long as you use pans or cans for they haven't enough skimming force to take out all the cream. But, just the minute you commence using Sharples Dairy Tubular Cream Separator, you stop that loss.

Sharples Dairy Tubular Cream Separators have 10,000 times more skimming force than pans or cans, and twice as much as any other separator. They get all the cream—get it quick—get it free from dirt and in the best condition for making Gift Edge Butter. Caseine don't bother the Tubular. The Tubular is positively certain to greatly increase your dairy profits, so write at once for catalog I-121 and our valuable free book, "Business Dairying."

The Sharples Separator Co. West Chester, Pa. Toronto, Can. Chicago, Ill.

ence her future value. A sudden fright at a dog or an unusual sight may cause her calf to be thrown. Abusive treatment for one or two of the first milkings may develop some vicious habit that will not be easily forgotten and may spoil her for good.

Many a small boy whose duty it is to drive up the kine well knows what it is to handle the skittish heifer. If she acts mean, her position is fully warrantable, for her position has been

changed from a care-free heifer to full maternal responsibilities.

Then follows the trial for the milker, and if she is nervous and sensitive it will require the best hired man's patience to get along without losing his temper and resorting to rough treatment. This is the time to keep cool.

There is a way to avoid all this trouble. Get acquainted with the maturing heifer, place her early in the herd of milk cows if she is in the far pasture

with the stock cattle, and watch that no harm befalls her in her new relation. Pastures have been short this fall and the young heifer may be thin from the double demand on her system for her own requirements and those of the embryo, so that a little grain in the stable will prove very enticing, and often in this way a young heifer will fall into the management of the herd without the least difficulty. One may be tempted to feed her heavily now, but it is not a good plan, as the system may become deranged. She is probably not used to grain and a few pounds of mixed grain daily with bran in addition will answer the purpose. A place to herself in the yard or stable, where the whole farm will not view her distress, access to water to ease her fever and perhaps a bran or mixed grain mash, if convenient, will bring her through the first experience, and thus contribute to her usefulness as a cow. L. E. Troeger.

OATS AND BRAN FOR MILK COWS.

The high protein content of oats combined with other good qualities, gives it a high rating as a grain feed for milk cows. In many parts of the country where it returns large yields per acre, it is a cheap source of protein. When oats are high, however, and bran can be purchased at a reasonable price, it often is better to sell the oats and feed the mill product.

There is a close similarity between oats and bran in their analysis and their value for feeding. One experiment is on record where whole oats were ground and gave 10 per cent better milk and butter-fat returns than bran. Of course, bran is quite variable in its analyses, so that this result could only be considered as indicative. However, the above experiment does not disagree much with general opinion.

Bran, that is wheat bran, derives its high value from the fact that it contains a larger amount of digestible protein and ash than any of the common grains. Besides, it adds bulk to a heavy grain ration; for example, corn meal, and is a natural laxative—two points considered by many to represent the best properties of bran.

Comparing the analysis of oats with that of bran we find that for every hundred pounds of weight, bran furnishes three pounds more of digestible protein and nearly the same amount more of ash. While it is somewhat short on fat content we will not consider that fea-

ture, both of these feeds are used primarily for their ash and protein, principally the latter, and other qualities mentioned before. Let us compare the two feeds on a protein basis alone, placing the cost of this element at three and three-quarters cents per pound. This is what protein costs in feeds where it comprises a large part, as for example in cottonseed meal. Just on a protein basis, therefore, bran is worth nearly twelve cents more per hundred pounds than oats. Thus, if the cost of bran is ninety cents per hundred, oats would be worth twelve cents less, or practically twenty-eight cents per bushel. With bran at eighty cents, oats would equal it at twenty-five cents.

It must be remembered that this comparison has been based solely on protein basis. While we think that is the point on which to make the most representative comparison, there are other things to be considered; for example, the cost of marketing the oats and hauling back the bran. This expense would allow oats to be two or three cents per bushel above their value compared with bran, before the change would be profitable. Then in turn this expense might be offset by the superior property of the bran in giving bulk to the ration of grain and keeping the digestive apparatus in tone. Ash is low in many rations and as this is a very necessary element in the making of milk, the large percentage in bran is a point in favor of the mill product.

From the above we do not wish to give the impression that when the price admits, bran should wholly replace oats, for we should always wish to feed several pounds of this unexcelled grain for milk making. But suppose oats are worth twenty-eight cents per bushel and bran eighty cents per hundred, it is quite likely that the farmer any reasonable distance from market could buy and feed bran freely, especially if no clover hay or other roughage high in protein could be fed. The following ration will illustrate our point. It is intended that corn stover and clover hay be fed freely for roughage in conjunction with this grain ration: Three pounds corn-and-cob meal, two pounds oats and six pounds bran; this amount to be fed daily to a cow weighing 1,000 pounds. Though a trifle below the standard set for protein, this ration will be economical and conducive to the thrift of the herd. If clover hay is not obtainable, then one or two pounds of cottonseed meal or linseed meal must be added. Some careful breeders would not be without bran whatever it cost, but the farmer not making a specialty of dairying must be economical and use feeds of his own raising as largely as possible.

The Schaefer Short-horn Sale.

The sale of Short-horn cattle made by Messrs. F. A. Schaefer & Son, of Raleigh, Iowa, on October 17th, attracted a great many breeders and a nice local attendance to take the plainer-bred cattle. The offering was particularly good, there being some splendid Scotch cattle in the sale. We called attention in our field notes preceding the sale to his herd bull, Choice of Archers, and every breeder present was loud in his praise of this grand young bull and his get. As a breeding bull he has few equals in the state, and his calves were a surprise to those who attended the sale. Cows bred to him or those having calf at foot were in good demand. The top price of the sale was \$330 for Imp. Celia 9th, and she went to Mr. W. J. McLean, of Rock Valley, Iowa. The yearling bull, Sittytton Archer, a son of Choice of Archers, sold for \$285 to Mr. J. B. Savage, of Mountain Lake, Minn. He was a particularly good young

A Very Lame Excuse

Is that offered by other Cream Separator concerns, when they tell you that even though they do not extract all the cream what they leave in is not wasted because it goes to fatten the pigs. This is a fallacy. Professor Haecker, of the Agricultural Department of the University of Minnesota, declares that there is as much food value in skim milk as in whole milk. Therefore, the cream remaining is wasted.

You prevent all this waste by using an

Iowa Dairy Separator

What you want is every particle of the cream, and this is exactly what you get with the "IOWA." Write at once for catalog 25 and full information, which will come free by return mail. Address,

The Iowa Dairy Separator Co., Waterloo, Iowa.

WORLD'S BEST BUTTER FROM DE LAVAL CREAM

Cream skimmed by a DE LAVAL separator can be made into butter SUPERIOR to that which can be made from cream skimmed by any other separator or system. This is the FACT—the proof of which grows more and more conclusive each year. Following is a list of the more important STATE FAIR FIRST HONORS awarded DE LAVAL users during 1906:

OHIO—Conover Creamery Co., Greenville.....	Score 98
INDIANA—Ray & Arnold, Logansport.....	" 97
ILLINOIS—W. J. Kane, Morton.....	" 97
WISCONSIN—W. J. Clark, Troy Center.....	" 97
MINNESOTA—M. Sondergaard, Hutchinson.....	" 98
IOWA—R. Kerganther, Northwood.....	" 98½
SIOUX CITY—C. J. Rohde, Manchester, Iowa.....	" 99

Of special note are the awards made at the Ohio State Fair where the highest score of 98 went to butter entered by the Conover Creamery Co., of Greenville, MADE FROM DE LAVAL HAND SEPARATOR CREAM, while the butter receiving the second highest score of 97 was also made from DE LAVAL HAND SEPARATOR CREAM by the Glen Echo Creamery, of Springfield. Here, as in many instances, we have a practical demonstration of how much the DE LAVAL separator means in both creamery and farm separation.

All highest awards in every contest of the National Butter-makers Association, from 1892 to 1906, including the great Dairy Show in Chicago this year, have been won by users of DE LAVAL machines. The butter receiving highest score at the World's Exposition in Paris in 1901 was DE LAVAL made, as was also the Grand Prize butter of the St. Louis World's Fair in 1904. A DE LAVAL catalog will help to make plain why DE LAVAL cream is superior. Write for it today.

Are You DEAF?

I was deaf myself for 25 years. I perfected and patented a small, invisible ear drum in order to help my own hearing. It is called "The Way Ear Drum," and by the use of these drums I can NOW HEAR WHISPERS. I want all deaf people to write me. I do not claim to "cure" all cases of deafness, neither can

I benefit those who were born deaf. But I CAN HELP 90 per cent of those whose hearing is defective.

Won't you take the trouble to write and find out all about me and my invention? Tell me the cause of your deafness. Geo. P. Way, 1049 Majestic Bldg., Detroit, Mich.

Whitewash as a Protection Against Winter Killing.

To the Editor of The Homestead:

A Canadian firm engaged in the manufacture of spraying machinery advocates a coating of whitewash as a protection for peach trees against winter killing and reports some very satisfactory results from experiments with its use carried on in Ohio, New York and Southern Canada.

Strange as this idea may seem, it is not without a reasonable basis. The damage occurring through winter killing is not due to steady, cold weather, but to a cold wave following a warm period which has started the sap flowing and made the buds swell. The futility of endeavoring to keep the tree dormant by retaining frost about the roots is shown from the fact that a twig from any fruit tree may be made to blossom in the dead of winter (if it bears fruit buds) by removing it to a sunny window in a heated room. This shows that conditions favorable to blossoming will cause the buds to push forward wholly independent of the condition of the roots.

On the other hand, if the tree can be kept cool the buds will remain dormant. So long as the temperature within the tree is kept below a certain degree the sap will not start nor the buds swell. Hence is the practicability of whitewashing the trees.

White, it is known, reflects the sunlight and heat. White garments are more comfortable than any other color in the summer time. Greenhouse men paint their glass white in hot weather in order that the heat of the sun will not penetrate the glass. This is more satisfactory than any covering or screen that can be used. Upon the same principle, trees that have been whitewashed, trunk, branch and twig, may be expected to remain more dormant during a Feb-

ruary thaw than any which retain their natural color.

This method has not been tried here to our knowledge, but it commends itself as worthy of trial, and if it proves successful it will mean much, not only in the growing of peaches along the northern line of the peach industry, but also in the growing of other fruits more hardy than the peach, but which more or less frequently suffer from having a period of untimely growth before the last cold weather has come.

For the application of whitewash to trees a sprayer fitted with Vermorel nozzles is the best apparatus to use. For a very few trees a brush could be used, but one would not want to cover many trees in this way. The work should be carefully done and the entire tree covered evenly.

To make a barrel (fifty gallons) of whitewash, ten pounds of good, fresh lime should be slacked, care being exercised that it does not burn. When thoroughly slacked it should be washed through a fine sieve with abundant water and the amount of the mixture finally increased to fifty gallons.

The use of glue is advocated in connection with the whitewash and it may be found practicable on account of the adhesive properties. Half a pound of glue should be dissolved in a little hot water in the usual way and added to the whitewash mixture after it is prepared, stirring briskly the while.

The work of going over the trees may be done at any time after winter has set in. If there are winter rains it may be necessary to repeat it. It must be remembered that a freeze late in March more often destroys peach buds than any other cause and a little negligence at this time in allowing the whitewash to be washed off may undo the results of careful work which has brought the trees through the winter safely.

Polk county, Ia. Franklin Brown.

Experience in Picking Seed Corn.

To the Editor of The Homestead:

I have been much interested in the discussion going on in your paper relating to the seed corn problem. I have gone into the corn field early in Sep-

GRAIN FREEMAN BROS. & CO., HAY

COMMISSION MERCHANTS.
Established 1886, 68 Board of Trade, Chicago.
Your shipments to this market and orders for the purchase and sale of grain for future delivery solicited.

tember and picked the early ears, some being dented and some just denting. I tied the husks together and hung up under the porch roof on wires put there for that purpose. The corn was left there all winter and germinated all right when planted. If you have a late variety of corn this practice is all right, but by so doing you get a smaller and earlier corn. I always pick some later when I husk the first week or two. I put a little box on my wagon and when I come to a good ear growing on a good stalk and hanging right, I put it in my box. Some days I get fifty to one hundred ears of the very best corn in the field.

I put my seed upstairs in racks and have the windows open until it is thoroughly dry. The room is warm, as we always have a fire below. Before moving here I lived on a rented farm and had no seed corn room, so I hung the corn under the porch, as I said before.

The time to pick corn depends largely on how dry your corn is when frost is liable to come and where you put it when it is picked. My experience is that I get the best seed from corn picked in the early husking. By all means do not pick your seed out of the wagon if you want corn of a uniform height of stalk and ear. How can you tell whether it grew four feet from the ground or six? Try to pick ears of a good type, straight rows, deep kernels, good color, good tip and butt. These are hard to find, but they are the kind to raise. I would like to hear from others on this subject.

ADDITIONAL FIELD NOTES.

A SNAP IN SCOTCH AND SCOTCH-TOPPED SHORT-HORNS.

On account of the severe drought in the vicinity of Unionville, Mo., Mr. A. C. Berry, of Unionville, Mo., is offering thirty head of pure Scotch and Scotch-topped Short-horns at a price that should move them quick. The helpers are by Imp. Mutineer and out of Mr. Berry's best cows. In addition to the thirty head of females Mr. Berry is offering eight pure Scotch bulls and nine Scotch-topped fellows. Here is an opportunity for some man who has the feed to step in and get a herd of cattle that will do him good from the start. The families represented are Secret, Victoria, Brawith Bud, Duchess of Gloster, Lancaster and Imp. Laura tribes. When buying, Mr. Berry has always bought the best blood to be had. Several of the cows are from imported stock; others are close descendants of stock that has done much for the Short-horn interests of the country. In last week's issue we gave the breeding of the bull, Imp. Mutineer, that heads Mr. Berry's herd. Several of the bidders are daughters of this bull and the young bulls are all by him. The cows are all in calf to his service or have young calves at foot by him. A representative of this paper has seen Mr. Berry's herd on several occasions and we do not hesitate to say that it is a working herd and a herd that will be found worthy of consideration by those who want Short-horns that are bred right and that are good producers. If any of our readers are in the market for Short-horns it will pay them to investigate this proposition now, as Mr. Berry is ready to sell and will make such a price on the entire lot as should move them at once. See page 28 for advertisement and if interested write Mr. Berry at once, mentioning this paper.

BAXTER'S DUROC SALE—LAST CALL.

Breeders who attended the Illinois State Fair this year will agree with the writer representing this paper that it is seldom that as strong a class of aged boars appears at any show. Among the number was Buddy K. IV., owned by Mr. Ed A. Baxter, of Pawnee, Ill. In 1905 at the Illinois State Fair Buddy K. IV. stood first in class and was champion. In 1906 at the same show he stood second in aged class and had improved much over the previous year. Buddy K. IV. weighed 1,035 pounds, was as smooth as an apple and stands on the best of feet and legs. He has a back that is equaled by few boars, and is in that respect beaten by none. Mr. Baxter has included in his fall sale, which will be held on Thursday, November 1st, about thirty fall and spring pigs of both sexes, sired by this noted boar. We wish to call attention this week to some of these in order that the readers of this paper may have a definite idea as to this noted offering. A two-year-old sow by Buddy K. IV. is My Choice 103800. She is sold for no fault, simply to make the offering attractive. She has raised two fine litters of pigs, nine in each litter, and Mr. Baxter has put it right when he says, "This sow will make more money in one year than four \$50 cows for the owner." A very fine yearling sow is Lady Cross. She was sired by Gem's Top Notcher, a grandson of Top Notcher. This sow raised a litter of seven nice pigs out of nine farrowed during the month of March. A yearling sow that will attract attention in any company is Trone's Best. She was sired by Milton Orion, bred by the World's Fair winner, Orion, Ill., now at the head of Mr. Ira Jackson's herd. The dam was Ohio Belle by Ohio Chief. The blood lines show a combination of Orion II and Ohio Chief blood, the kind that produces the winners. Three fall yearlings that will attract attention are found in Nos. 10, 11 and 12. They are sired by Buddy K. IV. and are out of Sanborn Red by Waneta Hub #215, one of Mr. Baxter's best brood sows. Two October yearlings are included by Buddy K. IV. and out of Ohio Girl. One that is particularly attractive is by Buddy K. IV. and out of Lady Krash 71210 by Prosperity Bill. This fall sow is unusually lengthy and yet has a very fine back and loin. Buddy K. IV. fall boars are very scarce, but Mr. Baxter has included two very fine ones, Nos. 24, and 26. A litter brother went to Mr. Stevens, of Maynard, Minn., at a very good figure, and Mr. Maynard was well pleased with his

purchase. Two boars by Golden Echo and out of Helen Blazes IV., litter sister to Helen Blazes III., the \$1,000 sow owned by Mr. Roach, are included in this offering. They are very good boars, fit to head some good herd. Two boars and a sow that are sure to please some good breeder are by Buddy K. IV. and out of Tip Top Notcher Baby 71202, she by the grand champion boar, Tip Top Notcher. These pigs are as good as their pedigrees, and no better one was ever written. Some breeder who is in the market for a herd header should not overlook these two boars. Plan to be present sale day. Bids sent to Mr. D. M. Pierce, representing this paper, will be properly handled. Write for catalogs as per the advertisement on page 33, mentioning The Homestead.

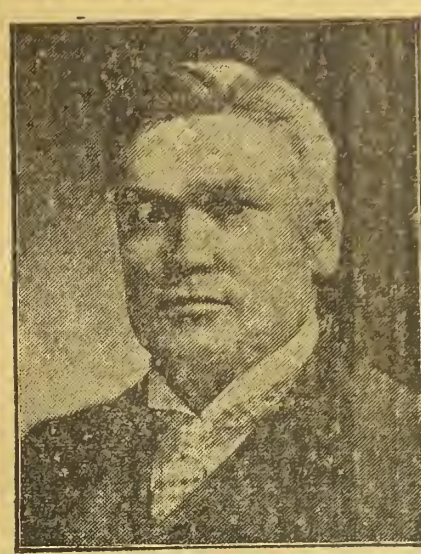

MCCNEIL BROS.' DUROC SALE.

When Messrs. McNeil Bros., of Bowen, Ill., bought Hanley at \$310, and later refused \$1,250 for him, there was much curiosity on the part of the breeders as to whether or not the investment paid. Messrs. McNeil Bros. know that the investment was a good one, for the crop of pigs sired by this boar are equally as good, if not better, than the majority of pigs the same age. The writer has seen many Hanley pigs and has for the first time to see a poor one. The offering is liberally sprinkled with the breeding of this great boar. One of the attractions of the sale is a May yearling boar, Kruger Boy, by Kruger, Mr. Ira Jackson's great breeding boar, and a prize winner at the World's Fair. This boar should go to head some good herd. Four boars by Hanley of March farrow, two out of Armide Demish 41928 and two out of Maple Grove Queen, will suit the buyer looking for a herd boar. Two March 17th boars by Tip Top Notcher and out of Golden Hatty by Major R. and a February boar by Tip Top Notcher furnish boars that will please anyone. The April boars by Big I Am and out of Bella Hanley by None Such are strictly herd headers of the right sort. The gilts in the sale are equally as good as the boars. Three litter sisters to boars first mentioned above are very fine. Three January gilts by The Great Conqueror and out of Florence Nightingale II. by Denver will please breeders present sale day. Four fall gilts of September farrow should not be overlooked, as they will do well in any company. Four April yearling gilts by The Great Conqueror should go to good herds. There are a number of spring and fall yearlings that are looking very fine and will do well for the parties buying them. Plan to attend this sale and secure something well bred and of good individuality that will make you money. Send bids to Mr. D. M. Pierce, representing The Homestead, if unable to be present sale day. The announcement appears on page 33 of this issue. Write for catalog.

KRASCHER'S DUROC SALE—LAST CALL.

The uniformity, quality and breeding of the Duroc Jersey offering of Messrs. Fred Krascher & Son immediately attracts the attention of breeders who are in the market for good stock. The prize winnings to the credit of this herd have not been made in slow competition, but in as strong shows as the breed produces. This week we wish to call attention to some of the more noted individuals of the offering, but before doing so we wish to call attention to the stock bred by Messrs. Krascher. They bred Buddy K. IV., the first and champion boar at 1905 Illinois State Fair, and second prize aged boar this year, being defeated by Commodore, one of the greatest show hogs the breed has ever known. There are a number of very good herds throughout the middle West whose herd headers were bred by Messrs. Krascher. History repeats itself. Who knows but that in the 1906 sale some boar will become the champion at Illinois State Fair in 1907? The females are equally as good. They are of the breed type and combine quality and size. A March 9th litter by Mayor Jr., first-prize boar of 1905, and out of Buddy T. Belle, she by Buddy T., the sire of Buddy K. IV., consists of four sows and

HAVE YOU CATARRH?

DR. T. F. WILLIAMS

gives me strength. My stomach no longer bothers me and that blessed inhaler. It is certainly wonderful. Why, it relieved me just as soon as I began to use it, and it was scarcely any time until there was no sign of catarrh in my head. And you know I was in a terrible shape. That awful smell has left me altogether. I am now in splendid health, and am glad to say I need no more medicine. I don't think there is any other kind of catarrh cure as good as yours as there is 50 different kinds, if one. You are welcome to use my testimonial whenever, or wherever you want to. I feel as though you have saved my life and shall be very grateful to you.

I wish you continued success.

Name.....

Address.....

a boar, and he is a handsome fellow, too. Buddy T. Belle won third in class at Iowa, 1905. This litter is a very good one. A boar and sow by Buddy T.'s Best 42431, the 500-pound yearling at the head of the well-known herd of Messrs. L. W. Cross & Son, of Mason City, Ill., will please the buyer who is looking for a good, strong pig. A March 13th boar by Gold Cloud and out of Esther K. II. by Buddy T. is a fine one, and well enough bred for any one. His sire was a champion at Illinois State Fair in 1904 and his dam is a half-sister to Buddy K. IV. A litter of April pigs by Gold Cloud and out of Prosperity Bella is an attractive one. This litter are full brothers and sisters to Gold Standard, the third-prize junior yearling at 1906 Illinois State Fair. A full brother to the second-prize boar pig at Illinois State Fair, 1905, and one of very fine make up is found in No. 13. A litter brother is also found in the sale. A boar and two gilts by Top Notcher Chief, he by Top Notcher Again and out of Queen Advancer by Ad-

vance is one of unusual merit and the boar will do to head some extra good herd. A sow, Perfection Belle by Allison Jr. Perfection and out of Lady Belle 70864 by Gold Chief, the sire of Gold Cloud, sells with litter of thirteen by Mayor Jr. Here is an opportunity for some breeder to start in the Duroc business at a reasonable figure. Two boars and a sow pig of April farrow are by Hanley, the noted boar at the head of Messrs. McNeil Bros.' herd. This litter is a very fine one and breeders should not overlook the boars included in it. Three Tip Top Notcher boars out of Fancy Gold Dust, she by Mayor R., will please discriminating buyers. A litter of March pigs by Gold Standard, the third-prize junior yearling boar at 1905 Illinois State Fair, are good ones. We have briefly called attention to some of the stock consigned. Messrs. Krascher deserve a good sale and breeders will know that there is an offering seldom equaled and never beaten. Bids sent to Mr. D. M. Pierce, representing this paper, will be carefully handled. Write for catalog at once, kindly mentioning The Homestead.

THE S. E. PRATHER COMPANY'S SHORT-HORN DISPERSION.

Riverdale herd of Short-horns, one of the oldest and best herds in America, is to be dispersed. This action has been brought about on account of a dissolution of a partnership. Mr. S. E. Prather, the senior member of the firm, has been breeding Short-horns since 1873. The record made by Riverdale herd in the prominent shows is a successful one and reflects credit upon the judgment of Mr. Prather in his selection of breeding stock. As good bulls as the breed affords have been used. At the present time there is in service at Riverdale one of the best Scotch bulls in America, Imp. Highland Champion. He goes into the sale to be held at the state fair grounds at Springfield, Ill., on Monday, November 5th. Highland Champion is considered by competent judges to be the best son of Lovat Champion, a bull used at Mr. Duthie's herd for several seasons, later sold to Mr. Andrew Chrystal of Marshall, Mich., and by him sold to head the Walnut Hill herd of Short-horns, owned by the Flynn Farm Company, of Des Moines, Iowa. Highland Champion is a bull of great substance, thick fleshed, solid red, very blocky and a splendid breeder. He has been a wonderfully good breeder and stands today as one of America's best Scotch bulls. A yearling Scotch bull which has been used at Riverdale is Pride of Riverdale. He was got by Imp. Pride of the Realm, one of the best Scotch bulls ever brought to this country. The dam of this good young bull is Sybil by Imp. Banker, a bull used by Mr. C. C. Norton, of Corning, Iowa, with much success. Pride of Riverdale belongs to the famous Secret family which have produced some of the best Short-horn cattle. Such bulls as Highland Champion and Pride of Riverdale are seldom, if ever, for sale at public auction, but it is a necessity in this case, as the closing out of the partnership makes it necessary to sell the cattle. The female portion is equally as strong. They were selected with a view to permanency. In fact the foundation stock was selected from the very best herds and comprises as richly-bred a lot as is found anywhere. Many of them are extra good milkers. In our next issue we will have more to say regarding this grand, good offering. Catalogs will be sent to all who write for sale as per the announcement on page 28 of this issue. Kindly mention The Homestead when writing

OUT-WEARS TWO PAIRS

If our boot does not outwear two pairs of the best quality rubber boots we will refund your money. The

Rubberhide Boot

has best reinforced rubber upper; heavy out sole of best leather; inner sole of leather, with rubber welt sole between.

All joined together so securely that a team of horses can't pull them apart.

They are sewed, not pegged or nailed, and they simply cannot leak.

The heavy leather sole protects the foot from uneven surfaces, and makes the boot warmer in cold weather.

The leather inner sole prevents excessive perspiration.

Any cobbler can resole them; they can be hob-nailed if you like.

It is the most durable, comfortable and economical rubber boot ever made.

Will You Try a Pair?

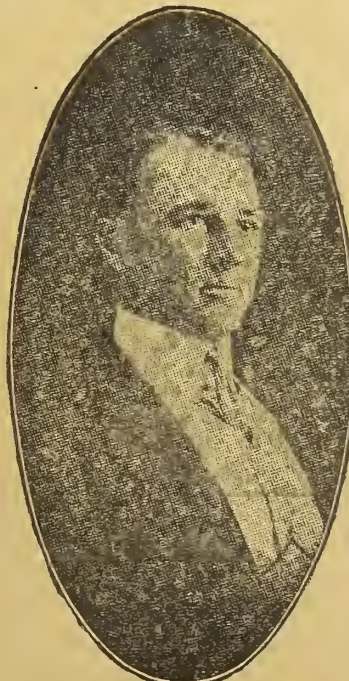

If your dealer handles the Rubberhide, he will refund your money if it does not outwear two pairs of the best rubber boots of other makes.

If he hasn't them, send direct to us for a pair on this guaranty. We pay express charges. Catalogue free.

Rubberhide Co., 812 Essex Bldg., Boston, Mass.

A. A. McNEIL.

H. C. McNEIL.

We take pleasure in presenting to our readers fair likenesses of Messrs. McNeil Bros., of Bowen, Ill., breeders of Duroc Jerseys. These gentlemen have been liberal purchasers of the best stock offered for sale during the past season. They are the owners of the noted breeding and show yard winner, Hanley. An extra good lot of pigs by this boar will be offered for sale on Tuesday, October 30th at their breeding farm at Bowen, Ill. Plan to be present.

Echoes From a Kansas Farm

By Henry Hatch

Right now the farmer is "dear to the heart" of the politician.

One dreaded job remains to be done on this farm before many weeks, that of digging potatoes.

Most every farmer has had to mow his potato patch this year, and some patches need mowing again. Soil that will grow such weeds will grow big crops, with the weeds kept down.

The harvest this year has been greater than the work of planting, and there was not help enough to do all the planting in time. A few more prosperous years and there will be no one to work out by the month.

Just now we are hauling home our winter's supply of coal. Four loads will be sufficient, unless we have one of those "old-fashioned winters." Four hundred miles further north it took twice that much. The saving of fuel is one of the beauties of the Kansas winter.

The first prophecy of a hard winter came in a daily paper, yesterday. It pointed out that squirrels have been putting up a large supply of nuts, that the corn shucks are thick and the bees have swarmed little but made much honey.

is worth little more than the price of the hide. Many farmers have this class of stuff to sell every year, but this year it is about like giving it away.

Once in awhile some behind-the-times man tries to make it appear that he can put fodder in the shoe cheaper with a knife than with a corn binder. Saying that it can be done and doing it are quite different things. Day before yesterday we cut our kafir corn. Three men to shoe and one man and two teams with the corn binder put up more fodder, and it was bound, too, than twice that many men could have put up by using a corn knife. It must be remembered that there was a time when people doubted the grain binder, and thought cradling was the cheapest and best.

Outrageously high prices are being asked for ordinary weaned colts, but it is noticed that few sell. It is now possible for a man to ask another from \$60 to \$80 for a six-months colt, without holding the breath. We know of only one man who has sold for such a price, but they all want it. It is strange how one sale will fix the price for miles around. They will say, "Mr. So-and-so got \$70 for his colt, and I ought to have as much." As an investment, horses must be too high in price.

Great is cement. In a few years we predict that tons of it will be used where pounds now are. Kansas is making the

David Harum, the first-prize Shetland stallion at World's Fair, 1904. A number of his get are included in the forthcoming sale of Mr. George A. Heyl, at Washington, Ill., on Wednesday, November 7th.

Could anything else be named that has no effect on the weather?

The soil has everything to do with corn husks growing thick or thin. We have a field that is partly creek bottom and partly hill land. Along this creek the husks are always thick; on the hill they are thin. Does this mean that it will be colder along the creek than on the hill? It is naturally the other way, or appears so to us when husking corn.

The Washington agricultural department has it that nearly a billion dollars of farm products were shipped from our shores during the past year. Now, the question with most of us is, did we get our share? Or, did the army of middlemen, who handle the products of the farm at every turn, get as much for their work as we did for all the grain?

Some of the cattlemen are wondering what has become of the ease against the packers. The way we understand it, the whole charge against them was knocked out by the decision of one judge. Whether the judge was right or wrong, this is an indication of the power that one judge has in causing costly delay. There seems to be too many steps to climb before a case can be finally decided, and each step costs a wad of money. Then, too, a case may be kept on the move from upper to lower court, and vice versa.

There is one thing about the beef investigation business that is plainly evident, however, and the outcome of it is of great injury to the cattlemen, instead of being a help. There is now almost no sale for only prime beef cattle. Everything that has heretofore gone into cans

best there is in the world, and we are finding, every week, how it may be used to take the place of the almost worthless lumber now being sold. The best of the hard pine lumber sold now will last little longer than ten years; cement will last forever. Several men are talking of building barns of cement blocks. Cement fence posts will probably be the only kind for a permanent fence in the course of ten years.

IN THE GREAT SOUTHWEST.

While many of us have been led to believe that honey comb is manufactured, filled by machinery and sold as the genuine article, the presence of such on the market is contradicted by a long-standing offer of \$1,000, backed by \$300,000 capital for a man who could possibly imitate the real product. The reward is still unclaimed. While strained or extracted honey may often be adulterated, it does not necessarily signify that it is always so, as the apiculturist makes a considerable saving by using the comb again and again.

Considerable agitation is being aroused over the high grain rates for shipping in Oklahoma. It is stated that export rates on corn and wheat are higher in this state than outside in any direction. The export rate from Ryan to Galveston, 330 miles, is fifteen cents, while from Lawton, sixty miles farther, the rate is twenty-eight cents. From Waurika the rate is sixteen cents and from El Reno, 100 miles farther, the rate is nearly double. The increase is maintained all along the line to Kansas, where it drops two cents, though the distance is 100 miles

Simpson - Eddystone Black & Whites

Surprising what beautiful dresses can be made from these economical fabrics. Their fadeless color, durable material and artistic designs have given them the reputation "Prints of Quality."

farther. These are the original rates when the territory was first opened and railroads have not seen fit to reduce them.

Joseph H. Glidden, the inventor of barbed wire, recently died at DeKalb, Ill., at the age of ninety-three. His first idea was obtained from a county fair exhibit where a man had driven nails through a block which he stapled to smooth wire. Glidden improved this idea, and the barbed wire of today is the outcome.

Doniphan county, Kansas, has had an exceptional crop of clover seed this season. Reports put the yield of seed from two to five bushels per acre, which at \$6 per bushel makes easy money.

One day last week Kansas City was crowded with homeseekers going west. Four extra trains besides extra equipment on regular trains were required to move the aggregation on to their new homes.

Many of the noted polo ponies that are becoming so popular in this country for sport are grown in Oklahoma on what is known as the 101 Ranch. Much time is devoted to their breeding and training, which is well repaid in the good prices they bring.

Eight counties of southwestern Kansas—Finney, Ford, Meade, Pawnee, Ste-

vens, Grant, Haskell and Wichita—are represented in the advertising ear that has been gotten up by commercial and industrial organizations. Everything from broom corn to mammoth squashes is on exhibition and the ear expects to be on the road for a couple of months, touring all over the country.

Blain Makes Good Average.

The John Blain offering of Poland Chinas sold on October 17th made an average of almost \$54 on fifty-six head. The same class of Poland was sold as in past sales and the same number of buyers were in attendance. The bidding was brisk from the start and every man at the ring side was bidding. Breeders were represented from Iowa, Illinois, Kansas, Missouri and Nebraska. The top price of the sale was paid for No. 25 in catalog, a boar that was recognized as the best in the sale. He was taken by the ambitious breeder, Mr. John Triggs, of Dawson, Neb., for the sum of \$190. No. 10 went to Mr. E. Story, of Kewanee, Ill., for \$170. The offering was a very growthy one and was very much in demand. Below we give list of sales of \$50 or over:

No.	Name	Price
1	F. Davis, Holbrook, Neb.	\$66
3	F. R. Barrett, Cadams, Neb.	52

POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

CHICKEN-POX, "SOREHEAD," ROUP.

Avian pathologists have pleased to group these diseases because of the kindred nature and the similarity of lesions. Dr. Cary, of Alabama, claims that there are no positive differences between the various forms of diphtheria, roup and chicken-pox or 'sorehead,' other than the locality in which the lesions occur; and possibly the per cent of mortality in the different forms of the disease. Usually when the mouth, throat, air passages or alimentary canal in one or more places is peculiarly inflamed so that an organized or solid exudate is formed on the surface of the inflamed mucous membrane and that membrane bleeds rather freely when the diphtherietic exudate is torn away—such a disease is called diphtheria. If the nasal cavities connected therewith have their membrane inflamed producing a catarrhal exudate, or solid, dried, pus-like exudate in the nasal cavities and sometimes pushing outward the tissues around the eyes such a diseased condition is called roup. If the skin of the wattles, comb, ear lobes, eyelids or of the head and sometimes the membrane lining the eyelids, become inflamed in such a way as to produce crusts or scabs or an exudate of dried pus—such a condition is called chicken-pox.

In a bulletin from the Alabama Experiment Station we are apprised of the existence of this disease in nearly every county of that state during the summer and fall, and it is found more prevalent among chickens from broilers to maturity, although younger chickens sometimes have it. It is a common poultry disease there, and more deaths occur from what is there known as "sorehead"

(chicken-pox) than from any other poultry disease known in the state.

Inoculation tests at this station prove that in about twenty-five days after inoculation, well-developed cases of sorehead appear on hitherto healthy fowls. In some instances the chicks died in a very short time after the inoculation, the severity of it varying as different parts of the body were inoculated. Experiments lead to the opinion that mosquitoes carry this disease and that they are instrumental in its dissemination. It is infectious and not only mosquitoes, but gnats, flies, mites, lice and other parasites may carry it and disseminate it.

Iodoform, creolin, lysol, creosote, carbolic acid, permanganate of potash, chlorid of lime, nitrate of silver and other drugs were tried in treating this disease and the experimenter says he has found no one drug that has given as good satisfaction as iodoform.

ENTERITIS.

What is the matter with my chickens? They have been dying for several weeks. They sit around with their eyes closed and refuse to eat. Some will drink a little after they get sick and some will not drink at all. They were very lousy when I bought them, but I have fought them until there are no lice now. They have had bowel trouble, their droppings being green and yellow. Some live only a few days after taking sick and others will live ten days. J. M. C.

Oskaloosa, Iowa.

The symptoms given are those of enteritis which bears the same relation to diarrhea that roup does to catarrh. It is a severe diarrhea aggravated, if not caused by improper feeding, violent purgatives, foreign substances, poisons, or it may follow a mild attack of diarrhea. It is not infectious. When a large number are troubled with enteritis it is because all have been exposed to the same causes. It may be caused by feeding too stimulating food, poisonous vegetable or mineral matter, a large number of worms in the intestines, eating Paris green and unslacked lime. Drinking water from old paint cans and other poisonous vessels will cause this trouble. Treatment lies in removing the cause. Giving castor oil to sick birds will be found beneficial. Feeding boiled milk or rice water to those that will eat may help. Feed no solid food for some time after treatment begins.

ONE EYE SWELLS.

My hens seem to have a disease that affects only one eye. It swells shut and the other is not affected in any way. The sight is lost entirely, but one hen had other sores on her body and head. What is the trouble? A Subscriber. Wiroqua, Wis.

It has been claimed that when only one eye is affected that it is due to a fowl roosting so that wind from an opening blows on her from the side affected and a mild form of roup or cold causes the trouble, which, if allowed to become chronic, means the loss of the eye. Sometimes sorehead will affect them in the peculiar manner as stated, which is closely allied to roup. Remove cause if possible. The eye is a delicate organ and yields slowly to ordinary treatment. Washing with sugar of lead is about all that can be done.

CONFINEMENT FOR LAYING HENS.

It has been conclusively proven that hens lay more eggs when kept yarded than when allowed to roam over a large acreage. It is also safe to say they have to be fed on more costly feed than when they have a free range, to say nothing of the time and labor devoted to their care. It will require more expensive fencing and house room and it is safe to conclude that there are losses among hens that become debilitated and unhealthy on account of the confinement than when they run at large. It remains for one to select which practice he will follow. If he is an egg producer and sells eggs at a good price and can make it pay even under the increased cost of production and the consequential loss, he is the man to carry on that business. Where such conditions do not rule it is safe to say that chickens should have a free range.

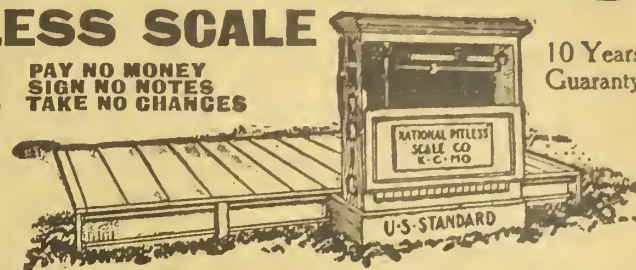

Hartwick Aberdeen Angus Sale.

At the combination sale of Aberdeen Angus cattle held on the farm of Mr. M. D. Korn, near Hartwick, Iowa, October 19th, a fair crowd gathered to do honor to this occasion. The day was perfect and all conditions had been carefully observed preparatory to a successful sale. The cattle as a whole were in good fair breeding fix, neither

From
FactoryMy One Profit Plan Saves You
From \$30 to \$50.

If you would rather keep \$30 or \$50 in your own pocket than to hand it over to some dealer, I will show you how to do it—

And still get the scale you want. I make the Knodig Pitless Scale and sell it direct from my factory to the user.

Nobody else is making so good a scale at so low a price—or a better scale at any price—Nobody is selling on such liberal terms.

And my big illustrated catalog explains why.

You simply can't afford to buy a scale until you know all about my proposition.

Send for my "Knodig" book and examine the brand new Models A. and B. with Protected Bearings.

Ready for instant use when you want them.

No ice or snow to cut away from the bearings in winter—no dirt or dust to clean out in mild weather.

Nothing to interfere at any time with the absolutely accurate and sensitive weighing feature of the "Knodig" Protected Bearings.

Fully covered by patents. Sold only direct from factory at lowest factory prices.

Costs half the price of a pit scale and has no expensive pit with rotting timbers, rusting parts and big repair bills.

H. C. Gumbel
The Man Who Stands
Back of the "Knodig"
Pitless Scale.

Can be moved anywhere on your land wherever the work happens to be.

Absolutely accurate because tested according to U. S. Standard of weights.

Why not deal direct with me and save all that profit that is added on for Agents, Salesmen, Jobbers and Dealers?

That \$30 or \$50 you pay the dealer doesn't make the scale any better.

I am willing to PROVE that the Knodig Pitless is the scale you want.

I will send a set to you or to any responsible Farmer, Stockman, Elevator Man, or Grain Dealer on a month's free trial.

You have nothing to pay until you are satisfied. Don't send me a penny. Simply give the "Knodig" a fair, honest trial at MY risk.

If it doesn't please you, send it back, and I will pay freight BOTH ways. That's fair.

Write to me personally for the new Knodig Pitless Scale Catalogue.

It contains over 40 fine half-tone pictures that will interest you, and is chock full of practical scale wisdom from cover to cover.

too fat nor too thin. The contributors in toto were Messrs. M. D. Korn, C. G. Korn, A. H. Kimball, U. S. Grant, Wm. Dickson and H. H. Reed. While the cattle were a good, useful lot, much of the breeding was of what Angus men term somewhat plain, which perhaps accounts for the fact that these cattle did not sell for more money. Some splendid bargains were in sight on every hand, in fact, the cattle sold generally for considerably less than they were worth. We think, however, that this was due largely to the fact that throughout the eastern half of Iowa there is practically no pasture in sight. The continued dry weather has caused the pastures to be unusually short, and few buyers care to load up their farms at this season of the year with cattle when they must commence at once winter feeding. The absence of the usual fall rains has caused all pastures to be depleted of that wealth of blue grass that is so commonly seen throughout eastern Iowa pastures at this season of the year. The greatest sacrifice in the entire sale was made on the splendid bull, Walnut Dell Proud R., a richly-bred Pride bull, worth \$200 to \$250 at the least calculation. It was the good fortune of Mr. Geo. Stuke, of Luzerne, Iowa, to secure this bull at the bargain counter price of \$145. Only two other bulls of the twelve sold reached the \$100 mark. One hundred and twenty-five dollars was paid for the splendid Blackbird bull, Blackbird Lord, he going to Mr. M. Linebeer, of Hartwick, Iowa. The other exception was the Queen Mother bull, Walnut Grove Quality, eighteen months old, which sold for \$102.50 to Mr. D. Rowland, of Victor, Iowa. Only two females reached the \$100 mark. These were the beautiful Pride cow, Pride of Glendale 24th, which brought \$180, selling to Mr. Harry H. Reed, of Marengo, Iowa, and Rose of Quietdale, selling to Mr. A. W. Brown, of Marengo, Iowa, at \$110. A notable feature of the sale was the fact that the bulls were in much more active demand than the females, the bull sale being quite snappy, with plenty of compe-

tion on all but one or two head. Twelve bulls were sold at an average of slightly under \$100. The average on the entire sale was \$75, which, while not high, furnished some marginal profit to the owner. The same bunch of cattle, under more favorable conditions, should have brought at least \$15 per head more money. Nevertheless, there is nothing discouraging in the results of this sale, as most of these cattle were bred by the sellers.

If you have a ten-year-old son or daughter that is experienced with the team, just read what the Litchfield Mfg. Co. have to say on page 5 about the boys and the girls operating the Litchfield Spreader.

ONE WAY SETTLERS' RATES.

To points in Nebraska, eastern Colorado, Kansas, Missouri, Arkansas, Indian Territory, Oklahoma, Texas and Louisiana, etc., the Iowa Central railway will place on sale on the first and third Tuesdays of each month, November to March, inclusive, one way tickets at extremely low rates for benefit of homeseekers and settlers. Through rate will be only two dollars (\$2.00) higher than half fare. Don't fail to call on Iowa Central agents for full particulars as to rates, etc., or address A. B. Cutts, G. F. & T. A., Minneapolis, Minn.

HOMESEEKERS EXCURSIONS.

The Iowa Central will sell round trip excursion tickets every Tuesday to points in Minnesota, Wisconsin, the Dakotas, Manitoba, Saskatchewan and the Canadian Northwest, and on the first and third Tuesdays of each month to points in the South, Southeast, West and Southwest. Rate one fare plus \$2. Liberal limits and stop-over privileges. For rates and further particulars call on agents or address A. B. Cutts, G. F. & T. A., Minneapolis, Minn.

FOR SALE—Five registered Scotch Collie females, bred or open at snip prices. Address, A. H. Gerot, Riverside, Iowa.

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

PEDIGREES AND REGISTERING SHEEP.

The pedigree of a sheep is a paper showing its lineage. This may give the parentage of the individual sheep or it may go further and give the several generations back. A pedigree is worth no more in truthfulness than the integrity of its owner or breeder. If he is dishonest or crooked it is safe to guess that the pedigree will be of doubtful value.

Most record associations require that all sheep registered trace to imported stock on both sides and all sheep of both sexes must have been registered in that association up to the individual to be registered. Imported sheep may be registered if they are from registered flocks in the country from which they have been imported. In some of the foreign registry associations the males are recorded as individuals and the ewe flocks are registered as flocks and not as individuals. In all American associations ewes are registered just the same as rams. In order to bring sheep to America duty free from the Dominion of Canada, the pedigree or certificate of registry should give at least the grandsire and grand dam of the sheep to be recorded. This is an order of the Treasury department of the United States.

In most associations a sheep breeder can upon recommendation of any other member, become a member by paying \$5 which will entitle him to a share. He has a vote and can get his sheep recorded at one-half the fee charged non-members and each volume of the record will be issued to him free of cost. Most of the associations charge a fee of fifty cents for registering American-bred sheep and one dollar for imported sheep. If they are not registered in the year in which they are born triple fees are charged. Non-members pay twice as much as members. When a sheep is sold to another party the transfer is made on a blank kept for that purpose for which a fee of twenty-five cents is charged.

In some of the associations a pedigree committee is elected or appointed, whose business it is to examine into the merit of all sheep that are recorded (such as-

The Right Way to Grow Hogs

Pigs have sometimes been called "mortgage lifters," and really it seems they deserve the title. What other animal from a beginning of only two pounds can grow to 1,000 pounds weight? And bear in mind statistics prove that it costs less food to grow a pound of pork than either beef or mutton. Do you know why? It is because of the large digestive capacity of the hog.

It is certain that all growth and milk production is in proportion to the amount of food digested and assimilated. The right way to grow hogs, therefore, is to take proper account not only of the feed, but the digestive system.

DR HESS STOCK FOOD

the prescription of Dr. Hess (M.D., D.V.S.) was intended for this purpose in particular. It takes charge of the digestive organs, compelling them to do their proper work.

Horses, cattle, cows, hogs and sheep are all dependent upon the digestion for every pound of growth and every ounce of milk. The cost of Dr. Hess Stock Food is paid back many times over, therefore, no stockman or dairyman can afford to be without it. Besides hastening maturity, Dr. Hess Stock Food cures and prevents disease.

Dr. Hess Stock Food owes its origin to the medical and veterinary colleges from which Dr. Hess graduated. Such medical authorities as Professor Winslow, Professor Finlay Dun, Professor Quittman and all the leading scientists recommend bitter tonics for improving digestion, iron for blood and tissue building, nitrates of soda and potassium for assisting nature in expelling poisonous material from the system. These ingredients and many others make up Dr. Hess Stock Food, and it is sold on a written guarantee.

100 lbs. \$5.00. 25 lb. pail \$1.60 } Except in Canada
Smaller quantities at a slight advance } and extreme
West and South

Where Dr. Hess Stock Food differs in particular is in the dose—it's small and fed but twice a day, which proves it has the most digestive strength to the pound. Our Government recognizes Dr. Hess Stock Food as a medicinal tonic, and this paper is back of the guarantee.

FREE from the 1st to the 10th of Each Month—Dr. Hess (M.D., D.V.S.) will prescribe for your ailing animals. You can have his 96-page Veterinary Book any time for the asking. Mention this paper.

DR. HESS & CLARK, Ashland, Ohio

Also manufacturers of Dr. Hess Poultry Pan-a-c-e-a and Instant Louse Killer.
INSTANT LOUSE KILLER KILLS LICE.

sociations usually not extending over much territory) before they can be recorded. In such associations the sheep have to pass certain stipulations in point of merit, without which there is no recording. This keeps out inferior sheep. Other associations record when purity is assured, resting on the principle that inferior sheep are not found among pure breeds. A breeder can scarcely afford to pay the fees for recording a sheep of doubtful merit, and if he thinks anything of his reputation at all as a breeder he will not even offer such for sale as breeders.

In selling sheep it is usually customary that the seller records a sheep unless it be under one year in which case he provides the purchaser with the names of the sire and dam both of which should be recorded. Some breeders record all the sheep they sell and send the certificate along at time of the sale. By so doing a transfer is avoided.

A breeder of an animal is the one who owns the sire and dam at the time of copulation. Names or numbers may be given sheep. All sheep should have a private record or ear tag for personal use as well as that provided by the record association. This is absolutely necessary so as to be sure of the breeding.

AN OLD TRIK IN A NEW PLACE.

Wool is a product that can be stored a long time without fear of much depreciation in quality or weight. Many sheep raisers have wool lofts in which to store their wool product and others bag it at once and store it in some convenient place where it will be safe. Experiments at the Iowa Experiment Station show that there is but little appreciable change in weights by storing wool. Many different kinds of fleeces were weighed and put in an ordinary wool room and after remaining there for three years there was an actual increase in the weights of some of the fleeces, and but few of them showed any decrease.

For the past two years prices of wool have been more gratifying to wool growers than for some years, and as prices enhance buyers have found a "combine" useful to regulate prices. This feature of trade has been quite common in other commodities. If there is an attempt to corner wool, the best way to meet such a combine is for the growers to store enough so that they can have some say-so as to its selling price.

The wool crop of the United States in 1905 as estimated by the National Association of Wool Manufacturers was 253,488,438 pounds, and it was found also that 67 per cent of this amount was produced in nine states. Now it is possible to organize an association of wool growers in these nine states or in the principal wool-growing states to insure

Now or Never

same fair this year. My Poland Chinas are easy feeders and bulky fellows. For prices write, F. C. THACKABERRY, FAIRVIEW STOCK FARM, TAMPICO, ILL.

the free operation of supply and demand laws.

We suggest, therefore, that sheep breeders and wool growers in the principal wool-growing states organize state associations and that these put themselves in connection with the National Wool Growers' Association and work together for the good of the industry. Much good has come through such association. As a rule we are against combines, but when such formidable combines threaten that can be stopped in no other way, the way to meet them is to play at their own game. There is a bright era ahead of the wool grower if he is not subjected to the dangers we have above outlined which appear to be gaining ground.

BABY COVERED WITH SORES.

Would Scratch and Tear the Flesh Unless Hands Were Tied—"Would Have Died But for Cuticura."

"My little son, when about a year and a half old, began to have sores come out on his face. I had a physician treat him, but the sores grew worse. Then they began to come on his arms, then on other parts of his body, and then one came on his chest, worse than the others. Then I called another physician. Still he grew worse. At the end of about a year and a half of suffering he grew so bad I had to tie his hands in cloths at night to keep him from scratching the sores and tearing the flesh. He got to be a mere skeleton, and was hardly able to walk. My aunt advised me to try Cuticura Soap and Ointment. I sent to the drug store and got a cake of the Soap and a box of the Ointment, and at the end of about two months the sores were all well. He has never had any sores of any kind since. He is now strong and healthy, and I can sincerely say that only for your most wonderful remedies my precious child would have died from those terrible sores. Mrs. Egbert Sheldon, R. F. D. No. 1, Woodville, Conn., April 22, 1905."

HOMESEEKERS' EXCURSIONS.

CHICAGO GREAT WESTERN RAILWAY. On the first and third Tuesdays of each month until November the Chicago Great Western Railway will sell homeseekers' tickets to points in Arkansas, Indian Territory, western Louisiana, Mexico, New Mexico, Oklahoma Territory and Texas at rate of one fare plus two dollars for the round trip, except that a maximum rate of \$23.00 from Des Moines will be in effect to above territory with the exception of Mexico. Stopovers will be allowed in both directions. Limit thirty days, stopovers both ways.

On the first and third Tuesdays of each

Clover Hill Shropshires

"LEADING FLOCK IN MIDDLE WEST." In favor everywhere because of their good size and mutton form, strong constitution, true type and richest breeding. We now offer a typical lot of growthy ram and ewe lambs. Also 150 beautiful yearling ewes bred to 265 to 305 lbs., champions of England and America. Grasp this opportunity to buy the best at prices others will ask for common sheep.

month until November the Chicago Great Western Railway will sell homeseekers' tickets to points in Arizona, Kansas, Missouri, Nebraska, Nevada, Utah, Wyoming, Alabama, Florida, Georgia, Kentucky, eastern Louisiana, Mississippi, North Carolina, Tennessee and Virginia at rate of one fare plus two dollars for round trip. These have limit of twenty-one days to return and allow stopovers on going trip.

On the first and third Tuesdays of each month until November, homeseekers' tickets will be on sale to Denver, Colorado Springs, Pueblo, at rate of \$23.00 from Des Moines and to Ogden and Salt Lake City at rate of \$29.50. Other Colorado points in proportion, all having limit of twenty-one days to return and allowing stopovers on going trip.

To points in Idaho, Montana and Washington homeseekers' tickets on sale the first and third Tuesdays of May, June, September, October and November at rate of one fare plus two dollars for the round trip, tickets having limit of twenty-one days to return.

To points in Minnesota, North Dakota, Manitoba, Saskatchewan and other Canadian provinces, homeseekers' tickets are on sale each Tuesday this year. Have limit of twenty-one days and allow stopovers west of St. Paul.

Full information can be obtained from E. J. Sawyer, C. T. A., 514 Walnut St., Des Moines, Iowa.

Warranted to Give Satisfaction.

Gombault's Caustic Balsam

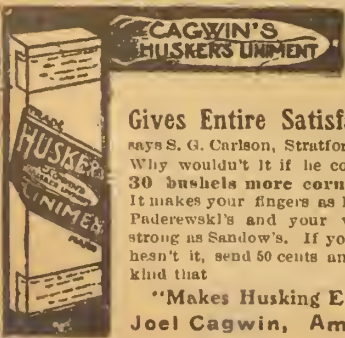

Has Imitators But No Competitors.

A Safe, Speedy and Positive Cure for Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lamenesses from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a Human Remedy for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

The Lawrence-Williams Co., Cleveland, O.

Gives Entire Satisfaction.

says S. G. Carlson, Stratford, Iowa. Why wouldn't it if he could pick 30 bushels more corn a day? It makes your fingers as limber as Paderewski's and your wrists as strong as Sandow's. If your dealer hasn't it, send 50 cents and get the kind that

"Makes Husking Easy."

Joel Cagwin, Ames, Ia.

DAY BY DAY

Agricola

Mr. Fleming, a reader of this paper of southwest Nebraska, writes us that the prairie dog still flourishes in that region. This marmot is certainly very tenacious in his habitat. We are not aware as to whether their presence is harmful or otherwise.

The jack rabbit is also there. This is the largest species of the genus. They have ears worthy of the name. Nevertheless we are not aware whether their hearing is bettered by them.

The jack part of their name was, no doubt, suggested by the big ears of the jackass.

From Wood River, Neb., to the sources of the Yellowstone river was a vast expanse of country in 1865 inhabited by wild animals and equally wild redmen. Now the redmen are among our best citizens, and the buffalo, elk and black-tailed deer are only found in parks.

What a change! And all in less than half a lifetime! The happy homes of civilization fill all the landscape.

Have commenced to crib the corn; gather a load every day. We never had a better crop. It is white corn and is an excellent stand.

The big ears play a fine music as they strike the throwboard. It sings of plenty in the stables and stock yards. We would need kicking every day to pretend to be a farmer and have any-

thing on the lift for want of feed and care.

A farmer who suffers it should be treated himself to the same medicine.

The humane society should get after him.

It will be time presently to lay down the tender grapes, such as the Agawam, and the California variety, which are tender in Iowa. We lay ours down and have grapes which are delicious.

The best of all fruits are generally somewhat tender. The most precious of everything, as a rule, needs the greatest care.

Some people allow their stock to infest their neighbors, from chickens up to hogs, and they pay no attention to requests to prevent.

The man who does this presently loses the respect of his neighbors, who though they speak to him, privately wish him at the North Pole, or in the Sahara desert.

It is exceedingly pleasant to visit with neighbors whom you know are warm friends.

Agricola would not fancy living by the side of a neighbor who had good reason to be offish.

The bluebirds seem loath to leave. We hear them every morning and they seem to be enjoying themselves. They are the earliest in the spring. They winter in southern Missouri and in Arkansas.

It is interesting to note the habits of our wild neighbors. The short-tailed mouse has now his winter stores in his granary. We have noticed, however, that weasels and skunks, as well as the domestic cat, are fond of a diet of these rodents; that is, short-tailed mice.

Near a town boys are hard on the bluejays, robins and other birds. They destroyed a nestful of our young robins in an elm near the house. It would not have been a happiness to them had we caught them at it.

Farming is a science and requires knowledge. Intelligence is absolutely necessary to successful farming.

THE MARKETS.

Chicago, Oct. 20.—Chicago Stock Yards movement of live stock, today's figures estimated:

OTHER MARKETS.

Kansas City, Mo., Oct. 20.—Cattle—Receipts, 900; nominal. Hogs—Receipts, 2,500; steady to 5c lower; top, \$6.32½; bulk, \$6.25 @ 6.30. Sheep—Receipts, none.

National Stock Yards, Ill., Oct. 20.—Cattle—Receipts, 1,500, including 1,100; Texas; steady. Hogs—Receipts, 1,500; 5c lower; top, \$6.40; bulk, \$6.30 @ 6.35. Sheep—Receipts, 500; steady.

South Omaha, Neb., Oct. 20.—Cattle—Receipts, 900; lower. Hogs—Receipts, 4,500; a shade lower; top, \$6.30; bulk, \$6.15 @ 6.20. Sheep—None.

St. Joseph, Mo., Oct. 20.—Cattle—Receipts, 600; steady. Hogs—Receipts, 3,500; steady to strong; top, \$6.35; bulk, \$6.20 @ 6.30. Sheep—Receipts, none.

Sioux City, Iowa, Oct. 20.—Hogs—Receipts, 2,800; steady; top, \$6.20; bulk, \$6.10 @ 6.15. Sheep—Receipts, 100; steady.

CHICAGO MARKETS.

Clay, Robinson & Co. write as follows under date of October 19th:

Receipts of cattle have been very liberal this week, both of rangers and natives; in fact, the five days' run is the largest since the first week of last December. As a result the promising outlook of last week has been somewhat changed. It is evident that the strong tone of the trade last week brought in more cattle than could be absorbed without a drop in prices. While the very best gilt-edge steers are not much lower, the class selling for \$6.50 shows 15c to 25c decline for the week, while those grading between \$4.85 and \$6 have sustained still greater loss. The most notable sale of the week was made by us on Monday for Fred V. Stowe, of Grimes, Iowa, of thirty-one head of 1,561-pound Wyoming-bred Hereford and Red Polled steers at \$7.25, the highest price of the year for fed westerns. These cattle were the third cut out of eight cars of Mr. Stowe's feeding, and in point of quality were not so good as the second cut sold by us a week ago Wednesday at \$7.15. On Monday of this week we also sold for F. Whitehouse, of Grimes, Iowa, thirty-two head of Wyoming-bred Angus steers averaging 1,500 pounds at \$7.25. Considering that the two lots of cattle were branded, thus detracting 15c per cwt. from their selling value, they were really the highest sold cattle of the year. On Wednesday of this week we sold for Wm. Riggs, of Shelburn, Ind., fifteen horned Hereford yearlings averaging 1,102 pounds at \$6.80, the highest sale of the year for yearlings.

With a strong demand for stockers and feeders prices ruled firm to 10c higher. Receipts of butcher stock have been very liberal and while good corn-fed cows and heifers are steady compared with a week ago,

all other grades of butcher stuff are 10c to 15c lower. Bulls have been in good demand at steady prices.

Receipts of hogs have been slightly larger than last week and the market is a trifle lower, top today being \$6.60 with bulk of the good hogs selling at \$5.45 to \$5.55.

The general trend of the sheep and lamb market has been lower this week, especially as regards lambs. The following quotations represent the present market: Fair to choice wethers, \$5.25 to \$5.75; good to choice killing ewes, \$5.40 to \$5.50; choice breeding ewes, \$5.25 to \$5.75; choice yearlings, \$6 to 6.25; fair to choice fat lambs, 7.10 to \$7.60; fair to choice feeding wethers, \$4.90 to \$5.15; feeding ewes, \$4 to \$4.50; fair to choice feeding yearlings, \$5.50 to \$5.75; fair to choice feeding lambs, \$6.25 to \$6.65.

ADVERTISING NOTES.

Mr. H. S. White, of Amelia, Neb., has a ranch of 720 acres which he is offering for sale in his advertisement on page 23 of this issue.

Mr. J. E. Hazlett, of Marion, S. D., has 10,000 acres of South Dakota lands that he is offering for sale in his advertisement on page 23 of this issue.

Mr. Milo J. Owen, of Barton, Vt., is offering a 1,293-acre farm for sale in Lipscomb county, Texas, in his advertisement which appears on page 23 of this issue.

Mr. E. S. Damer, of Beaver City, Neb., is offering Furnas county (Neb.) farms for sale on page 23. They range in size from 240 to 560 acres, and will be sold from \$15 to \$60 per acre.

We wish to call our readers' attention to the advertisement of the Hawkeye Company, of Iowa City, Iowa, who are advertising a loader for hauling corn fodder on page 10 of this issue.

Souvenir postal cards of historic Boston can be procured from the Boston Ledger and Printing Company, 116 Bedford St., Boston, Mass., at attractive prices named in the advertisement on page 5.

For prices on central Nebraska farm lands read the advertisement of Mr. R. G. Cross, of Genoa, Neb., that appears on page 23 of this issue, and write him for further particulars in regard to them.

Mr. Newton Hibbs, of Salmon, Idaho, has a 400-acre irrigated farm for sale, located within two miles of an important city, which he thinks will double in value in two years. The advertisement, from which further information can be obtained, appears on page 23.

The Bazel J. Meek Land Company, of Chillicothe, Mo., have just completed a supplementary and corrected list of the lands they have for sale in Livingston and adjoining counties. This list will be mailed with weather map covering a period of twenty years, to all who write mentioning this paper.

There appears to be a large crop of clover seed in some parts of this state and the weather is so favorable that the seed is being harvested in excellent condition. Owing to a short crop in some other sections it is now bringing a good price and it looks as though it would pay the farmers to sell their surplus this fall. At all events, it will be advisable to send a small sample of your clover or timothy to the Iowa Seed Company, of Des Moines, Iowa, and have them make you an offer.

Nearly every boy and girl reader of this paper is now considering, no doubt, in what way they can earn money with which to tide them over the coming Christmas time. As an aid to each of them in this direction we desire to call their attention to the advertisement that appears on page 7 of this issue of the Chautauqua Chemical Company, of Jamestown, N. Y., who promise to show each one how to make easy money at nice work. If interested, write the company, mentioning this paper.

TWO GOOD FARMS.

In this issue of The Homestead there are two first-class farms advertised for sale by the Allen Investment Company, of Kansas City. These farms are both worth more than the price asked for them, as they are both close to Kansas City and are finely improved, one of them having a barn that cost \$2,500. Did our readers ever stop to think what an advantage it is to own a farm so close to such a grain and stock market as Kansas City? It means a great many dollars profit each month and hundreds of dollars in the course of a year or two. Then on one of these farms the house cost \$16,000. The buyer of such a place will have a comfortable home the rest of his life and have a farm that will make him money

every year. Look up the advertisement on page 23.

FINE FARM FOR SALE.

A good Missouri farm at \$35 an acre is something unusual these days. This is the price of a fine farm which is offered for sale by Mr. J. H. Lipscomb, of Kansas City. This farm contains 640 acres and has fine water, etc. It is only one mile from station. Mr. Lipscomb says it's good and as he is a reliable man we know it is true. Good improvements and only a hundred miles from Kansas City, the great market. Those who are interested in a good farm at a low price should look up this advertisement on page 22 of this issue.

A HIGH-GRADE IOWA FARM FOR SALE.

Mr. S. K. Noland, of Des Moines, Iowa, is offering for sale a fine level farm in Sac county, Iowa. This farm is located close to two churches, school and market, and has the following improvements: A well-built, conveniently-arranged nine-room house, with good stone basement, barn 48x48, hog house 20x40, granary 30x40, corn crib 30x40, tool house 16x24, coal house, cattle sheds and other buildings, etc. There is also a good well, with windmill and tanks. The farm is rented for the year 1907 for two-fifths of the crop, but possession may be had at once by paying the present tenant for the fall plowing he has done and a bonus of \$200. This farm will be sold at a bargain and those interested should write Mr. Noland at once. See advertisement on page 22.

COST OF PRODUCING WHEAT IN THE BIG BEND COUNTRY.

The following estimate of the cost of producing wheat in the famous Big Bend country of eastern Washington is compiled from government reports and the actual price paid for labor, as taken from an article in the Big Bend Chief, of Wilson Creek, Wash., March 16, 1906. It is based on a quarter section of improved land. Government reports show the average yield of wheat in the Big Bend country to be twenty-two bushels per acre: Taxes, \$25; plowing at \$1 per acre, \$160; seed, 107 bushels, 40 pounds per acre, at sixty-five cents per bushel, \$69.55; seeding at thirty-five cents per acre, \$56; harrowing twice at twenty-five cents per acre, \$10; heading at \$1.25 per acre, \$200; sacks, 1,422 at eight cents per sack, \$113.75; thrashing, 3,200 bushels (only twenty bushels per acre) at six cents per bushel, \$192; hauling 1,422 sacks to market, distance of seven miles, figured on a basis of one cent per mile per sack, \$39.55; total expense, \$955.85. Wheat, 3,200 bushels at warehouse at sixty cents, \$1,920; less total expense, \$955.85, leaves a net profit for the year of \$964.15. Lands in cultivation, similar to that upon which the above estimate is made, in this favored section of eastern Washington, are selling at from \$28 to \$32 per acre, according to improvements and distance from market. Based upon the above showing these lands yield a net return at these prices of over 20 per cent, to say nothing of the advantages this locality possesses as a home in the way of climate, etc. Write the Big Bend Land Company, Dept. 1, Wilbur, Wash., af-

ONE LEVER DOES IT ALL ON THE I.H.C.

You would rather operate one lever than to get mixed up with three or four. The I. H. C. Spreader has but one lever—the only spreader of that kind.

This is just one point of superiority over other spreaders. There are others.

No other spreader has a vibrating rake to level the load and bring the manure up square to the cylinder. Everybody knows a spreader works better and gives a more even distribution when the load is level.

Great power is required when a spreader is in operation to run its cylinder, move its apron, level the load, etc. The I. H. C. Spreader gets ample power from both the rear wheels of the wagon.

It not only gets more power but it is surer of its power at any moment. It makes no skips, and it avoids friction, side strains, and consequent breakage.

This same thing helps to secure the light draft for which I. H. C. Spreaders are noted.

Call on the International local agent or write us for catalog.

Send three two cent stamps for a copy of "Farm Science," Book just from the press, written by eight leading agricultural authorities of the United States. Treats practically every farm topic in the most forceful, money-making way.

International Harvester Company of America, Chicago, U. S. A.
(INCORPORATED)

local dealer. Write them it may save a doctor bill. Their advertisement appears on page 11. Please mention this paper when writing.

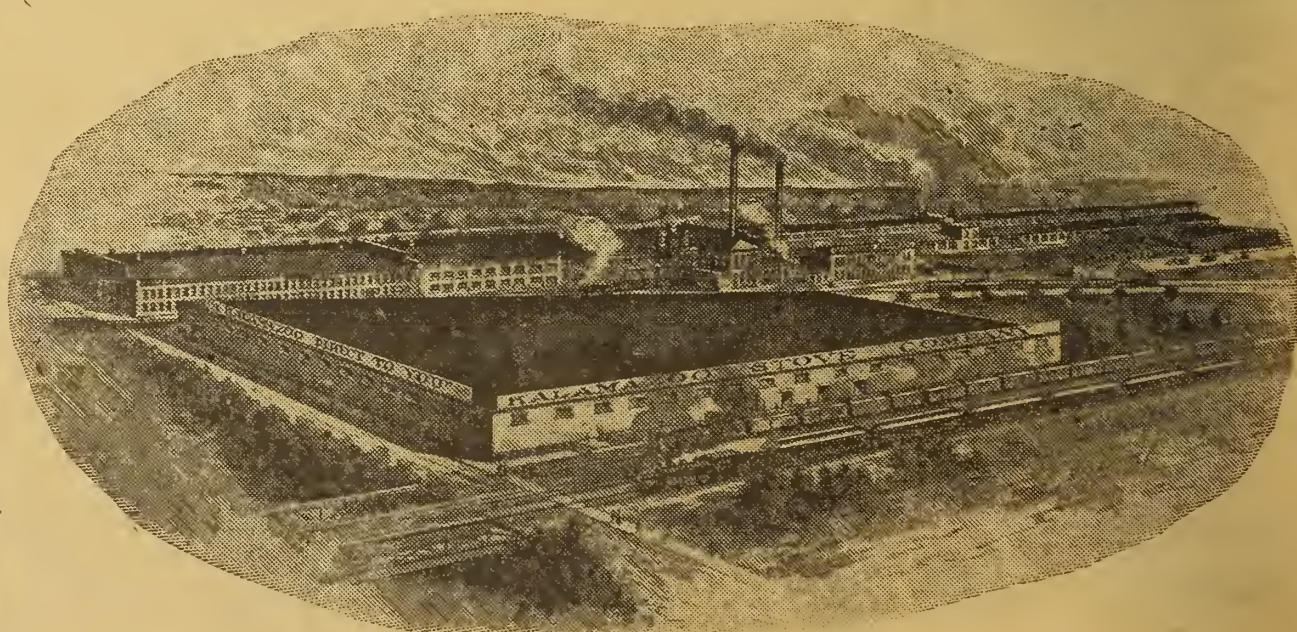

A RELIABLE NURSERY.

There is nothing that adds so much pleasure and enjoyment to farm life as plenty of trees. A large windbreak has come to be one of the necessities of the farm. Orchards and gardens well stocked with a complete variety of all the fruits and berries will contribute much to the health and comfort of the family. Now is the time to look over the orchards and find what trees must be replaced and what varieties should be added to lengthen the fruit season. Nursery stock may be secured from many sources, but it pays well in the long run to buy only of the most reliable firms. If the fruit turns out to be different than what is represented there is a big loss of time with no recourse. For fifty years the Phoenix Nursery Company, of Bloomington, Ill., have been selling goods that have made for them an enviable reputation. They carry only hardy and acclimated stock, including an extensive list of large and small

for booklet and prices, also please say you saw this notice in this paper. See their advertisement on page 18.

THE NEW SUPERIOR FANNING MILL.

A very valuable improvement has been recently made by the J. L. Owens Company, of Minneapolis, Minn., on their Superior fanning mill. The old Superior mill did excellent work, though the aprons interposed between the sieves sometimes gave considerable bother. A new system of sieves has been introduced, doing away entirely with these aprons, and as a result a better and faster separation can be made now than with the old process. With its improvements the New Superior fanning mill has been subjected to the most severe tests that a mill can be put to, and in these tests it has been found to have greater capacity than formerly, while in its grading and cleaning ability it is possibly the most perfect device that human genius can contrive. Those of our readers who are thinking of purchasing a new fanning mill during the next few months should write the J. L. Owens Company, 614 Superior St., S. E. Minneapolis, Minn., asking for full information

THE KALAMAZOO STOVE CO.'S FACTORY.

When you buy a stove—"A Kalamazoo direct to you"—you can be certain of getting the full worth of your money. The above illustration represents the well-equipped foundry and factory of the Kalamazoo Stove Company, at Kalamazoo, Mich. It covers five acres of floor space. Their plan has always been to produce the highest possible quality at the lowest possible price and by this aggressive policy they have developed a most enviable reputation for their goods. Their line is complete and you will be sure to find a pattern that will suit your use and your pocketbook. Their plan of selling direct cuts out much extra expense and makes very attractive terms to the buyer. The company demonstrate beyond a doubt their ability to put out only the very best goods, in their thirty-day trial offer. And still further they guarantee to correct every fault or imperfection that develops in any of their stoves within a year after purchase. They have thousands of satisfied customers on their lists and if your old range or heater is becoming bothersome you can do no better than to send for their 150-page catalog of ranges and heaters. Their advertisement will be found on page 19. When writing please mention this paper.

ter reading their advertisement on page 23, for further information regarding this country of great opportunities.

THE BOOTS OF THE AGE.

If there is anything that creates discomfort to those who are out in the wet and cold it is faulty, leaky foot-wear. If there is anything that gives you the "grumbles" it is to find your boots wearing out in half the time that they should. The firm that can put out boots that will not leak and will at the same time stand the snags and sharp, frozen ground is an exception. But this is just what the Rubberhide Company, of Boston, Mass., guarantee to do. In their Rubberhide boot they have overcome many of the faults of construction in foot-wear. This firm puts the water-shedding material where it is most needed and the wear-resisting material where it strengthens a weak point in boot construction. They will be glad to pay the express charge on a pair if you cannot obtain them at your

fruits, nuts, ornamental trees and green house and decorative plants. All their trees bear a unique red tag as a protection to themselves and their patrons. Their complete fall catalog will be mailed on request. Place your order for catalog early and mention this paper when you write. Address Phoenix Nursery Company, Bloomington, Ill.

FURS FOR WINTER.

Fur garments dispel the dread of winter. With a good fur coat and driving mittens and a fur robe you can ride to town on the coldest winter day with little discomfort. Not everyone can afford to buy such an outfit at the price they are usually retailed. Nearly every farmer has a cow or a horse hide to sell occasionally, and if he only knew it he could have as fine an outfit of winter clothing and robes from such hides as any on the market, and for about half the price. The Globe Tanning & Mfg. Co., Des Moines, Iowa, is just this kind of work. Write them

about the New Superior mill. It may be obtained on trial without the payment of a single cent. See advertisement on page 25.

PAYNE COUNTY, OKLAHOMA.

We desire to call your attention to the advertisement of Messrs. Swope & Co., real estate and loan agents of Stillwater, Okla., on page 23. This firm are the oldest real estate firm in Payne county, Oklahoma. They have been located at Stillwater for the past seventeen years and are thoroughly acquainted with the country, and its values and products grown. They believe that there is no country that offers better inducements to investors, either as a home or for investment. They have been identified with Oklahoma and its early existence and have spent their time and money to build up this portion of the country. They also desire to call your attention to the school facilities. Stillwater is the home of the agricultural and mechanical college and experimental station for the new

They will send you a folder containing facts about this wonderful location, and when you write them, please mention this paper.

CATTLE VERSUS HIDES.

We observe by the circular price list of the Northwestern Hide & Fur Co. just received, that green salted hides are bringing thirteen cents, fresh green, twelve cents, which are the highest prices ever known. We likewise see by looking at the report from various wholesale centers, that cattle are about as low as was ever known. Taking as an example the South St. Paul market, various sales ranging from poor to choice cows and heifers from \$1.50 to \$3.00 per 100 pounds. From this has to be deducted freight and commission. The average will be about two cents on foot. The net results of shipping to other markets would be about the same. Veal calves range from \$2 to \$3.75, average about four cents. That makes a cow hide worth about six times as much per pound as the whole cow and four times as much as the calf. It is not many years past that hides were worth but about twice as much per pound as cattle were on foot. Surely there is something wrong. While it is likely that with the advent of cold weather the prices of hides will decline one or two cents, owing to the increase coming to market, even then they would be five times as high as beef. It is evident that it will pay the farmer far better to slaughter his cattle at home, eat what he can and sell the rest to his neighbors and ship his hides and tallow to market, rather than to ship his cattle or sell to others who do. Besides that he will have the satisfaction of keeping the beef trust from getting most all there is in his cattle.

FARMERS WHO OWN TRACTION ENGINES SHOULD BUY A SAW MILL.

A great opportunity awaits farmers and others who own thrashing outfits and have no work for their engines in winter. By writing the Cedar Rapids Machinery & Supply Co., of Cedar Rapids, Iowa, they can learn that the American Saw Mill can be purchased at small cost, and they are easily operated with the ordinary traction engine, which usually stands idle ten months of the year. With common poor lumber selling at \$12 per 1,000 feet, farmers are now sawing up cotton wood and soft maple trees grown on prairie farms, and many having a natural timber would like to have lumber sawed if they could only find a saw mill. Two or three farmers could find it profitable to club together and buy one of these American Saw Mills and cut up 100,000 feet of building material between corn husking and spring and save \$25 on every thousand that is asked by the lumber trust. Almost any sort of tree will make lumber fit for dimension purposes such as is usually needed on the average farm. The Cedar Rapids people can now furnish these mills on short notice. They also sell the only air-cooled gasoline engine on the market that takes the cool air direct into the cylinder. These engines will run in the coldest weather and no danger of freezing up and bursting the cylinder, as is the case with water-cooled engines. They also sell feed grinders, hay presses, corn shellers, shredders, traction and stationary engines. Write for full information concerning saw mills, etc.

NINE OUT OF TEN PERSONS SHOULD READ THIS.

A straw will show which way the wind blows. The straw is a most insignificant little thing, but it demonstrates a fact which may be of considerable consequence. Every drunkard at one time has taken his first glass of spirits; things of seemingly little importance may develop to large proportions and count for a great deal one way or another. This reasoning applies to many bodily afflictions, among them the very prevalent malady, catarrh. A bad cold is very likely to develop into catarrh, and an incipient case is sure to become chronic unless properly treated. Every reader of this paper who is afflicted with catarrh will find it to his or her interest to read the advertisement in this issue of Dr. T. F. Williams, a Des Moines physician, who is making a specialty of the treatment of this disease. Dr. Williams is successfully treating scores of people every month and every afflicted reader of this paper should investigate his treatment. He is offering one month's free

treatment, absolutely free to prove to you that he can cure catarrh. He certainly would not go to the trouble of sending you a month's free treatment were he not sure that you would be benefited to such an extent that you would continue the treatment and eventually find yourself completely cured. In the advertisement of Dr. Williams will be found a coupon which you can fill out and send to the doctor, and upon receipt of it he will send you at once a month's free treatment. Dr. Williams' address is 218 Crocker Bldg., Des Moines, Iowa. See advertisement on page 11.

"GLIMPSES OF NORTH DAKOTA."

The above is the title of an elegant prospectus richly descriptive of the wonderful agricultural resources of North Dakota. In its half hundred pages are to be found most fascinating reading, which includes sketches of the early history of the region, the early attempts at settlement, and the rapid development of grain and stock farming at first confined to large operators, but now being rapidly taken over into the hands of small farmers from the central and eastern states. According to this prospectus it is a well-to-do class that is settling North Dakota. This insures pleasant neighborhoods and means progression. At present, wonderful progress is being made in all industrial lines. North Dakota has an astounding variety of resources. In the western portion there are vast deposits of coal, and the valuable clays and fine building stone found in several localities insure for the farmer a supply of good building material. Great as are these resources, they compare but feebly with the vast productiveness of the soil. Railroad facilities are unexcelled. North Dakota stands second in the number of miles of railroad that has been built during the past twelve months. The J. B. Streeter, Jr., Company, of Larimore, N. D., are sending out the prospectus referred to. It is an old, established, reliable company. They own some of the best farm land in the state, and are offering bargains on a new-crop payment plan. Their advertisement appears on page 23. It will be worth while to send for their book of farm lands. It is copiously illustrated and is interesting from cover to cover. Apply to J. B. Streeter, Jr., Company, Larimore, N. D. When you write, please mention The Homestead.

WHAT AN IOWA FARMER THINKS OF THE DENNING CANADIAN LAND COMPANY'S LANDS.

The Denning Company is located at Cedar Rapids, Iowa, and are perfectly reliable people in every way. Mr. J. Wm. Denning has farmed in the Yorkton district for seven years and his brother is proprietor of the Denning Fence Company, of Cedar Rapids. Here is what Mr. E. Ellingson, of Norway, Iowa, thinks of Canada after a trip up there this month: We left Cedar Rapids October 8th, arrived at Prof. B. W. Snow's, the Chicago grain expert, on the 11th. Had a splendid trip. I found everything as represented by Mr. J. Wm. Denning, and I talked with many farmers who were thrashing from seventy-five to 125 bushels of the finest oats I ever saw grown. When you see oats that will weigh out from forty-four to forty-six pounds per bushel you can easily see why the yield is so large. Wheat is yielding from forty to forty-eight bushels, and one farmer claimed to have fifty-two bushels to the acre. I compared the sale of the Denning Canadian Land Company's land with other sales from ten to twenty miles south, and in other districts, and found nothing to equal their soil. I saw lots of farm buildings that will compare with Iowa buildings; in fact, I was surprised to meet so many rich farmers. Lots of them own their thrashing outfits. I met two farmers that were building their own elevator in Yorkton; drove to their farms and saw large brick houses and large basement barns; in fact, I saw prosperity everywhere, more than I ever saw in any country before, and I will say I am sure this land the Denning Canadian Land Company is selling at \$16 per acre will be worth from \$50 to \$75 per acre in a very few years. I would advise my friends that want land to investigate this at once. I found the climate something grand; was very warm and still, and lots of sunshine. I was surprised to see the cattle so fat; they look like corn-fed steers. In fact, I was surprised to find such a beautiful rich country and so thickly settled and all happy and contented.

GREAT IS TEXAS.

We take pleasure in announcing the or-

Roofed 12 Years Ago BLACK DIAMOND Ready B Roofing

No other ready roofing can talk about 12-year-old roofs. They can't find them. Most ready roofings are wrecks or patch-works at that age. But Black Diamond instead of making the vague statement "Lasts for years," says "Here are Black Diamond roofs that have lasted 10 years, 15 years, and are still good roofs!"

May be you only want a roof that will last a year or so. Even then you will probably get Black Diamond on account of its *unusually low price*. But if you want a roof that endures, you *must* buy Black Diamond—the roofing with a record. Take a look at that record. It is in our free Booklet in the photographs and stories of old roofs where Black Diamond gave long service and satisfaction. Ask for a Sample at the same time. We will gladly send both free for the asking.

ganization of the Investors & Homeseekers Realty Co., whose advertisement will be seen on page 22 of this paper. This company are a combination of the strong business men, all hustlers, doing a general real estate and immigration business, giving special attention to southern Texas lands. These people claim there is no like region to be found where the lands are so fertile, and the climate and water as good to be had so cheaply. They have examined the lands of practically all the agricultural states in the union and four provinces of Canada and claim that the prices, quality and productiveness are all superior. It is astonishing to the middle west and northern farmers to know there is a belt of country that has been practically neglected, where the land can be purchased from \$8 to \$20 an acre, depending upon the location and distance from the railroad, that will produce as much in one year with another, even without irrigation, as the high-priced lands of the great agricultural states that cannot be purchased for less than \$50 to \$200 per acre. Not only is the quality and fertility of this land superior, but according to the United States Health Commissioner's report, it is one of the healthiest countries on the globe, and has one of the most perfect climates to be found anywhere. It is a country where people engaged in agriculture do not have to burn up and feed all they raise in one six months of the year in the next six months. Practically any crop that can be grown in temperate climates can be grown successfully there. It is said that roses bloom ten months in the year, and people who go there from the north and hustle can raise as much as two crops of corn, or a crop of oats and a crop of corn, and as high as four crops of vegetables, and nine crops of alfalfa have been known to be produced from the same land in the same calendar year. The gentlemen that compose the Investors & Homeseekers Realty Co. are not all Missourians by birth, but are all of the "show you" kind when it comes to proving the merits of Texas land. If any of our readers are desirous of buying lands, either for investment or for a home, we certainly think they will receive fair treatment from the Investors & Homeseekers Realty Co., who have offices at 519-21 Hall Bldg., Kansas City, Mo., or Rooms 10-16 Angelus Hotel Bldg., San Antonio, Texas.

THE KIMBALL ORGAN.

On page 4 of this issue will be found the advertisement of the W. W. Kimball Company, of Chicago. This company is now offering a genuine Kimball organ for a

ilege of testing it thoroughly for a period of one month. If, after that time, it is not up to expectations in every way it may be shipped back to the firm at their expense. There are no chances to take whatever on the purchase of a Kimball organ, because the small payment made in advance will be refunded if the organ does not prove satisfactory. If it suits the purchaser in every way it may then be paid for in instalments running as low as \$2.50 per month. Possibly our readers are not aware of the fact that the great Kimball organ works are the largest in the world. The firm was established in 1857 and its immense business has been built up on the principle that the buyer must always be given value for his money. Their organ catalog will be sent free upon application. Address W. W. Kimball Company, 108 Kimball Hall, Chicago, and mention The Homestead when you write.

J. H. Wintemute's Poland China Sale.

The Poland China sale of Mr. J. H. Wintemute was held at Blockton, Iowa, on October 16th, and resulted satisfactorily to both seller and buyers. The young stuff sired by Junco was keenly appreciated by the buyers on account of good length of body, good feet and strong backs. Mr. J. A. Stephenson, of Mt. Ayr, Iowa, bought the highest-priced sow, No. 47 of the catalog, at \$76, and a sow No. 15 of the catalog at \$58. The following is a list of those selling for \$20 and over:

No.	Name	Price.
1	J. A. Stephenson, Mt. Ayr, Iowa.....	\$100
2	A. L. Wintemute, Conway, Iowa.....	65

Fifty head averaged \$31.02.

F. H. Herring's Sale of Duroc Jerseys.

Mr. F. H. Herring, of Kalona, Iowa, reports that the average price paid at his recent sale of Duroc Jersey swine was \$21 per head. The crowd was not extra large, but nearly all present were breeders and buyers. Messrs. Geo. Herger & Sons, of Vinton, Iowa; F. S. Taylor & Son, of Wellman, Iowa, and H. T. Bird, of Iowa City, Iowa, were the principal bidders and buyers of the fancy lots. Mr. Herring writes: "Forty dollars was the top price and was paid for a gilt out of Nellie's Lady, a full sister to Top Notcher Chief. She would have been considered a bargain by the buyers, Messrs. Herger & Sons, even if they had been obliged to go into three figures to have secured her."

month's free trial. In other words, the buyer of a Kimball organ is given the priv-

Swing over the Snow

NOTHING bothers a farmer more than his gates in snow time. With the IOWA raise your whole gate from the ground. Besides the snow will not drift about the wires. Works as well in winter as in summer. If the wires get loose there is a stretcher on each to tighten it.

The IOWA gate is so simple we can sell it cheap, but being made from Rolled Steel Tubing will last for a lifetime. No wearing parts, simple hinges going clear thru the post, can readily be adjusted to a hog and chicken tight gate. Your stock laughs at wooden gates—why not get some IOWA gates to match your fences?

Cheaper than Wooden Gates, Write at once for our low prices and a dozen reasons why every farmer should have them.

IOWA GATE CO. Ninth Street
CEDAR FALLS, IOWA

Page quality begins in our furnaces. The molten metal is tested until it is found to contain just the proper ingredients to make Page-Wire—high carbon double-strength spring steel wire.

High enough in carbon to give it double the tensile strength of common fence wire and the springiness of a high-grade wire spring. Coiled by the Page process, it lets out and takes up like a spring; makes the fence adaptable to all soil and climatic conditions, and breaks the shock of animals running into it without breaking their necks. Our book is free. Write for it.

PAGE WOVEN WIRE FENCE CO.
Box 774, Adrian, Mich.

COILED SPRING FENCE

Closely Woven. Can not Sag. Every wire and every twist is a brace to all other wires and twists full height of the fence. Horse-high, Bull-strong, Pig-tight. Every rod guaranteed.

30 DAYS FREE TRIAL and sold direct to farmer, freight prepaid, at lowest factory price. Our Catalogue tells how Wire is made—how it is galvanized—why some is good and some is bad. Its brimful of fence facts. You should have this information. Write for it today. Its free.

WITH THE EDITOR.

It is some time since I have read anything which gave me the keen enjoyment which I had from a debate on "The Future of the Home," in the Independent of October 4th. Ever since the publication of "Woman and Economics," Charlotte Perkins Gilman has occupied a conspicuous place among the destructive, constructive writers of the day; Mrs. L. H. Harris is a southerner, and a very pronounced conservative, and while not exactly a woman of the old-fashioned, domestic type who believes that the first, last and only duty of woman is to be a good wife and a good mother, she has a shuddering horror of the new advance.

Mrs. Gilman opens the debate, stating her position in an article which she calls "Home Worship." To this Mrs. Harris replies in an article entitled "The Monstrous Altruism." Mrs. Gilman, having opened the debate, closes it by asking the question "Why Monstrous?"

What Mrs. Harris says, a thousand women could say equally well. She is bright, but not profound. She speaks for the multitude, using the usual stock arguments—with a dash of personal malice. It is necessary to quote her at this time when the object is not to sum up the debate, but to give the reader some idea of the position occupied by those of the modern school who have made a thorough study of sociology in the light of modern progress.

Mrs. Gilman writes so concisely that to summarize is difficult; in order to give her thought in the most forcible manner, it seems wise to make extracts which will cover some of the principal points in her position:

Home Worship—I might have called it family worship, but people would have thought I meant family prayer. It is not worship by the family, but worship of the family, that needs to be examined a bit; that well-nigh universal belief that "a man's first duty is to his family," and that a woman has no other.

Don't ever believe anybody who tells you that "self preservation is the first law of nature." Nature knows better. Race preservation is so wholly the first law of nature that she sacrifices the individual by millions to secure it, and even to improve it. If we study nature's laws with a large and open mind we see three great processes going on: The maintenance of species, the reproduction of species, the improvement of species. When you measure real values in living it is the last and not the first which counts.

At this point Mrs. Gilman traces the evolution of man to the place where the family was represented by "one man as the head, as many women as he could buy or steal, and children proportionate."

Then was the time when man could justly say that his first, i. e., highest, duty was to his family; because no higher form of human relationship had been introduced. There was no state or nation then; no civic duty, no public duty; the family was the top.

That was a long time ago. That poor little baro world, sparsely speckled with families, has given place to our rich world, thickly netted with nations; and at last we begin to see past even that, to the time when humanity will run smoothly all over the earth. We should worship the highest, work for the highest. It is the highest duty that comes first, a man's first duty is to the world—the whole of humanity—and also a woman's.

The goal of humanity is nothing short of universal peace and right living; an organization as wide as the world. Towards this end the widening, strengthening web of social relations steadily extends. Self interest, family interest, tribal interest, national interest all must give way to this world interest.

Self, one's personal, individual interest is at the bottom in our order of human duty. The family is next to self, i. e., next to the bottom. The blood tie is common to us and the animals, but the ties of specialized social relations are humanity's prerogative.

Now suppose we substitute the word world for the word home for a while. Suppose we spread our consciences quite a bit and say: "I am here in the world, a member of the human family. My first duty is to love and serve them, to keep them comfortable and happy and to help them grow." Suppose we had right here in America over fifteen or twenty million mothers awake and alive to their common responsibility, their common duty, their common power. Look at the housecleaning there would be. Imagine these deep, sunken wells of mother love rising, overflowing, meeting and mingling, flooding the world with peace and hope and happiness.

I am conscious that the foregoing gives but a poor idea of Mrs. Gilman's article, but it is all that is possible in the space at my disposal. A few extracts from her reply to Mrs. Harris' charge of "Monstrous Altruism" will perhaps elucidate some points not sufficiently brought out:

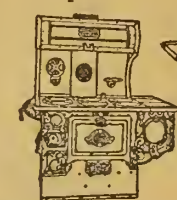

The position taken in my article is that in the order of virtues we should rank social

duty before domestic duty, and that the Christian religion does precisely this, demanding of us the love of the neighbor, the care for "the least of these" as direct service to God. Christ does not ignore or exclude family love and service. Neither do I.

When there is a choice of conduct in which one must decide between serving one's family to society's loss, or serving society to one's family's loss, the duty to society comes first, that is all.

The soldier who serves his country at the cost of his life, to the neglect and injury of his family, is not, therefore, considered a depraved and dissolute character.

The woman who sends her sons to war with her blessing on them is not an unnatural mother. She is simply a mother whose patriotism is stronger than her maternal instinct, as it ought to be. We have had plenty of such men and women practicing the "monstrous altruism" of sacrificing everything in life, including their best beloved, in devotion to certain square miles of land, certain thousands of population, certain groups of institutions and ideas—to a thing called "My Country." The common duty of the citizen, man or woman, in time of war, we all admit; why call it monstrous in time of peace? Love of humanity is the same feeling as patriotism, only larger.

HOME AND HOME MAKING.

LITTLE HELPS BY THE WAY.

'Tis well our hands must still keep toiling on For others' sake. For strength to bear is found in duty done, And he is blest indeed who learns to make The joy of others cure his own heartache.

In serving fellow mortals, We best serve the Father, too, And in lightning their burdens, Ours grow lighter and fall from view.

Each day has its special privileges, as well as its special duties. The morning is a good time for considering in advance the duties. The evening is a good time for considering in retrospect the privileges. "What ought I to do today?" is a good question to start

Gold Watch FREE AND RING

We positively give both a Solid Gold Watch and a Solid Gold Ring, set with a Famous Congo Gem, sparkling with the fiery brilliancy of a \$50 diamond, for sending 20 pieces of business jewelry at 10c each. Order 20 pieces and when sold send us the \$2.00 and we will positively send you the watch and ring; also a chain, Ladies or Gent's style. **ALTON WATCH CO., Dept. 131, Chicago.**

out with. "What have I gained today?" is a good question to wind up with.

WOMAN.

Woman is for soul, for thought, for love, for bewitchment, for romance, for beauty and for man. She is for all time and after time. She is for memory and for hope. She is for dreams beautiful. She is for poetry and art. She is for the fulfillment of the human imagination. She is for the household and her mate. She is for everything that is worth anything. She is for life. She is for faith, for earth and heaven. She is for summer and for winter, for the glory of the world, which would be intolerable without her. She is for delicacy and for daintiness. She is for youth, middle age and old age. She is for the merry hearted and the weary footed. She is the crown of creation, the consummate masterpiece of nature and the very soul of love.

FOR THE LUNCH BASKET.

A sandwich dear to childhood is simply bread, butter and sugar, with a liberal sprinkling of powdered cinnamon. Try this for the school lunch basket. A handful of dates is an excellent addition to the lunch basket; also an envelope full of shelled nuts. Soft dairy cheese now comes in tiny pots costing five cents. One pot should serve for two days' luncheon, the little pots afterward serving to hold jellies and preserves.

AUTUMN BREAKFASTS.

No housekeeper need be at a loss in deciding

what to serve for the early meal, now that the tomato season is here, because they are such universal favorites and find a welcome even when served as the mainstay. I know of no better or more tempting way to prepare a morning dish of them than by broiling them. Cut flat ones in halves, without peeling. Dip each cut side into melted butter, then into fine bread crumbs, dust over with salt and pepper, place in a wire broiler, and broil them directly over a hot fire. When nicely browned on each side, transfer to a hot dish, dropping a piece of butter on each piece prior to setting on the breakfast table. If this dish is properly prepared it is, with toast and coffee, a very palatable and satisfactory fall breakfast.

Tomato toast is another way of serving the seasonable tomato. A quick way is to stew one quart of ripe tomatoes, seasoned with one tablespoonful of sugar and one-half teaspoonful of salt, and pour the tomatoes over graham toast.

FOR THE COOK.

Split Pea Soup—Wash one pint of split peas in cold water and pick out those that float. Soak over night in plenty of cold water. In the morning drain them and cover with a quart of boiling water. Cook until tender. Then add one pint of boiling water and one quart of stock (if you have none on hand you can make it from a few cracked bones and bits of meat fresh or cooked). Press the soup through a sieve; return to the kettle and let boil up once. Season with salt and pepper and serve with croutons.

Baked Beets—After boiling the beets until nearly done, remove the skin, arrange them whole in a baking dish, pour over them a little water, turn frequently, taking care not to break them. When done, serve with a sauce of butter, salt and pepper.

Spoon Bread—For this use cold hominy. To one cupful of hominy add two cupfuls of sweet milk, one teaspoonful of butter, a little salt and two well-beaten eggs. Beat until smooth, turn into a buttered pan and bake brown.

Rice Balls—To one pint of hot boiled rice add a large cup of finely-minced cooked chicken, a well-beaten egg, salt and pepper to taste, and sufficient thick cream sauce to moisten slightly. Mix all smoothly together, and when cold form into small balls, egg and bread crumb them and fry them in deep fat.

AMONG OURSELVES.

I wonder if the circle is waiting with curiosity for discussion on the subject of American-born girls marrying foreign-born men? I hope it is, for the subject is eminently practical, as well as capable of interesting development. It will be opened by our old friend, Mrs. Laura Lewis. She comes Among Ourselves to give that most valuable contribution to such a subject, personal experience:

SHOULD OUR AMERICAN GIRLS MARRY FOREIGNERS?

If they are very, very sure that they love them, and equally sure that their affection is returned, I say, yes, for no man, be he foreign born, or American born, who truly loves his wife, will make a slave of her. I was born and raised less than one-half mile from our present home, while my foreign-born husband first opened his eyes to the light of this world on the little island of Moen, lying south of Denmark. There he lived until he was nine years old, when he came to America. We first met when children, twelve and fourteen years of age. Our childhood friendship strengthened as the years went by until at the ages of twenty-three and twenty-five we became husband and wife, now almost sixteen years ago. Never, for one moment, have we regretted the step taken at that time. I have not been expected to work outdoors, and I have yet my first time to milk a cow since I have been married. I can do it if necessary. I used to help some with the garden when first married, but of late years my hands have become so full that my husband does all the gardening. When the children were all small and it was impossible to get any help in the house my husband has neglected his work in order to help me. In fact, he has helped me more with my work than I have ever helped him. I will not acknowledge being lazy, either. A half mile from here lives a foreign-born man and his American wife; one-half mile farther on

lives another foreign-born husband and American wife. I have known several others, and with one exception they did not expect their wives to do near as much as Mrs. Eugenia enumerates. On the other hand, I know several American-born husbands who lie and snooze in the morning, while their wives get up and build the fires and get the breakfast, and after breakfast these same wives do the milking and also work in the field. Yes, I know them; could call them by name. I have come to the conclusion that it is not so much the country in which a man is born as it is the man himself that makes the difference.

Let us make a note of this conclusion of Mrs. Lewis. It grows so naturally out of her experience that it is true to her, at least. The qualifying cause, an important one, is that America is a huge melting pot in which old metal is recast and restamped.

We have heard a woman; let us now listen to a man, "A Native Born," who looks at the subject from a somewhat unusual point of view:

This is my first attempt and probably the last, and I will state I am native born. We too often forget the true reason why man was created. Were we created to raise hogs, cattle, sheep or goats, build fine houses, make flower gardens, wash dishes, or cook? No. To propagate our own species (or raise children). This, and this only. All of the others are for their nourishment, education and enjoyment. A child born into this world deformed in body or mind is a rebuke to the parents that gave him life. Before we can discuss this matter aright we should agree on what marriage is for. If my diagnosis is right then American girls should marry foreigners or men anywhere they could find them that were sound in mind and body, that had kind and generous hearts and industrious habits. Such husbands would be kind and unselfish and would not expect more of their wives or children than was good for their minds and bodies. The god of wealth has so woven and entwined and instilled itself into American girls that it has driven out some of the nobler and higher ideals of life and left no place for goodness, love and domestic happiness. When a woman marries a man, rich or poor, she has married either a divorce or misery case, or perhaps both. When a man marries a housekeeper or a helper in the field he has driven out all in his life that is worth living for. We have too few noble men and women in this country. The divorce courts are my witnesses to this. Dear girls, let me say this to you, if you find a kind, noble and industrious man (a man is what you should marry), one that is above reproach, one that is obedient to his mother, truthful to his father, affectionate to his sister, noble with his brother, honest with his neighbors and generous with his enemies (if he has any), marry him then and there, even if you are not seventeen or sixteen, for that matter, for that will be the only chance you will get, though a foreigner he may be, and you will never regret it. But one word of caution—council is always good. You may not be a good judge of the creature I have described. You had better get the best council you can. The person least likely to give you poor advice, and the one likely to give you good advice at all times is no other than your mother—the one most interested in your future happiness. If she can find no fault with him you might call in father, sister and brother, and if none of these can find fault against him, foreign born or native born, high or low, rich or poor, learned or unlearned, you will have a good husband.

"A Native Born" is something of a sage. Some of the thoughts he gives us are very good, but he is not altogether a safe guide. The object of marriage is no longer exclusively the propagation of the race, and if girls were to delay marrying until they found men of whom every member of their families approved, most of them would die unmarried.

A man who claims to know the mind of God with regard to women comes to answer the questions propounded by Mrs. Streeter. Men of this class are disappearing with the increase of civilization.

No More Cold Rooms

If you only knew how much comfort can be derived from a PERFECTION Oil Heater—how simple and economical its operation, you would not be without it another day.

You can quickly make warm and cozy any cold room or hallway—no matter in what part of the house. You can heat water, and do many other things with the

PERFECTION Oil Heater

(Equipped with Smokeless Device)

Turn the wick as high or low as you can—there's no danger. Carry heater from room to room. All parts easily cleaned. Gives intense heat without smoke or smell because equipped with smokeless device.

Made in two finishes—nickel and japan. Brass oil fount beautifully embossed. Holds 4 quarts of oil and burns 9 hours. Every heater warranted. If you cannot get heater or information from your dealer, write to nearest agency for descriptive circular.

THE Rayo Lamp cannot be equalled for its bright and steady light, simple construction and absolute safety. Equipped with latest improved burner. Made of brass throughout and nickel plated. An ornament to any room whether library, dining-room, parlor or bedroom. Every lamp warranted. Write to nearest agency if not at your dealer's.

STANDARD OIL COMPANY

The Easy Way

A child of ten can run an O K washer, standing or sitting, and do the work right. It is just simplicity itself. No complicated and expensive parts like machines that squeeze, pound and force water through the clothes. Fly wheel turns either right or left—pin wheel reverses automatically. Clothes are turned back and forth through the hot suds, dirt is dissolved and they are cleaned thoroughly and perfectly and quickly.

O K WASHING

O K washers are sold on their merits alone. We make no "free" offers. So is every other washer sold. Do not be caught by "free" talk. If you don't believe it just try to get one of our machines for nothing. O K sales have increased in six years from \$5 a week to \$50 a day. Sold, mind you, not given away. It's the washing machine people are glad to buy when they know it. And it's sold at a fair price. Our free book explains. Write for it.

H. F. BRAMMER MANUFACTURING CO.
1455 Rockingham Road, Davenport, Iowa.

I bespeak the most careful attention for Mr. R. S., as we may never hear his like again:

Uncle Josh tried to answer Mrs. Ed Streeter's questions and made a failure if I am any judge. She asked plain, blunt questions, and they will have to be answered in a plain, blunt way, which will probably bring a storm of contempt upon anyone answering them. I will try it, anyway, but I don't want her to think that I don't respect women or have any hard feelings toward them. I pity them because they can't see their place any better than they do. As for Uncle Josh, he is blind, too, or maybe he is one of the kind that can see and trim hats, but to the questions: First, Why do men pretend to have contempt for women just because they are women? They don't! It is when women try to be something else that they are held in contempt. Imagine yourself up in a balloon, where you could see all the big cities and factories, and railroads, at one time. See the skyscrapers, the complicated machinery working, the steamboats and trains, and ask who does all that, women? No; men. But you will say women are not expected to do that. Exactly so. We know they can't. It is when they think they can that men hold them in contempt. Then what are they supposed to do? Keep house, cook, be wives, daughters, mothers and sisters. That is what God intended them to do. When you don't do that, not only men, but God himself holds you in contempt. Second, Why do men hate to go to church? I suppose she means married men. Uncle Josh says the young men go to take their girl home. No contempt or religion, either, in that. The reason that the married men don't go is because they don't have to go to be religious. There are lots of useless fads and formalities about going to church. Suppose Mr. Streeter went to church in hob nail shoes, blue overalls, shirt sleeves, with the collar open, slouch hat and heard about ten days old. Honestly, now, wouldn't you growl just about as much as if he did not go at all? Do you suppose God will care how he dressed? He can worship the Lord a good deal better by himself by being among God's works, the fields, grain, and flowers. It is not necessary to be in mock society to worship God. Christ himself would go by himself to pray, and even called

some of the churches a den of thieves, etc. Third, Why do men growl if we want them to clean their shoes when coming in the house, etc.? They growl in answer to your growl. You growl first and they growl back, just like two dogs meeting in the road. Next time he comes in with muddy feet don't say a word, and see if he growls. He built the house to get in out of the weather. In muddy weather he expects the floors to be a little dirty, but you want him to pull off his shoes at the barn and fly to the house. Do you growl if the preacher comes in with muddy feet? Do you keep your towels as clean as the floors? Suppose your husband refused to go out at all when it was muddy for fear of bringing mud in the house. How could you live? And, last, why do they leave their old clothes, shoes, etc., lying around for you to pick up? They don't. Just leave them where we put them. We don't want you to pick them up because it will take lots of precious time to find where you put them. Just let them lie where we drop them. But you are afraid somebody will come in. That has always been a bugbear for women. They have worried half their life away for fear somebody would come in and see something lying on the floor. Be natural, loving and kind. If you can't don't make both lives miserable. Separate and see if you can suit yourself.

Mr. R. S. expected a storm of contempt. As he is intelligent enough to realize that the views he holds are not likely to be welcome in a circle of intelligent men and women, comment is unnecessary. Mrs. Streeter's questions have not yet been answered satisfactorily. I wish a representative, twentieth-century man like Reine's Husband could be induced to give his views frankly.

Letters are oftentimes like windows, through which one sees into the very soul of the writer. Not a man Among Ourselves but will think the husband of Fern a happy man, and the women—but read and see what you think, sisters. In discussing the topic sug-

"A Kalamazoo Direct to You"

Kalamazoo are fuel savers.—
They last a lifetime.—
Economical in all respects.—
They are low in price and high in quality.—
They are easily operated and quickly set up and made ready for business.—
Buy from the actual manufacturer.—
Your money returned if everything is not exactly as represented.—

You keep in your own pocket the dealers' and jobbers' profits when you buy a Kalamazoo.

WE PAY THE FREIGHT.

We want to prove to you that you cannot buy a better stove or range than the Kalamazoo, at any price.

We want to show you how and why you save from 20% to 40% in buying direct from our factory at factory prices. If you think \$5, or \$10, or \$40, worth saving

Send Postal for Catalogue No. 165

Examine our complete line of stoves and ranges for all kinds of fuel. Note the high quality; compare our prices with others, and then decide to buy from actual manufacturers and save all middlemen's profits. Catalog shows 267 styles and sizes for all kinds of fuel. Write now. Sold on 360 Days Approval Test.

Kalamazoo Stove Co., Manufacturers, Kalamazoo, Mich.

All Kalamazoo Cook Stoves and Ranges are fitted with patent oven thermometer which makes baking and roasting easy. All stoves blacked, polished and ready for immediate use when you receive them.

OAK STOVE HEATER, For All Kinds of Fuel.

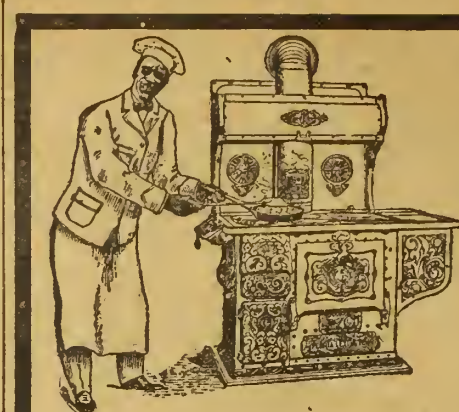

Oven Thermometer

gested by Aunt Ruth, Fern goes to the heart of things in a very beautiful spirit:

So many interesting subjects have come up Among Ourselves lately that I would think each week I must speak, but for want of time have waited to see what others would say. But I did feel so stunned and grieved over Aunt Ruth's letter that I will speak, I do not wish to be unkind, but it really seems strange to me that one who has such ideas of homemaking would care to read our Home Department. I do not refer so much to her opinion about girls and women working outdoors, but to the sentiment in general expressed so clearly, and the way she would have us deal with the brothers, fathers and husbands to make them respect and love us more. But first let me say that Aunt Ruth did not tread on my toes, for, owing to want of time, strength and robust health, I have never worked in the field nor milked a cow. In fact, have not been able to do any of the many things I would have loved at times to do to help my husband. But for his comfort I could be thoughtful. Is he not supposed to get tired when working from five in the morning until eight at night all through the busy, hot summer? I

do not think it lowers me in his estimation if I have the cistern full of freshly-pumped water, the wash basin empty and clean, a fresh towel on the hook and each meal on time. It has always been my special delight to try to keep the dining room cool in hot weather, the table neat and laid with care, and a bowl of fresh flowers on the dinner table if possible. If any of these things fail to be done does he speak of it? No, but what I do try to do he appreciates. Just as I appreciate his always taking the water pail from my hand if he sees me, helping with the washing or any other hard work that must be done. I think we should study duty less in our homes and study love more. I do not like the word duty in connection with home life. I do think that a great deal depends upon the early home training of the boy and girl, fitting them to be selfish or unselfish in their love and homemaking. I surely do not think it degrading to a girl or woman to help outdoors, but how can a wife find the time, even though well and strong to do more outdoors than to raise chickens and help with the garden if she keeps her home properly, gives some time to the care of the mental and spiritual as well as physical growth of her children, and, oh, the importance of the time that belongs to the children; does the sewing that must be done, and all the numberless things that fall to a woman's lot to do? A good wife will plan to spend the money economically and well, and we figure that to be a great help. I say "we," for there is no divided money in our home. We plan together to spend what there is to the best advantage. In the fifteen years of our married life this has been our habit. If the pocket-book became empty, as it sometimes has, we both understood and love lightened the way. If it began to bulge with its contents, how we enjoyed together the new piece of furniture or any articles that came to beautify the home, or from time to time the piece of machinery and outside improvements! In conclusion I would say that if daughters have time and strength to help their fathers and brothers, who will not honor them for so doing?

The end of this month should properly see the discussion of this matter brought to a close, but I have such a number of good letters—really fine letters—on hand, that I fear other subjects will have to wait a little longer. Will friends who are anxious for a change kindly

Jesus Anointed in Bethany.

Jesus had worked His greatest miracle under the very eaves of the ecclesiastical establishment. It was accepted as a challenge, and steps were immediately taken to compass His death. His hour not yet having come, the Master retired to Ephraim, twenty miles away, near to the wilderness or sparsely populated country. There, in company with His disciples, He passed the time in physical and spiritual recuperation. A price was practically set upon His head, for the chief priests and Pharisees had given notice that if any one knew where He was he should give information in order that the arrest might be made. With mingled motives of curiosity, admiration, and opposition the people who had come to Jerusalem in large numbers to attend the Passover, made quest for Jesus. For the time He eclipsed both temple and ceremony. As the days passed they began to say to each other in their disappointment, "Is it possible He is not coming to the feast at all?" But when the time was fully come, the Master resolutely set His face toward that slaughter-house of the prophets—Jerusalem. He was fully cognizant of all the peril of going to the city at this juncture.

It was in this instance that one significant incident like a shaft of light fell across the inky blackness in which His life closed. It was that high and loving courtesy shown Him in the home in Bethany. They banqueted Jesus. They made a supper in His honor, and in grateful recognition of His merciful deeds.

In the noblest villa of the suburb of Jerusalem, the table with its damask coverings was set in hollow square, as the custom was. It was surrounded by richly upholstered couches. Shaded lamps cast their full radiance upon the goodly scene. Eye, nostril, ear and palate were delighted. Color, fragrance, music and viands matched these several organs of sense. According to Oriental custom villagers hung like an animated fringe around the table, sharing with the invited guests sight of the cheer and gladness. On either side of Jesus reclined the trophies of His power—Simon whom He had healed of leprosy, and Lazarus

have patience? The volume of correspondence provoked by Aunt Ruth is eloquent testimony to the wide-spread interest being taken in the consideration of the propriety of women working in the fields.

whom He had revived from death. Noble and beautiful women graced and adorned the scene and hour.

One significant and timely deed lifted this feast to the level of a sacrament. Out of her boudoir Mary brought the most precious thing it contained—an Oriental cruse of alabaster, filled with genuine liquid perfume, very precious, the seal of which had never been broken. Her unspeakable gratitude would fain express itself in a deed of reverence and love. Unstintedly she poured the costly liquid upon Jesus' head and feet, using her luxuriant tresses for a towel. In a moment every recess of the house was filled with the subtle and delicious fragrance.

But as may be expected in every human gathering, which of necessity must contain some whose ethical evolution is retarded or stunted, an apple of discord was thrown into his feast of love. It came from the very hand that was flinging from the common purse of the apostles. Judas stole the livery of charity in which to serve his own cupidity. He affected benevolence that he might cover his own grasping spirit. Some of the apostles were evidently infected with his grasping spirit, and at least joined mildly in the specious protest.

Right royally did Jesus come to defense of Mary and her deed. He interpreted her action and put the seal of His Divine approval upon it. If she gave Him momentary and passing embalming, He embalmed her forever in the ineffable incense of His praise: "She hath wrought a good work. She hath done what she could. Whosoever this gospel shall be preached there shall also this that this woman hath done be told for a memorial of her." A practical principle of life is irradiated in connection with this incident. Jesus affirms that deeds which can be done any time must give place to those which can only be done just now. "The poor are always with you; not so I."

The banquet intended for His honor really set the seal of Jesus' doom and hastened it. The banquet couch proved a pedestal to lift Him not only in sight of the admiring people, but also of His implacable enemies. The end of it was that not only "much people knew that He was there and came," but immedi-

ately also "the chief priests consulted."

The Teacher's Lantern.

A lesson in sacred aesthetics is here. Money spent to adorn and beautify religion is never to be begrudged. A cathedral, for example, is a monument to the divine. It teaches and inspires. So wealth expended in awakening the sentiment of worship is never lost. It is always justifiable. Proportionate expenditures upon the artistic and tasteful are to be commended. They are definite contributions to ethical and spiritual evolution.

Much has been said of the "loneliness" of Jesus. But it must also be remembered that He was also much in society. The references are numerous enough to affirm a habit. He adorned and beautified many a supper and wedding. His social side was not atrophied.

Judas, by reason of the enormity of his crime, is almost excluded in the average thought from the role of human beings. But it admits of question whether there are not men now living who under similar circumstances would not do exactly as Judas did. He was a man, not a devil from the nether world.

Martha did not sulk. Jesus had on a previous visit criticised her for being troubled with much serving. She did not on that account fly moodily to the other extreme and refuse to serve at all. It is very significant then (although it might be overlooked), when the record says, "Martha served." Taking criticism is a fine art as well as giving it.

Judas' proposition cannot be disputed. It was a great sum—\$100 in perfumery!

The wages of a laborer for a whole year! But no higher use of that money could have been made than was made of it. It was a sacramental act. It was an expression of gratitude and reverence. While it did not preclude deeds of charity the latter could not be any substitute for it.

That home at Bethany was ideal. The meshes of the domestic net were soft as silk, but firm as steel. No wonder Jesus loved to be there.

An adult Bible-class is said to have spent the entire hour in discussing the shape of the alabaster box. It is to be feared that many are busy over husks and shells, pure technique—geography, archaeology, and the like, but never reach the subtle fragrance of the ethical and spiritual meaning.

Analysis and Key.

1. Jesus in His retreat. Awaits His hour at Ephraim. Recuperation, physical and spiritual.
2. Popular quest of Jesus. Eclipses temple and ceremony. For the time. Query, "Will He come?"
3. His hour come. Jesus goes. Cognizant of peril.
4. Jesus banqueting. High and loving courtesy. Recognition of merciful deeds.
5. Mary's anointing. Raises feast to sacrament.
6. Apple of discord. Thrown by hand that filched the common purse. Judas in livery of charity serves his own cupidity.
7. Jesus' defense of Mary. Interprets His action. Seals it with approval.
8. Banquet couch a pedestal. Raises Him to view of His enemies. Seals His doom.

Dressmaking and Millinery—No. 540.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

Now that the vogue of plaid is established and the majority of us are coming to like it, even though at first we were very certain we would never have it among our belongings, it is well to keep an eye out for some of the designs that are especially adapted to its making up. The Norfolk jacket and the pleated skirt appear to find great favor when plaid materials are being used for a costume, and the one shown herewith appeals to the fancy, if such design is desired. The Norfolk jacket is one of the easiest models for the amateur dressmaker, as it is not necessary that an extremely close fit be effected. Rather the jacket is intended to be half-fitting. No. 5474 pictures one of the new designs in this mode, and in this it is shown made up as a suit garment in plaid. The cuffs, collar and belt are of velvet, but may be of the material or of plain cloth in the prevailing tone of the plaid. It is well to note in this connection that velvet touches are the very height of style at the present, and they seem, in a special way, just what is needed on plaid. The strappings on the seams from the shoulder to the bottom of the jacket are of the plaid, and these may be piped with the velvet with good effect, although not so shown in the illustration. The buttons are of dull gold (effect), but velvet covered buttons to match the trimming may be used instead. Buttons, you know, are the feature of the season, and should not be dispensed with. No. 5474 is cut in sizes for a 32, 34, 36, 38 and 40-inch bust measure. Give size when ordering.

The skirt shown with the jacket is No. 5474, and is a nine-gored model, having a box pleat on each seam. It is scarcely necessary to repeat that the pleated skirts are still in highest favor, and that they are a wise choice for plaid fabrics. The skirt is very simple, but may be made a

little more elaborate by using strappings of the plain material on the jacket, these running down from the waist line half or

[5474—Norfolk Jacket.]
[4974—Nine Gored Walking Skirt.]

two-thirds the length of the skirt. Bands of velvet or of braid may trim the skirt around the bottom. Any suiting liked may

[5480—Girl's Russian Blouse Suit, 6 to 12 years.]

be used for this costume. Pattern No. 4974 is cut in sizes for a 22, 24, 26, 28 and 30-inch waist measure. Give size when ordering pattern.

The Russian blouse suit is one of the fa-

PILES cured. Most cases get well after one application of medicine without pain one hour, then go about your work. No matter how bad or long standing your case, you should go at once and take this treatment. No knife or scissors used. Pay when cured. Examination free. Dr. J. C. McLoughlin, 351 Junction Bldg., Kansas City Mo.

ROYAL PITLESS WAGON SCALE
SOLD on 30 days free trial. For catalog and discounts, address, Monarch Grubber Co., Lone Tree, Ia.

The company's largest and latest purchase, the St. Louis Exposition, added much to their stock. It brought them something like 100,000,000 feet of lumber alone, besides, train loads of other building and furnishing material. Aside from the fairs, this company "wrecks" nearly all the government and public buildings that are to be dismantled. Not only this, but they have a force of most inveterate and successful bargain hunters in the world, constantly making purchases on an immense scale at sheriffs',

receivers, and other forced sales. This adds much to their stock in the way of variety. But all this vast supply of materials does not remain long at headquarters. Thousands of car loads of goods secured at St. Louis have already gone out. Farmers have been liberal and satisfied purchasers, and now some of the fair lumber is housing mills, factories, churches, stores and farm buildings throughout the country. Some of the larger sales of their material have gone to build bridges, a steamship pier in New York, car shops at Harvey, Ill., and other structures in large numbers. A visit to Chicago would be incomplete without a look in and about the great plant and workshops of the noted Chicago House Wrecking Company. Their business system is marvelous in its capacity to strike out and include the world in its daring ventures. Yet infinite care and thought are devoted to the minutest detail of business that no by-product shall be wasted, no source of gain overlooked or not even the smallest customer dissatisfied. Their method of doing business is well illustrated in the complete and extensive catalog which they send free of cost to those interested. Please mention this paper.

shelters thousands and thousands of articles, from the smallest pieces of elegant furniture and decorative material to dynamos and engines of every conceivable pattern. One may see in this great storage room miles of sewer and water pipes, acres of lumber, doors and windows, and in the ware rooms tons of all kinds of iron supplies and fixings. The noted Ferris wheel which did duty at Chicago and St. Louis now lies in a heap, cogs, shafts, beams and wheels.

Ask for The Shoes With a Buffalo Calf They Will Stand All the Hard Knocks You Can Give Them

"BUFFALO CALF" Shoes are made from the skins of young cattle. They are very tough and close fibre and our Dongola process of tanning sets this fiber together and adds to the wearing qualities of the leather. After tanning, this leather is softened by hand working and "boarding," just as the Indians soften buckskin. That is why "Buffalo Calf" Shoes are always soft and do not harden after wetting. Leather softened by artificial greasing retains a lot of tan juice, and this not only irritates your feet, but when the grease is worked out, the leather hardens. Soles of "Buffalo Calf" shoes are made from Hemlock tanned Texas steer hides, and all counters, insoles and slippers are solid leather. Another thing—If you were to tear off a toe cap of a "Buffalo Calf" shoe you would find the vamp toe continuous—clear over to the sole. We make them this way so that if you wear off a toe cap, the vamp toe will still be good. Ask your dealer for "The Shoe with the Buffalo Calf." Every pair of "Buffalo Calf" shoes has tied to one of the straps a little piece of our special vamp and upper leather, cut in the shape of a Buffalo Calf. If you can tear this leather with your fingers we will send you a new pair of shoes FREE. This will prove to you how tough and durable these shoes are.

If your dealer does not carry "Buffalo Calf" shoes, write to us and get one of the little buffalo calves to test.

"Buffalo Calf" shoes are made in all sizes—men's, boys' and youth's—and they don't cost any more than common shoes.

Bentley & Olmsted Company, "The Western People" Des Moines, Iowa.

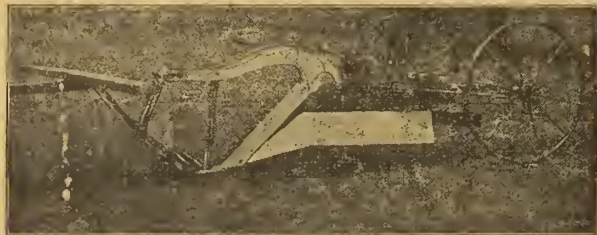

LIVE STOCK SALES

O. A. Wright Sale of Durocs.

Mr. C. A. Wright, of Rosendale, Mo., "the stock feeder man," held his sale of Durocs on Thursday, October 18th. In connection with the sale Mr. Wright had arranged a seed corn contest, paying \$15 in cash for the best dozen ears of corn, the premium to be divided into five moneys. A fine display was made and the farmers took much interest in examining the various samples and comparing notes on the best varieties to be planted in their locality. The judging of corn was finished before dinner and immediately after Mr. W. P. Morrison, of College Springs, Iowa explained why he gave the premiums to the various samples of corn. The crowd had by this time become seated in the commodious tent and the hog sale was commenced. Only a limited number of breeders responded to Mr. Wright's invitation to attend his sale, and to these few breeders much credit is due for their promptness in bidding on the better things. The farmers who had come in goodly numbers bought freely and secured many fine specimens of the breed at far cheaper prices than they could be bought at private treaty. Mr. Wright had advertised to sell eighty head to the highest bidders and with so large an offering many had waited until over half had been sold before they were willing to raise their hands and pay what the hogs should have brought. As the sale drew toward a close prices ruled stronger, and at the close, hogs brought 25 to 50 per cent more than at the opening of the sale. Seventy-six head were sold at an average of \$22.83. The top price was \$51, paid by Mr. G. B. McMurray, of Maryville, Mo., for a March gilt. Mr. Claud Bowman, of Savannah, Mo., bought thirteen head of gilts and will start a good herd. Mr. John Hoiste, of Massena, Iowa; W. A. Rankin, of Carson, Iowa, and T. G. Nash, of Pickering, Mo., were the breeders from a distance who bid on and took the better things. Following is a list of all sales of 25 and over:

Lot.	Price.
2 Boar, W. L. Wright, Rosendale, Mo.	\$25
13 Sow, Claud Bowman, Savannah, Mo.	27

A NEW TILING MACHINE.

Land tiling is fast becoming universal on the farm. As yet it is very slow and expensive. The farmer should therefore heartily welcome the appearance of a new ditching machine now on the market. This is known as the "Cyclone" and is made by the Jeschke Manufacturing Company, of Bellevue, Ohio. Its simple and practical construction should at once appeal to everyone, either the farmer or the contractor. The statement that it will cut from 400 to 500 rods per day should be a guarantee of its efficiency. There is plenty of time yet this fall to use the machine, so write for prices immediately and mention this paper, if you please. Address the Jeschke Manufacturing Company, Bellevue, Ohio. See page 6.

R. G. Robb & Son Sale.

As per previous announcement in The Homestead, October 18th was the day set for the R. G. Robb & Son dispersion sale of Short-horn cattle. The day was an ideal one, so far as weather conditions were concerned, and the announcement of this important dispersion sale brought forth a goodly number of buyers from various sections of Iowa, Missouri and Illinois. As a whole, the sale must be classed a success. However, some excellent bargains were in store on many of the best cattle. Unfortunately, the plum of the sale, Lot 1 of the catalog, Imp. Craikstone Beauty 6th, had died of blood poisoning a few days prior to the sale, and one of the best bred cows in the entire offering, Pleasant View Victoria, fifteen years old, sold at the beef price of \$60. She was bred February 21st and did not show plainly to be in calf. The beautiful Lavender cow, Lavender Blossom of Beaver Creek, had lost her last calf and was but recently bred. This cow, by all odds, was entitled to top the sale, but for this unfortunate condition, which brought her selling price down to \$155. These explanations are made to show why

Augustina of Honey Creek, one year, sire Graceful Archer, G. W. Brown, Indianola, Iowa	120
Augustina 5th, two years, sire Lord Darnley, G. A. Bonnewell	200

IOWA FARMS. Send for our new illustrated list of improved Iowa farms. Is the finest list we have ever issued and gives full descriptions with good pictures of improvements, with map. Northern Iowa Land Co., Independence, Ia.

IMPROVED 60 acres near town and school, 45 acres cultivated; plenty water, \$55. Easy terms. Other bargains, all sizes. Armitage & Moffitt, Afton, Ia.

LOOK! 480 acres, excellent farm; all improvements 300 cultivated; just right for diversified farming. Cheap. National Agency, Fergus Falls, Minn.

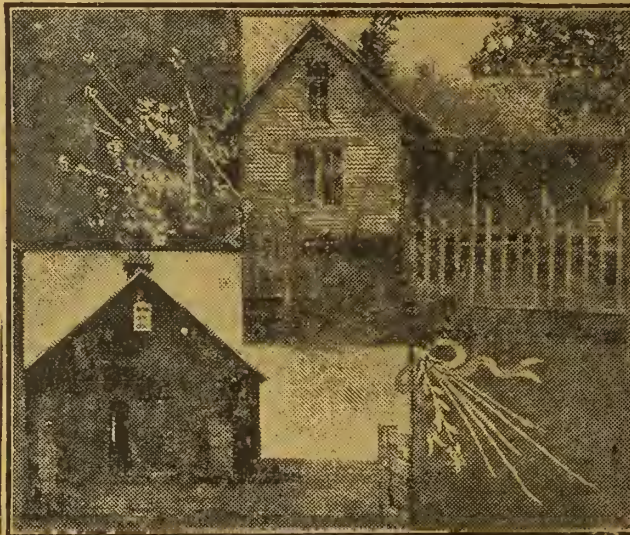

When writing to advertisers please mention this paper.

the average of the Robb cattle was not better than shows in newspaper reports. With these conditions eliminated, the average would doubtless have been considerably above the subjoined report. Neither of the herd hulls were appreciated to their fullest extent, both selling far below their real worth. Colonels Bellows and Jones did excellent work, selling in turn. The Robb cattle made an average of \$131. Messrs. Carrithers and J. J. Robb had contributed some fifteen head to this sale of cheaper cattle which materially reduced the general average.

FEMALES.

Graceful Beauty, one year, sire Graceful Archer, M. Wilsey, Center Point, Iowa	\$125

Imp. Augustina 3d, seven years, sire Royal Pride, G. A. Bonnewell, Grinnell, Iowa	340

A Missouri Farm Bargain.

300 Acres in Mercer County, Missouri

THIS FARM is located only four miles from a good railroad town and about ten miles from the county seat. It is well improved with a good house, barn 30x50 and other buildings; a fine well and windmill. There is also a good bearing orchard and the place is well fenced and cross fenced.

The land is rolling enough for good drainage and the soil is rich and productive. It is the very best corn land, producing from fifty to seventy-five bushels to the acre. Two hundred acres are in cultivation, the balance in good tame meadow and blue grass pasture. There is some timber sufficient for fuel and posts.

Mercer county is one of the best farming counties in Missouri and this farm is in the best part of the county. The owner will sell right on favorable terms, or might consider a smaller farm, live stock and other property in part payment.

Send for our new illustrated catalog of improved farms. It is the most attractive list we have ever issued and offers many unusual bargains. The descriptions are complete and the illustrations are from actual photographs of improvements on the farms described. It is printed in handy folder form on good paper and contains a large map of Iowa.

We have a few good farms to exchange for city property, merchandise, etc.

NORTHERN IOWA LAND COMPANY, INDEPENDENCE, . . . IOWA.

FOR LAND SEEKERS.

The Denning Canadian Land Co.

We have a rate of \$10.50 to our Lands and return every Tuesday of this month. In the famous district at the option of the purchaser we guarantee your investment. At the end of five years we will refund all principal and interest you have paid and take back the land and allow you 5 per cent on the same. We will also sell you a farm on the crop payment plan. THE ONLY COMPANY IN THE WORLD THAT GUARANTEES YOUR INVESTMENT.

Room 50 Kimball Bldg.

Cedar Rapids, Iowa.

FANCY FARM

ABOUT 100 MILES SOUTH OF KANSAS CITY.

Is 640-acre improved corn, grass and stock farm I will sell for less than half its worth. It is good. One mile from station. Fine water. It was taken by a city man under a mortgage. He got it for less than one-third its worth. Don't know how to run it or what to do with it. Will you look it up? Well improved, complete farm. Only \$35 an acre. 2,540 acres at \$35 an acre.

J. H. LIPSCOMB, 336 Fidelity Trust Bldg., Kansas City, Mo.

480 ACRES

FINE, LEVEL LAND IN SAC COUNTY, IOWA,

near market, close to first-class graded school; ten minutes walk to two fine churches, Presbyterian and Methodist. Excellent neighborhood. Improvements: A well built, neatly finished, conveniently arranged, nine-room house with good stone basement; barn 48x48 in good condition; hog house 20x40; granary 30x40; corn crib 30x40; tool house 16x24; coal house, cattle sheds, and other buildings, etc. Inexhaustible supply of good well water with wind mill and tanks attached; two hog pastures of 12 and 35 acres, fenced tight; 2,000 tile put in recently; entire acreage well drained. Rented for the year 1907 at two-fifths crop. Possession may be had by paying tenant for full plowing and a bonus of \$200. For sale at a bargain. Write

MISSOURI LAND

IS BETTER at present prices than a gold mine. Come and we will take pleasure in showing you. 509 acres
well improved, all kinds of fruit and the best of water, and the low price of \$40 per acre buys it. 220
acres three-fourths of mile to Kirksville. As good prairie land as you will find in Missouri. Fair improve-
ments. This is an ideal lying farm and \$65 per acre buys it. 80 acres, 2 miles from Kirksville, nice im-
provement, a lovely small home at the slaughter price of \$40 per acre. 82 acres, one-fourth mile to Kirks-
ville, good improvements and as near an ideal home in every respect as can be found, and we are only ask-
ing \$90 per acre for it. 132 acres one-half mile to Kirksville, good improvements, all kinds of fruit, no bet-
ter land in the state, every foot can be farmed with any kind of machinery. This looks good to anybody,
but it is better than it looks and we are putting the low price of \$80 on this ideal home. 180 acres, 90 rods to
Kirksville, good building, good fence, all kinds of fruit, the best of water and worlds of it, clats in house,
in fact everything is right. No better or finer lying land in the state. \$70 per acre will buy this home.

ISAAC A. NOVINGER & SONS, KIRKSVILLE, ADAIR COUNTY, MO.

P. S. WE are not real estate dealers, we own the land herein described and furthermore our home is not
for sale. We simply have more than we can handle.

BUY YOUR LAND IN THE BIG BEND COUNTRY

OF EASTERN WASHINGTON, where you get not only the best of lands
at low prices, but also get located in the finest climate, where crop
failures are unknown: no bugs, flies or rust; freedom from electrical
and destructive wind and hail storms; where fruits of all kinds do
well. This is no experiment, as the country has been thoroughly
tested. Special inducements to parties buying this fall. Railroad fare
refunded to purchasers. Write for pamphlet to

Terms \$2.50 per acre. Address, J. F.
Lynch, New Hampton, Iowa.

AN HONEST BARGAIN.

555 ACRES, fine Grain and Stock Farm, 1
mile from station on main line R. R., 30
mils. from K.C. Over 600 A. fine upland, strong
black loam; all under cultivation and blue
grass; 60 A. river bottom Splendid 7 room
house and new \$2500 barn 65x90. Well fenced
and cross fenced. Here is a farm that anyone
can make money on. Price \$55 an acre.

Allen Investment Co.,
Cor. 9th and Wyandotte Sts. Kansas City, Mo.

LEAVENWORTH CO., KAN.

248 ACRES. Very fine land; $\frac{1}{2}$ miles from
station, 25 miles from K.C. 100 A. of this
the richest kind of level creek bottom land.
No better land in the world. Good house and
extra good barn, etc. Price \$75. It is worth \$100.

ALLEN INVESTMENT CO.
Cor. 9th and Wyandotte Sts. Kansas City, Mo.

UNIMPROVED FARM LANDS

In Osceola County, Michigan.

THIS group of lands was covered at one time with
hardwood timber, some hemlock, but no pine.
Soil is heavy and rich, clay or gravelly loam, well
watered. Crops: Good hay and grain lands; ideal
for potatoes; all fruits do well. These lands are
guaranteed to be as fine as any in the state, but are
still wild and covered with some timber and must
be cleared. Markets are plentiful and close and
on good railroads. Good schools, churches, roads
and telephone lines already built. Terms: Lands
sold for cash or one-quarter down, balance in five
annual payments, interest 6%. Price, \$12 to \$15
per acre. Write for booklet.

H. W. MARSH, MANISTEE, MICH.

WHY BUY LAND AT FANCY PRICES

IN the Canadian Northwest, thousands of miles
from markets, when you can buy good quality
land in the Clover and Tame Grass Belt of
Minnesota, near two railroads and less than
100 miles from the Twin Cities or 70 miles from
Duluth, at \$8 to \$10 per acre, easy terms? Whole-
sale tracts at dealers' prices. Agents wanted.
For particulars apply to the owners.

THEO. F. KOCH LAND CO.,
801 Globe Building, ST. PAUL, MINN.

OUR NEW STATE.

GREATER Oklahoma (Oklahoma and Indian Ter-
ritory combined) is a country for the investor.
Best farming lands on earth. The New State
Tribune, the biggest paper in the New State, tells
you, How, When, and Where to buy these lands.
"Big Pasture" will be opened by President's procla-
mation right away. Subscription one dollar year.
Seth K. Gordon, Dept. B.

New State Tribune, Muskogee, I. T.

Wheat, Dairy

CORN and STOCK RAISING LAND. Unim-
proved half section in Hettinger Co., North Dakota;
best of soil and water; land can all be plowed and is
in the best farming district west of the river. If taken
at once I will accept the low price of \$11 per acre on
reasonable terms, no commissions to be paid. No
trades. Write or call upon the owner.
E. M. KIERON, 311 Nicollet Ave, Minneapolis, Minn.

LAND SNAPS YOU can't find better land in
Kansas than we offer in Gove
County at from \$5 to \$16 per acre.
IN GOVE CO., Biggest crops in the state in
KANSAS. Gove county this year. Bargains
down. Easy terms. If you see this land you'll buy
it. Next expiration November 6th. For more
information write

W. F. SHELTON LAND AGENCY,
215 Sheidley Bldg., Kansas City, Mo.

NOTHING LIKE THIS.
2 800 ACRES; Eastern Kansas; 500 cultivation;
all but 200 good farm land; all black lime-
stone soil; good buildings; running water and wells;
price \$32.50 per acre. For further information and
plot write:
Willis & Co., Sale Agts., Emporia, Kan.

RANCH IN FLOWING WELL BELT.

720 ACRES of farm meadow and pasture land.
Will cut 180 tons of hay. 400 acres in pasture.
Three flowing wells. Write for terms.
H. S. WHITE, Amelia, Neb.

FIELD NOTES.

Messrs. Watson Bros., of Creston, Iowa, have a number of good Duroc Jersey boars for sale.

Mr. John Weighton, of Audubon, Iowa, is offering a few good Duroc Jersey boars for sale.

A good bunch of Duroc Jersey boars are offered for sale by Mr. T. A. McMahon, of Craig, Neb.

Thirty-five Duroc boars are offered for sale at moderate prices by Mr. E. A. Shafer, of Sanborn, Iowa.

Mr. S. I. Welch, of Cherokee, Iowa, offers Duroc Jersey boars and sows for sale at very reasonable prices.

Duroc Jersey boars and Short-horn bulls are offered for sale by Mr. James T. Dollison, of Sac City, Iowa.

Mr. J. Nissen, of Meservey, Iowa, names November 23d as a date for a public sale of Aberdeen Angus cattle.

Mr. H. A. Sexsmith, of Greenfield, Iowa, has some good Ohio Chief and W. L. A.'s Choice Goods boars for sale.

Mr. Delmar McCann, of Kennard, Neb., is making special prices on Duroc Jersey boars for the next thirty days.

Ten good boars by the noted Duroc Jersey boar, Dandelion, are offered for sale by Mr. W. A. Peterson, of Lyons, Neb.

Some very choice yearling and spring Duroc Jersey boars are offered for sale by Mr. Harmon Gruver, of Brewster, Minn.

Mr. Arch Brown, of Waterloo, Neb., has named the date of February 10th as a date on which to hold a public sale of Duroc Jersey brood sows.

The first annual sale of Short-horn cattle by the Wayne County Short-horn Breeders' Association is announced to take place at Corydon, Iowa, on November 30th.

Some good Orion boars and several by a son of the sweepstakes boar, Gold Dust Jim, are offered for sale by Messrs. A. B. Easter & Son, of Fremont, Neb.

Some very top Duroc Jersey boars, sired by Glendale Jim, the second-prize boar at Des Moines in 1905, are offered for sale by Mr. J. S. Golder, of Scribner, Neb.

Mr. Arch Brown, of Waterloo, Neb., reports that his recent sale of Duroc Jersey swine was very satisfactory. Thirty head sold at an average of \$31 and the top price was \$51.

Mr. R. C. Poston, of Corydon, Iowa, is offering seventy-five good spring Duroc Jersey pigs for sale, sired by the great boar, Junior Jim, Arlon, Walter G., and others. Read his advertisement and write him at once.

Mr. A. H. Brett, of Mason City, Iowa, has postponed his sale, which was to have taken place November 9th. He will hold a sale some time in December or January, the date for which has not yet been named.

Mr. J. F. Lentz, of Earlham, Iowa, has sold his farm and must give possession. He is therefore closing out his entire crop of Duroc Jersey boars at greatly reduced prices. If you want a good pig at a reasonable price, write him at once.

Mr. E. H. Dancer, of Lamoni, Iowa, having sold his farm, is now offering for sale 100 choice English Berkshire pigs and matured hogs of both sexes. He will make prices very low if taken soon. Write him your wants, as he is sure he can please.

Three sales of high-class Duroc Jersey swine are announced to take place, in our date columns, as follows: 'Mr. Ira Jackson, Tippecanoe City, Ohio, February 13th; Mr. White Hall, Yellow Springs, Ohio, February 14th, and Messrs. Watt & Foust, Cedarville and Xenia, Ohio, February 15th.

Two hundred Duroc Jerseys, both spring boars and gilts, are now being offered for sale by Mr. W. J. Wendt, of Marcus, Iowa, and we can recommend them to any of our readers. His breeding is all right, his pigs are good and his descriptions can be depended upon, and last, but not least, his prices are extremely reasonable.

One of the best Duroc Jersey breeders in our sister state on the north is Mr. William Malcolm, of Bigelow, Minn. He won first and sweepstakes on his boar this year; besides, a great many of the other best prizes, and he also won the lion's share of the prizes in 1905. He has a good bunch of boars for sale, some by his sweepstakes boar and some by a son of Crimson Wonder I Am.

Messrs. A. B. Easter & Sons, of Fremont, Neb., report the sale of the two Duroc Jersey boars that they have been advertising, one going to Mr. R. B. Snider, of Fremont, the other to Mr. L. T. Williams, of the Woodlawn Farm Company, of Sterling, Ill. They now announce for sale in their advertisement on page 38 twenty good spring boars sired by Gold Dust Prince 106646, by Gold Dust Jim 15169, and The Auditor 34097 by Orion 5293. They also have for sale one yearling boar got by Russell's Surprise 12539 and out of a Gold Dust Jim sow. They state that they will make right prices on these boars, as they must sell them.

Mr. U. G. Davidson, of Manson, Iowa, in a recent letter writes as follows: 'I have a good Duroc Jersey boar much like the one I sold to Mr. H. S. Allen last fall, and the one that won first and sweepstakes at Des Moines. I also have one exactly like the one I sold Mr. August Voge, and the one that won third at Des Moines. He is one of those good prospects out of American Belle's litter. I also have two or three boars in the herd that are the exact counterpart of the pig I sold Mr. F. E. Garrett, and these are good enough to go anywhere. I have more good prospects this year than I had last, and if these are placed in good herds where they will be properly cared for I am sure that some of them will be winners again next year. These Crimson Wonder I Am boars beat the world when it comes to show-yard quality, and they have the finish that will always keep them in the front of the procession. Another good thing about them is that they breed on and on. Just say to your read-

I Will Send My DEAFNESS BOOK FREE

To anyone who is deaf or whose hearing is failing at all. It shall not cost you a penny and it's full of the very help and medical advice that every deaf person needs. My book tells just what causes Deafness and shows the way to clear and perfect hearing. It explains what brings on the ringing, buzzing noises in the head and ears, and how to be free from them. It shows how the ear gets closed up and points out how Deafness can be cured, easily and painlessly, right in your own home. Fine pictures of the different parts of the ear illustrate almost every page.

If you want to get rid of your Deafness, let me give you this book, that will tell you what to do. Ask for it today and I will send it at once. Write your name and address plainly on the dotted lines, and mail the Free Book Coupon to Deafness Specialist Sproule, 473 Trade Bldg., Boston.

ers that they should order at once if they want to get the best."

Messrs. H. S. Duncan & Sons, of Clearfield, Iowa, will hold a public sale of Short-horn cattle on December 7th.

Mr. Gus A. Pederson, of Ocheyedan, Iowa, offers the best bunch of Duroc Jersey boars he ever raised at prices that anyone can afford to buy. They are sired by Osceola Chief, a Van Patton bred boar and by Prond Perfection by the great sire, Perfection Chief. Mr. Pederson has closely culled this year's bunch of boars and is now only offering the best. It will pay any of our readers to write him if they want a boar.

Mr. W. J. Prather, of Russell, Iowa, breeder of Duroc Jersey swine, in sending in change for his advertisement which will be found on page 38 of this issue, says: "My pigs are doing well and I think I have some that will please any man. I can breed the gilts I am offering for sale to Top Notcher Again, or Red Advance by Advancer, the first-prize aged boar at Des Moines this year, or to a son of Proud Advance.

The sale of Short-horn cattle at Humboldt, Iowa, on October 16th, made by Mr. B. G. Stark, brought out a fair crowd, and an average of \$70 was made on everything. This included young heifers and bulls. This Duchess was purchased by Mr. J. A. Behrens, of Ft. Dodge, Iowa, at \$102.50, and Lady Amelia, a daughter of Imp. Blackwatch, went to Mr. F. B. Glidden, of Britt, Iowa, at \$100. There were some good bargains in the sale, and the cattle were in good, thrifty condition.

Messrs. Henry Bros., of Lemars, Iowa, breeders of Poland China swine, still have for sale a few good fall and spring boars sired by the double sweepstakes boar, Matchless Junior, and seventy-six fall and spring gilts sired by Matchless Perfection, Matchless Jr., E's Chief Tecumseh 2d, and Correct I. Know, that will be bred to above bogs, and On Parade, a son of On and On out of E. L. Slick; Perfection E. L. and Meddler Boy, a son of Meddler, out of a Keep On sow. Their advertisement appears on page 38 of this issue.

Mr. John O'Kane, of Bancroft, Neb., showed his splendid sixteen-months-old bull, American Flag, at the American Royal and got fifth place on him in one of the strongest classes ever seen in a western show ring, or any other show ring for that matter. He is a son of Gloster Chief, a well-bred Duchess of Gloster bull, and he is one of the best things produced in the West. Mr. O'Kane is one of Nebraska's younger breeders of Short-horns, and he is founding a good herd, and with his ability as a feeder and a caretaker we can look forward to the time when he will have some of the best of the breed.

On November 14th Messrs. J. & I. D. Godden will make a sale of fifty head of Short-horn cattle at Bradgate, Iowa. There will be forty head of females and ten young bulls in the sale, the latter ranging from ten to eighteen months of age. About twelve or fifteen cows will have calves at foot by their Scotch bull, Prince Malcolm 201060. The latter bull is a son of Malcolm 171375, a bull well known by Short-horn breeders in the West on account of the uniformity of his get, and out of Brewster Beauty 3d by Prince Victor. A number of the young bulls in the sale will be sired by him and all the calves that sell with dam will be sired by him. Everything that goes into the sale will be well Scotch topped, some

having four and five good crosses. We will have more to say of the offering in next week's issue.

Write Mr. W. W. Vaughn, of Marion, Iowa, for prices on Short-horn bulls and Chester White boars. See advertisement on page 37.

Mr. W. K. Ferguson, of Algona, Iowa, can supply Homestead readers with Red Polled bulls. His advertisement appears on page 37 of this issue.

A dispersion sale of Short-horn cattle is announced to take place on December 13th, by Mr. T. A. Baldwin, of Emmetsburg, Iowa. The offering will consist of about fifty head.

Mr. William Barr, of Kirkman, Iowa, has fifteen good Poland China spring boars which he wishes to find purchasers for at once. His advertisement, giving prices, appears on page 27 of this issue.

Mr. Wm. Reed, of Pleasantville, Iowa, the well-known breeder of Short-horn cattle has 175 head in his herd at present and wishes to sell fifty head quick, on which he will quote farmers' prices. His advertisement appears on page 27.

Messrs. Dawson Bros., of Franksville, Wis., announce in their advertisement on page 13 of this issue that for the next month they will make a special sale of Embden, Toulouse and White China geese and Aylesbury and Pekin ducks.

Mr. F. A. Ham, of Saronville, Neb., is offering choice pigs of March and April farrow at reduced prices. He wants to get them out of his way. His herd is well represented in the blood of Improver 2d, Billy K. and Bezdek. You will not make a mistake by writing him at once.

Owing to the fact that he has sold his farm, Mr. E. H. Dancer, of Lamoni, Iowa, has twenty-five head of registered Hereford cows and heifers and two herd bulls for sale. One of these bulls is imported and will be sold at a right price if sale can be made quick. Mr. Dancer's advertisement appears on page 27.

Mr. G. Van Patten, of Sutton, Neb., has some choice spring boars left that will be priced worth the money. These boars are sired by Billy K. and they are very choice. Billy K. get sold in his sale for \$300 and \$325. His sale made an average of \$34. This was on the get of Billy K. and Beauty Wilkes. Write him for prices.

Some splendid Duroc Jersey boars are ready to be shipped by Messrs. Edmonds, Shade & Co., of Kingsley, Iowa. These are sired by the great undefeated sweepstakes boar, American Royal, and several other of the most noted boars. It will pay any of our readers to write the above firm at once if they are on the market for a boar.

Mr. F. A. Ham, of Saronville, Neb., breeder of Duroc Jersey swine, writes: "My hogs are doing well and I wish you would call special attention in the Field Notes to the spring boars I am offering for sale. There are some good pigs among them and I am offering them at a reasonable price." See Mr. Ham's advertisement on page 39.

Mr. J. D. Vorhees, of Charles City, Iowa, proprietor of the Prairie View herd of Poland China swine, announces on page 27 of this issue that he has twenty-five boars and gilts for sale. They are sired by S. D.'s Choice 106849. The gilts will be sold bred or open as desired. He also has a few yearling sows and his herd boar for sale, and satisfaction guaranteed.

Mr. W. W. Vaughn, of Marion, Iowa, writes that he is making special prices on thirty strong-boned, growthy Chester White boars of March and April farrow, also ten blocky, thick-fleshed, all red and dehorned Short-horn bulls, from twelve to twenty months old, of good milking families. Write him for particulars and prices, or go and see his herd. See advertisement on page 37.

Mr. John Schneider, breeder of Poland China swine, of Remsen, Iowa, writes: "I have twenty-five grand spring pigs and three fall boars that are big, husky fellows, with good, heavy bone, good length, black, slick coats and good heads; they stand right up on their toes and are good all round boars. The three fall boars are good enough to head any herd and will weigh close to 400 pounds in breeding condition. I am pricing them low to make room for my fall pigs."

Mr. Austin Renshaw, of Blair, Neb., writes: "I have about thirty good Duroc Jersey boars for sale sired by Junior Jim, the noted boar that got second place at Des Moines this year in the strongest class that was ever shown at that fair. I also have some good pigs by Long Alix, a litter brother to the great sweepstakes sow, Alix II., and I have a couple of boars by the noted show winner and sire of show winners, Glendale Critic. I can also sell a few sows sired by Junior Jim. Tell Homestead readers to write me at once."

Mr. Frank Pearce, of Fredericktown, Mo., in renewing his land advertisement in The Homestead which will be found on page 23 of this issue, writes: "The results from my land advertising in The Homestead are very satisfactory. The present owners of the land are offering to sell it for less than half its real value considering its productiveness and location. They do not seem to realize what they have, just as it was in Iowa twenty-five or thirty years ago. My references are the Citizens' Bank, of Anita, Iowa, where I used to live, or the

Fredericktown Trust Company Bank, of Fredericktown, Mo."

The new advertisement of Mr. W. T. Loughary, of Packwood, Iowa, offering Double Standard Polled Durham cattle for sale appears on page 27 of this issue of The Homestead. This offering will include Mr. Loughary's young herd bull, Duke of Waterloo 2333. In writing about the stock he is offering Mr. Loughary says: "These cattle are of good breeding and good individual merit, and having rented my farm, I am making a price to move them at once. I will close out the entire nine head for \$600. Here is a snap for someone."

Mr. Fred Behder, of Marshalltown, Iowa, has fifty-five head of thoroughbred Hereford cattle, not registered, which he wishes to sell as per his advertisement on page 27. The offering consists of twelve bulls and forty-three females of all ages. Mr. Behder is disposing of the herd on account of age and sickness. They are all in good flesh and are said to be a very choice lot by those who have visited the herd. Further information in regard to this herd can be obtained from the advertisement and by writing Mr. Behder, R. R. 5, Marshalltown, Iowa.

Mr. F. A. Edwards, breeder of Short-horn cattle, of Webster City, Iowa, whose advertisement will be found on page 37 of this issue, writes: "My cattle are doing extra well. I think the herd is stronger today in good cattle than ever before. We have had a dozen calves dropped the last two months, the get of Secret Viscount, which are an unusually promising lot. They certainly ought to be if there is anything breeding and individual merit combined. We have a few good young bulls on hand fit for service that we will price so that no one can afford to be without one."

Mr. J. W. Pittman, of Lohrville, Iowa, breeder of Duroc Jersey swine, who has a new advertisement on page 27 of this issue, writes as follows: "I have four yearling Orions, out of a Young John sow. One of these is an extra good one with fine back, legs, feet, very nice head, and small neat ears; is broad and carries width well back; the other three pigs, although good, are more on the rangy type, but all have good bone, feet and back. I have some pigs by Orion II., also Young John (dam out of Zovetta, dam of the \$1,275 Proud Lady); one yearling Proud Advance, dam Nan Orion, by Orion Dandelion. I have also some spring males by Young Advance, Proud Lad, I Am

This notable hog, Kerr Dick, is included in the O. I. C. offering of Mr. O. L. Kerr, of Independence, Mo., on the date of November 2d. There will be sold at that time thirty-five hogs and twenty-five open gilts, all bred from show mothers. Mr. Kerr recently swept the boards at the American Royal held in Kansas City, and a number of his winners are included in his sale. Catalogs are now ready and will be furnished upon application to Mr. O. L. Kerr, of Independence, Mo. Those interested in good Chester Whites cannot do better than keep this date in mind and if possible attend the sale. It will be worth the average man's time if he does nothing more than to inspect Mr. Kerr's breeding herd.

a Wonder and others. The females in my herd are by Orion, Proud Advance, Crimson Wonder I Am, American Royal, Young John and other good ones."

Col. T. B. Hart, the noted Short-horn breeder of Edinburg, Ill., writes: "My consignment to the Kansas City Short-horn sale, November 2d, will consist of two yearling Scotch bulls, two two-year-old heifers and one heifer calf, as follows: Barondale 244736 bred by Mr. J. F. Prather and sired by Imp. Bapton Sovereign. He is a straight Scotch of the Nonpareil family and exceptionally good in his lines, extra good in hips, twist, thighs and flank and a smoother laid shoulder and better heart girth would be difficult to find. Claret's Sovereign 345194 got by Imp. Sovereign 157330 and out of Imp. Claret 2d, is a beautiful red, smooth, low, wide and thick, with extra good head and horns. These two bulls have fine scale and with their splendid individuality and breeding should go to head good herds. The

The New Superior Fanning Mill

We Have Invented a New Device for Separating, Grading and Cleaning all Sorts of Seed and Grain.

The old Superior Fanning Mill was a pretty good Grain Separator. The Farmers told us it was way ahead of any other mill on the market, and we knew it was, but we were not entirely satisfied with it. It was the aprons interposed between the sieves in the wheat gang that bothered us. We found that they easily got worn out, and that, when they got wet they were entirely useless and also that the grain had a tendency to

stick to these aprons, causing much delay in work and, thus, and then they were expensive.

During last summer, we experimented a good deal with a new sieve, that Mr. Owens had worked out, and during the last two months we have perfected a machine and subjected it to the most severe test that any grain separator ever was put to. It is

A GRAND SUCCESS

The aprons are done away with. We obtain a better and faster separation by using a system of sieves having imperforated sections. These are so arranged, that when separating oats from wheat, if any oats get up on end and drop through one sieve with the wheat, they strike on an imperforate portion on the sieve below, and slide off from this imperforate portion onto the next perforate portion. Whenever any oats drop through a perforated section of the sieve they strike upon an imperforated section of the sieve below. By this means we get a more perfect separation and greater capacity.

We believe that the New Superior for separating, grading and cleaning all kinds of Seed and Grain, is the most perfect device that human genius can contrive. Unless some one comes along and performs a miracle, the New Superior will always stand at the head in grain cleaning machinery. Now this we are ready to demonstrate and prove to you, and that without the slightest cost on your part.

ARE YOU INTERESTED? Then write us and we will tell you how we can satisfy yourself by actual trial that the New Superior is what we claim it to be. And it will not cost you one cent so write today.

J. L. OWENS CO., 614 SUPERIOR STREET, S. E., MINNEAPOLIS, MINN.

heifers are of slow-yard conformation and type. The two-year-olds are well along in calf to Barondale, and the heifer calf is, I think, as good a show animal as I have ever bred."

Mr. F. E. Garrett, of Lohrville, Iowa, the owner of I Am a Wonder, a son of the sweepstakes Duroc Jersey boar, Crimson Wonder I Am, and a half brother to Allen's sweepstakes boar, Crimson Wonder Again, is now offering a nice bunch of boars by him. He also has two hogs sired by Tien Tsin, the sire of the great prize-winning sow, Ruberta, the first-prize sow at Des Moines this year; two sons of Arlon and one son of Proud Advance. Mr. Garrett will make a public sale of brood sows

long bodies, good color, neat head and ear, a rounding rib, good ham and large bone, and stand right on their toes. I have April boars that will weigh 170 pounds. Just say to Homestead readers that I have the best blood lines known to the breed, and I have the goods in the way the very best and practical Duroc Jersey boars. It will pay any of your readers to write me or come and see my herd."

The McNutt & Meece sale to be held on Saturday, October 27th, promises to be one of the best of the season. Both gentlemen have a class of Polands that have won ribbons at the Nebraska State Fair and they are offering the same class of hogs at Grand Island, Neb., next Saturday. King Look is one of the greatest sires of this breed and his reputation is known the world over. Our Chief is another of the choice sires doing service in the herd. His get are large, roomy fellows with finish and quality. This sale is one that should interest all lovers of good Polands. If you cannot attend the sale, send your bids to Mr. G. W. Segrist, representing The Homestead.

Messrs. William Pedrick & Son, of Ottumwa, Iowa, are offering large Poland China boars, the get of All Dude 106413, for sale on page 27 of this issue. In ordering the insertion of the advertisement they say: "The boars we are offering for sale are just in good breeding condition. Their sire, All Dude, won second at Sedalia and third at Kansas City recently and was the largest-boned Poland China at either show. He weighed 800 pounds as a yearling and competent judges say he could now carry 1,000 pounds conveniently. His pigs have the heavy bone and stretch of their sire, with his goat-like feet and straight legs." For other winnings of All Dude, see advertisement.

Mr. S. D. Miller, breeder of Galloway cattle, of Wellman, Iowa, whose advertisement appears on page 37 of this issue, writes: "All parties who are interested in Galloway cattle will do well to write me. I am offering for sale sixty cows and heifers and seven choice young bulls that are beauties. These cattle are bred right and are good individuals. The herd is headed by Zampy Boy of English River 11001, which has won first prize at Iowa State Fair; Kate's Boy of Wolf Creek 13464, and Dean of Elmland of Missouri 19458. I know I can please those looking for good stock if they will but come and inspect my herd. I will sell cattle singly or by the car load at farmers' prices."

Messrs. Stow & Gingrich, the well-known proprietors of the Clover Wave herd of Duroc Jerseys, at Hamburg, Iowa, write as follows: "We have the best lot of boars we ever raised and they are coming along in nice shape. They are sired mostly by the 700-pound yearling, Duroc Standard 44117. A few others are by Red Orion 28793 and Critic's Echo. Several of these pigs are above the average shown in their class at the Iowa State Fair, and should find a place in some good herd. The gilts average up about the same as the boars, and we think we can select twenty of them and with about the same number of yearling and aged sows we will have an extra good bunch to put in our brood sow sale which takes place on the 2d of next February."

Among the most important of the Duroc Jersey sales to be pulled off yet this fall is that of Messrs. W. A. Staples & Son, at Glidden, Iowa, on November 8th. Last winter some of the greatest sows of the breed were purchased by this well-known firm and were placed in their herd, and in their coming sale will be found the produce of many of same sows. Not only did this firm buy the very best, but they have taken excellent care of their purchases and have fed and reared the pigs this year with all the skill and pains that anyone could wish. They have not attempted to crowd the stuff nor to bring it out in fat, show shape, but they have seen that every pig got his "hog's rights" from start to finish, and today the pigs are in the pink of good serviceable breeding condition, ready to do the buyer the most good. The draft will consist of some fifty head of this spring's pigs—thirty-five or forty boars and the balance topdy gilts. Messrs. Staples are not selling culls. Everything that goes in will be O. K. As to the breeding represented we doubt if there will be a more highly-bred or variously good lot of stuff in another sale this autumn. Probably the most interesting proposition of the whole roundup is the great pair of wonderful \$605 sow, Nancy 8th, that Messrs. Staples bought, bred, at the Manley sale last spring, paying the high-

est recorded price ever paid for a Duroc Jersey sow—gilts excluded. Nancy 8th is probably too well known by all Duroc men to need or justify extended comment here, but for the benefit of the uninformed few we will say that she is a massive individual, standing right up on a grand set of pins, with remarkably strong, even back, great depth, fine sides, full hams, elegant head, good color and a high degree of finish. She was the sweepstakes sow at Sioux City last fall, defeating this year's Des Moines and Sioux City sweepstakes winner. Don't be afraid to travel a long way to attend this auction—it will pay you. Messrs. Staples are good buyers and believe in the theory of reciprocity. See the sale advertisement on page 40 of this paper and write now for illustrated catalog, mentioning The Homestead. Bids sent to Col. F. F. Luther will receive proper attention.

Messrs. S. M. Deyoe & Son, of Mason City, Iowa, have Duroc Jersey hogs and Shropshire rams for sale as noted in their advertisement on page 28 of this issue. In furnishing copy for advertisement Messrs. Deyoe & Son write as follows in regard to their stock: "We have twenty spring boars, the pick of forty head that are as good a lot as we ever raised. They are exceptionally good in color, bone and length; stand right up on their toes and not a pig was kept in the whole lot that is not an all-round good one, and what we consider will be a good advertisement for our herd wherever sent. They have always had plenty of range, and are strong, vigorous fellows, ready for business. We also have a good lot of yearling Shropshire rams and will be pleased to quote prices on boars or rams to all who will write us. We also have one Cheviot ram for sale."

The herd shown by Messrs. T. K. Tomson & Sons, of Dover, Kan., was the recipient of much praise from the commencement of the show season at Des Moines, Iowa, in August until the close of the season at the American Royal. Seven shows were made, five being state fairs, and the Interstate at St. Joe and the American Royal. In every show their winnings were numerous. The get of that grand old sire, Gallant Knight, was in evidence at every show, both in class and herd prizes, and when, as in a couple of cases, the judge turned down the get of Gallant Knight, the ring-side talent could be heard to murmur. In a future issue a complete review of the winnings made by Messrs. Tomson & Sons' herd will be given, but in the meantime any of our readers hunting a choice herd bull or a few extra good females would do well to write Messrs. Tomson & Sons and arrange to visit the herd at Dover, Kan.

On page 23 of this week's issue of The Homestead will be found the Duroc Jersey advertisement of Mr. Roy E. West, of Churdan, Iowa, who now offers a splendid bunch of boars for sale. He says: "I have concluded to sell the bunch for \$25; the first come first served. I have three boars by Adjuster, a son of old Dandelion out of a Royal Plummer sow. Adjuster was out of the great sow, Kruger Belle. These pigs are just like him. One of them measures thirty-eight inches in length, forty-one inches in heart girth and forty-three inches in flank, with six and one-fourth inch bone. On September 23th he weighed 155 pounds, and another one 165, both farrowed April 26th. He has the back, hams and spring of ribs that has characterized his old sire. There is another good boar by Adjuster and out of a Clover Croft King. He is a good one. I would like to hear from readers of The Homestead who want a good Duroc boar. I am pricing these right and I know I can satisfy buyers." Write Mr. West at once and give him a description of what you want.

In the Sotham pavilion at Kankakee, Ill., on Thursday, November 8th, one of the important Aberdeen Angus sales of the season will be held. The animals in this offering have been selected with the greatest possible care and the sale manager, Mr. M. A. Judy, expresses himself as believing that the equal of this consignment has not been offered for many years. There are plenty of Blackbirds, Prides, Ericas and Heatherblooms. An examination of the catalog will indicate that from the pedigree standpoint the offering is of the very finest, though no animal has been put in the sale on the strength of its pedigree alone, as the individuality is there in every instance. The advertisement will be found on page 33 of this issue. Catalogs are now ready and will be sent upon application to Mr.

M. A. Judy, of Beecher, Ill., and when writing please mention The Homestead.

Mr. U. H. Palmer & Co., of St. James, Minn., on account of having lost their hogs by disease are offering twenty-five steers for sale in their advertisement on page 28 of this issue. Many of these steers are considered market toppers.

Corn huskers will be interested in the advertisement of the Algert Novelty Company, of Mason City, Ill., which appears on page 27 of this issue. They are placing on the market what they term their Always Ready Tape, which does away with sore thumbs and fingers and the bother of making stalls. Write them for a roll of this tape, sending fifty cents as per announcement in their advertisement.

BUY ONE OF THE BEST.

Readers of The Homestead who want a Duroc Jersey boar should write Mr. H. S. Allen, of Russell, Iowa. He owns the Iowa sweepstakes boar of 1906, viz.: Crimson Wonder Again, and he has boars by him, and also by his other World's Fair boar, Top Notcher Again.

A GOOD HEREFORD BULL FOR SALE.

Anyone wanting a good Hereford bull should write at once to Mr. J. G. Von Seggern, of Wisner, Neb. He offers to sell Monarch of Shadeland 10th 207387, a grandson of the noted 2,800-pound bull, Anxiety Monarch, and out of a daughter of Earl Grove 4th, he by the great bull, The Grove 3d. Please mention The Homestead.

JOHNSON'S DUROC SALE.

Mr. Thomas Johnson, of Columbus, Ohio, one of the best breeders in the Duroc business, is offering fifty-five head of choicely-bred Durocs for sale on Wednesday, November 7th. The writer recently inspected this offering and is pleased to recommend it to Homestead readers in the market for good stuff. In our next issue we will give full details regarding the offering and wish to advise our readers in the market for good stock to plan to be present at Columbus, Ohio, on Wednesday, November 7th.

GOOD DUROC JERSEY BOARS.

Any of our readers who are looking for boars should write Messrs. Norrish & Bevington, of Kingsley, Iowa. These are sired by Pericles H., the second-prize boar at the Interstate Fair in 1905 and 1906; also by their great young boar, Cedar Lawn Model, second-prize boar at the Interstate Fair this year. They won second prize on get of Pericles H., second on aged herd bred by exhibitor, and third on aged herd, and they now have a crop of boar pigs that could be made good show material for another year. Go and see them, or write them just what you want.

IMPORTANT DUROC SALE.

The Whitehall Combination Sale Company, of Yellow Springs, Ohio, is one of the strongest Duroc Jersey combinations in this country. The consignors to this sale are such breeders as Messrs. S. E. Morton, and Stewart Bros., of Camden, Ohio, and C. E. Speaks, G. N. Fogg, George D. Black and E. S. Kelley, of Yellow Springs, Ohio. It is doubtful if there is an offering this year that contains the get of such noted boars as does the lot listed for this occasion. We will be pleased to furnish details regarding this good offering in our issue of November 1st. Write for catalog at once as per the advertisement on page 29 of this issue, kindly mentioning The Homestead.

ELM LAWN DUROCS.

Mr. Charles Sobotka, of Cainesville, Mo., proprietor of the Elm Lawn Durocs, has a change of advertisement on page 39 in which he offers his yearling herd boar got by Elm Lawn Orion by that grand old breeding boar, Orion. His dam, Roycroft Princess 154 was bred at the Roycroft farms at Des Moines, Iowa. Mr. Sobotka says he is not selling this boar for any fault, but because he has so much of his blood in the herd eight sell with calves at foot and all are sure breeders. Some extra good spring pigs of early farrow are also ready to ship. They are by Elm Lawn Top Notcher, Elm Lawn Orion and a few are by the yearling boar offered for sale. If wanting boars or gilts write Mr. Sobotka, mentioning this paper.

WEBB'S CHESTER WHITES.

On page 27 of this week's Homestead will be found the advertisement of Mr. W. R. Webb, of Spencer, Iowa, who owns one of the best herds of O. I. C.'s in the Northwest. A field representative of this paper had the pleasure of inspecting this herd during the summer and saw some of the best herd hogs and brood sows that it was his privilege to see anywhere on his rounds. Mr. Webb now offers some choice young boars for sale, as well as some extra good gilts, and they are now ready to ship. It is with pleasure that we recommend his herd to readers of The Homestead. He will treat you right and you will get a good pig if you send him your order. Write at once and mention The Homestead.

CROW'S BIG POLAND CHINA EVENT.
